It's just hitting here, Al, at least according to Environment Canada's radar. I looked outside and there a bit of wind, but no snow yet. I think the radar catches the high atmospheric stuff first, before we see it on the ground. Either way, it's going to be crappy for the next 24 hours or so.

My first DX of 2009 was EA6UN on 40M at 00:13 UTC. Don't know if I should count that or wait until local time (UTC + 4 hours.)

I don't have a cold, and also have no juice to cure one, so I guess I'll play radio and then watch TV until the power goes out. Then again. it might stay on! Not a lot of activity on the air tonight. Flux stuck at 69 and the GMF seems a bit upset. Oh well, that's how it goes.

Happy New Year to all the list members, and we are all praying for sunspots in 2009. As Al suggested, the Palos Verdes Sundancers need to get their act together. I believe WB6PSY is a former member, and might have some influence in getting them enthusiastic. What say, Gary? Do you still have one of those grass skirts squirrelled away somewhere?

That storm just blew through New Hampshire. We received only 8 inches [20 cm] of light, puffy snow. The wind is NW [330] at 30 KM/H. Baro = 1009 mB falling. The temperature has dropped from -8C to -30C in a little over 3 hours.

Might be tempted to give up hammin' on 1 Jan and go fishin' instead. Meanwhile, I'll hug the airconditioner. [It conditions the ambient air to ~20C.]

Subject: [DX-IS] Happy New Year

Although VO1 will usher in 2009 in just less than 4 1/2 hours and be the first part of North America to see the new year, we here in Nova Scotia are hunkering down for a major winter storm. So it is a good night to celebrate at home!

We could get up to 40 cm of snow buffeted by winds gusting between 100-110 km/h. While that sounds like a lot, it is only 18" of snow. The wind, however, could gust to 70 mph. So heavy drifting is expected. It is a good thing there's no work on New Year's Day.

So long as the power stays on, I'll be snug as a bug in a rug with plenty of juice to make the pain go away.

To all my friends on the DX-IS Reflector, and for that matter to all the lurkers from whom we never hear, a very healthy and prosperous 2009. I'm not hopeful but I will continue to say my daily prayer to the Palos Verdes Sundancers and their leader.

Very 73 & DX

Yes, I expect there won't be a lot of weather until just before dawn (isn't there a song about that?) and I suspect we'll be pretty much mired in snow tomorrow. And I concur -- the bands are terrible unless you want to work a bunch of HNY stations. No one to QSO with.

As for that grass skirt, I thought I'd heard that Gary had outgrown it and had it shipped off to Hans. Gary's being fitted for a new one.

Nelson--
See if you have a local card checker. You don't have to let those cards out of site, saves postage, insurance (although how do you afix a $ amount). The ARRL web site should list card checkers some where on the site. Usually you can just make an appointment with them and have it done.

Not that we ever have anything like that , at least on any kind of normal basis. Our winds today exceeded 60 mph with about 50 steady. We have trees down all over the place, but escaped any power outages so far- just flickers all day - so have had the computer down more than up. Gusts are still about 40 mph. We had two short "snows" if you call very small icy looking stuff falling sideways, a snow. The temp was right around freezing, and will drop to the low 20s tonight, so thankuflly nothing stuck. Heck - it was too fast to stick. This wasnt supposed to hit until tomorrow night, so be interested to see what happens then.

Meanwhile the grandkids (9 and 7) are down here watching a video they got for Christmas, then they will pull an "all nighter" (they think) here on the pull out couch.

I want to wish each and every one of you a very HAPPY NEW YEAR, and may 2009 fill your stockings with new ones.

Gonna go fishin?? :-)

I've been ice fishin only a few times in my life. Not bad. Cold doesn't bother me ... I can always dress properly for cold WX [I've been deer hunting at -30C in North [Northern]Maine and Wyoming].

The NH WX bureau just announced wind gusts to 65 KM/H. Getting breezy but the baro is started UP.

Have a great HNY!!

Dale,

There is a checker about 50 miles away but a good many of my cards were from 160 meters and I believe they have to be done at HQ. Today was also the last day to be part of the next group recognition. The LOTW submission is a lot less hassle. I'll consider using the checker when I have just a general purpose submission in the future.

73,
Nelson

Dale,

There is a checker about 50 miles away but a good many of my cards were from 160 meters and I believe they have to be done at HQ. Today was also the last day to be part of the next group recognition. The LOTW submission is a lot less hassle. I'll consider using the checker when I have just a general purpose submission in the future.

73,
Nelson

Yes, I was thinking about a buck a QSO as well. Tell you what, you do half and I'll do half and we'll head for Arizona!

My ice fishing days are over. Now I'm on a beta blocker and anything below 55 is cold for me. That's why it is 73 here in the shack and a bone-chilling (for me) 27 outside.

Yes, I expect there won't be a lot of weather until just before dawn (isn'tthere a song about that?) and I suspect we'll be pretty much mired in snowtomorrow. And I concur -- the bands are terrible unless you want to work abunch of HNY stations. No one to QSO with.As for that grass skirt, I thought I'd heard that Gary had outgrown it andhad it shipped off to Hans. Gary's being fitted for a new one.73Al, VE1AL-----Original Message-----From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf OfPaul M DunphySent: Wednesday, December 31, 2008 8:43 PMTo: DX IS!Subject: Re: [DX-IS] Happy New YearAt 07:14 PM 12/31/2008, you wrote:>Although VO1 will usher in 2009 in just less than 4 1/2 hours and be >the first part of North America to see the new year, we here in Nova >Scotia are hunkering down for a major winter storm. I'm not hopeful but I will continue to say my daily prayer to >the Palos Verdes Sundancers and their leader.>>Very 73 & DX>>Al, VE1ALIt's just hitting here, Al, at least according to Environment Canada'sradar. I looked outside and there a bit of wind, but no snow yet. I thinkthe radar catches the high atmospheric stuff first, before we see it on theground. Either way, it's going to be crappy for the next 24 hours or so.My first DX of 2009 was EA6UN on 40M at 00:13 UTC. Don't know if Ishould count that or wait until local time (UTC + 4 hours.)I don't have a cold, and also have no juice to cure one, so I guessI'll play radio and then watch TV until the power goes out. Then again. itmight stay on! Not a lot of activity on the air tonight. Flux stuck at 69and the GMF seems a bit upset. Oh well, that's how it goes.Happy New Year to all the list members, and we are all praying forsunspots in 2009. As Al suggested, the Palos Verdes Sundancers need to gettheir act together. I believe WB6PSY is a former member, and might havesome influence in getting them enthusiastic. What say, Gary? Do you stillhave one of those grass skirts squirrelled away somewhere?73, Paul VE1DX ----------Yahoo! Groups Links

Hi Qsl Submitters,

Before you spend a lot of time sorting and getting the
cards in order I would suggest a phone call to the League. Sorting and
a check sheet is important if you are using a "card checker" only as
that is what the data will be entered from if you use one. The card
checker sends the list in. If you send the cards in it becomes
irrelevant as they just go and enter the data directly from the cards.
I found this out when I took my cards to HQ a few years ago and my
list went directly to the trash and I asked why.

Yesterday I went to HQ to get my yearly submission
done and I didn't have any listing sheet at all. I handed in just the
cards and went to a local 3W restaurant. When I came back they were
done. There was an error which got corrected while I stood there. I got
new corrected printouts and left. The extra cost for doing it on a
walk-in basis is a wash verses registered mail.

They have printed, several times, how they want the cards sorted. If they dont want that, then they should say it - in print. They also say they want the lists in a certain order, for when the checker sends it in (without the cards).

0045Z 1Jan 09

That storm just blew through New Hampshire. We received only 8 inches [20 cm] of light, puffy snow. The wind is NW [330] at 30 KM/H. Baro = 1009 mB falling. The temperature has dropped from -8C to -30C in a little over 3 hours.

Might be tempted to give up hammin' on 1 Jan and go fishin' instead. Meanwhile, I'll hug the airconditioner. [It conditions the ambient air to ~20C.]

Subject: [DX-IS] Happy New Year

Although VO1 will usher in 2009 in just less than 4 1/2 hours and be the first part of North America to see the new year, we here in Nova Scotia are hunkering down for a major winter storm. So it is a good night to celebrate at home!

We could get up to 40 cm of snow buffeted by winds gusting between 100-110 km/h. While that sounds like a lot, it is only 18" of snow. The wind, however, could gust to 70 mph. So heavy drifting is expected. It is a good thing there's no work on New Year's Day.

So long as the power stays on, I'll be snug as a bug in a rug with plenty of juice to make the pain go away.

To all my friends on the DX-IS Reflector, and for that matter to all the lurkers from whom we never hear, a very healthy and prosperous 2009. I'm not hopeful but I will continue to say my daily prayer to the Palos Verdes Sundancers and their leader.

Very 73 & DX

I don't remember who said it, but I do believe hams know more about geography, and government history than the aberage bear.
After being on this list for atleast a year or so (don't righty remember), I have learned (intended) more than what I did in 12 years of school and one year of college .
Perhaps we study it more (who did I just work, what's that call), or as in some cases have been there, done it.

Well happy knew years, gotta go watch the ball drop :)
(also gotta be into work in 8 more hours)

I was last there in 68-70 eara and forget who does what to whom out there. The US now rents an old French Foreign Legion base there, and runs some actions out of there. It is also the port for Ethiopia, since they lost Masawa, the port that is now in Eritrean hands. Its a mess.

Dick spent most of his 65+ years here in the Boston, MA area. I used to believe he was a true New Englander. But then, that terrible situation entered his life ... retirement! His true colors emerged ... he moved to the country of sand, heat , sand, snakes, sand, cactus, sand ... er, ARIZONA.

Dick, this am [1000Z 1Jan 09] the temperature is '0'F [-18C ... for the down under crowd], winds are gusting to 30 mph [48 kph]and 6 inches [15 cm] of snow lies beautifully in my driveway. It seems a shame to disturb the tranquility by shoveling it for 2 hours. But, my truck has to get me to Mass [for general info ... I'm a Catholic Deacon {clergy} who has a 10:00 am EST Mass schedule].

FYI, Dick and I were co-workers for many years,

DD

Yes, I was thinking about a buck a QSO as well. Tell you what, you do half and I'll do half and we'll head for Arizona!

My ice fishing days are over. Now I'm on a beta blocker and anything below 55 is cold for me. That's why it is 73 here in the shack and a bone-chilling (for me) 27 outside.

Yes, I expect there won't be a lot of weather until just before dawn (isn't there a song about that?) and I suspect we'll be pretty much mired in snow tomorrow. And I concur -- the bands are terrible unless you want to work a bunch of HNY stations. No one to QSO with.

As for that grass skirt, I thought I'd heard that Gary had outgrown it and had it shipped off to Hans. Gary's being fitted for a new one.

It's just hitting here, Al, at least according to Environment Canada's radar. I looked outside and there a bit of wind, but no snow yet. I think the radar catches the high atmospheric stuff first, before we see it on the ground. Either way, it's going to be crappy for the next 24 hours or so.

My first DX of 2009 was EA6UN on 40M at 00:13 UTC. Don't know if I should count that or wait until local time (UTC + 4 hours.)

I don't have a cold, and also have no juice to cure one, so I guess I'll play radio and then watch TV until the power goes out. Then again. it might stay on! Not a lot of activity on the air tonight. Flux stuck at 69 and the GMF seems a bit upset. Oh well, that's how it goes.

Happy New Year to all the list members, and we are all praying for sunspots in 2009. As Al suggested, the Palos Verdes Sundancers need to get their act together. I believe WB6PSY is a former member, and might have some influence in getting them enthusiastic. What say, Gary? Do you still have one of those grass skirts squirrelled away somewhere?

73, Paul VE1DX

At 1400 on New Year's Day it is 0C (32F) in Sydney, NS. The predicted blizzard was a wimp (although the warnings are still in effect). We also got 6" (15cm) of snow. I don't have anywhere to go until tomorrow and thus I will rest :-).

Seems if you want warm, you have to put up with snakes. I think (even tho' as a northerner and a Canadian to boot, I have an innate fear of snakes) I would put up with a couple to be warmer -- at least for several months a year. Here in Eastern Canada we have only two seasons -- winter and July.

Yes it was.

I arrived at Kunsan Air Base, South Korea along about 1990, and I took my TS-430S with me. In a few weeks, I had all the paperwork done so I could install an antenna on the roof of the dorm, and I got on the air. The first thing I thought was to get on 14.313 and get a phone patch to my wife. Couldn't do it, there was a guy calling CQ on top of the net, and that was the end of my idea of getting a phone patch. That guy subsequently lost his license, went through a bunch of appeals, and got re-licensed. He now has his old call as a vanity call.

I think he should have been permanently banned from having ANY FCC license, but that's just my idea of integrity, which both he and the people who got his appeals lack.

I'll never work him in any contest of DX try -- he just isn't worth my time of effort, and I wish the whole ham community would do the same.

Listen, Danny, cars with American licence plates have been spotted on a 90F day in July in Ottawa with skis on the roofs.

At 1400 on New Year's Day it is 0C (32F) in Sydney, NS. The predicted blizzard was a wimp (although the warnings are still in effect). We also got 6" (15cm) of snow. I don't have anywhere to go until tomorrow and thus I will rest :-).

Seems if you want warm, you have to put up with snakes. I think (even tho' as a northerner and a Canadian to boot, I have an innate fear of snakes) I would put up with a couple to be warmer -- at least for several months a year. Here in Eastern Canada we have only two seasons -- winter and July.

It's just hitting here, Al, at least according to Environment Canada's radar. I looked outside and there a bit of wind, but no snow yet. I think the radar catches the high atmospheric stuff first, before we see it on the ground. Either way, it's going to be crappy for the next 24 hours or so.

My first DX of 2009 was EA6UN on 40M at 00:13 UTC. Don't know if I should count that or wait until local time (UTC + 4 hours.)

I don't have a cold, and also have no juice to cure one, so I guess I'll play radio and then watch TV until the power goes out. Then again. it might stay on! Not a lot of activity on the air tonight. Flux stuck at 69 and the GMF seems a bit upset. Oh well, that's how it goes.

Happy New Year to all the list members, and we are all praying for sunspots in 2009. As Al suggested, the Palos Verdes Sundancers need to get their act together. I believe WB6PSY is a former member, and might have some influence in getting them enthusiastic. What say, Gary? Do you still have one of those grass skirts squirrelled away somewhere?

73, Paul VE1DX

Snakes ?? What Snakes ??
In 15 months I have seen two snakes, a Black Racer (a good guy)
and an immature Diamondback (who foolishly took up residence in
a drainage culvert). I have yet to see a Scorpion, but I have lots
of Quail running around, some Turkey Biuzzards (the cleaning crew)
and a few Harris Hawks (they are big).
You folks up in the frozen North can keep thinking how bad it is
down here, that delays the inevitable mass migration.
BTW, we have beaucoup Canadians down here for the winter. The
Trailer Parks are full.

Happy New Year to all,

73, Dick, W1KSZ

I entered logs for W4ABW, W4FOA (entered several logs from his
African posts) and VE1DX (only part of Paul's - about 5,000 QSOs if
I remember, maybe less than that).

Still not rich, as I did those logs for free.

A number of them are still in existence and better than ever. A doctor I saw several years ago had a system that worked quite well with Word. During dictation, he only had to make moderate adjustments/corrections.

It's possible that the computer has "permeated" (maybe saturated is a better choice of words) society sufficiently that more and more people have become adept at computer entry.

There is still a thriving field in medical transcription. Doctors are apparently far too busy to spend time typing entries. Those who do the transcripts (there are schools for it) apparently make reasonably good money.

Dick spent most of his 65+ years here in the Boston, MA area. I used to believe he was a true New Englander. But then, that terrible situation entered his life ... retirement! His true colors emerged ... he moved to the country of sand, heat , sand, snakes, sand, cactus, sand ... er, ARIZONA.

Dick, this am [1000Z 1Jan 09] the temperature is '0'F [-18C ... for the down under crowd], winds are gusting to 30 mph [48 kph]and 6 inches [15 cm] of snow lies beautifully in my driveway. It seems a shame to disturb the tranquility by shoveling it for 2 hours. But, my truck has to get me to Mass [for general info ... I'm a Catholic Deacon {clergy} who has a 10:00 am EST Mass schedule].

FYI, Dick and I were co-workers for many years,

An honest mistake, Gary. Today is the first day since Boxing Day (I know you know what that is) that I have been reasonably well enough to even make a QSO. In fact, I was in bed well before midnight last night -- my granddaughter (six years old) didn't go to bed until 1 am.

Seeing the QSL manager reminded me of I5GN (yes, I know it is a r-e-a-l stretch) but that's a different country and we bloody well don't want to get started on that.

BTW, my 1st QSO of the new year: 9A2009OS. How appropriate.

The lagoon in "Gilligan's Island" was on CBS's Studio City back lot. The lagoon was built for the show in 1963 at a cost of $75,000. Dead trees were planted and dressed with palm leaves. Landscapers added tropical greenery, some live, mostly plastic. The lagoon was 4 feet deep with a working waterfall. The pilot contained footage of Kauai Island in Hawaii (Moloa'a Bay, to be exact). This footage was sometimes recycled in the first season episodes. Later they shot color stock footage of Zuma Beach near Malibu and filmed some outdoors scenes at Franklin Canyon in Beverly Hills. You should also know that Russell Johnson (The Professor) says that the lagoon on the Universal Studio tour that guests are told is from "Gilligan's Island," was never used on the series. The Universal lagoon was only used in one of the re-union movies.

As a kid I remember going swimming on the May 24th weekend every year. That's the weekend when Canada celebrates the Queen's birthday. I believe we may be the only country that celebrates the Queen's birthday -- I don't know why -- maybe so we could go swimming. And last time I saw the Easter bunny she was shivering wildly in her skimpy little bunny suit.

However, in the last decade, since Al Gore's prediction started to make sense, there's often ice in the harbour here and snow on the ground until mid-late May. Wait...wasn't that supposed to be global warming? These days, I'm hard pressed to put a toe in the ocean before July 15th.

For the kids, Dale, we've moved the outdoor Easter egg hunt to July 1st, our version of your July 4th, called Canada Day. And I give all the Easter eggs I find to the grandkids.

I'm sure there were multiple sets for the long running series. One of the sets is between the highway and Pacific just north of Kaneohe, HI. You can still recognize the scenery of the set. It is included in one of the tours from the Macademia Nut farm off Kamehameha Hwy near Kualoa Ranch. Good place to take kids.
I'm sure most of the series was filmed in a studio without the cost of travel to Hawaii.

Well I THINK Great Britain also celebrates the Queens birthday. At least they did when I was there. Even more celebrations seemed to be the Queen Mothers birthday, but now that she finally died, I suspect the Queens is getting more important, as the years go by.

I was up there on Canada Day,in the mid 80s, and non-suspecting, didnt bring my Artic gear and like to froze to death in my pop-up camper. I did save the world though, by killing the worlds largest B-29... er make that mosquitto. on the bathroom mirror. If that sucker had bred, we would have all been sucked dry in 3 years.

There was an outdoor heated pool at the campsite, but I didnt get within 30 foot of it. We moved camp sites and managed to swim indoors the next couple of nights. It did give me a chance to operate /VE3 for the first time.

I don't know about that, Danny -- Britain celebrating the Queen's birthday.
I do know that mosquitoes in Canada are some of the largest in the world,
if that's anything to be proud of.

You've got to admit that waking up in the morning up here is refreshing
'cause you haven't worked up a sweat all night. If it is 45-50 when you
get up and hits 85-90 by mid-afternoon, that's pretty decent.

Heated swimming pools? Come on, now. Only heated pool I ever swam in was
the one I owned. Didn't like it so I sold the house.

Well I THINK Great Britain also celebrates the Queens birthday. At least
they did when I was there. Even more celebrations seemed to be the Queen
Mothers birthday, but now that she finally died, I suspect the Queens is
getting more important, as the years go by.

I was up there on Canada Day,in the mid 80s, and non-suspecting, didnt
bring my Artic gear and like to froze to death in my pop-up camper. I did
save the world though, by killing the worlds largest B-29... er make that
mosquitto. on the bathroom mirror. If that sucker had bred, we would have
all been sucked dry in 3 years.

There was an outdoor heated pool at the campsite, but I didnt get within 30
foot of it. We moved camp sites and managed to swim indoors the next
couple of nights. It did give me a chance to operate /VE3 for the first
time.

As a kid I remember going swimming on the May 24th weekend every year. That's the weekend when Canada celebrates the Queen's birthday. I believe we may be the only country that celebrates the Queen's birthday -- I don't know why -- maybe so we could go swimming. And last time I saw the Easter bunny she was shivering wildly in her skimpy little bunny suit.

However, in the last decade, since Al Gore's prediction started to make sense, there's often ice in the harbour here and snow on the ground until mid-late May. Wait...wasn't that supposed to be global warming? These days, I'm hard pressed to put a toe in the ocean before July 15th.

For the kids, Dale, we've moved the outdoor Easter egg hunt to July 1st, our version of your July 4th, called Canada Day. And I give all the Easter eggs I find to the grandkids.

I can't verify 100% John's statement about Gilligan's Island,
but I did visit the Macademia Nut farm he mentioned last July. A
heck of a lot of TV shows and movies are indeed partially shot in the
Hawaiian Islands.

John will rent you one of them if you want. Act quickly for
there is a big demand for Kauai and Maui. Especially Kauai. I got a
weekly deal from John for Kauai in 2007, but I had to reserve it
quite a bit in advance. :-)

I'm sure there were multiple sets for the long running series. One of the sets is between the highway and Pacific just north of Kaneohe, HI. You can still recognize the scenery of the set. It is included in one of the tours from the Macademia Nut farm off Kamehameha Hwy near Kualoa Ranch. Good place to take kids.
I'm sure most of the series was filmed in a studio without the cost of travel to Hawaii.

The lagoon in "Gilligan's Island" was on CBS's Studio City back lot. The lagoon was built for the show in 1963 at a cost of $75,000. Dead trees were planted and dressed with palm leaves. Landscapers added tropical greenery, some live, mostly plastic. The lagoon was 4 feet deep with a working waterfall. The pilot contained footage of Kauai Island in Hawaii (Moloa'a Bay, to be exact). This footage was sometimes recycled in the first season episodes. Later they shot color stock footage of Zuma Beach near Malibu and filmed some outdoors scenes at Franklin Canyon in Beverly Hills. You should also know that Russell Johnson (The Professor) says that the lagoon on the Universal Studio tour that guests are told is from "Gilligan's Island," was never used on the series. The Universal lagoon was only used in one of the re-union movies.
Might count as W6 - rene

I have just read at www.docufunk.org that the original cards for P5RS7 that were submitted for and accepted for DXCC credit, prior to Romeo's expulsion from DXCC, were never removed from the totals of those stations which submitted them. While there's a great deal of doubt in my mind that this is true, it is too late at night to e-mail Bill, and before I go to bed I'd like to know if anyone on here knows anything.

If it is true, and I never did submit my P5RS7 QSL, would it be retroactive? Oh how happy I would be.

What a way to start the year :-).

Not MY part of Texas. You gotta have water to have skeeters. We might have averaged 18-20 inches of rain a year, if that. It all soaked down in the sands, and seldom flooded the rivers- which are normally a quarter mile across on the bridge, with about 3-4 foot wide cricks in the middle, 3 inches deep. They, and the frogs, may come out ever 4-5 years for a month or so, then bury down so deep you would think they were looking for oil in the Permein Basin.

Hey, there were three DX stations earlier on 160, and worked two of them. The third, (a needed on of course) went QRT when he got s5 here.

I'm not questioning where he was, as ultimately decided by the League, John, I just found the English translation to be somewhat confusing. As I remember, by the time I would have sent cards for credit, Romeo would have already been booted out. The German site seems to indicate that credit given was never rescinded. That, to me, is preposterous.

I am not privy to the data provided by the Japanese DFers who pinpointed, perhaps to the square metre, where he was along the Russian/N. Korean border. I also question this pre-GPS (for the general public) determination. But then, who am I to ask? I'm just a pawn in the DXCC game of chess.

Actually (statistically) not many. We get an infrequent tourist bite from a visiting Tiger Shark or Great White, likely mistaking the surfer for a seal which is much more tasty. The black tip and white tip reef sharks here don't appear to bother swimmers.

The daily ferry and flights from Maui are a better way to get to Molokai.

Pardon me for being so uninformed, but why is Kure KH7, never activated......how far from the mainland is it? Is it that difficult to get to? I am asking these questions without the aid of a map in the near vinicity of the desk.

Most likely because it's "managed" (and I use that term loosely) by
the Fish & Wildlife guys.
Check it out on Google Earth at +28 23' and +178 17'
It shows a runway.
I knew a guy years ago that was in the Coast Guard and was
stationed there. He went half nuts !!

Actually (statistically) not many. We get an infrequent tourist bite from a visiting Tiger Shark or Great White, likely mistaking the surfer for a seal which is much more tasty. The black tip and white tip reef sharks here don't appear to bother swimmers.

The daily ferry and flights from Maui are a better way to get to Molokai.

Since there is no new DX, we'll continue this travelogue.

Molokai is easy to visit, boat of flight from Maui. BUT the hotel by the one nice beach closed. Molokai Ranch closed, cut down all the trees, nothing left. It is more difficult to find a place to stay but you can still visit the former leper colony, see the rest of the park, take the mule ride, and put out Kalawao county for the USACA group.

Those natives NEED YOUR TOURIST MONEY! Come visit.

Only a team serious about a trip should inquire! You CAN get F&W permission AND you have to take THEM WITH YOU at YOUR EXPENSE to tell you WHERE you can walk, run coax, set up stations. There are NO towers, NO runways, NOTHING but bird crap and birds and native island. The boat ride is long and rough and the climb!!! from the boat to the land is STEEP and difficult. You must carry EVERYTHING! Water, Food, etc and you must REMOVE IT ALL when you leave. YOU must stay out of the way of the goony birds, etc.

A TEAM with money and sincere interest should talk to the last team that was there! They are probably over being seasick by now.

You SHOULD have worked it when the USCG was there with a LORAN C station! And an airfield and frequent flights from Oahu.

I have all of the LOGS for Rick's operations there over many years. (KH6JEB, AH7RS, /KH7)

Most parts of Australia still celebrate Queens Birthday Weekend.
Here in New South Wales it moves about between the 1st and 2nd weekend in June.
Currently it is celebrated on the second weekend.

The Queen is not impressed as it is not her Birthday at all!

Bob

As a kid I remember going swimming on the May 24th weekend every year. That's the weekend when Canada celebrates the Queen's birthday. I believe we may be the only country that celebrates the Queen's birthday -- I don't know why -- maybe so we could go swimming. And last time I saw the Easter bunny she was shivering wildly in her skimpy little bunny suit.

However, in the last decade, since Al Gore's prediction started to make sense, there's often ice in the harbour here and snow on the ground until mid-late May. Wait...wasn't that supposed to be global warming? These days, I'm hard pressed to put a toe in the ocean before July 15th.

For the kids, Dale, we've moved the outdoor Easter egg hunt to July 1st, our version of your July 4th, called Canada Day. And I give all the Easter eggs I find to the grandkids.

73

Al, VE1AL

AL;
Does that mean that you miss easter as it is commonly held in spring? What's that commenwealth day?
Dale

The Queen's birthday is celebrated on June 2 (not her real birthday). The date for the celebration was altered many years ago so that the date coincided with the date of her coronation.

Kure was activated with a pretty big dxpedition in September/October 2005.

That was the dxpedition where they had a web site displaying when your QSO was posted. There were little indicators that looked like lights to indicate band/mode for your QSOs.

It was the first dxpedition I remember that had so much feedback from the site.

You might be confusing this with XY0RR, another phantom Romeo
operation. This was before DXCC records were computerised,
so they couldn't tell which card you had submitted for XY/XZ
when they stopped accepting Romeo's cards. The DXCC people
basically told us to work another XY/XZ on the honour system.

I'm sure they never accepted P5RS7 cards.

03 January 2009 A.R.I. DX Bulletin
No 922
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B - Rachid, 3B8FQ reports that his working trip to St. Brandon Island (3B7) may be rescheduled for February. His earlier 3B7FQ operation was cancelled due to transportation problems. He is also planning a personal holiday with ham gear to Rodriguez Island (3B9FQ) in July, and a return trip to Agalega Island (3B6FQ) in November. Details will be provided as they are available. Meanwhile, Rachid is often QRV on 40-10 metres, CW and SSB. QSL via K5XK. [TNX K5XK]
3V - The TS7C [425DXN 912] multi-national team now includes 25 operators (namely DL1BDF, F1HRE, F2VX, F4AJQ, F4EGD, F4EVR, F5EOT, F5PED, F5UFX, F6AXX, F6BIV, F6CTT, F6ENO, F8BJI, F8IJV, F9IE, FM5CD, G0OPB, I2VGW, N2WB, N6OX, OE8KDK, OE8SKQ, OE9AMJ and ON7RN). They will leave Paris on 8 January and expect to be QRV with the first station from Chergui Island, Kerkennah (AF-073) in their late afternoon or early evening hours. They will be active until around 18-19 UTC on 18 January, as they will depart the island in very early morning of the 19th. They plan to have six stations active on 160-10 metres CW, SSB, FM and digital modes (RTTY, PSK31, BPSK, SSTV), with special attention to be paid to 160 and 80 metres. The antenna farm will consist of verticals and wires for the low bands and Spiderbeams from 40 to 10m. QSL via F4EGD, direct or bureau. Please visit http://www.ts7c.net/ for further information, suggested frequencies, updates, QSLling instructions and on-line logs. [TNX F5NQL]
8Q - Andy, G7COD will be active again as 8Q7AK from Embudu, Maldives (AS-013) on 11-27 January. He plans to operate SSB and CW on 40-12 metres (suggested frequencies and operating schedule at www.qrz.com/8q7ak). QSL via home call, direct or bureau. [TNX G7COD]
9A - Seven special event stations will be active until 1 February from the host cities of the Men's World Handball Championship that is going to be held in Croatia (http://www.croatia2009.com/). Look for 9A2009OS (Osijek), 9A2009PO (Porec), 9A2009PU (Pula), 9A2009ST (Split), 9A2009VZ (Varazdin), 9A2009ZD (Zadar) and 9A2009ZG

(Zagreb). QSL via bureau. [TNX VA3RJ]
C6 - Karney/W2AFC, Dave/N1EMC and Bill/NE1B will operate from Nassau (NA-001, Grid Square FL15), Bahamas with Tom/C6ANM during the following contests: CQ WW 160M CW (23-25 January), ARRL DX CW (21-22 February), CQ WW 160M SSB (27 February-1 March), ARRL DX SSB (6-8 March). Additional C6ANM DX activity on 160-6 metres will be from 1 January through 1 April. QSL C6ANM via LOTW (preferred) or direct to WA2IYO. [TNX NE1B]
CE - Esteban, XQ7UP and other seven operators from Chile and France will be active as XR5L from Santa Maria Island (SA-070) and lighthouse from 28 January to 4 February. They plan to operate SSB and CW on all bands. QSL via CE6AMN. Further information can be found on the Three Stars DX Group's website at http://www.3stardxgroup.cl/ [TNX XQ7UP]
E4 - Salvador, C31CT has joined the team (Vinicio/IK2CIO, Simone/IZ0BTV, Aurelio/IZ0EGM, Giorgio/IZ4AKS, Pasquale/IZ8IYX and Les/SP3DOI) that is currently active as E44M [425DXN 918] from Palestine. Operations started on 2 January and will continue until the local evening of the 10th, as the team is expected to leave on the 11th at 10h. Arturo, IK7JWY liaises with the team and the amateur radio community through the forum which can be found at http://www.hamradioweb.org/forums/forumdisplay.php?f=39. QSL via SP3DOI (bureau) or IZ0BTV (direct); further information, including QSLling instructions and on-line logs, at www.dxcoffee.com/e44m/
EA - Adolfo, EA7TV will be active as ED7TV from the two Rota lighthouses (ARLHS SPA-085 and SPA-339) on 9-11 January. He plans to operate on 20 and 40 metres. QSL via home call, direct or bureau. [TNX EA7TV]
FW - Eli/HA9RE, Laci/HA0NAR and Sara/HA9SDA will be active as FW5RE from Wallis Island (OC-054) starting on 27-28 January until 17 February. They will operate CW, SSB and RTTY on 160-10 metres with two stations. QSL via HA8IB. Donations will be gratefully accepted (please contact ha9re@... if willing to help). [TNX HA8IB]
G - Founded in 1969 by the late John Morris, G3ABG, the Worked All Britain Awards Group celebrates its 40th anniversary. GB40WAB will be aired for the entire anniversary year from different locations, and it may be used from any of the seven British DXCC Entities. All of the QSOs will be confirmed automatically via the bureau. Further information on the event and the relevant award can be found at http://www.worked-all-britain.co.uk/
HI - Simone, IZ5JNQ will be active as HI7/IZ5JNQ from the Dominican Republic (NA-096) between 5 January and 5 February 2009. He also plans to go and operate as HI2/IZ5JNQ from the coastal islands (NA-122) of Saona and Catalina during that time frame. [TNX IZ5MMB]
HK - Cody, KC2LSD will be active as HK3/KC2LSD from Colombia on 9-15 January. He plans to be QRV mainly around 23 UTC on 20, 30 and 40 metres, with some day time operation as well. [TNX K1XN and The Golist]
KH2 - Yoshi, JE2EHP will be active as K1HP/KH2 from Guam (OC-026) on 16-19 January. He plans to operate SSB, CW and RTTY on the HF

bands and 6 metres. QSL via JE2EHP, bureau preferred. [TNX JE2EHP]
PA - Look for Raymond, PA6FUN to be active on various bands and modes
from Schiermonnikoog Island (EU-038) and lighthouse on 2-6
January. QSL via PE1GUR.
P4 - Peter, EA5GVH will be active as P40PZ from Aruba (SA-036) on 12-28
January. He will operate digital modes (PSK, Olivia, FeldHell,
SSTV, RTTY and others) and SSB on 80-6 metres. QSL via home call.
[TNX NG3K]
S2 - The expedition to St. Martin's Island (AS-127) [425DXN 916] is now
expected to take place on 16-22 January. Six operators will be
active as S21DX on 10, 12, 15, 17, 20, 40 and 80 metres SSB and
RTTY. QSL direct to EB7DX. Please visit http://s2iota.eb7dx.com/
for further information and updates.
S7 - Jan, DL7JAN will be active as S79JF from Praslin Island (AF-024),
Seychelles from 22 February to 6 March. He plans to operate CW,
SSB, RTTY and maybe PSK31 on 40-10 metres. QSL via home call,
direct or bureau. [TNX DL7JAN]
TL - Chris (ex-5U5U) expects to start activity from the Central African
Republic (requested call TL0A) around 15 January. He will operate
in his spare time, with an amplifier and a 6-band yagi, plus
dipoles and a long wire. QSL to Christian Saint Arroman, Chemin de
Mouteguy, 64990 Urcuit, France. [TNX The Daily DX]
UA - A few activities for the World Flora Fauna Award are expected to
take place between 3 and 8 January. Look for UE1RFF/4 and UE9WFF/4
to operate from five different locations. QSLs via UA1RJ. [TNX
RW3GW]
VK - VI2BV90 is the special callsign issued to the Waverley Amateur
Radio Society (www.vk2bv.org), the oldest continuously licensed
amateur radio club in Australia, to celebrate its 90th
anniversary. The special callsign will be in use by the club
station from 24 January to 1 February. Expect SSB activity on on
or near 3590, 7090, 14190, 21190 and 28490 kHz. [TNX VK3FM]
W - Wade, AA8LL will be active as AA8LL/4 from Cedar Keys (NA-076)
from around 22 UTC on 17 January to around 17 UTC on the 20th.
Holiday style operating will be mostly CW and RTTY on 80-17 metres
with 100 watts and wires. QSL via AA8LL, direct or bureau. He will
upload his log to LoTW. [TNX AA8LL]

PACIFIC TRIP ---> Udo, DL9HCU is currently active as 3D2HC from the Fiji
Islands. Starting around 8-9 January he will be on Banaba Island, possibly
signing T33HC. After that he plans to go and operate from Western Kiribati
as T30HC. QSL via DL9HCU. [TNX The Daily DX]

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The latest issue (December 2008) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

I2UIY MEMORIAL PLAQUE PROGRAMME ---> Two plaques will be sponsored annually by CQ Magazine for the CQ WW WPX RTTY Contest and the CQ WW RTTY Contest in memory of Paolo Cortese, I2UIY. The recipients will be chosen by the CQ RTTY Contest Committee from among all single-operator entries from DXpeditions in that year's contest. Final score is only one aspect considered in determining the recipient: difficulty of the endeavor, rarity of location, contribution to the local environment, etc. are all factors that are important in determining the winner.

CQ DX MARATHON ---> The CQ DX Marathon is a year-long DX hunt, with participants competing to see who can work the greatest number of countries ("entities") and CQ zones during the calendar year. The 2009 edition started at 00.00 UTC on 1 January and will end at 23.59 UTC on 31 December. Complete rules and submission information can be found at www.dxmarathon.com - and remember to submit your 2008 scores by 31 January 2009. [TNX K9EL]

CQ WW WPX CONTEST ---> The new rules for the 2009 CQ WPX Contest are now available (http://www.cqwpx.com/rules.htm). There are changes throughout the rules and, even though most of them are administrative and should have little impact on the competitive and fun aspects of the contest, participants are encouraged to read the complete rules carefully. The SSB event will be held on 28-29 March, followed by the CW event on 30-31 May.

DX SOUND CLIPS ---> Tom's (K8CX) DX sound clips for 2008 can be found at http://hamgallery.com/dx2008/; the collection of 120 streaming Real Audio DX clips covers all the major DXpeditions, plus rare and semi-rare DX.

HOGWASH FOR HAMSTERS ---> Jerry Spring, VE6CNU is the author of "Hogwash for Hamsters: A Light-hearted Look at the Hobby of Amateur Radio", a 111-page book that casts a humorous look at the hobby of amateur radio: "When we take ourselves less seriously, we become even better ambassadors to the world". Complete information can be found at http://www.trafford.com/08-1259

QSL BX2AAL ---> As of 28 December 2008, NI5DX is the QSL manager for Jack, BX2AAL. Buzz will be able to answer all requests for cards as soon as the logs are transferred and QSL cards are printed. [TNX K1XN and The Golist]

QSL II5EME ---> Direct and bureau cards for the 13th International EME Conference's special event station are being sending out. The Conference papers and a few photo galleries are available at http://www.eme2008.org/ [TNX IW5EIJ]

QSL RA1QKI/1 ---> The new QSL route for RA1QKI/1 (EU-102 and EU-160, August 2007) is via UA1RJ. [TNX UA1RJ]

QSL VIA UA1RJ ---> The "World Flora Fauna" (www.wff44.com) is an award programme for contacts made with amateur radio stations operating from

national parks and nature reserves worldwide. UA1RJ is the QSL manager for the following operations conducted by the WFF Russian Team in 2008: RA3AUU/3 (July), RW3GW/3 (July), UE1RFF, UE1RFF/1 (December), UE1RFF/3 (September-November), UE1TFF (July), UE1ZFF (July), UE3FFF/3 (July) and UE9WFF/1 (August). [TNX RW3GW]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Twelve different galleries include cards for the ten Most Wanted DXCC Entities (234 QSLs), the 58 deleted DXCC entities (927 QSLs), obsolete prefixes (2475 QSLs), stations from Magrebh from 1947 to 1962 (292 QSLs), Antarctic bases (719 QSLs) & TAAF (Terres Australes and Antarctiques Francaises, 245 QSLs), the various French DXCC island Entities in the Pacific Ocean (228 QSLs) & the Indian Ocean (95 QSLs), pre-1945 countries (511 QSLs), French Departments (508 QSLs) and USA (49 QSLs) plus a gallery for cards not accepted by DXCC (104 QSLs). Several cards are still needed and your participation is encouraged - please visit http://LesNouvellesdx.fr and send send your comments to lesnouvellesdx@... [TNX F6AJA]

QSL.NET ---> After 13 years of providing the amateur radio community with no cost web space, e-mail forwarding and mailing list services through QSL.net and QTH.net, Al Waller (K3TKJ) has decided to retire. All QSL.net and QTH.net servers and Internet connections at his home QTH are being turned down, while Scott, KA9FOX is in the process of migrating all services to new hardware. Please check http://www.qsl.net/ for updates on server migration.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

VISALIA 2009 ---> Sponsored this year by the Northern California DX Club, the 60th Annual International DX Convention will take place on 17-19 April at the Holiday Inn Hotel & Conference Center in Visalia, California. Please visit www.dxconvention.org for further information and registration forms.

ZL DX HALL OF FAME ---> The newly established New Zealand DX Hall of Fame honours those outstanding ZL DXers who have excelled in our radio sport hobby over many years. After much deliberation the judges (ZL1AIH, ZL3JT and ZL3NB) were unanimous in their selection and have elected the first three ZL radio amateurs to the New Zealand DX Hall of Fame for 2009: Roy Jackson (ZL4BO), Ron Wright (ZL1AMO) and Jock White (ZL2GX, SK). Details can be found at http://www.southgatearc.org/

+ SILENT KEYS + Recently reported Silent Keys include Rev. Padraic O'Kelly (EI5DA), Birgit Nilsson (SM7DBI, wife to Arne Nilsson, SM7AED) and Stanley A. Goldin (W2DNO).

8562. ARLP001 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-01-02 20:01:49 UTC
From: jjreisert@alum.mit.edu
Topic: 8562 Message: 8562

SB PROP @ ARL $ARLP001
ARLP001 Propagation de K7RA

ZCZC AP01
QST de W1AW
Propagation Forecast Bulletin 1 ARLP001
>From Tad Cook, K7RA
Seattle, WA January 2, 2009
To all radio amateurs

SB PROP ARL ARLP001
ARLP001 Propagation de K7RA

2008 was a year of very low solar activity. Over forty percent of this year's propagation bulletins reported zero sunspots for their respective weeks. The average daily sunspot number for the year was 4.7, and in 2007 it was 12.8.

The yearly averages of daily sunspot numbers for 1999-2008 were 136.3, 173, 170.3, 176.6, 109.2, 68.6, 48.9, 26.1, 12.8 and 4.7.

Two years ago we wrote, ''This is the first bulletin of 2007, the year we'll likely see the end of sunspot cycle 23, the beginning of cycle 24, and the minima between cycles''.

One year ago in the first bulletin of 2008 we noted the same quote from the previous year, and wrote ''Now a year later we might say the same about 2008''.

This is probably still true for past year, because since early 2008 we saw cycle 24 spots, and what looks like a slow increase in activity toward the end of the year, although a week of sunspots at the end of December would have helped to sustain the upturn.

We've been looking at a three month moving average of sunspot numbers, and the average for October-December, centered on November, was 4.4, about the same as the number 4.5 centered on October.

Here are the 3-month sunspot number averages since early 2007:

Jan 07 22.7
Feb 07 18.5
Mar 07 11.2
Apr 07 12.2
May 07 15.8
Jun 07 18.7
Jul 07 15.4

Aug 07 10.2
Sep 07 5.4
Oct 07 3.0
Nov 07 6.9
Dec 07 8.1
Jan 08 8.5
Feb 08 8.4
Mar 08 8.4
Apr 08 8.9
May 08 5.0
Jun 08 3.7
Jul 08 2.0
Aug 08 1.1
Sep 08 2.5
Oct 08 4.5
Nov 08 4.4

For those readers who track the solar cycle using Scott Craig's Solar Data Plotting Utility, there is a new data file on his website containing 20 years of data, from January 1, 1989 through December 31, 2008.

The program can automatically suck up the data from the text of our bulletins. You can download the software for Windows and the update from the WA4TTK web site at http://www.craigcentral.com/sol.asp. The updated data file is available directly from http://www.craigcentral.com/software/update.zip.

Mike Hoteling, KD7IBE of Colville, Washington wrote ''Just want to report some good propagation from northeastern Washington on 160 meters late at nite. These quiet sunspot conditions offer some unique opportunities. QSO into Wyoming and Texas complete with QSL cards with the century club on 1892 kHz with 100 watts into a 75 meter dipole at 35 feet. Don't be afraid to give it a try.''

Elwood Downey, WB0OEW of Socorro, New Mexico along with many other readers called attention to recent news from NASA that the ionosphere is now at lower elevation than in the past. I suppose this means that worldwide shortwave signals might not propagate as far. Read the article that Elwood sent at http://tinyurl.com/3p2pcs.

A number of readers, including Norm Priebe, W7ISD of Alexandria, Minnesota sent in links to articles about a big hole in our earth's magnetic field. Read about it at http://science.nasa.gov/headlines/y2008/16dec_giantbreach.htm. The magnetosphere helps protect us from solar wind, so if these findings are correct, it wouldn't take strong space weather to trigger aurora.

The local newspaper in Homer, Alaska ran an article this week about aurora borealis, which often can be seen from Homer. Read it at http://www.homertribune.com/article.php?aid=3733.

Dave Deatrick, WA8OLD was mentioned in ARLP051 back in December, 2006, when he told about the fun he was having on 40 meters with a shortened dipole in a vee configuration at 30 feet. He wrote again on December 20, 2008 to report more fun from the far north of Michigan with the same antenna, and about 4.8 db more power (300 watts vs. 100 watts). He lives about a mile from the Canadian border at Sault Ste Marie, and writes ''40 CW has been good lately, especially from about 1000 to 1200 GMT to Caribbean and South America. Just worked H6VA at 1155 this morning, December 20. Also was able to work a AH6 same time period during CQ WW CW test''.

Finally, nothing to do with propagation, but check out this link to a historical page dedicated to the Novice license: http://www.novice.bappy.com/index.html.

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for December 25 through 31 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 69.3, 69.2, 69.4, 69.8, 69.8, 68.5, and 69.3 with a mean of 69.3. Estimated planetary A indices were 3, 1, 1, 2, 0, 1 and 10 with a mean of 2.6. Estimated mid-latitude A indices were 2, 2, 1, 1, 1, 1 and 8 with a mean of 2.3.

Quite honestly, Bob, I am hardly a monarchist. When the Queen's birthday is, or isn't, is of no more import to me than my birthday is to her. Other than being a traditional holiday (I don't know when it was declared), the May 24th weekend in Canada is a time to unofficially welcome (usually after a cruel winter and a harsh spring), the start of warmer weather. Not only did we go swimming, but my mom packed a wonderful picnic lunch and we all ate at the beach -- before (or until) the mosquitoes found us :-).

73

Al, VE1AL

Subject: [DX-IS] Happy New Year

Most parts of Australia still celebrate Queens Birthday Weekend.
Here in New South Wales it moves about between the 1st and 2nd weekend in June.
Currently it is celebrated on the second weekend.

The Queen is not impressed as it is not her Birthday at all!

Bob

As a kid I remember going swimming on the May 24th weekend every year. That's the weekend when Canada celebrates the Queen's birthday. I believe we may be the only country that celebrates the Queen's birthday -- I don't know why -- maybe so we could go swimming. And last time I saw the Easter bunny she was shivering wildly in her skimpy little bunny suit.

However, in the last decade, since Al Gore's prediction started to make sense, there's often ice in the harbour here and snow on the ground until mid-late May. Wait...wasn't that supposed to be global warming? These days, I'm hard pressed to put a toe in the ocean before July 15th.

For the kids, Dale, we've moved the outdoor Easter egg hunt to July 1st, our version of your July 4th, called Canada Day. And I give all the Easter eggs I find to the grandkids.

73

Al, VE1AL

AL;
Does that mean that you miss easter as it is commonly held in spring?
What's that commenwealth day?
Dale

You might be confusing this with XY0RR, another phantom Romeo operation. This was before DXCC records were computerised, so they couldn't tell which card you had submitted for XY/XZ when they stopped accepting Romeo's cards. The DXCC people basically told us to work another XY/XZ on the honour system.

I'm sure they never accepted P5RS7 cards.

Oh - we had those. I remember when I was about 6 or so, getting in the car down in front of the bank, and looking down and one crawled out from under the seat. It was MONTHS before they got me to rid the car again. They are just big centepedes. There are smaller ones too, they are just the babies of the larger ones.

Al - the information is contradictory:
Consequenty the ARRL Headquarters in Newington, CT, issued DX Bulletin 11
ARLD011, February 21, 1996: "To all radio amateurs. Awards committee vote.
The ARRL Awards Committee met recently to review submitted documentation for
the 1992-93 P5RS7 operation submitted by Romeo Stepanenko. After a review of
all material available, the Awards Committee voted unanimously to disqualify
Romeo Stepanenko from participation in the DXCC program. This
disqualification is based upon Rule 12, Operations Ethics, and Rule 13. The
disqualification means that Stepanenko is not eligible to participate in the
DXCC program in any manner. This includes, as provided for under Rule 12,
paragraph (b) disallowance of contacts made with any station or DXpedition
operated by him from the time of this action." In other words: P5RS7
contacts submitted for the DXCC programm and accepted remained valid.

You can sort it out - rene

8575. Increase in Canadian postal rates - 12 Jan 2009

Yahoo group: DX-IS (2009)
Date: 2009-01-03 02:48:01 UTC
From: Paul M Dunphy
Topic: 8575 Message: 8575

I went to the post office today to pick up a few stamps and was
told that Canadian Postal rates were increasing as of 12 January 2009.

They will increase as follows:

Canada to the USA - FROM $0.96 TO $0.98
Canada to any other country - FROM $1.60 TO $1.65

Note that in Canada we have to pay a tax (called the GST) of 13%
on postage stamps so the actual cost, come 12 January will become:

To the USA: $0.98 + $0.13 = $1.11
To any other country: $1.65 + $0.21 = $1.86

If you are sending return postage to Canada, please adjust
accordingly. Note that the strength of the US dollar against the CND
dollar *currently* means $1 USD will cover the $1.11 CDN to the USA,
but this fluctuates significantly. (At least this has in the past
year.) Your best bet is to somehow acquire Canadian stamps -- or
better yet use LoTW or the buro.

This is from Bill Moore:
Phone - #9,690 issued October 18, 1979

10 Meters - #18 issued July 1, 1988

I agree wiff Paul's statement - us SSB'ers have to put up wiff lotsa phone QRM - policemen telling us where to put it, VFO swishers and all the hams wot call out of turn.

No, it is because they started issuing a CW DXCC certificate
much later in the DXCC game than PHONE and MIXED.

Yeah, that was pointed out when that tax was implemented in the 1980s. Stands for "Goods and Services Tax." Applies to almost everything. If I get a haircut, it's a service. Suppose the barber charges $10. I get to pay $11.30.

And you are correct . . . a postage stamp was, at least historically, a tax to cover the cost of transporting mail. So applying the GST to the "service" of transporting mail is indeed a tax on a tax.

You'all will love a GST if you ever get one in the USA (it's the same as the VAT - Value Added Tax in Europe.) They tax everything! Labour costs. You pay a mechanic $300 to fix your car and they add 13%. You buy the damn car for $20,000 and they add 13%, which comes to $2,600. So your $20,000 car ends up costing $22,600.

Great cash grab for the government. But remember, we are a socialist/communist country and we get lots of social programs like free medicare. It all works out in the end, I think! :-)

Yeah guys, try some of the Value Added Tax so many counttries now have. They dont need income taxes, when they have to spend an additional 15 percent (or so) tax every time a raw product is sold, manafactured to a product, then sold and sold and sold again finally to the user. By that time, the price has more than doubled.

Having a tax on stamps is just plain stupid. Just put the real price on them. The government gets all the money anyway.

There is just as much CW activity in the world of DX as there
was 20 years ago. The most successful DXpedition so far (VP6DX at
184K QSOs) made more CW contacts than SSB.

Yes, but you would think 33 years would be more than enough to make up more difference than there is at the moment (the CW award only began in 1975). The bottom line seems to be that SSB is still (and, unfortunately, always will be) more popular.

CW isn't dead and most likely will still be going gangbusters when you and I are dead and buried (although my plans are to be deep fat fried!). *And* a surprising number of the newer license holders are attracted to CW. But the great majority of those coming in (and I'll bet that holds true for a number of years) go directly to SSB and never depart!

A suggestion was made the other day that the government raise the federal gas tax by 50%. I think that comes out to something like another 20 cents to the gasoline price. Group A argues that the tax will hurt the disadvantaged. Group B points out that if you buy gas, you're using the roads the gas tax helps pay for.

This morning I saw where one state is proposing a mileage tax instead of a gas tax. They think GPS technology will allow them to keep track of motorists and tax them for the miles they drive.

I guess that means that there will be a new department under the energy czar (just exactly what does our energy department do?), tasked with hiring zillions of people to keep track of the GPS miles (and those who either rip out their GPS or hack into them or...).

I thought I was retired. Appears maybe the only way to keep passing bigger tax burdens on to our children and grandchildren is if we all end up working for the government!

Maybe I could run for office on a DX platform - promise more sunspots, more DX, more entities, more bands...

Conditions here in UK are dreadful.I heard a whisper from them on 20M at 1700 UTC, band more or less closed here and high noise level. Nothing here on 15M earlier when they were working Europe. This should be an easy one from here but no chance with these conditions.I'm not too concerned as I worked E4/OM2DX before but would like to get some new bands.
Only good opening was into ZL long path first thing today.Even sigs from EU have been well down but booming signals from Italy on 20M.
Happy New Year to everyone. Surely conditions have got to improve this sun spot minimum keeps going on and on!

>73,
>Mike G3XLB

I just got them on 20M SSB (I think . . . . he gave my call
clear as a bell but someone 40-over tramped on him while I was giving
his, so I'll be sure when I see it in the on-line logs.) Pretty
messy. They are committing the cardinal sin! Repeatedly saying "2XY
only" and then working the "4AB" guy in the next breath. I realise
they are just hearing a zoo on their end, but you have to stick with
the guy you come back to or the pileup falls apart and the QSO rate
drops dramatically.

To be fair, I'm here, and they are there, so it might be easier
said than done. It will settle down in a few days.

73, Paul VE1DX

8610. A nice surprise, propagation on 20 M

Yahoo group: DX-IS (2009)
Date: 2009-01-04 06:44:02 UTC
From: Mark Lunday, WD4ELG
Topic: 8610 Message: 8610

0500 UTC today, 20 meters was open to south Africa and Australia at the same time. I worked several ZS stations, and heard VK7 in a rag-chew. Reminds me fondly of the days in 1979 in Central Calif when I was running a JA pileup on 15 meters SSB at 2200 local time, or fall of 1990 in central Georgia when I would call CQ on 20 CW at 0200 local time and I would get responses from EU, VK/ZL, and South America all at the same time. I still check my logs to make sure it was not a dream!

Things can only get better, propagation-wise.

I don't think so!!

First, you VKers are supposed to be in your summer season, what's this question about snow?

Second, I just measured the resistivity of my local snow bank at 1 meter. The value is OFF SCALE high. That is >19.99 Megohms. That doesn't sound like a good value for a ground plane.

Ah, but (if it passes) will that tax increase actually have an affect on the funds spent on highways?

Every few years, the Commonwealth of Pennsylvannia increases the gas tax by about a nickel. Always on the argument that due to higher costs & higher wear & tear, the highway repair fund needs more shekels.

So what happens?

Well, a certain amount of "non gas tax" funding from the General Funds gets transferred from the highway fund to other purposes, equal to a certain percentage of the expected increase in gas tax income. Somewhere around 40-50% or so of the proposed increase, maybe more if you can ever dig all the details out.

About 20-25% of the increase is immediately allocated to the State Police to cover higher costs of highway patrols and so forth.

About 20% gets allocated to mass transit -- and an equal amount of General Funds then gets transferred out of mass transit, so that's actually a wash for the mass transit funding.

And there are other little dings here & there along the way. Pet projects, political payoffs, the usual corruption. (Any other state set up grants for their legislators, nicknamed locally Walking Around Money?)

The bottom line is that of the extra nickel per gallon that we allegedly pay in the higher gas tax towards highway repair, if we're lucky, about a penny (give or take) of that actually increases the fund. Now factor in 4 to 5 years of inflation, and the net result is no actual increase in the dollars spent... but a higher tax that funds other things.

So the feds want to increase the federal gas tax by 50%? Think they won't play the same shell game?

Bring on E4!

73

Subject: RE: [DX-IS] Increase in Canadian postal rates - 12 Jan 2009

A suggestion was made the other day that the government raise the federal gas tax by 50%. I think that comes out to something like another 20 cents to the gasoline price. Group A argues that the tax

will hurt the disadvantaged. Group B points out that if you buy gas, you're using the roads the gas tax helps pay for.

This morning I saw where one state is proposing a mileage tax instead of a gas tax. They think GPS technology will allow them to keep track of motorists and tax them for the miles they drive.

I guess that means that there will be a new department under the energy czar (just exactly what does our energy department do?), tasked with hiring zillions of people to keep track of the GPS miles (and those who either rip out their GPS or hack into them or...).

I thought I was retired. Appears maybe the only way to keep passing bigger tax burdens on to our children and grandchildren is if we all end up working for the government!

Maybe I could run for office on a DX platform - promise more sunspots, more DX, more entities, more bands...

Sure hope so, Win. That's the one of the few advantages of
getting old . . . we don't have to go anywhere tomorrow.

I was just going to post something about that. Sounds like a
keyboard keyer because I notice the pattern of some of the random
characters being sent on top of him match the layout on the keyboard
like "QWERTYUIOP" stuff.

The jamming of this operation seems particularly nasty. The
small minds who do this are a disgrace to Ham radio. Might be
related to the politics in that part of the world, but those who
think jamming a DXpedition is going to change anything are just that;
small minded.

We'll work them sooner or later. I did get them on 20 SSB
yesterday (logs are updated), and there were was some viscous
swearing taking place on their transmit frequency. That's twice I've
been on 20M SSB in the past 6 months or so, and both times it wasn't
"LID" and "HE'S LISTENING UP, DUMMY!", but instead vulgar obscenities
and profanity like I have never heard on HF before.

The hobby has changed. What a shame. We Hams *had* a good
reputation for almost a century. De-regulating it has destroyed it
beyond repair.

No, didn't hear him. That's fairly short skip for 20M and we
only hear VE2s when conditions are just right. You are almost
certainly correct that it was someone else using his call
though. Not that there are any legal consequences for doing that
stuff these days, but no one is going to ID with their own call when
they jam. The kill two birds with one stone; jam the other guy and
make it look like it was someone they have a hate out for.

They got the heck jammed out of them on 30M RTTY, and from the
look of the spots 40M is just as bad. Has to be politically
motivated as I've never seen such vicious jamming within 1-2 minutes
of a cluster spot. I gave up and am playing in the ARRL RTTY thing.

73, Paul VE1DX

8619. Acknowledging jammers encourages them!

Yahoo group: DX-IS (2009)
Date: 2009-01-04 16:32:32 UTC
From: CSM(r) Gary Huber
Topic: 8619 Message: 8619

Recent comment on "jammers" and their activities including profanity - I recall our military communications "play book" said not to acknowledge jamming as doing so provided the jammer with information on their effectiveness and encouraged them to continue. If there is no audience or the audience cannot hear the message, why continue to transmit? Never respond to a jammer, just ignore them (and DF them, coordinating off frequency if you can).

Hans is correct. Some years ago I had a HF6V with a ton of
radials under it, and I couldn't tell the difference when the ground
was bare or when there was 3-4 feet of snow.

Also have a friend who was running phased verticals on 30M, and
we always marveled how the snow had no effect on its performance.

Paul, etal - that wuz the main reason I left the lower bands in favour of 10 metres - a whole lot less QRM. Example: 3Y?X in February 2006 I worked them split and gave him an exaggerated report of 3x2 (never moved the S meter) and there didn't seem to be any interference on his tx frequency. In April 2007 I worked N8S (stoopid call) and gave him a 3x1. Try that on the lower bands. I have dozens of countries/entities worked that were barely perceptible - why? No interference or minimal comments like, 'he's up 5' or 'wrong VFO' and an occasional tuning carrier as some think they have to tune exactly where the DX is.

Tried about an hour the other day on 17 CW. He was working a U.S. call every once in a while, but predominatly EU guys were the ones getting through.

Don't need it except for the prefix.

My sentiments exactly. Given the choice between getting a new one on CW or SSB, give me CW any day of the week.

I did break down last year and worked hard on SSB. Brought my confirmed numbers up into the 290s. Unfortunately, that may be indicative of how bored I was with all the rest of the DX (or the lack thereof!). Yes, there was some surprisingly good DX last year, but the run-of-the-mill every day stuff was severely lacking - we don't seem to hear very many Russians lately!

Saw a snippet from a movie recently - something about a guy who worked for the Mob. He walked into the boss's office (played by Albert Finney) and the mayor and another guy were sitting in there. When asked if he knew the mayor, the guy replied "I voted for him 5 times in the last election." The mayor grinned and replied "And that wasn't even the record!"

When I lived in eastern Kansas (yuppieville) they even taxed my pet!

We're going to be so knee-deep in a deficit burden that the guvmint is going to find a way to tax our QSLs via LotW!

Marsha is in the shack in shorts - eat yer heart out! Not that she's that foxy, just that it's so damned hot!

Most of the guys on the list are perfect strangers. Well, not perfect, but you know what I mean!

I met several of them last year when I went to Minnesota. Hans looks like he sounds/writes (as I probably do as well) and Bob is really Mr. Mild-Mannered behind that intellectual facade!

That was my first trip back to Minnesota in many, many years. Had a great time at the W0DXCC convention. Hope to go again some day. We were not carried away either by the deer flies or the mosquitoes!

SB DX @ WW < KB8NW $OPDX.891
Ohio/Penn DX Bulletin No. 891

The Ohio/Penn DX PacketCluster
DX Bulletin No. 891
BID: $OPDX.891
January 5, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NE1B, NJ1Q, WV2B, NG3K, N4AA & QRZ DX, K5XK, KH6BZF, AA8LL, K8CX, K8YSE, N8OFS, K9EL, DX-IS News Site, Pete's-DX-Newsdesk, A35RK, CX3AN, DK8JB, DL6KAC, DL7MAE & The DX News Letter, F5NQL & UFT, F5PFP, I1JQJ/IK1ADH & 425 DX News, RSGB IOTA Web Site, VA3RJ & ICPO and ZL3JT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th/December, through Sunday, 4th/January there were 216 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FW, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP6, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2008 A SPOTLESS YEAR! Lee, KH6BZF/7J1AAP, propagation guru, informed OPDX that "We have experienced some very Sunspot lacking days during 2008." There were 272 spotless days out of the 366 days (Leap Year) or 74.37% of the year's days! August and December were the worst months with 31 and 28 spotless days, respectively. June and November were the best months with 19 and 15 spotless days, respectively. The rest of the months (of the year) were all in the twenties.

2008 DX SOUND BITES! Tom, K8CX, has done it again. He has provided DXers with 120 memorable DX sound clips from 2008. Visit Tom's famous "HAM GALLERY" Web at: http://hamgallery.com/dx2008
While there also check out some of his other features on his Web page, such as: Rare DX Sound Clips of the past, QSL Card Museum, Dayton Photo Galleries and Tribute to Silent Key Ham Operators.

2009 DX MARATHON (Now Underway!). John, K9EL, Program Manager of the CQ DX Marathon, reports: "The 2009 edition of CQ Magazine's 2009 edition of the DX Marathon is now underway! Each year from January 1 to December 31, CQ Magazine sponsors a challenge to work as many countries and zones as possible in the calendar year. For complete rules and submission information, please see our web site at: www.dxmarathon.com. The 2009 official DX Marathon score sheet is now available for download. Remember to submit your 2008 scores by January 31, 2009."

3B7, ST. BRANDON ISLAND (Update - Also 3B6 and 3B9). Ron, K5XK, updates OPDX that Rachid, 3B8FQ, reports that his working trip to St. Brandon Island (3B7), may be rescheduled for February. His earlier 3B7FQ operation was cancelled due to transportation problems. He is also planning a personal holiday with ham gear to Rodriguez Island (3B9), in July, and a return trip to Agalega Island (3B6) in November. The callsigns will be 3B7FQ, 3B9FQ, and 3B6FQ. QSL all three operations via K5XK at his new address per instructions on QRZ.com. More details will be provided as they become available. Meanwhile, Rachid is often active on all bands, 40-10 meters using CW and SSB (from Mauritius).

8Q, MALDIVES. Just a reminder that Andy, G7COD, will be operational for his fifth time from the Island of Embudu in the Kaafu Atoll (AS-013) using the callsign 8Q7AK between January 11-27th (2009). Activity will be CW and SSB on 40-10 meters including 30/17/12 meters. He plans to be operational every day from approximately 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z. Suggested frequencies are:
CW - 7003, 10103, 14003, 18073, 21003 and 24893 kHz (+/- for QRM)
SSB - 7063, 14147, 18133, 21253 and 24953 kHz (+/- 10 kHz)
For comprehensive details on QSL information etc, please check 8Q7AK on QRZ.COM.

A35, TONGA (6m History Continues). Paul, A35RK, continues to be active on 6m enjoying the sporadic E season in the South Pacific. As well as making the first A3/VK 6m digital QSOs on December 26th and the 27th, Paul made the first 6m A3/ZL digital QSO with Duncan, ZL3JT, followed on the 28th with John, ZL3AAU. A35RK to ZL3JT on RTTY is another 6m "first" in amateur radio milestones.

A35, TONGA. World traveller and Uruguay DX Group member Bert, CX3AN, will be active as A35HA from Tonga's main island, Tongatapu (OC-049) for one week starting February 14th. He informs OPDX that he will be active on 40-6 meters with a special emphasis on 30/17 meters using CW and SSB, and only 100 watts from his Icom 706 into dipole antennas. His activity will be limited because he will be on a family holiday trip. Bert will be operating alone this time, not like other trips where his

good friend Mario, CX4CR, usually would join him. QSL via CX3AN.

ANTARCTICA/POLAR WEB INFORMATION. Members of the "French Polar Team" have
been putting together some interesting information/pictures (with music)
of the different polar and sub-Antarctic regions. The Web page also has
details on how to achieve their "Polar Trophy". They have created the
Polar Trophy with the aim to stimulate the radio contacts with these
regions as well as with the polar ships. This challenge is also sub-
divided into the Antarctic Challenge and the Arctic Challenge. Visit
this interesting Web page at: http://www.french-polar-team.fr/index.php
Also, view the following polar ships/stations/islands at:
Rothera (Station R) on Adelaide Island --
http://www.french-polar-team.fr/VP8_Rothera_Station_R_Adelaide_Island.php
Base H on Signy Island (South Orkney archipelago) --
http://www.french-polar-team.fr/VP8_Signy_Station_H_Signy_Island_South_Orkney.php
Marion Dufresne II (Polar Ship) --

Juan Carlos I Station on Livingston Island --
http://www.french-polar-team.fr/EA0_Juan_Carlos_I_Station_Livingston_Island.php

ASIAN TRIP (Update). Frank, I2DMI, has ended his A52RY operation from
Thimphu, Bhutan, on December 30th. However, he has announced that his
9N7DMI activity from Nepal must be cancelled. He returned to Italy on
January 1st. No other details were provided. Remember, A52RY QSOs will
be put on the LoTW and e-QSL the second week of January. Bureau cards
will go out the fourth week of March. You can QSL direct to I2DMI:
P.O. Box 55, 22063 CANTU, Italy. Include a self addressed envelope (SAE)
and sufficient return postage. Please QSL only to his P.O. Box # 55,
22063 Cantu (not his home address).

C5, THE GAMBIA. Niels, OZ8KR, will be active as C56KR from Bakuto between
January 9-14th. Activity will be on 40-10 meters SSB. His equipment is a
FT-857 and wire antennas. After travling in Senegal (6W - no activity
planned) he will be active again between January 23rd and February 4th.
QSL via his home callsign.

C6, BAHAMAS. Operators Karney/W2AFC, Dave/N1EMC and Bill/NE1B (C6AWB)
will operate from Nassau (NA-001, Grid Square FL15) with Tom/C6ANM during
the following contests: CQ WW 160 CW (January 23-25th), ARRL DX CW
(February 21-22nd), CQ WW 160 SSB (February 27th-March 1st) and ARRL DX
SSB (March 6-8th). Additional C6ANM DX activity will be on 160-6 meters
between January 1st and April 1st. QSL via LOTW.

CY0, SABLE ISLAND (DXpedition Postponed). Duane Traver, WV2B, the CY0
DXpedition Team Leader, sent out a press release on January 1st, that
states the following (edited):
"Dear Fellow DXers,
Reluctantly, due to the current U.S. economic situation, the DXpedition
team has decided to postpone the CY0 DXpedition planned for 2009. While

we are hopeful to reorganize the DXpedition {possibly for 2010}, we have decided that rather than tie up the funds so graciously made available by our sponsors, we will return donations received so the sponsorship may be available to other DXpeditions for this year. Any sponsoring organization may feel free to contact me with any questions regarding the matter. We are hopeful that our kind sponsors will be willing to renew their sponsorship when the Dxpedition is able to be reorganized in the future. The sabledx.com website will remain functional for the time being. Wishing all good DX and 73.
Sincerely, Duane Traver, WV2B Team Leader"

E4, PALESTINE (Update). The E44M is now active until January 11th. Activity will be on 160-2 meters using CW, SSB, RTTY and all the digital modes with a maximum power of 1KW. They will have 3 stations on the air active with beams, verticals and wire antennas. The E44M arrived late on January 1st, but did not start setting up until the next day. Arturo, IK7JWY, has been named as their pilot station for their activity. They state, "The function of the pilot station will be to collect requests and suggestions relating to the DXpedition, and then forward them to the team, and communicate to the public any instructions or information from the team." The pilot station will be only using the forum at http://www.hamradioweb.org/forums/forumdisplay.php?f=39
to receive messages from users in the special area of discussion.
The E44M Web page is at: http://www.dxcoffee.com/e44m

FO, FRENCH POLYNESIA. Phil, F5PHW, has received a 2 year assignment in Tahiti which will begin during the summer of 2009. He intends to be active on all HF bands from 80-10 meters using only 100 watts into a few different antennas composed of a doublet or a HF6VX vertical, and a Spiderbeam. Modes of activity will be mainly CW and Digital with very little SSB. QSL will be by LoTW, and there may be a QSL Manager who will be chosen later. More information is forthcoming, especially about his callsign.

GB40, ENGLAND (Special Event). Look for special event station GB40WAB to be aired between January 1st and December 31st to celebrate the 40th anniversary of the Worked All Britain Awards Group (WAB). Activity will not be at a permanant location and may be used from any of the 7 UK countries. The GB40WAB callsign will be running for the entire year, but other GB*WAB callsigns will also be on the air along with their club callsigns of G4WAB and G7WAB, using the club identifier prefixes of GX, GC, GS, GN, GP, GT and GH. Working these stations is an integral part of the WAB award. The WAB does NOT require QSL cards to be sent to them, but all contacts made by GB40WAB will be QSLed by them via the bureau. For more details, please see their Web site at:
http://www.worked-all-britain.co.uk
ADDED WAB NOTE: The special event callsign GX4KPT (by the Keep People Talking CASHOTA Club), used during the "Three Castles In One Day" operation in December, has a new WAB book number of 18222. QSL via M0DOL, direct or by the bureau.

H7/YN7, NICARAGUA. Operators Stan/AC8W, Hank/K8DD, Jim/KB8TXZ and Lee/
N8LJ will be active for one week starting February 14th. Their activity
will include the ARRL DX CW Contest (February 21-22nd). Emphasis will
be on 160/80 meters and 30/17/12 meters. Their callsigns (TBA later)
will be either be H7/homecall or YN2 callsigns. QSL via info on QRZ.com.

IOTA NEWS.............................
NA-076. Wade, AA8LL, will be active as AA8LL/4 from Cedar Key, FL,
between 2200z, January 17th and 1700z, January 20th. Activity
will be holiday style on 80-17 meters, mostly CW on the IOTA
frequencies and RTTY using only 100 watts and wire antennas.
This operation also counts for USI: FL041S as Way Key. QSL
direct or by the bureau to AA8LL. Logs will also be uploaded
to the LoTW.

P4, ARUBA (SA-036). Peter, EA5GVH, will be active as P40PZ and on holiday
between January 12-28th. Activity will be on 80-6 meters using SSB and
the digimodes (PSK, Olivia, FeldHell, SSTV, RTTY and possibly others).
QSL via EA5GVH. Visit his P40PZ Web page at:
http://www.mydarc.de/df7dq/aruba2009.htm

PJ2, NETHERLANDS ANTILLES. Members of the Caribbean Contesting Consortium
(CCC) will activate Signal Point Station on Curacao (SA-006, WLOTA
LH-0942) as PJ2/homecall during the end of February. Operators mentioned
are Dan/N1ZZ, Geoff/W0CG, Jim/WI9WI, Mark/N5OT, Mal/NP2L, Jim/K6ZH and
Charles/WA9S. Their main goal is the ARRL DX CW Contest (February 21-22nd)
as a Multi-? entry using the callsign PJ2T. QSL PJ2T via N9AG or LoTW.
QSL all others via their home callsigns. Visit the CCC Web site at:
http://www.pj2t.org

QSL INFO AND NEWS.....................
QSL ROUTES by Johannes, DK8JB:
3Z0HNY via SP2FAP
KZ6C/KH2 via JA1CGH
RQ9I via RW9IM
YB8XM direct (PO BOX 151 AMBON 97001)

LOG ONLINE. The log for the special event station 4A1DXXE is now
available online at:
http://www.dxxe.org/logsearch/index.php?cmd=preselect&log=4A1DXXE
It is planned to update the online log once a day until activity ends.
QSL for 4A1DXXE is via N7RO or LoTW.

NO LONGER THE QSL MANAGER FOR CT3BX. Hermann, HB9CRV, announced that
as of December 31st, 2008, he is no longer the QSL manager of CT3BX.
No new QSL Manager has been nominated and the logs are closed.

QSL UPDATES FOR HC8N and K5S (NA-082). Randy, W5UE, reports that all
direct requests received for HC8N as of December 19th, have been answered
and are in the mail. The remaining incoming QSLs of 2008 for HC8N should
be in the mail by January 5th. QSL cards for K5S/K5Z, East Ship Island,
MS (IOTA NA-082) activity in October have been received from the printer
and direct requests have started going out. The K5S team was expected to

have a "QSL Party" on January 3rd and the remaining direct requests received to date should be answered then. Randy states, "I have also started accepting online requests for direct cards for stations I manage. The process is fairly simple. Make an online donation via PayPal to cover my postage/card costs and send me QSO data via E-mail. My hope is that this method will be more cost effective and efficient for both you and me as manager. Please see my Web page for details at: http://w5ue.net/qsl-w5ue.html
I welcome any feedback you might have on this process. Bureau requests are now being answered via the GlobalQSL service. Several thousand backlogged HC8N requests have already been entered and should be finding their way into the bureau system soon. I apologize for my lack of bureau responses since hurricane Katrina... this should put me back on track."

HAVE PATIENCE! QSL cards are still being received for the many UA4WHX operations. Vlad is still sending them out.

QSLS VIA LOTW: 5Z1A, 5Z4DX, ER0WW, H44MY, PZ5RA, SJ2W and XV4BM

QSLS RECEIVED VIA MAIL: 5N/LZ1QK, 9L0W, 9L1X, 9M6XRO/p, 9Q1D, C6AKX, C6ATA, C91R, CN2B, CU2X, ER0WW, HB0/PA3FGA, OA4BHY/2, OJ0B, OJ0J, PJ7/K1XM, S79NS/P, TO4X, UA9MA, V73NS, VK1ANU/5, VU4MY and YU8/OH2R

QSLS RECEIVED VIA THE BUREAU: 6W1SJ, 9A73AA, DR1A, HB9LH, HB10DX, J48IO, J48YL, LY4L, LY2FN/P, OX3MC, PA20NAFRAS, R375I, SO9R, TA2DS/0, TC0SV, TK/ON4AXU, V31FG/P and YI9RKB

QSL.NET & QTH.NET ANNOUNCEMENT. Al Waller, K3TKJ, announced on December 31st (2008) the following (edited):
Dear fellow hams,
After 13 years of providing hams with no cost web space, e-mail forwarding and mailing list services through QSL.net and QTH.net, I have decided to retire. All QSL.net and QTH.net servers and Internet connections at my home QTH are being turned down.
Scott, KA9FOX, has graciously decided to pick up where I left off, and he is in the process of migrating all services to new hardware. See below (on <http://www.qsl.net/index.html>) for an update on the status of the migration.
I want to thank all of you for all of your support over the years, and I hope that you will support Scott as he takes over the reigns.
See you on the air! 73 - Al Waller, K3TKJ"

TS7, TUNISIA (Update/IOTA Op). Members of the France Provins ARC (F6KOP) and some international operators will activate Kerkennah Island (AF-073) using the callsign TS7C between January 8-19th (2009). This 12 day operation would not be possible without the help of Mustapha, DL1BDF. According to the latest press release (edited) by Maurice, F5NQL: "All the luggage is packed and sorted by 25kg parcels (one per operator). Mustapha, DL1BDF, team member, was a great help to so we could obtain the use of the special callsign TS7C. As indicated in "Press Release No.1, some new comers in the DXpedition have been included in the team, to permit them to get some more skill, operating side by side with long time

experienced DXpeditioners. They are the future operators of F6KOP next expeditions. We ask your indulgence for them; they are learning what to do in the pile-ups, and for some of them, TS7C will be their first DXpedition. We will stay on Chergui Island (IOTA AF-073 and WLOTA 3459), in the Kerkennah Group. Their departure is scheduled from Paris, on January 8th, in the early morning. The team will begin to set-up the first station immediately when they arrive at the Kerkennah Hotel. So, the first signals are expected the same day at the end of the afternoon or early in the evening. The departure from Kerkennah is scheduled very early in the morning of the 19th. So the operation end will happen sometime around 1800 or 1900z, in the evening of the 18th. As usual, one station will continue to be on the air in the evening as late as possible. For the new bands and/or modes hunters, we will be operating on the HF bands, 160-10m, using CW, SSB, FM, and the Digital modes (RTTY, PSK31, BPSK, SSTV). We will pay special attention on the lower bands, 160/80m. Of course you'll find operators on the other bands and modes. Six stations will operate at the same time, 24 hours a day. Sometimes it will be possible to hear TS7C on the same band but different modes. The antenna farm will consist of vertical and wire antennas for the lower bands and Spiderbeams for 40-10m. Since the first press release the team had to be changed a little. The complete team going to Tunisia has been finalized and the team consists of the following:
Frank/F4AJQ - SSB and Digimodes; Team leader and former leader of all the past F6KOP DXpeditions
Mustapha/DL1BDF - SSB and Digimodes; Public relation with Tunisian authorities
Bernard/F9IE - CW traffic leader
Bob/N6OX - SSB traffic leader
Jean-Paul/F8BJI - Digital traffic leader
Sylvain/F4EGD - SSB and Digimodes; He is also the QSL Manager of the DXpedition.
Gerard/F2VX - SSB
Bill/N2WB - CW and SSB
Michel/FM5CD - CW, SSB and Digimodes
Sabastien/F5UFX - CW and SSB
Sabastien/F8IJV - SSB
Jean-Luc/F6BIV - SSB and Digimodes
Norbert/F6AXX - CW
Alain/F6ENO - CW
Dieter/OE8KDK - SSB and Digimodes
Stefan/OE8SKQ - CW
Mathieu/F5PED - CW
Eric/ON7RN - CW and SSB
Henri/F1HRE - SSB
Franco/F4EVR - SSB
Michel/F5EOT - SSB
Arno/OE9AMJ - CW and SSB
Joseph/F6CTT - SSB and Digimodes
Tony/G0OPB - CW and SSB
Gabriele/I2VGW - CW, SSB and Digimodes

XYL Anne Marie LAURENT, Photo reporter

BACK OFFICE (still the same):

Topic: 8575 Message: 8633

Well you could live in Texas where up until a few years ago the state gas tax paid for nearly all of the highway construction and repairs in Texas.

Then the State Legislature, which meets in odd years from January through June, in all of its infinite wisdom decided to lump the gas tax into the state's "general" fund to stave off a tax increase for the general fund.

Now we have a governor who loves toll roads and is committed to building toll roads all over the place, even leasing them out to foreign corporations to run rather than the state. The state even waited until one state highway (TX 121) was nearly finished with state tax money then at the last minute after spending tax money decided to make it a toll road, and the money wouldn't go for that road, but for "other" roads all over the state.

Plus now the state wants to raise the state gas tax an additional 10 cents a gallon to pay for "highway repairs" because people are traveling less and thus the state isn't making as much money. He even wants to raise annual vehicle registration fees (license plates) to several hundred $$ a year.

What's next, toll booths at the end of everyone's driveway? One state rep is proposing that each vehicle owner be taxed on the number of miles driven each year. Exact details haven't been announced if you'd pay the tax at annaul inspection time or when you renew your licnese plates, but you'd pay a tax based on miles driven, even though some might not have been in Texas.

As they say its dangerous times in Texas when the state legislature is in session. Back in the 1970s one state senator, who was tired of fellow senators introducing resolutions praising people and no one ever knowing who these people were. So he introduced and got passed a resolution praising Albert DeSalvo of Massachusetts for his efforts at population control. Albert DeSalvo was the accused "Boston Strangler."

I'm sure this staunch Republican (me) is already on the FBI's and Homeland Security's watch list. Years ago back in the 1970s and early 1980s before I earned my license I was an SWL and periodically received program "guides" for English language broadcasts from Radio Moscow, Radio Havanna, etc.

Also, my former next door neighbor, a retired Dallas TX Police Officer now deceased, subscribed to "Soviet Life" magazine just to irritate the Postal Inspection Service and the FBI.

8634. Where in Palestine are the E44M team?

Yahoo group: DX-IS (2009)
Date: 2009-01-05 00:50:19 UTC
From: Paul M Dunphy
Topic: 8634 Message: 8634

Without getting into the politics of it, does anyone know where the E44M team are located? I presume the West Bank, and not Gaza! At any rate, I'm just curious if anyone knows from which city/location in Palestine they are operating?

73, Paul VE1DX

8635. calling out of turn

Yahoo group: DX-IS (2009)
Date: 2009-01-05 03:08:12 UTC
From: Danny Douglas
Topic: 8635 Message: 8635

Sitting and listening to E44M on 40 meters. He is working, and saying UP3. The following are some of the things I heard in a 5 minute period(when I could actually hear him when someone wasnt calling him on HIS own freq.

He called They called WE3L 8LSK ,K2QLN, K8LSK
(same one - several times) Loudest of 3 or four.

W4RJ WA5FC

N1CW 4 OR 5 JUMBLED IN TOGETHER

At this point, there were not enough calling on his frequency, so someone came in and said QRL? Three responded to him.

K4BM GT3EH (or ES - as he sent it both ways)

VE2TZ K7SC, NL, EI etc.

All of these on 7028, which was up exactly 3

I would apologize only if those calls I heard, were not on the air, and apparently someone else wanted to play Pirate, and get the credit for someone other than themselves.

Now- I know that WE ALL ocassionally call when we shouldnt, We hear him say CQ, we call twice or three times, go back and there is nothing there, we call again *not realizing he heard someone else call once, responded to them and has already turned it back to them before we stopped our second or third call ((how DO they do that??--- especially on vocie calls) , but we try not to. But to be the one that people can hear over-and-over should be embarrasing. Especially when giving ones call equates to yelling your name out loud in church.

This is exactly what makes it difficult for all of us to work these expeditions. Interfering with someone else, out of turn equates to cutting in line at a movie theater only there, someone is likely to get punched in the eye.

I paraphrase the Golden Rule: LISTEN UNTO OTHERS AS YOU WOULD HAVE THEM LISTEN UNTO YOU.

Why would you call twice or three times?

>((how DO they do that??--- especially on vocie calls)

Easy - he heard someone giving their call ONE time and came back to him
while yur still calling.

> but we try not
> to. But to be the one that people can hear over-and-over should be

Some have found that the DX will work you for calling a dozen times wiffout
letting go of the pickle jez to get you off the band

> LISTEN UNTO YOU.

I thought it wuz: Do unto others as you would have others do unto you - BUT
do them furst! Or wuz it Do unto others before they do unto you?

<snip>

I guess I got there before the mess started. It was actually civilized for the first 10 minutes when they switched from SSB to CW. I managed to get them after about 5 minutes of trying, but the natives were getting restless on this TX frequency. As usual he was sending UP 2 USA after every QSO, and still the EU guys kept calling.

This left me in the usual position. I'm not in Europe, and I'm not in the USA, and I'm not in JA. (Those are the three areas 95% of all DXpeditions call for - you know, EU EU or JA JA or USA USA ONLY?) I figured, given NAFTA, I could sneak in under the USA's turn, so I did. They are never going to call for Canada.

I wish someone would convey to DXpeditions to ask for NA instead of USA. It's not like there are a million DXers in Canada or Mexico. They don't say F, DL, G, etc for Europe, so why USA? Oh well, I worked them anyhow, and then went back and played the RU game on teletype.

Thanks for the RTTY QSO today. I couldn't hear K1ZZ either (on 40M), but worked him later on 80M.

"I wish someone would convey to DXpeditions to ask for NA instead of USA."

Wonder what a Brazilian has to say about this ;-)

VP6DX is the only expedition I recall asking for SA specifically.

I assure you, if I ever went on a DXPedition, "USA" would mean
"Western Hemisphere," and I think most ops would agree.

Maybe they should send "WH" but that would just confuse a bunch of
people who seem really on the edge of non-comprehension if not
plummeting down into the chasm.

"USA" means "Europe shut the #($& up"

I worked'em all plus a bunch of deleted ones by ignoring "USA ONLY." Never had one DXpedition tell me to QRX because I was in Canada. The only reason I brought it up is because I feel a millisecond twinge of guilt before I send my call when they are asking for a specific country other than mine . . . but it only lasts a millisecond.

VP6DX was the DXpedition by which all others will be measured for decades to come. When guys on the other side of the planet are working them during the first couple of nights on 160M barefoot by loading up an 80M dipole, you know they (VP6DX) are in a class all of their own.

As far as what a Brazilian thinks, PY7ZZ is from Brazil, and he has them all worked too. I don't think he did it by waiting for them to specifically call for Brazil. :-)

The real trick is being able to work them when they are calling for EU only, and it's your last shot at them 'cuz propagation is fading and they are leaving the next day. Can't tell you how that's done, but it's been done it more than once and the caller didn't get a NIL! Us Old Timers have some secrets we can't share! >:-}

Hmmmm When I was out, US meant USA and Canada, and any Mexicans that wanted to throw in, and I knew the difference. Or CQ central and South America". Thats the one the Mexicans seemd to not know where they lived. Is just easier to say that way, if that is what you want. . Most over here understand that. But - If I really wanted to hit particular states, Those are what I asked for. " CQ West coast" CQ East Coast, CQ midwest, CQ Southwest, CQ western Canada-- or more often that not CQ Texas, CQ North or So Dakota, etc.
In Hong Kong, it was 'CQ DX - NO JAPAN" I had so many of those, I didnt count QSL cards, but just weighed them. Maybe not a supprise, but the Japanese listened to that, and followed my instructions. They knew they would get their turn, and could hear me most anytime I was up.

"I wish someone would convey to DXpeditions to ask for NA instead of USA."

Wonder what a Brazilian has to say about this ;-)

VP6DX is the only expedition I recall asking for SA specifically.

I assure you, if I ever went on a DXPedition, "USA" would mean
"Western Hemisphere," and I think most ops would agree.

Maybe they should send "WH" but that would just confuse a bunch of
people who seem really on the edge of non-comprehension if not
plummeting down into the chasm.

"USA" means "Europe shut the #($& up"

8643. Re: calling out of turn

Yahoo group: DX-IS (2009)
Date: 2009-01-05 11:58:06 UTC
From: Art Burke
Topic: 8635 Message: 8643

The same people calling out of turn and ignoring requests for certain calls are the same people you see on the road everyday - the rules apply to someone else.

Isn't that obvious when the posted speed limit is 45 and virtually everyone drives well over that? Why should it be any different with amateur radio?

There was a time when it was thought that amateurs were "a cut above" average society. Since average society now seems to be immersed in the "me too" generation - along with the "I want it now" generation...

Society, in general, seems to no longer have any patience. If the amateur exams are truly being "dumbed down," then the guys on the air are becoming even more "average."

And when no one's really in charge of the mob.....

Just checked here and there were no signals at all, but suddenly 20-30 second later I saw and heard one signal, then a dozen more popped in. Copying O0FZ, SM5GRD, PD0DK,GW0GHF, R0DK N4DC, ON4DS, SM5GRD and HA1ZW. Signals were increasing in strength then suddenly appeared to be getting weaker again, then once again came up stronger. Its going to be one of those days.

Well, the LIDs just drove E44M off of 30M. Constant jamming on
his TX frequency (10.123 MHz) for about an hour made it impossible
for him to work anything.

Just imagine what will transpire if a 7O or P5 operation ever
surfaces. I honestly believe it's all over. It was a hobby of the
20th century.

I think you'll find, Dale, that the JAs we hear, east of the Mississippi, are generally among the strongest of the JAs. And, for the most part, I have to agree that JAs are generally pretty good operators. But those living in the Pacific and along the Pacific coast might disagree.

Art, N4PJ, kind of said it all earlier today, that our "gotta have it now, at any cost, me first, damn the others" attitude is killing us. And Paul, VE1DX, lamented that the 20th century WAS the century of ham radio.

A few minutes ago, some Italian posted that E44M would soon show up on 7025. I'd been listening there for over 40 minutes and there wasn't a signal to be heard. But suddenly it became a tune-up frequency, until nothing showed up. Just a second ago, at 2304, there was another burst of activity. But there's nothing there, but WB2EZG is calling anyway.

You can blame it on "everyone" if you want, but let me suggest something on my little personal crusade.

First, let's talk about driving. I live in the Metro DC area, in the Maryland suburbs inside the beltway. Driving out of here for Christmas in Erie, PA took forever. I-70 kept coming to a standstill every 5 miles or so, and it seemed to me that there was one very simple reason.

A small percentage of drivers race ahead in the merge lane to try to get in front of everyone. It's one or two people out of dozens of cars, but they ruin everything. Everyone has to brake because there's not enough room to merge smoothly. That's the big story around here. Most of the problems are caused by a handful of erratic jerks. It doesn't take many to really screw things up. There's a huge density of cars and even if 98% of people are driving well, the remaining 2% are capable of stopping traffic.

We don't have to blame 100% of drivers for the problems in heavy traffic.

And I think the same is true of pileups. If there are 10,000 people calling the DX and 1% of them are blithering idiot constant callers, that means 100 people are spread over a few kHz ALWAYS ALWAYS calling.

If the pileup only were 100 people, there'd just be one. If the pileup were only 50 people, half the time there wouldn't even be one.

But, you might say, the blithering idiot constant callers cant find the QRG that the DX listens on, so maybe they're not such a problem?

But they have help:

N4PJ 10112.0 E44M wrked on 10115.4 0013
06 Jan

- - - - - -

A small percentage of humankind doesn't give a damn about others. Most of us do. A tiny percentage don't.

But the DX gets spotted every 30 seconds and we collect a few thousand callers, we're pretty much guaranteed to collect a bunch of mindless

moron callers and a bunch of DX Cops.

Worst of all we collect BLIND CALLERS and JAMMERS. They either CAN'T or DON'T EVEN WANT to hear the DX. The former wants to work the DX and can't hear it, and the latter doesn't care if they hear the DX.

And a spot that includes the QRG where the DX is listening? That tells every mindless moron and blind caller where to go. They don't have to listen. They don't have to figure out a pattern. N4PJ tells 'em.

We can all blame this on the downfall of society, but in my experience society remains composed largely of good, decent people, and ham radio remains composed largely of good, decent ops who shut up when the DX calls someone else. But if you tell every LID and DX Cop and Jammer where the DX is with a constant play by play on the cluster, what do you expect is going to happen.

If a P5 or a 7O comes on the air, for god's sake, don't spot it. No one spot it, ever. The second it is spotted, it's all over except for the very loudest stations in the countries with best propagation. If your friend spots it, tell them off. Call your DX buddies on the phone or the local repeater or send them a private email. Use internet chats. But CONTROL THE INFORMATION and consider the consequences of not doing so.

Spotting on the global internet-connected cluster is NOT the same thing as that old DX Phone Tree one-ringing all your friends in the middle of the night. It's not the same as your spotting repeater. It's not even the same as a more fragmented packet cluster. If a P5 came on, would you one-ring your kilowatt LID neighbor who was always stepping on peoples' toes in pileups? I wouldn't.

Hundreds of thousands of hams see these spots. What happens when a hundred of them, a mere 0.1%, are terminal LIDS attracted to some rare DX?

And you give them the exact frequency the DX was last listening on?

Following up on the last post.

Do you personally know a LID who blind calls in pileups and never shuts up?

When you hear bad behavior in the pileups, is it ever someone you've actually met, had a QSO with, or even heard of?

If DX Pileup problems are due to a general breakdown in society, a general impatience and me-firstness, then each and every one of us should know at least one LID in addition to being one ourselves, right, or know two if we're not?

So, do you know a LID? I can't really think of any.

Do you personally know a LID who blind calls in pileups and never shuts up?

When you hear bad behavior in the pileups, is it ever someone you've actually met, had a QSO with, or even heard of?

If DX Pileup problems are due to a general breakdown in society, a general impatience and me-firstness, then each and every one of us should know at least one LID in addition to being one ourselves, right, or know two if we're not?

So, do you know a LID? I can't really think of any.

1. You're assuming that N4PJ spotted the correct QSX.

2. Whether he did or he didn't, there is something to be said for concentrating the poor operators on one frequency.

73,

Dave, AA6YQ

You can blame it on "everyone" if you want, but let me suggest something on my little personal crusade.

First, let's talk about driving. I live in the Metro DC area, in the Maryland suburbs inside the beltway. Driving out of here for Christmas in Erie, PA took forever. I-70 kept coming to a standstill every 5 miles or so, and it seemed to me that there was one very simple reason.

A small percentage of drivers race ahead in the merge lane to try to get in front of everyone. It's one or two people out of dozens of cars, but they ruin everything. Everyone has to brake because there's not enough room to merge smoothly. That's the big story around here. Most of the problems are caused by a handful of erratic jerks. It doesn't take many to really screw things up. There's a huge density of cars and even if 98% of people are driving well, the remaining 2% are capable of stopping traffic.

We don't have to blame 100% of drivers for the problems in heavy traffic.

And I think the same is true of pileups. If there are 10,000 people calling the DX and 1% of them are blithering idiot constant callers, that means 100 people are spread over a few kHz ALWAYS ALWAYS calling.

If the pileup only were 100 people, there'd just be one. If the pileup were only 50 people, half the time there wouldn't even be one.

But, you might say, the blithering idiot constant callers cant find the QRG that the DX listens on, so maybe they're not such a problem?

But they have help:

N4PJ 10112.0 E44M wrked on 10115.4 0013
06 Jan

- - - - - -

A small percentage of humankind doesn't give a damn about others. Most of us do. A tiny percentage don't.

But the DX gets spotted every 30 seconds and we collect a few thousand callers, we're pretty much guaranteed to collect a bunch of mindless moron callers and a bunch of DX Cops.

Worst of all we collect BLIND CALLERS and JAMMERS. They either CAN'T or DON'T EVEN WANT to hear the DX. The former wants to work the DX and can't hear it, and the latter doesn't care if they hear the DX.

And a spot that includes the QRG where the DX is listening? That tells every mindless moron and blind caller where to go. They don't have to listen. They don't have to figure out a pattern. N4PJ tells 'em.

We can all blame this on the downfall of society, but in my experience society remains composed largely of good, decent people, and ham radio remains composed largely of good, decent ops who shut up when the DX calls someone else. But if you tell every LID and DX Cop and Jammer where the DX is with a constant play by play on the cluster, what do you expect is going to happen.

If a P5 or a 7O comes on the air, for god's sake, don't spot it. No one spot it, ever. The second it is spotted, it's all over except for the very loudest stations in the countries with best propagation. If your friend spots it, tell them off. Call your DX buddies on the phone or the local repeater or send them a private email. Use internet chats. But CONTROL THE INFORMATION and consider the consequences of not doing so.

Spotting on the global internet-connected cluster is NOT the same thing as that old DX Phone Tree one-ringing all your friends in the middle of the night. It's not the same as your spotting repeater. It's not even the same as a more fragmented packet cluster. If a P5 came on, would you one-ring your kilowatt LID neighbor who was always stepping on peoples' toes in pileups? I wouldn't.

Hundreds of thousands of hams see these spots. What happens when a hundred of them, a mere 0.1%, are terminal LIDS attracted to some rare DX?

And you give them the exact frequency the DX was last listening on?

73
Dan

Truer words were never spoken, Even at Internet speeds, by the
time a spot propagates worldwide and the DX pileup sees/reacts to it,
the DXpeditioner(s) are listening somewhere else. Hence having
everyone call on the hypothetical 10115.4 KHz frequency suits me! :-)

That's not realistic. What about all the ego-hams? The second they're finished logging the contact they're posting it for all to see their prowess. A Pee Five comes up and withing 30 seconds there will be dozens of spots - same for the 7O. Fortunately I'm not one who would spot either one.

I won't comment on yur traffic as I lived in Los Angeles where we had Road Rage. Road Rage is caused by 'In yur face' driving - 'cause I can do it...

Yes, there is, as long as that type of spot from op after op isn't an accurate play by play, something I've seen a fair amount. I know it's true because I'm tracking the pattern myself, and you know it's true too ;-)

The cluster is a useful tool, but I think it has undergone a certain phase transition even since *I* started in ham radio.

Do you have a good feel for how many people use telnet clusters now compared to how many people did in, say, 1998?

I'd guess 10% of DXers in 1998, and 99% now. Maybe I'm off somewhat, but of course the increase is dramatic. I despise DX Clusters. They have taken away the skill in finding the DX on your own, and even if you do, you have 30 seconds tops to work it before one of the Cluster Braggers has to spot it.

In 1990, there were no DX Clusters, and it was a heck of a lot better. However, today I make full use of DX Clusters because that's the way it's done these days (point and click.) If I want to be competitive, I need to use the same technology as the competition. I can tune and find my own DX (and sometimes I do), but when something I need is on a ship to some barren rock in the middle of nowhere, I have to use a DX Cluster if I want to work it.

Some will argue otherwise, and they might well work some DXpeditions with no DX Cluster help (and with their proverbial 5 watts to a random wire and a tuner) when the pileups are worked dry. As much as we hate what DX Clusters have done with the "brag spots", we have to live with it. Don't waste your energy trying to get these guys to stop spotting DX they work. If you do, I wish you luck, because you're gonna need it.

Especially don't try to stop one particular mega-station on the East Coast . . . I can guarantee that within 5 seconds of my hearing him work something, the spot flies out with a "THANKS - EASY!" in the comment section. (Sometimes it's "THANKS! 8TH BAND!") Of course the DXpedition can't see the spots, so the comments are just to tell the rest of us he worked it. The reason I am telling you to leave him alone is because if you mention his call, he'll sign your email up for lots of porn sites and send you nasties through an anonymous emailer! :-) A real gentleman Ham, this guy is.

I'm sure there are a lot more telnet cluster users now than there were 10 years ago, but I have nothing quantitative to back up that perspective. One certainly wants to find the DX before its spotted or (worst case) get to a needed station before anyone else does.

My earlier point is that some spots are intentional misdirections. One way to clear a hole in a nasty pileup is to spot a QSX frequency away from that hole. Another is to spot an even more desirable DX station on some other frequency. Putting the word "CQ" in the spot notes makes this almost irresistible; "begging", however, strains credibility.

Clusters do have good uses:

1. you can determine a needed station's pattern of operation, which helps in planning a stakeout

2. you can get a good feel for propagation

3. you can communicate that a station is working split without transmitting on the DX frequency

8664. When Good Ops Go Bad

Yahoo group: DX-IS (2009)
Date: 2009-01-06 02:25:18 UTC
From: Lee Jennings
Topic: 8664 Message: 8664

Last nite around 1400 utc (middle of the nite in ZL I couldn't sleep so fired up my old FT1000D and sure nuff there was E44M on 30M CW - "CQ USA E44M UP3" I waited for the usual polite 15 minutes while he continuously called CQ USA ONLY and made a call up3. Protocol dictates I should have waited my turn until he called CQ PAC, which from experience I knew would never happen. He was 599 and immediately answered ZL? thinking my suffix was ZL.

I repeated my call and got "SRI USA ONLY CQ USA E44M UP3" Which is probably what I deserved and I accept that. But most savy DXpedition ops would have given me a 599 TU and called CQ PAC then gone back to the USA pack. It's not as if the op was up to his eyeballs and shoveling them at 230 per hour. I would guess that he was struggling to get 40 an hour but he certainly was getting a lot of "CQ USA ONLY E44M UP3" bursts out there.

Meanwhile on this op's TX frequency all hell was breaking loose. Carriers, Ditters and Commenters ran rampant with blind rage and frustration and consequently when the E44M op did hear and try to work a USA station, the station found it very difficult to hear the confirmation.

I have to admire the op for his single minded determination in the face of mounting frustration from EU, PAC, SA and AS who were having a call every now and then. This guy wasn't having anything interfere with his CQ USA quest!!!! He just blithely pushed on.

Eventually the pack drove him off 30M. The amazing thing is that he had great ears and his CW was very good.

There is a moral in this story for potential DXpeditioners.

1) Be a bit reasonable and flexible
2) Your signals go everywhere - not just to one call area
3) Ignore at your peril the general ham community who want to work you.
4) Patience is not a virtue of DXers.
5) Talk to your pileup - they are usually quite reasonable in understanding what you want to do.

Great post, Lee. Bang on in all respects. (I was there at
14:00 and a bit later and heard him driven off by the QRM, but didn't
hear you get the bum's rush.) Either way, there is a lot of wisdom

in what you said.

> on the DX frequency

Absolutely, all of those things are useful and good reason to spot some stations. #1 is particularly useful in my opinion, and yes, it wouldn't be useful if no one spotted. I don't have any expectation that that would ever happen though.

The cluster has some excellent uses, but I think it also has the potential to REDUCE the number of stations that get to work a particular DX station during a particular time frame, if that station doesn't have an iron constitution in the face of QRM and terrible operating. Some DX will even go away if a pileup starts.

There's no way to know what's better, of course, but I think it's worth having a little nagging doubt in both directions, to carefully consider it for rare DX. And sure, there's always going to be SOMEONE who spots everything they work to brag, and some might even be some trying to intentionally work up a frenzy to disrupt those who come later.

But there are some people who just think if it hasn't been spotted yet it belongs on the cluster, bar none, and I'm not sure I agree with that... especially if whatever it is has managed to attract a pileup even without a spot.

That's basically my test these days:

1) Is there a pileup even without the cluster, or even one or two excited callers?
2) If so, am I willing to spot it before I work it?

If #1 is "yes" and #2 is "no," I figure the other callers already on frequency have won some right to have their otherwise unencumbered shot at that DX even if I beat them.

I realize that implies an opinion about the relative value of tuning around and listening vs. tuning to cluster spots and working them. I further realize that one could ask why I don't take it a step further

and let them have the DX before I work them.

But I hear a difference between a slowly growing pileup on interesting DX and a pileup that started instantaneously after a cluster spot, and it's a difference that makes me want to leave some stations totally unspotted.

It's not an opinion I've always held. At one point I thought it was just a public service to spot cool stuff I was hearing, but I've changed my mind. I spent a *lot* more time on the radio all hours of the day when I was first starting, and I still feel like I heard more jamming, bad behavior, more cops, and more "FU" on CW and general discontent in 2008 than in 1998...

Maybe I'm just getting old and grumpy ;-)

> Do you personally know a LID who blind calls in pileups and never
> shuts up?

If you tune across any major split pileup, you will find that these ops are very numerous. It's getting harder and harder to find the frequency of the station that the DX is actually working, because so many are not only calling, they are responding with 5NN as though they actually heard the DX come back to them. Then they continue calling. It's clear that they are not tuning through the pileup themselves looking for where the DX is working stations. I do not keep track of who these ops are, because time spent copying their calls is time wasted.

I do, however, keep track of the calls that consistently obliterate the frequency of the DX station, making copy unnecessarily difficult for everybody else on frequency. I keep a private and short list of the worst offenders, which I will never post online. Over the years, this list has grown to only 43 calls, and some are already silent keys. To make my list, one must obliterate many pileups over a span of time - clearly indicating that no other style of operating by the op is conceivable.

Let's elaborate by stating that there are two basic types of lids:

A. Stupid: Ops who are not aware of the amount of QRM they are causing others.
B. Rude: Ops who simply don't give a s#!t.

Yes, the two categories often overlap, but I think most would fall into one of these categories. That moonbounce guy here in W5-land is definitely not stupid.

I also take note of ops who can consistently and discreetly beat me in pileups without ever causing problems on the DX frequency. My own DX Elmer was one of these (W9AW, active in the 60's & 70's). Through the years I have always tried my best to follow his and similar examples, even in contests. The rule is simple:

The first priority in ANY pileup is to keep your own QRM on the DX frequency to a minimum. Working the needed DX is 2nd priority. No exceptions, but some mistakes may occur. My apologies in advance.

Well OK, so that's another sort of big problem... and yet, you've got 43 guys, some dead. There are maybe 2 million licensed hams, give or take.

So we have 0.002% of hams who are your worst offenders.

Let's say for every caller who routinely calls on the DX frequency, there are a hundred who do something a little disruptive. That's another 0.2% A thousand for every one of your super lids takes it to 2% of licensed hams who do something disruptive.

Of course, not everyone's active, but your list is not saying end of civilized society to me ;-)

Well this is a problem... you're going to have to fall into the good op category just like everyone else I ever exchange words with on the subject.

So where's the "gimme generation," the impatient hordes that will ruin ham radio?

They must not use the internet.

From: OE8SOQ Helmut
Topic: 8670 Message: 8670

Hello group, fellow DXers,

received this today from the austrian member of the group, OE8KDK, and thought you might not have it yet. If you got it via other channels, please discard it.....

GoodDX and 73 de
Helmut
DG7DXX + OE8SOQ

PS: HAPPY NEW YEAR to you and your family

PRESS RELEASE N° 2:

Please spread this informations as largely as possible.

TS7C, TUNISIA, KERKENNAH Island - IOTA AF- 073,

by The Provins ARC , F6KOP.

http://www.ts7c.net/

Hi Friends

If your diaries are not boomarked yet, do it ! It isn't too late.

The next expedition which will take place between January 8th and 19th, 2009 is quite ready to go.

All the luggage is packed and sorted by 25kg parcels, one by operator.

Mustapha, DL1BDF, team member was a great help for us to be granted to use the special callsign TS7C.

As indicated in the PR N°1 , some new comers in Dxpedition have been included in the team, to permit them to get some more skill, operating side by side with long time experienced dxpedioners. They are the future of F6KOP next expeditions. We ask your indulgence for them ; they are learning to do in the pile ups, and for some of them, TS7C will be their first dxpedition.

We will stay on Kerkennah group, Chergui isl. , IOTA AF-073, and WLOTA 3459.

The departure is scheduled from Paris on January 8th in the early morning.
The team will begin to settle the first station, immediately when they will arrive at the Kerkennah Hôtel.
So the first signals are expected the same day at the end of the afternoon or early in the evening.

The departure from Kerkennah is scheduled very early in the morning of the 19th. So the traffic end will happen sometime around 1800 or 1900 utc, in the evening of the 18th.

As usually, one station will continue to be on the air, in the evening as later as possible.

New bands and/or modes hunters, we will be operating for you, in HF, 160 to 10m , using CW, SSB, FM , and digital like RTTY, PSK31, BPSK , SSTV.

We will pay a special attention on low bands, 160 and 80m

Of course you'll find operators on other bands and mode.

Six stations will operate at the same time, 24h a day. Sometimes it will be possible to hear TS7C on the same band with different modes.

The antenna farm will consist of Verticals and wires for the lower bands and Spiderbeams from 40 to 10m .

Since the first release the team had to be change a little.

The complete team going to Tunisia is finally the following one:

Ø Frank, F4AJQ, Team leader as he did in the previous F6KOP dxpeditions, - SSB and digitals.

Ø Mustapha, DL1BDF, in charge of Public Relations with the Tunisian authorities. - SSB, digitals.

Ø Bernard, F9IE, - CW traffic leader

Ø Bob, N6OX, - SSB traffic leader.

Ø Jean-Paul, F8BJI Digitals traffic leader.

Ø Sylvain, F4EGD, - SSB and Digitals. Dxpedition QSL manager.

Ø Gerard, F2VX, - SSB -

Ø Bill, N2WB - SSB CW -

Ø Michel, FM5CD - CW SSB Digitals

Ø Sébastien, F5UFX, SSB - CW

Ø Sébastien, F8IJV - SSB

Ø Jean-Luc, F6BIV, SSB, Digitals -

Ø Norbert, F6AXX - CW -

Ø Alain, F6ENO - CW -

Ø Dieter , OE8KDK - SSB Digitals -

Ø Stefan, OE8SKQ - CW -

Ø Mathieu, F5PED - CW -

Ø Eric, ON7RN - SSB CW -

I'm not a frequent poster here [I'd like to tell you that I'm usually working DX, but one of my New Year's resolutions is to stop telling porkies on line], and although I'll try to work a new one when I hear it, I'm not a BIG GUN.

However, I can't help wondering why N3OX would spot a DX station at the bottom of a pileup BEFORE he works it. The maxim for working DX has always been "Work First, Worry Later". Perhaps in the dog-eat-dog world of the DX cluster, it should be "Work First, Spot & Worry Later".

73, and a belated HNY to all

>However, I can't help wondering why N3OX would spot a DX station at the
>bottom of a pileup BEFORE he works it.

I wouldn't, that's the point.

I think most people would agree that it would make it *much harder for
me* to work that DX station if I were to spot it prior to working it.

But let's say you and I come across 7O1ZZ calling "CQ NA" on 40m CW,
as do six other guys (what would probably happen if something like 7O
came on).

And let's say I make it through first, before you and the other six guys.

I wouldn't spot that DX before *I* had the chance to work it, so why
should I spot it out from under you and the other six? And,
furthermore, why should you or any of the other six guys spot it out
from under the sixteen other guys that find the 7O while you're trying
to work it.

So that's my test. Would I be willing to spot it BEFORE I worked it?
Do I think that spot would make it HARDER for me to get through? If
it's an ON or a G or an EA8 station, it probably wouldn't. I could
spot it, have a nice calm little QSO, exchange names and "HNY's" and
say 73 and maybe one or zero other people would show up right away.

If it's a 7O or a P5 or even a longpath HL or BY on 40, my spot would
cause all hell to break loose, and if I know that BEFORE I work the
station, why should I strafe the other guys on frequency with a spot
AFTER I work the station?

73,
Dan

Not sure it's that much fun to be popular!

I made the spot (and have done many like that before) because I see nothing wrong with observing (and posting) the habits of a given operation. Is he listening up, down, up 3 up 4 up 5 or what?

Danny, N7DC, has advocated (ever since I've known him) that the DX should send UP 2 and then really listen UP 2, not UP 3 or UP 4 or whatever. Is that any worse than my spot? The DX op himself is theoretically telling all the bums (along with the non-bums) where to congregate.

Personally speaking, I would much, much rather see a spot that says:

"UP 4 TKS FOR QSO"

instead of just the spot itself and those who don't bother to listen first start immediately sending on the DX frequency.

It appears your opinion of what constitutes acceptable "spotting behavior" differs from mine. I don't mind agreeing to disagree!

> least one!

Don't take it personally Art, everyone spots ;-) I don't really mean to offend.

I just don't agree that pileup etiquette has much to do with society falling apart. I think it's more to do with whipping the pileup so huge that even 0.5% lid-dom in the ham population means 10 guys are there to cause malicious or stupid QRM and trouble, and furthermore the lids have a harder time finding unspotted DX than if you're spoon-feeding them QRGs.

I don't like fighting in the pileup that hasn't been spotted for half an hour, and it's dwindling to a reasonable level, still with plenty of callers but not so much QRM, and then someone tosses off another spot post-QSO and all of a sudden there's a jammer on the DX QRG.

I think it happens a lot. Maybe it's just me, and anyone else who doesn't feel this way they're free to spot whatever they like.

But I think it turns a pileup into a raving mess some of the time, and a situation in which a handful of bad apples can ruin the day. There have always been people who will selfishly ignore the rules to the detriment of others. However, I believe that DX spotting of certain stations, especially repeatedly, attracts more troublemakers than the average pileup would accrue if people were just tuning across the band.

The reason I say that the DX should tell you exactly where he is listening is to encourage people to actually listen to the DX. If one spots the guy up 6, say, and everyone runs to 6 up, the DX is going to have one or two get there first, and work them -- then all hecktoralisis busts loose - with dozens or even hundreds calling there. While they all just blabber away, the DX meanwhile says down 4, and those who actually are listening, go down 4, and work the DX until someone else spots him down 4, and again the crew shows up there. By actually giving a freq, the DX is serving those who listen, and filtering out the people who just see spots and start calling (half who cant hear the DX to start with). I did it that way for years, and its a very good management technique. It kept my pileups manageable and gave the true deserving a quick contact. Of course, back then there were no spot pages (let alone computers) to point me out to half the world in moments. Its a technique needed even more now, given the instant bedlam after the first spot.

Doesn't seem to matter whether it's on the cluster or not.
The E44M op has been calling on 14028 for W6 and W7, asking EU to
QRX and sends he's listening *only* for W6/W7.

So who's sending back?

A W7 can't hear the UP 3 so he's sending on top of the E44M, while 3
kHz up, there is a host of 4s, some 3s and several zeroes sending
away.

Just heard N7RO get through. The E44M op stuck by his guns.
Amazingly, the QRM 3 UP seems to be dying down. Oops, guess I was
mistaken.

I personally do think it is worse, because it calls a whole new set of bums in from afar who just got within earshot of the computer they depend on. Don't get me wrong, I like the fact that the cluster exists. It's fun to knock down band countries more easily. But I think there's a point at which the pileup doesn't need any more spots for an hour or even at all. The DX sending "UP 3" only tells those people who understand "3" where he is listening.

> Personally speaking, I would much, much rather see a spot that says:

Well, I can agree that "UP" is better than not putting "UP" if you have to spot it.

>
> It appears your opinion of what constitutes acceptable "spotting
> behavior" differs from mine. I don't mind agreeing to disagree!

Yeah, it does. And I'm trying to find converts. But I don't want anyone to think that I'm feeling contemptuous or angry if they spot, it's not that. I just think there was actually a time when spotting was almost always a public service, but that time has passed with such widespread adoption of the cluster.

73,
Dan

Well said Roy. Unfortunately, I sometimes hear a few well-known "big guns" doing what you describe. I came to the conclusion long ago (and have publicly stated so) that not everyone on the HR#1 (or even just the Honor Roll itself) got there by being "nice guys."

I've met a few of these guys who would steamroll their mothers to work the DX!

Might I reccommend that those who would like a good spotting page: One which doesnt roll by so quickly, look into using SpotCollector, which is just one portion of the the DXLab suite of ham programs. It has the capability of just showing a spot, and not showing the next 50 for the same station (set by how many minutes you want between spots). You can select to filter by only the spots you need (Ie Needed countries/band/modes only, or you can look at all spotted stations, again without having to see dozens of spots all for the same station, on each page. Great features all around - and ITS FREE, as is the whole suite of programs , including DXKeeper (logging) Prop view (propagation predicitions), Pathfinder (address and info lookups), WinWarbler (The PSK/RTTY/CW and Voice Keyers) eetc. and the very best of all features at the end of this ITS FREE.

Judging by your "data" at QRZ.com, you've undoubtedly had some experience/training in statistics. Your "sample" or "population" is enormously skewed. Of the millions of hams you refer to, how many are either actively pursuing DXCC or only casually embedding themselves in the pileup?

From my own college days, I fondly recall and remember the following, partially because I taught college-level statistics at one point:

Never trust percentages when you don't know much about the base!

The number of potential "suspects" in a DX chase most likely numbers in the 75,000 range, rather than 2,000,000 range. The club I belong to has approximately 90 paying members. Of those, the great majority is of the "shack on the belt" variety (DX might only be the next county!). There aren't 10 guys in the club who even casually chase DX.

Other than that (except where you slammed me on my spot and then claimed you weren't picking on me :)), I think we're in agreement. The unfortunate aspect of the analogy of drivers to DX lids doesn't hold up very well. When the route gets really bad, we often have alternative routes - get off the interstate/tollway and onto another street - but when the going gets really bad in a pileup, often the only recourse is to sit it out or turn the rig off.

Yes, I realize when you've been sitting in a traffic jam for 45 minutes, it's a little too late to think about alternatives. But I still contend it's far easier for four or five jerks to severely disrupt the pileup than it is for four or five jerks to disrupt *all* the rush hour traffic.

Art (from a moderately small town in FL where a traffic jam is 20 cars trying to get to the same grocery store) - N4PJ

You're not a closet liberal are you? :)

Sounds like you'd just as soon not have anyone spot anything at all.

"...so why should I spot it out from under you and the other six?"

By that very definition, you imply *no* one should spot it. Now you and I are truly in agreement! No spots means you actually have to sit in front of the radio and tune something in - what a concept!

I still sort of agree, but I still sort of disagree, but that's not important. We're allowed to have our own opinions - I think!

Even when it works the way you describe, isn't it amazing how many people just can't seem to hear the UP 3 or UP 5 or whatever. And even the mob attracted by the cluster spot doesn't seem to pay much attention to spots that say "...QSX up 3.45" and blindly send away on their present sending freq!

Basic DX skills demand:

1. Listen
2. Follow the directions of the DX op
3. Listen
4. Attempt to identify operator patterns
5. Listen
6. When no apparent pattern exists, try to be where the rest of the guys ain't!
7. Listen

Oh, did I mention that listening is one of the most desired skills necessary to chase DX?

If one spots the guy up 6, say, and everyone runs to 6 up, the DX is going to have one or two get there first, and work them -- then all hecktoralisis busts loose - with dozens or even hundreds calling there. While they all just blabber away, the DX meanwhile says down 4, and those who actually are listening, go down 4, and work the DX until someone else spots him down 4, and again the crew shows up there. By actually giving a freq, the DX is serving those who listen, and filtering out the people who just see spots and start calling (half who cant hear the DX to start with). I did it that way for years, and its a very good management technique. It kept my pileups manageable and gave the true deserving a quick contact. Of course, back then there were no spot pages (let alone computers) to point me out to half the world in moments. Its a technique needed even more now, given the instant bedlam after the first spot.

Dave makes good points. I believe there's more "value" in the history and pattern of operation of the DX in the cluster data base rather than the immediate feeding of the needy. The real time QRG / QSX information is really of little value to the Little Pistol / average DXer in any but the smallest pile-up. Over the years I've been able to use the historical information of "rare" DX stations in order to call them when the came up on frequency to "tune up" before their schedule with friends back home.... once they'd been spotted on East Coast or Western European clusters, I'd have little chance being heard.

Dave also makes a good point as to some of the tricks to "move or reduce the pile", not that I'd admit to doing some of those things.... ;-)

73 es DX,

Gary - AB9M

From: Dave AA6YQ
Sent: Monday, January 05, 2009 8:03 PM
To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] Re: calling out of turn

I'm sure there are a lot more telnet cluster users now than there were 10 years ago, but I have nothing quantitative to back up that perspective. One certainly wants to find the DX before its spotted or (worst case) get to a needed station before anyone else does.

My earlier point is that some spots are intentional misdirections. One way to clear a hole in a nasty pileup is to spot a QSX frequency away from that hole. Another is to spot an even more desirable DX station on some other frequency. Putting the word "CQ" in the spot notes makes this almost irresistible; "begging", however, strains credibility.

Clusters do have good uses:

1. you can determine a needed station's pattern of operation, which helps in planning a stakeout

2. you can get a good feel for propagation

3. you can communicate that a station is working split without transmitting on the DX frequency

73,

Dave, AA6YQ

You're right, I am assuming that in this case. I've been in plenty of pileups where those types of spots are dead on though. I'm not really trying to pick on N4PJ...

> 2. Whether he did or he didn't, there is something to be said for
> concentrating the poor operators on one frequency.

Yes, there is, as long as that type of spot from op after op isn't an accurate play by play, something I've seen a fair amount. I know it's true because I'm tracking the pattern myself, and you know it's true too ;-)

The cluster is a useful tool, but I think it has undergone a certain phase transition even since *I* started in ham radio.

Do you have a good feel for how many people use telnet clusters now compared to how many people did in, say, 1998?

Looks like NASA has again revised the prediction for Solar Cycle 24 (as of 5 January, 2009):

http://solarscience.msfc.nasa.gov/images/ssn_predict.pdf

Looking at that chart, it appears it will peak around 2013, with a SSN of ~105-110. Who knows?

The Shadow knows! Course, if there's lots of sunspots and the sun isn't as bright, will there still be shadows?

Alas, if you took all the forecasters, put them all end to end, I wouldn't be a bit surprised! We won't know until after the fact who's forecasts were right/wrong.

Patience or not, we'll have to wait! This will give you time to build that Bobtail Curtain for that low band we're going to get - the one down below the BC band.

DX Special Bulletin No. 891.1
BID: $OPDX.891.1
January 6, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K4UEE and W0GJ for the following DX information.

The following press releases were provided by Bob Allphin/K4UEE and Glenn Johnson/W0GJ.

FOR IMMEDIATE RELEASE

January 6th, 2009
Desecheo 2009 Press Release #3

During the week of December 17-21, six members of the February 2009 Desecheo DXpedition team met in Puerto Rico. The team spent the first evening with local DXers and members of the Puerto Rico Amateur Radio League and enjoyed a wonderful dinner and a night of fellowship. The hospitality was gracious and very much appreciated.

The following day the team visited US Fish and Wildlife Headquarters in Boqueron and met with the Chief Refuge Manager and law enforcement personnel. Later that day, the DXpedition team members underwent UXO (unexploded ordnance) training. The following morning, Friday, Dec. 19th, they accompanied U.S. Fish & Wildlife law enforcement and UXO personnel to Desecheo. The campsite and antenna fields were thoroughly swept for UXO and several areas were found suspicious. These areas were clearly marked, mapped by GPS and declared off limits for the DXpedition. USFWS will allow antennas on the ridge above the helicopter pad, thus providing a clear shot to EU, NA and JA. Other antennas will be located on the beach below the helicopter pad. The only radio operation that was conducted was to test a 2m link to Puerto Rico. After three hours on the Island, the team endured a rough passage back to the mainland.

Logistics and staging of equipment is ongoing and will be complete before the team arrives in Puerto Rico on Feb. 7th. The team will transit to Desecheo on Feb. 12 to begin the two-week operation. Eight HF stations plus 6 meters will be operational. An incredible array of antennas has been planned. Transportation and logistics have been arranged for a fast

deployment and quick appearance on the air.

The Desecheo 2009 team wishes to thank our sponsors for their generous support. Special thanks go to North American and Japanese DX clubs and individual DXers. Their support has been especially noteworthy.

Fundraising continues .if you or your Club would like to help out, please go to www.kp5.us/help.htm. While on the team website, click the ☐Pictures☐ menu button and check out the pictures taken on the recent reconnaissance trip to Desecheo.

73,

Co-leaders:
Bob Allphin, K4UEE

We may be in trouble now. If you thought it was hard to get expeditions in these places before - its gonna be much more difficult and a heck of a lot more expensive.

You have to stay in band, so you must have a way to know where you are. I think they took the fact that the digital readout is now on rigs, and equates to a frequency meter, is probably good enough. Of course, we all know there is failability to that.

At one time, FCC Regs required that a station be capable of measuring
his (or her) frequency so as not to go out of band.
I wonder if that requirement still exists.

Yep, that's what I'm getting at. Now, if there are NO other callers at that moment (I'd personally probably wait two unanswered CQs), maybe I'll spot it. I don't want the DX to have a bad morning where he can't get a call.

But sometimes if it's really cool DX I'll leave it unspotted anyway because I figure someone who actually tunes and listens is going to be along in a minute. I don't always stay to listen, so I don't know. Maybe I'm forcing DX to prematurely QRT.

>Now you
> and I are truly in agreement! No spots means you actually have to

That's what I like to do most... and no, it's not the only way to DX, and yes, I do go ahead and look at the cluster and go after needed ones that way too, but I enjoy finding rare DX with my ears and being able to work it before a horde descends on me because the last guy spotted it.

I enjoy the competitive aspect of knocking down new ones, but I don't enjoy it *ALL THE TIME* on any and every DX that I don't hear every day. There's a scarcity right now; I understand that, but in my opinion, the enjoyment of tuning for DX (the last couple of years especially) has been somewhat reduced by the fact that there's this ticking timebomb of ridiculous pileup waiting if I'm not the only one to find that station or the absolute first one to work him.

I'm sure at least some others are having the same experience, especially the guys with the small stations. I'm sure it won't bother me as much when I have the kind of station that makes it almost certain that I'll get through first ;-) But I intend to remember the sinking feeling I get when something I found but haven't worked yet gets spotted, and I intend to remember the exhilaration of the few (VERY few) times I actually *CAN* find someone interesting with no

pileup and work him.

Anyway, my apologies for singling you out and I think I'll go home and work some DX ...

I do not like it, sitting here calling a DX station, with two or three others calling and working him, then one or two more come by and work him, while I am still trying to get him - but thats the nature of the beast. I HATE being the one or two left in the pile who are waiting for him, only to have someone suddenly spot him, and have another hundred join the pile, and loose out because my signals are with a dipole/100 watts/and he is s3 to start with. I know my likelyhood of working him in that sort of pile have just gone away.

Subject: Re: [DX-IS] Re: calling out of turn

Might I reccommend that those who would like a good spotting page: One which doesnt roll by so quickly, look into using SpotCollector, which is just one portion of the the DXLab suite of ham programs. It has the capability of just showing a spot, and not showing the next 50 for the same station (set by how many minutes you want between spots).

You can select to filter by only the spots you need (Ie Needed countries/band/modes only, or you can look at all spotted stations, again without having to see dozens of spots all for the same station, on each page. Great features all around - and ITS FREE, as is the whole suite of programs , including DXKeeper (logging) Prop view (propagation predicitions), Pathfinder (address and info lookups), WinWarbler (The PSK/RTTY/CW and Voice Keyers) eetc. and the very best of all features at the end of this ITS FREE.

>>>SpotCollector displays a scrollable table with one entry for each active DX station. When a DX spot arrives, SpotCollector checks for an existing table entry near the spotted frequency in the spotted mode. If it finds one, it updates that entry to reflect the "time last spotted" and "notes" accompanying the spot; if it doesn't find one within a time range you specify, SpotCollector creates a new table entry. The result is an easy-to-view list of active DX stations that can be instantaneously filtered (by need, band, mode, location, location of spotting stations, etc) and sorted.

>>>Filtering the table to show only entries for a needed DX station provides insight into that station's operating pattern. Each table entry shows when the DX station was first spotted on a frequency and mode, and when it was last spotted near that frequency in that mode.

>>>Filtering the table to show only DX stations spotted from your region and sorting the filtered table by "time last spotted" provides insight into current propagation, as well as past propagation.

From: Peg Haese KB9LIE
Topic: 8699 Message: 8699

Hey Art,

Marsha beat me out for the ZD8UW on 20 SSB the other day. I did work them a little later. Good for her!

Would be nice to get them on 12 and 17 now like she's done. However the 160 CW was nice too. Gotta love those log search websites. Of course it helps to have a 160 nut at the same QTH. I get to use his antennas for the low bands, not to mention the bigger amp.

Its not nice for ham radio. We already have too many islands tied up out there that no expediton can get to without jumping thru hoops made of money and paper..
It is only going to get harder, and much more expensive for groups to go.

Topic: 8575 Message: 8712

I NEVER reported any specific QSOs with or QSLs from Soviet block and Communist countries while I held a security clearance as a condition of my military occupational specialty and position(s) within the units I served in during the last half of my military career. My Commander was informed of my hobby and that I was communicating most likely with Spetnatz or KBG on occasion. Most likely the more "sensitive" one's position / knowledge, the more concern... in my case I had little info that couldn't be sourced from the local library.... ;-)

Best regards,

In the olden days, when I got paid for doing my hobby, I could have lost my job for having a QSO with any UA stations ... !!!

A condition of my security clearance required that ALL contacts with Soviet personnel or agencies be IMMEDIATELY reported to my security department. I was reprimanded for a CW Contest QSO [UA3??? 599 TU ... etc] in 1981 and put on notice of no further contacts!!

Never sent a card to Box 88 ...

AFOSI tells the whole story!

I was working some DX back in the early '80's, and EVERY NIGHT 20 meters was open from Valdosta, Georgia USA (I was stationed at Moody AFB) to just about anywhere in Eastern Europe. After having done this for several months, I happened to tell my boss about it and he told me that I had to report every contact to AFOSI. Took my log over there and told them all about it, and they made a simple report.

After doing this 3 or 4 more times int eh next few months, but with different contacts, the agent told me not to come back unless one of those guys asked me for specific information about my Air Force job! So I never reported those kinds of contacts again, although I did report a numbers station in the middle of 40 meters once, and that was a different story -- they didn't care in the first place about that!

I just discovered the same thing with ZD8UW. The only band needed, 160 worked two nights ago. Not in their log, and should be updated beyond that. I could scream. Im getting tired of that on 160 - and also on RTTY. How do you get confirmation on a screen on rtty, then still not make it into the logs? I have no idea.

I wonder if the logs on their log search page are complete now?

I had one "maybe" QSO with them while they were on Baja Nuevo and one I thought was definitely good - they definitely sent my callsign and responded after I sent my exchange. But I don't appear in the log search for Baja Nuevo QSO's.

I don't know, but my 160m Bajo Nuevo QSO (during the contest if I recall) is good, and I've been waiting on that since they said they wouldn't upload those until it was time for them to submit the contest log.

Dunno if that helps or hurts ;-|

My definition of a "closet liberal" is someone who says something up front, but you sort of sense there's a hidden agenda and, eventually, they'll get around to it. In my case, I was pulling your leg as well. Why, some of my best friends are liberals! :)

As I wrote previously, I think we are in full agreement. A few minutes ago, VR6XMT wrote on the cluster (using a spot) "PSE LSN FOR ASIA"

A few minutes later KJ4DHF also wrote on the cluster (using a spot)

"Good Luck Charlie HNY to u an family"

The first spot from VR6XMT didn't send an alarm. It didn't send me an alarm because I don't need E44M on 20. Besides, since the spot came from Asia, I would not have received an alert anyway.

But when KJ4DHF made his spot, my wife's alarm went off and it wasn't even a spot - it was an announcement (obviously disguised as a spot). If the cluster didn't exist, we would probably already know we can't hear the mideast yest on 20 meters and no one would be bothering anyone else about it.

Perhaps the cluster would work better if there were some way to force users to follow reasonable etiquette. Unfortunately, even if a lot of people agreed on the proper etiquette, how do you get everyone who needs to read to do so?

An acquaintance of mine once suggested the AI6V web site was the way to go. The obvious repartee for that is "..how do you tell in the first place they should go to AI6V?????"

Back in BC (Before Clusters), it was amazing how quickly a pileup would develop when some hot DX came on the air. But tuning and tuning and listening and listening was more rewarding!

Alas, those thrilling days of yesteryear seem now merely nostalgia.

GO GATORS!

Marsha says sort of the same thing! I told her one day how lucky she is with a tower, beam and amp. When I first started, I had a 100W rig and a piece of wire laying on the roof of an apartment building.

The "new" shack is almost complete. It's eight feet wide with her position at the left and mine at the right. The "common" equipment is in the middle - rotor, SteppIR controller and 12v distribution supply. We have to share the beam and she's using it a great deal more than I at the moment - she needs everything! When the house construction is complete (we're enclosing a porch) I'm going to cover the "bench" with some veneer. Even if we can't work anything it'll look bitchin'!

Happy New Year to you and Paul.

You have no idea of what COLD is!!!

In the 70s I was stationed at Hill AFB, Utah. One January morning the temp was measured at -29F with 50 mph winds in the canyons. Now that's cool!! [COOL!!]

Several years later I was hunting in northern Maine [really up north ... Quebec Canada was South of my location]. We were in an open lean to for a week. The night I hiked in the temp was -25F. In the morning as I got out of a frozen sleeping bag the temp was OFF Scale low in an alcohol base thermometer [that's somewhere in the -35F range][COOLER!]

My hunting partner said it was relatively WARM!!! But, he was just back from a 12 month assignment with the navy to the Antarctic. His high, down south, for the day would be -50F [that's COLD!!!]

:-) +50s is warm enough to open the swimmin' pool, truthfully! [I do that every late April or Early May]

Back in the 80s I had a bunch of friends who worked for Martin-Marietta. One of them referenced participating in a Russian contest and receiving a lapel pin. He commented that it was a cute little pin that would undoubtedly get your security clearance jerked if you wore it!

I'm sure you realized the comment that 50F was cold was *very* tongue-in-cheek.

One year, back in the late 80s, it actually got to 17F here in central Florida. Needless to say, there were gobs of burst pipes, power outages, etc.

When I was in the Air Force, we once set up an air transportable hospital (like those things you saw in MASH) in Alaska while it was 22F below zero - that's my personal record.

I'm far enough inland here that hurricane force winds are a pretty rare event and I've *never* suffered through an ice storm here either!

Ice storms are real fun! We escaped one last night by the skin of our teeth. Temperature held just at freezing for 3-4 hours with lithe "drizzle" coming down, and 60 MPH winds forecast for this morning (they came -- it's blowing like heck now.) Last night, by midnight, everything had 1/2 inch of ice on it. Thankfully the temperature went up to about 43-45 F (6 C) around 2:00 AM and all the ice melted off before the wind hit. Had the temperature held or dropped, we'd have lost a lot of gear. That's the peril of living here!

Personal "cold" limit? Don't know for sure. I've seen - 25 C (-12-15 F) here in past winters for a few nights, but that doesn't usually last. Was on a ship in the pack ice in the Norwegian Sea in 1989 at 78 degrees north. 600 miles or so from the North Pole. Don't recall the temperature, but you could take a can of pee-warm beer and put it outside on the deck for 8 minutes and it was "ice" cold. 10-12 minutes and it was frozen solid.

Side story about that trip that makes this a Ham related post. I was looking after a mini-VAX computer system with a large plotter (did plots the size of a table.) We noticed occasionally the pen(s) would mark where they shouldn't, or not lift off of the paper when they moved. Got the electronics tech to look the gear over an it was all OK. Finally I unplugged it from the computer to eliminate the possiblility of a bug in the O/S sending pulses or something. Then I noticed the pen was tapping up and down. Unplugged it from the 120 VAC and it still did it. A bit of listening told me and another Ham it was CW! Finally figured out it was the RO on the deck above sending traffic back to shore. Must

have been inducing currents in the solenoids that controlled the
pens! We got his schedule and just did out plots when he wasn't transmitting.

Here is a URL from that trip, complete with sound:

http://www.ve1dx.net/cwwx.html

Good code practice if you can copy the weather report . . .

I used to skydive, back in the '70's -- one day, it was around 65* F
on the ground, so we all wore T-shirts and shorts under our canvas
(non-insulated) jumpsuits. No gloves, either.

Well - when we were climbing through 7500 feet, it was TEN BELOW
ZERO! And we went up to 12,500 to jump.

Can you imagine 10 below zero with a wind speed of 120 MPH (terminal
velocity)? That comes out to something like 60 below zero wind chill.
When I got to 3500 feet, and reached for the ripcord, I couldn't feel
anything. And my fingers wouldn't move enough to grip the handle -- I
had to use my whole hand more like a stump to pull that thing. And when
my hands started thawing -- well, I haven't had pain like that in a
long, long time.

That's still my personal record for cold, some 30 years later.

WB6PSY,
The application is still pending. The next step in the process is for the U.S. Attorney's Office in Maine to file suit against Mr. Baxter to collect the forfeiture that the Commission assessed against him. We do not know when that will occur. After that litigation is resolved, the Commission will take action on the pending application.

I've got one of "those" pins.... did not cause me to loose the clearance I held at the time. (Neither did QSOs with Romeo and other "operators")

Back in the 80s I had a bunch of friends who worked for Martin-Marietta. One of them referenced participating in a Russian contest and receiving a lapel pin. He commented that it was a cute little pin that would undoubtedly get your security clearance jerked if you wore it!

SB DX ARL ARLD001
ARLD001 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. Members of the Provins ARC are QRV as TS7C from Chergui Island, IOTA AF-073, until January 19. QSL via F4EGD.

UGANDA, 5X. Peter is QRV as 5X4X until June while working as development aid worker in Arua. Activity is on 40 to 10 meters generally before 2000z. QSL via DF5GQ.

MALDIVES, 8Q. Andy, G7COD will be QRV as 8Q7AK from Embudu Island, IOTA AS-013, from January 11 to 27. Activity will be on 40 to 12 meters using CW and SSB. QSL to home call.

CROATIA, 9A. During the Men's World Handball Championship, special event stations 9A2009OS, 9A2009PO, 9A2009PU, 9A2009ST, 9A2009VZ, 9A2009ZD and 9A2009ZG are active until February 1. QSL via bureau.

TONGA, A3. Bob, ZL1RS is QRV as A35RS from Tongatapu Island, IOTA OC-049, until January 15. Of late, he has been active on 2-meter EME. QSL to home call.

GAMBIA, C5. Niels, OZ8KR is QRV as C56KR from Bakuto until January 14. Activity is on 40 to 10 meters using SSB. QSL to home call.

CHILE, CE. A large group of Amateur Radio operators from Copiapo will be QRV from January 11 to 25 with special event station XR27RAID in commemoration of the 27th Raid Atacama desert trophy. Activity will be on all HF bands using CW, SSB and various digital modes. QSL via CE6TBN.

LIBERIA, EL. Ashley, EL2AR has been active on 15 meters around 1730 to 1815z. He hopes to be active on 80 and 40 meters soon. QSL via

EL2BA.

IRAN, EP. Mohsen, EP3SMH has been active on 20 meters using RTTY around 1330z and SSB around 0800z.

CROZET ISLANDS, FT/W. Florentin is QRV as FT5WO currently from Alfred Faure Station on Possession Island, IOTA AF-008, and has been active on 20 meters generally around 1700z. QSL via F4DYW.

DOMINICAN REPUBLIC, HI. Simone, IZ5JNQ is QRV as HI7/IZ5JNQ until February 5. He also plans to be active as HI2/IZ5JNQ from the coastal islands Saona and Catalina, both IOTA NA-122. QSL direct to EB7DX.

GUINEA-BISSAU, J5. Peter is QRV as J5UAP and has been QRV on 17 meters using SSB from around 1000 to 1200z. He has also been active using RTTY. QSL via HA3AUI.

ARUBA, P4. Peter, EA5GVH will be QRV as P40PZ while on holiday from January 12 to 28. Activity will be on 80 to 6 meters using SSB and various digital modes. QSL to home call.

BRAZIL, PY. Look for operators PY1/PY1ZV, PY1/PY2OC, PY1/PY1RY and PY1/PY2HN to be QRV from Cabo Frio from January 12 to 17. This operation is devoted to the Transatlantic tests between Africa and America. Activity will be on 6 and 2 meters and 70 cm. QSL via operators' instructions.

BANABA ISLAND, T33. Udo, DL9HCU is currently active as T33HC. QSL to home call.

VIET NAM, XV. Mike, OM2DX is QRV as XV9DX and 3W1M while working for the Slovak Republic Embassy. He is here for three years. Activity is on all bands using CW, SSB and various digital modes. QSL via OM3JW.

MACAO, XX9. Vincent, F4BKV is QRV as XX9TKV until January 12 from from Coloane Island, IOTA AS-075. QSL to home call.

VANUATU, YJ. Ted, VK2EZQ is QRV as YJ0AZQ from Aneityum Island, IOTA OC-035. Activity is on 80 to 10 meters. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Afghanistan, T61AA, the license for this operation has been updated. Anyone having this operation rejected recently can send an email to dxcc@... to be placed on the list for an update.

THIS WEEKEND ON THE RADIO. The North American CW QSO Party, NCCC Sprint, Hunting Lions in the Air Contest, PODXS 070 Club PSKFest, MI QRP January CW Contest, Midwinter CW/Phone Contest, SKCC Weekend CW Sprint, NRAU-Baltic CW/Phone Contest, Midwinter Contest and the DARC 10-Meter Contest are all on tap for this weekend. Please see

January QST, page 82, and the ARRL and WA7BNM contest web sites for details.

"Perhaps the cluster would work better if there were some way to force users to follow reasonable etiquette. Unfortunately, even if a lot of people agreed on the proper etiquette, how do you get everyone who needs to read to do so?"

How about a cluster with encrypted, addressed spots and a social network structure.

You can have a list of trusted Cluster Friends.

Then you can send your spots according to this plan:

Level 0, which would be the default, is a local spot database reference spot (I'm thinking about DXLab SpotCollector and it does that now if you hit the "local" button). It's just an easy way to keep your own notes on DX activity stored with the rest of the spots.

Level 1 would go as far as your Cluster Friends list and stop. These would be your closest ham buddies, guys you know you can trust for friendly competition even on a P5, and guys you know would keep it quiet ;-)

Level 2 propagates spots only as far as friends of your friends.

Level 3 through perhaps Level 6 or so just go one step further... friends of your friends of your friends and so on.

Level 7 is "public," which is probably true of the friends of your friends of your friends six times repeated anyway ;-)

Garden variety stuff can just go out Level 7 and it's exactly like the cluster is now. You don't have to have any "cluster friends" at all to receive those spots, so the system doesn't shut out new participants.

Egregious lids will get un-friended by pretty much everyone, so they'll ONLY get Level 7 spots most of the time. The same will go for those guys who re-spot everything Level 7 even if it came in Level 1 .

Level 2 or 3 spots probably hit every DXer you know personally even if you forgot to add them to the list.

But a Level 6 spot still has a chain of cluster trust attached to it even if it reaches nearly everyone who uses the system.

Unfortunately I don't actually have the time or programming skills at the moment to write the software ;-)

This sounds like another kind of cluster which I can not mention here.

10 January 2009 A.R.I. DX Bulletin
No 923
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3W - Mike, OM2DX is now working for the Embassy of the Slovak Republic in Hanoi, Vietnam for the next three years. On 5 January he got his licence, and he will operate as XV9DX and 3W1M on all bands CW, SSB and digital modes. QSL via OM3JW. [TNX VA3RJ]
5X - Peter, 5X4X (DL8SBQ) is active from Arua, Uganda until June. He runs 100 watts into a spiderbeam for 20, 17, 15, 12 and 10 metres and a Zepp antenna for 40 metres. He has been pirated on 160, 80 and 40 metres - if you worked him during the evening hours, please note that Peter cannot operate after 20 UTC, because the power is off in Arua. QSL via DF5GQ. [TNX DXNL]
6W - Tom, DL2RMC will be active as either 6W/DL2RMC or with a 6V call from Senegal on 16-29 January. It will be a holiday style operation, with most activity to be concentrated during the CQ WW 160-Meter DX CW Contest. QSL via DL1RTL. [TNX NG3K]
A3 - Bert, CX3AN will be active as A35HA from Tongatapu Island (OC-049), Tonga on 14-21 February. He will operate holiday style on 40-6 metres SSB and CW, with an emphasis on 30 and 17 metres, running 100 watts into dipoles. QSL via home call. [TNX CX3AN]
CE - Special event station XR27RAID will be active on 11-25 January for the 27th Raid Atacama Desert Trophy. Expect activity on all bands and modes. QSL via CE6TBN.
CU - CU8AS, HB9CQL and HB9CRV/CT3FN will be active as CU8W from Albarnaz Lighthouse on Flores Island (EU-089) on 19-23 January. They plan to operate CW and RTTY with a focus on the low bands. For the CQ WW 160-Meter DX Contest (CW) they will be joined by CT1GPQ and possibile another operator, and will use CU8A (multi-single). Then they will move to Sao Jorge Island (EU-175) and operate as CU5T on 160-10 metres CW, SSB and RTTY from Topo Lighthouse from 28 January to 2 February. QSL for CU8W, CU8A and CU5T via CT1GFK, direct or bureau (e-mail requests for bureau cards can be sent to cu8at@...). The team has a website at http://www.to-mk.com/azores/presentation/index.php
DL - Club station DL0PHG (http://www.a53.de/) will be QRV throughout

2009 with special DOK 1225PHG to celebrate the 1225th anniversary
of the city of Philippsburg. QSL via the DARC bureau. [TNX DJ6JH]
FR - The Association Radio Amateur des Deux Sevres
(http://ed79.ref-union.org/) reports that Daniel, F5LGQ will be
active as TO4IPA from Reunion Island (AF-016) on 13-31 January.
G - The first known rescue at sea involving radio occurred on 23
January 1909, when the "Republic" and the "Florida" collided off
Nantucket and the CQD emergency call was used for the first time
by Republic's radio operator Jack Binns. Celebrating that 100th
anniversary, the Scunthorpe Steel Amateur Radio Club will be
active as GB5CQD on 24-25 January. QSL via G0OKF. Information on
other stations participating in the Jack Binns' special event can
be found at http://www.jackbinns.org/
H4 - Bernhard, DL2GAC [425DXN 917] will arrive in Honiara, Solomon
Islands, on 10 January. He is expected to stay until 28 April,
with a side trip to Temotu Province in March (see H40 below).
Bernhard plans to operate SSB as H44MS with a focus on 80 and 40
metres. QSL via home call, direct or bureau. [TNX OPDX Bulletin]
H40 - Sigi/DK9FN (CW operator) and Hermann/DL2NUD (EME operator) will
join Bernhard, DL2GAC (H44MS) in late February for a 2-3 week
operation from Temotu Province [425DXN 917]. Their flight to Lata
is planned for 2 March, and Sigi will go back home on 16 March. He
plans to operate CW only on 160-6 metres, hopefully as H40FN (the
callsign he used back in 1999). Whatever callsign Sigi will be
using, the QSL route is via HA8FW (bureau preferred). [TNX The
Daily DX]
HI - Josep, EA3BT and his wife Nuria, EA3WL will be active as HI9/EA3BT
and HI9/EA3WL from Cayo Levantado (NA-122), Dominican Republic on
21-27 January. They plan to operate mainly SSB and digital modes
on 10-80 metres, with an amplifier, a beam for 10-20 metres and a
vertical for 40 and 80 metres. QSL via EA3BT. [TNX EA3BT]
I - Angelo, IK1UGX is active as IY1GM until 31 March to commemorate
the 100th anniversary of the Nobel Prize in physiscs awarded to
Guglielmo Marcnoni. QSL via home call. [TNX IK1VKH]
KL - The same operators who activated NA-234 in 2008 plan to be active
as KL7RRC from Ogliuga Island in the Delarof Islands Group
(NA-233, new one) indicatively between 20 and 30 July, IOTA
Contest included. Further details are expected in due course;
preliminary information can be found at
http://www.na-234.com/index.html (click on "NA-233 Plans").
KP2 - Look for KP2/JA1CJA, KP2/JA3AVO and KP2/JA3BZO to be active from
St. Croix, US Virgin Islands (NA-106) on 17-22 January. They plan
to operate CW, SSB and digital modes on 160-6 metres. [TNX The
Daily DX]
T3 - Udo, DL9HCU [425DXN 922] is currently active as T30HC from Western
Kiribati for about a week. "Then he will go to Banaba (T33HC) if
the boat is on schedule", The Daily DX reports. QSL via home call.
W - Due to popular demand, the Old Barney ARC (www.obarc.org) has
decided to extend the N2OB/150 and N2OB/LH special event operation
[425DXN 920] through 31 March. [TNX N2OO]

XX - Vincent, F4BKV (http://www.f4bkv.net/) will be active as XX9TKV
from Coloane Island (AS-075), Macau on until 12 January. QSL via
home call. Logs will be uploaded to LoTW. [TNX The Daily DX]
YN - Stan/AC8W, Hank/K8DD, Jim/KB8TXZ and Lee/N8LJ will be active from
Nicaragua for one week starting on 17 February, ARRL DX CW Contest
included. They will put an emphasis on 160, 80, 30, 17 and 12
metres. They will operate as either H7/homecall or with YN2 calls.
[TNX K8DD]
ZK2 - Chris, ZL1CT will be active as ZK2V from Niue (OC-040) between 16
May and 20 June. His 5-week expedition aims to to give as many
stations as possibile their first QSO with ZK2. Resources are
limited, and he will operate maily on 80, 40, 20 and 15 metres CW
and SSB, with some activity on 30, 17 and 12 metres and some RTTY.
QSL via N3SL. A log-search will be available at
http://www.gm7v.com/zk2v.htm, and Chris plans to update it as
often as possible. [TNX ZL1CT]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

DESECHEO 2009 ---> On 19 December several members of the 12-26 February
2009 Desecheo DXpedition team, along with representatives of U.S. Fish &
Wildlife Service (USFWS), visited Desecheo Island to scout out operating
and antenna positions and do a preliminary unexploded ordnance (UXO) check.
The campsite and antenna fields were thoroughly swept for UXO and
suspicious areas were declared off limits for the DXpedition. USFWS will
allow antennas on the ridge above the helicopter pad, thus providing a
clear shot to EU, NA and JA. Other antennas will be located on the beach
below the helicopter pad. Eight HF stations plus 6 meters will be
operational. An incredible array of antennas has been planned.
Transportation and logistics have been arranged for a fast deployment and
quick appearance on the air. The complete Press Release #3 (6 January) is
available on the DXpedition's website (www.kp5.us), along with details on
how contribute to the expedition, pictures and much more information.
A new interview with Glenn Johnson, W0GJ, expedition co-leader, can be
found on the Documentary Archive's special web page
(www.dokufunk.org/desecheo). The interview was given to Wolf Harranth,
OE1WHC on 7 January.

DXCC NEWS ---> The license for T61AA (Afghanistan) has been updated. Anyone
having this operation rejected recently can send an e-mail to dxcc@...
to be placed on the list for an update. [TNX NC1L]

EPC WW DX CONTEST ---> The European PSK Club invites amateur radio
operators all over the world to participate in the EPC WW DX Contest, to be
held on 31 January-1 February (from 12 UTC to 12 UTC). Object of the
contest is to work as many stations as possible using the BPSK125 mode.

Full information can be found at http://www.epcwwdx.srars.org [TNX CT3EE]

IOTA BASH ---> The fifth annual IOTA Bash will be held on 13-14 March at the QTH of AD5A, Mike Crownover in Boerne, Texas. The agenda is being finalized and will include presentations on some of the most recent IOTA expeditions and a nice social programme. Details will be available on the IREF website (www.islandradio.org).

LOGS ---> A log search for the special event station 4A1DXXE can be found at http://www.dxxe.org/logsearch/index.php?cmd=preselect&log=4A1DXXE [TNX DL6KAC]

LOGS ---> A log-search for ZD8UW (Ascension Island) can be found at http://clublog.g7vjr.org/l.php?log=ZD8UW; the logs are being uploaded to LoTW.

QSL CT3BX ---> Hermann, HB9CRV reports that as of 31 December 2008 he is no longer the QSL manager CT3BX. No new QSL manager has been nominated so far and the logs are closed. [TNX K1XN and The Golist]

QSL ZS1REC ---> Effective 1 January, the new QSL route is via OK1DOT, direct only: Petr Gustab, P.O. Box 52, Cesky Brod 282 01, Czech Republic. The other stations Petr is the current QSL manager for are 3W22S, 3W3W, 9G5SW, 9M2/G4VGO, 9V1GO, EP4SP, HK1AR, HK3KAV, NL7G, TG9AKH, WP3F, XV1X, XV9DT, YB1JZS, YB5AQB, YI9CC and ZS6CCY. [TNX OK1DOT]

QSL FROM CHILE ---> Still waiting for a QSO with a Chilean station (3G, CA, CC, CD, CE, XQ or XR) to be confirmed? You may find help from Jose Luis Jimenez, CE1KR - check http://hunting-qsl.blogspot.com/ [TNX I0DJV]

QSL VIA E77E ---> The QSL cards for a number of stations Robert, E77E is the QSL manager for (E7HQ, E7DX, E74AW, E75A, E79D to name a few) are still awaited from the printer. There is no need to send second direct cards, just be patient. The first batch of bureau cards (Robert is the E7 outgoing bureau manager) is expected to be mailed in March. The address for incoming bureau cards has not changed: E7 QSL Bureau, P.O. Box 61, 71000 Sarajevo, Bosnia and Herzegovina. [TNX E77E]

VE POSTAL RATES ---> Canadian postal rates will rise on 12 January. The new rates for standard letter items up to 30 grams (1 ounce) will be $0.57 (within Canada), $1.03 (Canada to the USA) and $1.73 (Canada to any other country). [TNX VA3RJ]

XE1KK/XF1 ---> Ramon, XE1KK operated as XE1KK/XF1 from a couple of islands in the NA-124 IOTA group between late December and early January. A presentation on these "lunch time" activities can be found at http://files.xe1kk.com/XE1KK-XF1.pdf. All of the QSOs will be confirmed automatically via the bureau and uploaded to LoTW; direct cards should be sent to XE1KK. [TNX K6HFA]

QSLs received direct or through managers: 3B8/SP2JMB, 3D2YA (OC-121),
3V8BB, 3X5A, 3XM6JR, 4J3M, 4J4K, 4J5A, 4K4K, 4K9C, 4X0AI (AS-100), 5H3VMB,

We're all chasing DX and playing in the NAQP, I guess. 290 QSOs logged today, 4 digital, 2 SSB, and 284 CW. Not much to discuss, apparently. I think the E44M operation wound down today, and the TS7C one is one the air.

Apparently they (TS7C) had some trouble getting their gear cleared through the customs (only 3 out of 4 rigs on the air.) I managed to work them on 17 SSB/CW, 20 CW/RTTY and 30 RTTY. Other than that, I've pretty much been working Ws and VEs in the NAQO.

Oh yeah, I think another little cycle 24 sunspot formed, breaking the spotless day period at 27 or 28. The flux sky rocketed from 69 to 70.

73, Paul VE1DX

Forgot about the NAQP, don't work that one.....don't know why though

Only spots I have seen on the TS have been RTTY (someday gotta get)

Gave up on the E44 this afternoon.....snow all day, QRN terribale on vertical, no horizontal

Go get 'em Paul

Dale

I got in a snit one day when someone on another cluster reported:

"Ten meters is wide open!"

Turned out, of course, that a guy in Texas had worked some guy in Minnesota. I made a sarcastic post about the definition of "open" without really addressing "wide open." All it brought was a bunch of sneers - perhaps appropriate.

A friend of mine in our local club told me one day "Ten meters is open all the time to *somewhere*!" I told him, yes, I agree, but if that somewhere is from your house to Sioux Falls, SD, it may open for a narrow path and maybe for not very long. Kind of like a wormhole! (I have my phaser set for deep fat fry if anyone challenges me!)

My definition of "wide open" is I can get on 10 meters and talk to Rene in California and the next guy is someone who calls me from England.

Now I just do the intelligent thing when someone posts something about "wide open." I just go to the next post!

Thanks for calling me in the NAQP. Worked 7 hours for 430+ QSOs. Fair to middlin'. Heard a Delaware guy running around but never snared him. Also never heard North Dakota. Does anyone still live in North Dakota?

Art - N4PJ

The E44M guys are QRT. This is the first DXpedition of any size that I have not worked in a long time. Had prop for about 8 hours while they were working NA on 20 CW. I wouldn't have even known I was getting out except for the one call I made on his transmitte frequency. At that time I got good signal reports from about 20,000 UPPERS.

Win, W0LZ

8745. Re: [DX-IS] E44M

The E44M operation was one that I did not need for an all time new one, but I was interested in making a 100 W low band contact IF they seemed loud enough. I called a few times (including during the NAQP) but never thought the propagation was good when they were working NA.

The only night I could hear the E44 on 40M CW that they were strong enough to call, I wasted more than 40 minutes calling in an unruly, undisciplined, rude and stupid pile-up wherein Europeans who had been asked to stand by for NA, continued to call and call and call and call and call. The guys with the kilowatts and beams got through from North America but because I'm not one of them, I didn't.

Thankfully, I didn't need it either for a new country.

I believe it was VE1DX who expressed the sentiment that ham radio, as we knew it, is over. And I think two of the developments that have hastened the end of the hobby are clusters and electronic keyers. The "hams" who were too stupid to listen still wouldn't, if there were no clusters. And the idiots who program their keyers at 2 wpm and then turn them up to 40 wpm and push buttons all day without understanding anything going on wouldn't otherwise be in the pile-ups.

Bitter? You betcha.

You are right, Al, The conduct on this one was about as bad as I have seen. And, yes, amateur radio is no longer the hobby we once new. Makes me wonder, sometimes, if I should seek a more wholesome hobby. But I have too damn many years and too damn much time invested.

Bitter? Also!

Win, Al, etc,

Yes, it was I who opined that Ham radio was a hobby of the 20th century. I beat the dead horse all the time, and I'll just give it another kick this time. It's not the fault of the clusters and electronic keyers. It's not the elimination of CW. It's the lack of enforcement of the Ham radio laws world wide. The USA and Canada were leaders in that area, and they shifted their resources to other things. That's the end of it. Other countries followed suit. You take away the enforcement and make it a self-policing "honour system" and anything will degrade into chaos. It can't be fixed, so we have to use it as it is or take up something else.

I too found the jamming and mis-behaviour of the E44M operation to be one of the worst in recent memory. The current TS7C crew are not getting jammed nearly as bad. E44M was an embarrassment to the hobby. I wish I could explain why they were different. They weren't particularly bad operators, and their signals were pretty good. I guess a half dozen nuts decided they were going to disrupt the operation every chance the could, and they did a pretty good job of it.

As Al said, for the most part only those with beams and linears got through. I was lucky enough to be one of them, but what should have been 2-3 calls *always* turned into a slugfest that lasted an hour or more. It wasn't fun. Working DX and breaking pileups used to be fun. It's not when you have to spend and hour working what would have been a simple QSO 20 years ago. The art of pileup breaking is gone. He who gets through is the one with the loudest signal, who calls all the time blindly, and can get enough filters (rig filters and psychological filters) in place to recognize their call when the DX comes back to them. That's not how it used to be, not how it should be, but it is the way it is. I do not see it changing in the future. What will happen is our numbers will dwindle as we die off, and the new kids won't bother. In 20 years there will be no Ham radio.

Am I bitter? No. Bitter won't fix it. I'm sad. Sort of like
I would feel if a close friend became a SK.

Speaking of strange stuff, I got an email last night from a W1
telling me I was spotting too much stuff during the NAQP. Maybe he
was right. I don't know what prompted it.

73, Paul VE1DX

8749. TS7C (was E44M)

Yahoo group: DX-IS (2009)
Date: 2009-01-11 16:06:24 UTC
From: Alan Leith
Topic: 8454 Message: 8749

Changing the topic slightly, Win, I have been in the pile-up on TS7C for a bit here this morning. The operator is desperately trying to clear the non-NA callers (almost all European, I presume) so he can take advantage of the short opening to us.

But, BUT, on top of that, even if the operator gets a part of a NA call and asks for it, there are hundreds of North Americans calling anyway. So it is virtually impossible for me, or anyone else for that matter, to find a QSO and try to call on or near the frequency, after a successful contact
.

Fortunately, I don't need the country but I'd like the IOTA and the prefix. Probably not gonna happen with the Sunday hogsters on there. His QSO rate, BTW, is absolutely dismal.

Mornin' Paul,

I listened for a bit last night in NAQP and watched the spots fly by, including yours. I heard lots of friends in there and perhaps I should have given a few points out. I didn't, partially because I still have not completely recovered from the flu bug I picked up the day after Christmas and just didn't (don't) have the interest.

Actually, I think spotting during something like NAQP is a travesty and should be completely outlawed by the organizers. The point of a contest, any contest, for me, is to find, work and move on. I have absolutely no interest, or intention, of telling anyone who or where I worked anyone. That goes completely against my competitive spirit (which is fading as I get older). As for day to day spots, I would never, ever, spot a European or Caribbean station, or many South Americans for that matter, unless there was little activity from the country or unless the operator asked me to spot him/her.

Even if the bands (all of them) have been dead for days, I would not spot a European. Perhaps, if I lived west of the Mississippi I might. Seeing a KJ4xxx spot a DL on 20M makes me crazy.

I see the TS7 has disappeared from 20M CW. Woulda been nice but guess it ain't gonna happen for me.

Spotting too much!!! What a man with chutzpah. Would love to know his call so I could harass him :-).

Win, Al, etc,

Yes, it was I who opined that Ham radio was a hobby of the 20th century. I beat the dead horse all the time, and I'll just give it another kick this time. It's not the fault of the clusters and electronic keyers. It's not the elimination of CW. It's the lack of enforcement of the Ham radio laws world wide. The USA and Canada were leaders in that area, and they shifted their resources to other things. That's the end of it. Other countries followed suit. You take away the enforcement and make it a self-policing "honour system"
and anything will degrade into chaos. It can't be fixed, so we have to use it as it is or take up something else.

I too found the jamming and mis-behaviour of the E44M operation to be one of the worst in recent memory. The current TS7C crew are not getting jammed nearly as bad. E44M was an embarrassment to the hobby. I wish I could explain why they were different. They weren't particularly bad operators, and their signals were pretty good. I guess a half dozen nuts decided they were going to disrupt the operation every chance the could, and they did a pretty good job of it.

As Al said, for the most part only those with beams and linears got through. I was lucky enough to be one of them, but what should have been 2-3 calls *always* turned into a slugfest that lasted an hour or more. It wasn't fun. Working DX and breaking pileups used to be fun. It's not when you have to spend and hour working what would have been a simple QSO 20 years ago. The art of pileup breaking is gone. He who gets through is the one with the loudest signal, who calls all the time blindly, and can get enough filters (rig filters and psychological filters) in place to recognize their call when the DX comes back to them. That's not how it used to be, not how it should be, but it is the way it is. I do not see it changing in the future. What will happen is our numbers will dwindle as we die off, and the new kids won't bother. In 20 years there will be no Ham radio.

Am I bitter? No. Bitter won't fix it. I'm sad. Sort of like I would feel if a close friend became a SK.

Speaking of strange stuff, I got an email last night from a W1 telling me I was spotting too much stuff during the NAQP. Maybe he was right. I don't know what prompted it.

The crowds were unruly. IMHO, not as bad as Bouvet 89/90 (nothing could ever be that bad), but things were bad. Lots of issues came into play.

#1 Conditions are terrible. And, because of our friend - packet - everyone thinks they can work the DX station simply because he was spotted. Hence, folks called and called and called without really knowing that the DX station wasn't even working them (i.e., they couldnt hear E44M).

#2 From the E44M video, they had some AWFUL QRM and QRN. Elevators, unshielded switcher supplies, power lines, you name it. When E44M is calling CQ and doesnt pick everyone, folks automatically assume that the E44M op is a LID.

#3 A couple of the E44M ops could have done a better job of sticking with calls once they had them on the line. They seemed rather quick at cutting the call if it couldn't be made easily.

#4 Certain EU stations were doing their utmost to jam this operation when E44M was QSX for NA/SA. One night, a ham was sending "NA Only NA Only" constantly over E44M and was sending at about the same speed and was zero beat to E44M. Very tough to tell who was who.

My guess, Paul, is that he was seeing lots of NA spots and could find his E4 spots. Probably didn't know how to filter.

Hi Rich,

Heard you in there, as well as last night on 80M, and feel I must comment from my point of view.

#1 - agreed
#2 - I was unaware, that explains a lot
#3 - agreed
#4 - thankfully, I did not observe

My imagination or not, I believe there was a lot of political expression over the E4 operation, another sad commentary.

I really wonder why bad operating practice propagates so well/fast while good practice is stuck at the bottom of the sunspot cycle on 10M.

Unfortunately, you see this in eyeball conversations too this day. The male-male one talk, one listen mode seems dead. It is more like the everybody talks and listens (maybe) at the same time. I wonder if the teen text messaging mess, where one is having multiple simultaneous conversations, is partially responsible. Multitasking gone mad.

It used to be one had one mouth and two ears for a reason.

Hi Al,

Hope the flu bug is losing the battle. In fact it better lose
the battle or there will be no more VE1AL!

Regarding the cluster, I was taken to task 5-6 years ago for
complaining about too many "run of the mill" spots and Ws spotting Ws
in contests. Then someone pointed out the cluster spotting idea (and
the original software) was invented by contesters for contesters. We
sort of grabbed it and re-named it the DX Cluster.

Easiest way to get rid of this is to filter out spots of Ws and
VEs. That way, one only sees the DX. An unfiltered cluster is going

to fill your screen with page after page of spots that are of no interest to you.

There is a lot of software out there today that allows the operator to click on a spot and it automatically QSYs the rig (and amp if it is auto-tune) to that band and mode. I'm pretty sure all major contests did away with the "assisted" and "non-assisted" categories. (Used a cluster or did not use a cluster.)

My point is, you might have a competitive spirit, but unless you use a cluster, you are competing against those who do. They can click on a 15M multiplier, are there in a half second ready to call, and then back on 20M without losing their spot or keeping their run going. You'll come 999 out of 1000! :-)

That's how contesting has changed, and there is nothing we can do about it. I was spotting the S & P stuff I worked. I obviously wouldn't spot stuff I was running. In this contest the states and provinces are multipliers, so I was telling everyone who was serious about the contest where they were. I don't send in logs (other than the occasional check log) so I wasn't shooting myself in the foot by telling everyone that KL8DX was on 14.054 MHz. I don't care how many others work him.

On the other hand, I rarely spot real DX (I worked the TS7C on SSB today, but didn't feel I needed to tell everyone connected to a cluster when and where I worked him -- he had already been spotted 32 times in the previous hour.) I guess we look at these things differently on this topic.

Al,

One thing that increased the spots for Ws is
the introduction of the "Triple Play" award by
the ARRL on 1 January 2009. Read all about it here:

http://www.arrl.org/news/features/2009/01/01/10470/

Basically you have to work all states on
SSB/CW/RTTY and have them all confirmed by LoTW,
and they all have to occur on 1 Jan 2009 or
later. Hans invented it. Blame him!

"As adopted by the Board after study by the
Programs and Services Committee, the ARRL Triple
Play Worked All States (WAS) Award was developed
from a suggestion offered by past Vice Director
Hans Brakob, KØHB of the Dakota Division."

That needs a little more clarification. 10m can be open wiff F layer (fat chance now) or Sporadic E (rarly) including backscatter and sidescatter and line of sight. Line of sight makes it open all the time to 'somewhere' (local).

But- you see, Im there for new ones - not the contest itself. The spot help me locate and work what I need (skipping those I dont). A contester needs them all, so either he sits in one place and they come to him, or he starts at one end of the band and works his way up to the other. Since I got onto the world wide spot nets, Ive done more "contesting" than ever before - even though that consists of 20-150 contacts per contest, only.

I didn't, partially because I still have not completely recovered from the flu bug I picked up the day after Christmas and just didn't (don't) have the interest.

Actually, I think spotting during something like NAQP is a travesty and should be completely outlawed by the organizers. The point of a contest, any contest, for me, is to find, work and move on. I have absolutely no interest, or intention, of telling anyone who or where I worked anyone. That goes completely against my competitive spirit (which is fading as I get older). As for day to day spots, I would never, ever, spot a European or Caribbean station, or many South Americans for that matter, unless there was little activity from the country or unless the operator asked me to spot him/her.

Even if the bands (all of them) have been dead for days, I would not spot a European. Perhaps, if I lived west of the Mississippi I might. Seeing a KJ4xxx spot a DL on 20M makes me crazy.

I see the TS7 has disappeared from 20M CW. Woulda been nice but guess it ain't gonna happen for me.

Spotting too much!!! What a man with chutzpah. Would love to know his call so I could harass him :-).

Win, Al, etc,

Yes, it was I who opined that Ham radio was a hobby of the 20th century. I beat the dead horse all the time, and I'll just give it another kick this time. It's not the fault of the clusters and electronic keyers. It's not the elimination of CW. It's the lack of enforcement of the Ham radio laws world wide. The USA and Canada were leaders in that area, and they shifted their resources to other things. That's the end of it. Other countries followed suit. You take away the enforcement and make it a self-policing "honour system"
and anything will degrade into chaos. It can't be fixed, so we have to use it as it is or take up something else.

I too found the jamming and mis-behaviour of the E44M operation to be one of the worst in recent memory. The current TS7C crew are not getting jammed nearly as bad. E44M was an embarrassment to the hobby. I wish I could explain why they were different. They weren't particularly bad operators, and their signals were pretty good. I guess a half dozen nuts decided they were going to disrupt the operation every chance the could, and they did a pretty good job of it.

As Al said, for the most part only those with beams and linears got through. I was lucky enough to be one of them, but what should have been 2-3 calls *always* turned into a slugfest that lasted an hour or more. It wasn't fun. Working DX and breaking pileups used to be fun. It's not when you have to spend and hour working what would have been a simple QSO 20 years ago. The art of pileup breaking is gone. He who gets through is the one with the loudest signal, who calls all the time blindly, and can get enough filters (rig filters and psychological filters) in place to recognize their call when the DX comes back to them. That's not how it used to be, not how it should be, but it is the way it is. I do not see it

changing in the future. What will happen is our numbers will dwindle as we die off, and the new kids won't bother. In 20 years there will be no Ham radio.

Am I bitter? No. Bitter won't fix it. I'm sad. Sort of like I would feel if a close friend became a SK.

Speaking of strange stuff, I got an email last night from a W1 telling me I was spotting too much stuff during the NAQP. Maybe he was right. I don't know what prompted it.

Sounds much like an excuse to me. It rally is all about money. The more people involved in LOTW, and the more applications, the more money flows in to the kitty. Far as I am concerned its nonsense. We have had WAS awards for some decades or so now. There is a 5 band WAS. Many of us have already worked that, even if we havent applied for it. Its just another set of rules to do what we are already, or have already done. Im not about to go buy verifications for 150 more statiions, when I aleady have worked and received cofirmations for all those. They didnt have the chintzpaw to go ahead and accept the cards already in everyones queues, but supposedly are letting everyone stqrt from the beginning. This one might take the leaders a month or so, to be in there trying for certificate number 1 - and Im sure some have already got the majority needed.
Thank God its not going to be an annual event.

Al,

One thing that increased the spots for Ws is
the introduction of the "Triple Play" award by
the ARRL on 1 January 2009. Read all about it here:

http://www.arrl.org/news/features/2009/01/01/10470/

Basically you have to work all states on
SSB/CW/RTTY and have them all confirmed by LoTW,
and they all have to occur on 1 Jan 2009 or
later. Hans invented it. Blame him!

"As adopted by the Board after study by the
Programs and Services Committee, the ARRL Triple
Play Worked All States (WAS) Award was developed
from a suggestion offered by past Vice Director
Hans Brakob, KØHB of the Dakota Division."

Good heavens, Paul, it isn't that I'm on death's doorstep! No, this bug just doesn't want to go away. I've still got a slight nagging cough and stuffed sinuses that won't leave. Apparently it is not uncommon to have flu-like symptoms around here for weeks. I'll recover :-).

As for the cluster, yes, I have done some filtering. But because I want to know what others are hearing/working, I leave a lot of stuff in. What I'm not particularly interested in, however, are spots from UA0 for JAs, even on 160, or spots on 20 for DLs and Fs from K4s. I worked J28JA to say HNY on 20 and he's one of a very few J28s who is active. I thought briefly about spotting Jean but decided against it because he's pretty regular and besides, someone else had spotted him. Same with 5N/LZ1QK who was lower in the band. While he clearly came back to me, several Ws decided to keep calling, making my QSO a little messy, but likewise, he's pretty regular and had been spotted and so I didn't spot.

The last thing in the world I want to do is to brag, unless, of course, there's a bloody good reason.

BTW, I also can click and shoot. However, if I do click, I always listen long enough to see if the spot is correct, whether he's working my area (NA) and just how strong he is before I get in there shootin'. I just saw a couple of phony spots mentioning ZS8T. What morons.

As for TS7C, I wouldn't give anyone the pleasure of knowing where and when I worked him. If I have to work at it, then so do you. I don't think we disagree there :-). And, although I see TS7C spotted, I have heard nothing since late this morning on 20M CW.

Hi Al,

Hope the flu bug is losing the battle. In fact it better lose the
battle or there will be no more VE1AL!

Regarding the cluster, I was taken to task 5-6 years ago for
complaining about too many "run of the mill" spots and Ws spotting Ws in
contests. Then someone pointed out the cluster spotting idea (and the
original software) was invented by contesters for contesters. We sort of
grabbed it and re-named it the DX Cluster.

Easiest way to get rid of this is to filter out spots of Ws and VEs.
That way, one only sees the DX. An unfiltered cluster is going to fill
your screen with page after page of spots that are of no interest to you.

There is a lot of software out there today that allows the operator to
click on a spot and it automatically QSYs the rig (and amp if it is
auto-tune) to that band and mode. I'm pretty sure all major contests did
away with the "assisted" and "non-assisted"
categories. (Used a cluster or did not use a cluster.)

My point is, you might have a competitive spirit, but unless you use a
cluster, you are competing against those who do. They can click on a 15M
multiplier, are there in a half second ready to call, and then back on 20M
without losing their spot or keeping their run going. You'll come 999 out
of 1000! :-)

That's how contesting has changed, and there is nothing we can do about it. I was spotting the S & P stuff I worked. I obviously wouldn't spot stuff I was running. In this contest the states and provinces are multipliers, so I was telling everyone who was serious about the contest where they were. I don't send in logs (other than the occasional check log) so I wasn't shooting myself in the foot by telling everyone that KL8DX was on 14.054 MHz. I don't care how many others work him.

On the other hand, I rarely spot real DX (I worked the TS7C on SSB today, but didn't feel I needed to tell everyone connected to a cluster when and where I worked him -- he had already been spotted 32 times in the previous hour.) I guess we look at these things differently on this topic.

Well, N1BAA cleaned up all 50 on RTTY in the roundup (all 50
LoTW confirmed) and I'm betting he has made a big dent on the CW side
because he was going full bore in the NAQP. My money is on him to
get serial #1.

Sure it's about money, but it puts some interest back in
operating. I am not actively pursuing it, but it's something to
dabble at. If I stick purely to DXCC stuff, I'll work 10 "new"
things a year if I'm lucky. We need sunspots or we are going to have
to get more serious about bands, modes and awards that do not require
much F2 propagation.

Are my ears playing tricks on me or am I actually hearing more and more people sending "YQ YQ YQ de xxxxxx xxxxxx xxxxxx YQ K" on CW these days? I could swear I heard an OK7 and an IK1 doing just that just a few minutes ago. I was always taught the general call is "CQ" but maybe that's a change I missed.

Sounds much like an excuse to me. It rally is all about money. The more people involved in LOTW, and the more applications, the more money flows in to the kitty. Far as I am concerned its nonsense. We have had WAS awards for some decades or so now. There is a 5 band WAS. Many of us have already worked that, even if we havent applied for it. Its just another set of rules to do what we are already, or have already done. Im not about to go buy verifications for 150 more statiions, when I aleady have worked and received cofirmations for all those. They didnt have the chintzpaw to go ahead and accept the cards already in everyones queues, but supposedly are letting everyone stqrt from the beginning. This one might take the leaders a month or so, to be in there trying for certificate number 1 - and Im sure some have already got the majority needed.
Thank God its not going to be an annual event.

Al,

One thing that increased the spots for Ws is
the introduction of the "Triple Play" award by
the ARRL on 1 January 2009. Read all about it here:

http://www.arrl.org/news/features/2009/01/01/10470/

Basically you have to work all states on
SSB/CW/RTTY and have them all confirmed by LoTW,
and they all have to occur on 1 Jan 2009 or
later. Hans invented it. Blame him!

"As adopted by the Board after study by the
Programs and Services Committee, the ARRL Triple
Play Worked All States (WAS) Award was developed
from a suggestion offered by past Vice Director
Hans Brakob, KØHB of the Dakota Division."

8771. Re: [DX-IS] calling CQ on CW

Yahoo group: DX-IS (2009)
Date: 2009-01-11 20:50:58 UTC
From: Danny Douglas
Topic: 8768 Message: 8771

They dont have to know how to receive, let alone send CW. Its like all those spots that keep wakin me up from a nap with BY5 in the call, and when I listen its 6Y5. Half of that is because the idiots spotting cant copy, or figure out that there is not going to be an 80 meter BY station heard here on the east coast at 2 O'clock in the afternoon, and the other half because the Jamaican DX station really is sending a 6 when he should be sending a B, but there still isnt going to be a BY heard on the particular band, at whatever time of day it is. CW Spots (in particular) should be limited to those who pass a 20 wpm CW test, send and receive.

I got one when I first was licensed, but I couldn't find it
now. Likely filed somewhere. However, I have a question. What
happened to all the Canadian awards? Seems to me they all
disappeared in the last decade. Wasn't there one for working all the
provincial capitols, one for working stations along the St Lawrence
seaway, etc. Did the now defunct Canadx sponsor anything? Does RAC
offer any awards?

As a lifetime member of CANAD-X and a former editor of the bulletin, Long Skip, I can't honestly recall any awards ever offered by the group. I don't know who offered the Seaway Award, or the one for working all the provincial capitals or all the provinces. The guy who would know is Garry Hammond, VE3XN. I don't know if Garry lurks here or not.

Maybe someone "up the line" can enlighten both of us.

He would have noting to do with it, one way or the other. ARRL doesnt sponsor or approve spot nets (as far as I know). My director got fired a few years back, for being one against all this gimmie generation junk.

*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW): There will be "NO BULLETIN" for January 19th. Linda (XYL/chief proof-reader) and I will be heading south to Port Richey, FL, because her dad has become ill and is in the hospital. However, PLEASE continue to send your DX info to me; I should have InterNet access..... TNXS and GUD DX de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th/January, through Sunday, 11th/January there were 216 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV9, T30, T7, TA, TF, TG, TI, TK, TL, TN, TR, TT, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3W/XV, VIETNAM. Mike, OM2DX (aka E4/OM2DX, YI9X..etc), is now in Hanoi, and is working for the Embassy of the Slovak Republic. He has obtained a license with the callsigns XV9DX and 3W1M. He is expected to be here the next 3 years and be active on all bands using CW, SSB and the Digi modes. QRNs shown that Mike has been on 40/20/17/15 meters CW this past week. QSL via OM3JW.

5X, UGANDA. Peter, DL8SBQ, is now active as 5X4X from Arua until June. Activity will be on 40/20/17/15/12/10 meters SSB. Over the past week Peter was on 20/17/15 meters. He uses only 100 watts into a Spiderbeam for 20-10 meters and a Zepp antenna for 40 meters. PLEASE NOTE: Peter cannot operate after 2000z because the power is off in Arua. So, if you hear a station on after that time, it is a pirate. QSL via DF5GQ.

7X, ALGERIA. Fred, ON6QR, will be active as 7X2ARA, the club callsign of "Amamteur Radio Algerians", for only a few hours this week. He will be on the air starting at 2000z on January 17th, until early morning on the 18th. His aim is to make QSOs during the Hungarian DX Contest and will be pleased to put you in the log. His activity will be on both CW and SSB; bands will be used according to propagation. QSL via 7X2ARA.

A3, TONGA (EME DXpedition Report). Paul, A35RK, informs that he has been talking to Bob, ZL1RS (now signing as A35RS), on the phone because he was a little concerned about him due to some nasty weather and wind storms coming out of the NW. Bob is situated on the NW end of the island. Paul states, "Bob said that he has had some trouble keeping his antenna pointed, because of the wind, but he's fine and all his equipment is working OK. Bob said that he has made about 60 2m EME contacts so far."

ATTENTION 6M DXERS. Justin, K9MU, has an interesting North American 50 MHz Beacon Map available at: http://www.k9mu.com/map/
Also, visit his VHF Web page at: http://www.k9mu.com

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following is approved for DXCC credit:
T61AA - Afghanistan
PLEASE NOTE: The license for this operation has been updated. Anyone having this operation rejected recently can send an E-mail to <dxcc@...> to be placed on the list for an update.

E4, PALESTINE (Update). The E44M operation is now QRT. For this operation you can either QSL direct, by the Bureau or LoTW (in reasonable time). An online log search is available at:
http://www.hamradioweb.org/e44mlogsearch.html
PLEASE NOTE: The QSL Manager for BUREAU QSL CARDS is SP3DOI.
The QSL Manager for DIRECT QSL CARDS is IZ0BTV.
Also, BUREAU QSL CARDS can be requested via E-mail at: QSLE44M@...
Your request must be clear and complete with all the details (your callsign, time, RST, date, mode...). Please don't send them multiple E-mails for each QSOs, only one (with all your QSOs listed) will be enough. Any incomplete E-mails without these will be ignored. BUREAU cards will be managed after the direct ones. For updates, watch the following Web pages.

The forum at: http://www.hamradioweb.org/forums/forumdisplay.php?f=39
The E44M Web page at: http://www.dxcoffee.com/e44m

FREE HAM MAGAZINES.....
* HAM-MAG - There are 26 pages of interesting stuff to read. All in color and PDF format. HAM-MAG states it is "The First 'E-magazine' for ham radio operators. A magazine without paper is a tree saved!" Check it out at: http://ham.france.free.fr/crbst_18.html

* Richard Moseson, W2VU, CQ Amateur Radio Editorial Director, announced on January 8th, the following:
"WorldRadio Online - E-mail Notification List Established --
A new e-mail list has been established to notify readers of the availability of each new issue of 'WorldRadio' magazine, which is converting to a free online-only publication ('WorldRadio Online') as of its February 2009 issue. 'WorldRadio' subscribers and any other interested people may sign up for the list at:
http://mailman.sunserver.com/mailman/listinfo/WorldRadio-L
Direct links to this signup page will be posted on both the CQ magazine website at <http://www.cq-amateur-radio.com> and the old 'WorldRadio' website at <http://www.wr6wr.com/>. Monthly e-mail alerts will include highlights of each new issue, along with instructions and hotlinks for connecting with the online issue. The e-mail addresses will be used only by CQ Communications, Inc., and will not be rented or sold. Each issue of 'WorldRadio Online' will be posted in PDF format, permitting readers the choice of browsing articles online or downloading the issue to their own computers to read at their convenience or even to print out in part or in whole. Access to 'WorldRadio Online' will be free of charge. Most of WorldRadio's columnists will continue to write for the new online edition. In November 2008, CQ Communications, Inc. purchased 'WorldRadio' upon the decision of founding publisher Armond Noble, N6WR, to retire and sell the magazine."

FO, FRENCH POLYNESIA (Update). Phil, F5PHW, informs OPDX that his 2 year assignment in Tahiti will begin during the summer in August and end in July of 2011. He will be there with his family, and since he is there for work, his on air activities will be limited, but he will try to operate as much as possible. At the moment he doesn't know where he will be living (house or apartment). If he lives in a house, Phil intends to be active on all HF bands from 80-10 meters mainly on CW and RTTY (possibly some PSK31) with very little SSB using only 100 watts. His antennas from the house QTH will be:
80-40m - Inverted V + HF6VX (GP)
30m - HF6VX
20-10m - HF6VX + Spiderbeam (not sure)
However, if he lives in an apartment the antenna may only be the HF6VX. QSL via F8BPN, by the Bureau or direct. QSL will also by LoTW. Phil tells OPDX that if he has time, he will create a Web page with photos and an online log search. More information is forthcoming, especially about his callsign. ADDED NOTES: Phil has been active as J28BS (1993-1994-1999),

6W1/F5PHW (1994-1997), FM/F5PHW (1994-1995) and F5PHW/P EU032. All these operations are available via the LoTW.

HEADING TO THE CARIBBEAN (Maritime Mobile). John, ZS1JNT, left Cape Town, South Africa (in mid-December), in the new catamaran called "Oceans Dream 2" heading towards the Carribean. The 40 ft. catamaran is headed to Chaguaramas, Trinidad & Tobago. John will be operating Maritime Mobile under the callsign ZS1JNT/MM. He recently left James Bay, St. Helena, on January 7th. Look for him to be active on 20 meters after 1800z, possibly on 14297.5 kHz (or between 14235-14250 kHz). Read his interesting blog at: http://www.sailblogs.com/member/deliveries
You can also track him at: http://shiptrak.org/?callsign=ZS1JNT&filter=60

H7/YN7, NICARAGUA (Date Correction). Operators Stan/AC8W, Hank/K8DD, Jim/KB8TXZ and Lee/N8LJ will be active for one week starting February 17th. Their activity will include the ARRL DX CW Contest (February 21-22nd). Emphasis will be on 160/80 meters and 30/17/12 meters. Their callsigns (TBA later) will be either be H7/homecall or YN2 callsigns. QSL via info on QRZ.com.

IOTA NEWS.....
EU-038. During the annual Dutch PACC Contest, members of the PA3FKN PACC Team will activate the Island of Ameland, one of the West Frisian Islands off the north coast of the Netherlands. It consists mostly of sand dunes. "This is a good opportunity for island chasers to contact EU-038 on all bands, propagation permitting", according to Gerben, PG5M. The PA3FKN PACC Team members are: Bote/PA0BVD, Aloys/PA3DAT, Wietse/PA3DDJ, Berend/ PA3FAL, Eric/PA3FKN, Douwe/PD0RXP, Laurens/PD3LHS, Andries/ PE1PIX, Peter/PE1PIX, Joeri/PE5JW, Gialt/PE1OLM and Gerben/ PG5M. As this is not a permanent contest location, all equipment has to be transported to the island and installed and setup just before the contest. The list of equipment is extensive, including 8 transceivers, 13 antenna configurations, masts, more than 2 km of coax cable, etc. which altogether is more than 2500 KG. For the low bands they will use: 160m - 2 phased verticals, 80m - 4 square dipoles and 40m - 4 square verticals. Time and dates: 1200z, Saturday, February 14th, to 1200z, Sunday, February 15th. For more information on the PACC Contest, visit the official PACC Web site at: http://pacc.veron.nl
Also, watch the following Web page for updates (especially during the contest) at: http://www.dx.to

NA-122. Operators Josep/EA3BT and his XYL Nuria/EA3WL will operate as HI9/EA3BT and/or HI9/EA3WL from Cayo Levantado Island in the Dominican Republic's Coastal Islands Group, January 21-27th. Nuria will operates SSB while Josep handles the CW. Activity will be mainly SSB and the Digital modes, on 80-10 meters. They will use a Yaesu FT-900, w/Ameritron ALS-600 amp into a Cushcraft MA5B antenna for 20-10 meters, and a Butternut HF2V for 80/40 meters. QSL via EA3BT.

NA-223. Members of the Russian Robinson Club will be active as KL7RRC
from Ogliuga Island, Alaska, between July 21st and August 3rd.
Activity will be on 160-6 meters including an entry in the
RSGB IOTA Contest (July 25-26th). Operators mentioned are:
N3QQ, RA3NAN, RU4SU and UA9OBA. Watch for updates on:
http://www.na-234.com/index.html (Click on NA-233 Plans).

KP5, DESECHEO ISLAND DXPEDITION (Updates and News).....
* The Documentary Archive Radio Communication provides, on its Web site
<http://www.dokufunk.org>, another special (second) exclusive interview
with Co-Team Leader Glenn Johnson, W0GJ, on the coverage of the
upcoming KP5 Desecheo DXpedition. This interview has background
information on the recent visit to the island and some details about
the upcoming operation scheduled for February 12-26th. Listen to the
interview at: http://www.dokufunk.org/desecheo

* As mentioned in special bulletin OPDX.891.1, Several members of the
team visited Desecheo on December 17th, 2008, on a recon mission
along with USFWS and security personnel. The KP5 Web page has several
interesting photos available for viewing at:
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/pictures.htm

* European Press Release (from dx-hamspirit.com): KP5 Team Prepares
for Europe!: "The KP1-5 Project is very aware of the need for KP5
(Desecheo) in Europe. Previous DXpeditions contended with an obstructed
path to Europe making working this #3 most needed country difficult
at best. During the recent reconnaissance trip to KP5, agreement was
reached that will allow antennas to be placed on a ridgeline above the
helipad that will give a clear path to Europe! The team wants to provide
as many EU hams with a QSO as possible." See the complete press release
(with detailed pictures) at the following Web page:
http://dx-hamspirit.com/2009/01/09/european-press-release-kp5-desecheo-island/

LIGHTHOUSE ACTIVITY (Operation Extended). Members of the "Old Barney
Amateur Radio Club (OBARC) have extended their activity as N2OB/150 and
N2OB/LH through March 31st, due to popular demand. Operations will be
on all bands and modes available. This activity is to celebrate the
relighting and the 150th anniversary of the "Barnegat Lighthouse" (nick-
named "Old Barney"). See OPDX.889 for more details. N2OB/150 stations
will be operating from various locations around "Ocean County". Some
operations from the lighthouse property may be possible, and the callsign
N2OB/LH will be used which will count for working the lighthouse and
IOTA NA-111. A nice color photo QSL is being planned showing the relighting
of the lighthouse. QSL via N2OB (SASE requested) or by the Bureau is "OK".
Visit the OBARC Web page at: http://www.obarc.org

LY1000, LITHUANIA (Special Event). To mark the "Millennium of Lithuania"
(see http://www.lietuvai1000.lt/index.en.htm), members of the Amateur
Radio Society of Lithuania (LRMD) is issuing a special wooden plaque to
those who can fulfil the required following conditions:
Contact Special Event Stations with the prefix LY1000 (14 active
stations) or other LY stations from 01-JAN-2009 to 31-DEC-2009 and

collect 1000 points. Points are earned as follows:

A. European stations: 150 points for each contact with the Special Event Station LY1000 (At least 5 contacts necessary.) 50 points with other LY station.

B. DX stations: 300 points for each contact with the Special Event Station LY1000 (At least 3 contacts necessary.) 100 points with other LY station.

Applications deadline - December 31, 2010. Please send certified list of contacts (no QSL please) and payment to the LRMD Award Manager. Please give your E-mail address with your application, in case they have to contact you by E-mail. PRICE: 10 Euro or equivalent in USD.
Here are the Special Event LY1000 Stations and their operating dates:
LY1000FW (Op. Giedrius/LY1FW) from 01-JAN-2009 until 01-MAR-2009
LY1000GV (Op. Gintautas/LY2GV) from 01-JAN-2009 until 01-MAR-2009
LY1000QT (Op. Valerijus/LY2QT) from 01-JAN-2009 until 01-MAR-2009
LY1000WN (Op. Algimantas/LY2WN) from 01-JAN-2009 until 01-MAR-2009
LY1000M (Op. Vytautas/LY3M) from 01-JAN-2009 until 01-MAR-2009
LY1000NX (Op. Romas/LY3NX) from 01-JAN-2009 until 01-MAR-2009
LY1000W (Op. Rimantas/LY3W) from 01-JAN-2009 until 01-MAR-2009
LY1000CV (Op. Boleslovas/LY2CV) from 07-JAN-2009 until 01-MAR-2009
LY1000CM (Op. Bronius/LY1CM) from 02-MAR-2009 until 30-APR-2009
LY1000X (Op. Tomas/LY3X) from 02-APR-2009 until 31-MAY-2009
LY1000A (Op. Jonas/LY5A) from 02-MAY-2009 until 30-JUN-2009
LY1000Q (Op. Rolandas/LY4Q) from 13-JUN-2009 until 11-AUG-2009
LY1000G (Op. Stanislovas/LY1G) from 03-JUL-2009 until 31-AUG-2009
LY1000LA (Op. Eduardas/LY4LA) from 03-JUL-2009 until 31-AUG-2009

Any questions regarding this and other LRMD awards, can be sent via E-mail to: diplomai@... --or-- ly4q@...
Also, visit the LRMD Web page at: http://www.lrmd.ivi.lt/en/index.htm

P4, ARUBA. John, KK9A, will be active as P40A during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band entry. QSL via WD9DZV.

QRP NEWS. The 2009 QRP Challenge is now going on as of Janaury 1st. The event is to "Promote QRP portable operations with 'light' equipment, as well as the longest distance in kilometers with as few watts as possible."
For details, visit the Web page at:
http://qrpfr.free.fr/challenge/index_gb.php

QSL INFO AND NEWS.....
QSL ROUTES by Johannes, DK8JB:
9W2NTO direct
9W2IBR direct
J79WE via DL8WEM

NEW QSL MANAGER. Petr, OK1DOT, informs that he is now the QSL Manager for Raoul, ZS1REC.

NEW QSL TRACKING SERVICE IN CHILE. Have you sent a QSL to Chile but had no reply? Perhaps you had a contact with XQ, CE, CA, CD, XR, 3G, CC which has not been confirmed. A group of Chilean amateurs are offering to try to help to obtain missing card or cards by carrying out searches and making enquiries in Chile. This service is offered as a goodwill gesture by some Chilean amateurs and is completely free. To use the service you need to contact Jose Luis Jimenez. His E-mail address is: ce1kr.joseluis@...
You can write to him in Spanish or English. Full details are available on the Web site at: http://hunting-qsl.blogspot.com

HAVE PATIENCE! More QSL cards are still being received for the many UA4WHX operations. Vlad is still sending them out.

XE1KK/XF1 QSL STATUS. Ramon, XE1KK, recently active from the Baja California Sur State South East Group (NA-124), reports that QSLs will be designed and printed soon. He plans to send out a QSL card for each QSO via the bureau. No need to QSL back. Direct QSL will also be available for those who need the card faster. Logs will also be uploaded very soon on the LoTW. Ramon adds that he has made a presentation of his "lunch time" expeditions (as he calls it) and it can be download at: http://files.xe1kk.com/XE1KK-XF1.pdf
Also, Joaquin, XE1R, made a short video on Youtube with several QSOs were recorded from his home. You can watch the video at: http://www.youtube.com/watch?v=iGaatmYRCL8

ARE YOU IN THE LOG? The ZD8UW log search is available online at: http://clublog.g7vjr.org/l.php?log=ZD8UW

QSLS VIA LOTW: ER0WW, P49X and ZD8UW

QSLS RECEIVED VIA MAIL: 3DA0VB, 4J4K, 5H3VMB, 5N/LZ1QK, 5R8VB, 5X1VB, 7Q7VB, 9J2VB, 9U0VB, 9X0VB, A25VB, C91VB, C91VB/4, C98RF, D20VB, D60VB, EZ21BO, EZ8BO, EZ8CQ, FJ/OH2AM, J20VB, JD1BMM, K5S, K7A, KH0AB, P29VLR, VU4AN, VU7SJ, XW1B, YN2I, YU8/OH2R, Z2/UA4WHX, ZA0/I0SNY and ZK3MW

QSLS RECEIVED VIA THE BUREAU: None reported this week!

S2, BANGLADESH (Reminder). The St. Martin's Island, Teknaf, Bangladesh, operation will take place this week between January 16-22nd. The callsign will be S21DX. The six main operators will be: S21RC (Fazlay Rabby), S21AM (Manjurul Haque), S21DM (DM Hemayet), S21S (Sohel Awrangzeb), S21RO (Rasedul Islam) and S21SA (Sayra Shahlin, YL). QSL Manager will be EB7DX (www.eb7dx.com). For more details and updates, visit their Web page at: http://s2iota.eb7dx.com

SV/A, MOUNT ATHOS (Topband). Monk Apollo, Sv2ASP/A, has been showing up on 160 meters. He was on 1843 kHz at between/around 0545-0615z on December 29th, and between/around 0538-1612z on January 9th. He "may" show up again between/around the same time this week. Agelos, SV3RF, states, "Although he uses a low dipole barefoot he hears quiet well being in an area free of noise."

T33, BANABA ISLAND. Udo, DL9HCU, who was active as T30HC from Tarwa Island this past week (up to Janaury 10th), may be headed to Banaba Island (according to several sources) and sign T33HC. QSL via his home callsign.

T8, PALAU (Reminder). Operators Mike/JA6EGL, Yas/JA6UBY, Yu/JE6DND and Hiro/JA6KYU will be active as T88SM, T88CP, T88HK and T88HS, respectively, from Koror Island (OC-009), this week between January 16-18th. Activity will be 80-10 meters CW/SSB. QSL via their home callsigns (direct only).

TO4, REUNION ISLAND (AF-016). Daniel, F5LGQ, will be active as TO4IPA between January 13-31st.

TS7, TUNISIA (Update/IOTA Op). Members of the France Provins ARC (F6KOP) and some international operators are now active from Kerkennah Island (AF-073) using the callsign TS7C until January 19th. The team had some problems with customs with some of the transmitters, but by the time you read this, they should have all the stations (six) on the air. QSL via Sylvain, F4EGD, either direct or by the REF-Union Bureau (Please only via this bureau). More details are available on the DXpedition's Web site at: http://www.ts7c.net

VP8, FALKLAND ISLANDS (Reminder/Update/YL Op!). Just a reminder that an international group of YLs will activate the Falkland Islands (SA-002) between January 17-31st. Each operator will be signing with the callsign "VP8YL*", where the third letter of the suffix will be assigned to each YL operator at beginning of the operation. There will be 8 YLs from the following countries active from Falkland Islands:
2 from the UK 1 from Japan
1 from the Netherlands 1 from USA
1 from Italy 1 from Norway
1 from Greece
YL operators mentioned at present include: Janet/VP8AIB, Chantal/PA3GQG, Unni/LA6RHA, Jeanie/WA6UVF, Mio/JR3MVF, Liz/M0ACL, Victoria/SV2KBS, Nicky/M5YLO and Ruth/IT9ESZ. The YL team will fly into the Falklands on January 17th. Together with Janet, VP8AIB, and other YLs from Falkland will all activate VP8YL* for 14 days. All the YLs coming from around the world will be getting their VP8 callsign on Monday, January 19th. During the first weekend they will operate as VP8YLC which is the YL club's callsign on Falkland. The YLs will be operating from QTHs in Stanley (one from the home of Bob/VP8LP and Janet/VP8AIB and the other from a hut not far from Bob/Janet's home). Some of the YLs will bring along their own HF rigs. Some will stay for a week and the others for two weeks. The activity will be mainly on SSB, on all bands (80-10m), but only 20 hours every day. There will be 4 stations with the following antennas: two SteppIR 3 element beam and two vertical SteppIR.
QSL via operator's home callsign. Look for more information to become available at: http://www.radioclubs.net/aa_vp8yl_/

XR27, CHILE (Special Event). Chilean operators from the Atacama region will activate special event station XR27RAID between Janaury 11-24th. Operations will be on all bands using CW, SSB and PSK. QSL via HA1AG, by the Bureau or direct to: Zoli Pitman, Somogyi Bela UT 18, Gyor 9024,

HUNGARY. QSL are also "OK" via CE6TBN. Activity is to celebrate the running of the Association of Raidistas de Atacama's (ALTAR) jeepera adventure, the 27th Raid Atacama Desert Trophy which takes place between January 20-25th. For more details, see: http://www.raid-atacama.cl

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the ARRL DX CW Contest (February 21-22th) as a Single-Op/All-Band/High-Power entry. QSL via K6AM, direct or by the Bureau or LoTW.

ZK2, NIUE (OC-040). Chris, ZL1CT (GM3WOJ), will be active as ZK2V between May 16th and June 20th. He states that this 5 week DXpedition is not a "Holiday DXpedition" but it aims to give as many stations their first QSO with ZK2 as possible. This is the cyclone season, so operation may be interrupted by electrical storms. Resources are limited, so activity will be mainly on 80/40/20/15 meters using CW and SSB, with some 30/17/12 meter activity and RTTY. Planned operations include entries in the 2009 ARRL CW and Phone Contests. QSL via N3SL. More details will be forthcoming.

From: Paul M Dunphy
If I stick purely to DXCC stuff, I'll work 10 "new" things a year if I'm lucky. We need sunspots or we are going to have to get more serious about bands, modes and awards that do not require much F2 propagation.

Al,

About 3-4 years ago I suggested a WAS award for working WAS in three modes..... I suggested the name "Triple Play" because I thought it was sort of catchy. I did suggest a "fresh" starting date so that activity would be stimulated across all three modes. I didn't suggest it be LoTW-centric.

Beyond that, the idea was developed by "who-ever" in Newington.

The snide suggestion that somehow I profit from the idea is the basest sort of mean-spirited insult I've received in some time.

If not you're attracted to the idea of the award then don't commit a colossal waste of time chasing it, but have the common decency not to demean my character in the process.

As a lifetime member of CANAD-X and a former editor of the bulletin, Long

Skip, I can't honestly recall any awards ever offered by the group. I

don't know who offered the Seaway Award, or the one for working all the

provincial capitals or all the provinces. The guy who would know is Garry

Hammond, VE3XN. I don't know if Garry lurks here or not.

Maybe someone "up the line" can enlighten both of us.

73

Al, VE1AL

At 04:20 PM 1/11/2009, you wrote:

Believe it or not, Paul, I have never applied for WAS on any mode. I

am not interested, have never been interested, and never will be

interested.

As for digital, fuggidaboutit.

I wonder if Hans gets a small percentage of the gate for suggesting

this colossal waste of time. Let's see, perhaps I could start a

triple-play WAVE. I wouldn't charge much.

73

Al, VE1AL

I got one when I first was licensed, but I couldn't find it now.

Likely filed somewhere. However, I have a question. What happened to all

the Canadian awards? Seems to me they all disappeared in the last decade.

Wasn't there one for working all the provincial capitols, one for working

stations along the St Lawrence seaway, etc. Did the now defunct Canadx

sponsor anything? Does RAC offer any awards?

73, Paul VE1DX

It's difficult (and generally unfair) to criticize an operation.
But, day after day, my wife would listen and call and call on 20 SSB
relatively early in the morning. With no success, even when E44M was
calling specifically for NA.

I showed her the graph from a popular propagation program.
Statistically, later in the morning should be better for 20M to NA
from the Middle East.

Finally, two or three days before they QRTed, she worked them on 20,
around 10 AM local time.

I managed to get 'em on 30 early one evening for a band fill and a
new prefix. Never could get through on SSB.

If, like Danny, you dabble in a contest, I agree - the spots can be very beneficial. If you're still looking for that elusive AK on 80 meters (or some other band), the spots certainly help the chase.

In programs like N1MM (been too many years since CT!), if you're operating in an assisted category, the spots can populate the bandmap faster than you can whistle Dixie. The contest logging program can sort the calls by frequency, by callsign, by direction (so you're not turning the beam every three minutes) and obviously, by band.

You can tune the rig via the bandmap and virtually never touch the radio. Technology in action!

My contesting is not that serious and I generally don't connect to the cluster while I'm working most of the contests. My tuning is, for the most part, still manual. I try to find a place to "run" (i.e., call CQ and let them come to me) and occasionally go hunting for multipliers.

The latest skill seemingly disappearing - zero-beating! Some newbies make it out to be real technical challenge, with talk about pushing this button and that button, etc. It shouldn't be that tough.

Maybe it's the disappearance of the slide rule. With the slide rule you had to be cognizant of what was going on. With the calculator, you can divide eight by four and get 2.000000000000!! Good Grief!

Art - N4PJ

--- In DX-IS@yahoogroups.com, "Danny Douglas" <n7dc@...> wrote:
>
> But- you see, Im there for new ones - not the contest itself. The spot help me locate and work what I need (skipping those I dont). A contester needs them all, so either he sits in one place and they come to him, or he starts at one end of the band and works his way up to the other. Since I got onto the world wide spot nets, Ive done more "contesting" than ever before - even though that consists of 20-150 contacts per contest, only.

(1) Hans suggests the "Triple Play."
(2) ARRL sees it as a money-maker.
(3) ARRL institutes it and the number of LotW users skyrockets.
(4) Danny benefits because now there are more users than ever and his "chase" to ferret out the LotW users is enhanced.

They win - you win - where's the beef?

I already have 40 confirmed, but called night after night on the band, cause still need ssb somewhere.- and its spretty much all I could hear from them. Never heard, and didnt see any rtty spots. Never made it. Didnt even get a maybe. They would call for 6s and 7s for long stretches, and I was calling each time, along with 2 or three others I could hear. Nada- they responded to no one, over and over again. Maybe there is a lesson here: Investigate your operating area, before setting up. One quick trip,prior to the operation, by anyone with a receiver, to the hotel would show them all the qrm from lifts, motors, etc. that they were going to have, and they could have gone elsewhere to a different location, when they all arrived. Of course the biggest bug-a-boo - Propagation. I wish all these groups would go during a high sunspot period , not at the bottom of the cycle. Supprising how many Ive looked back at, who have gone out this last couple of years, and the last operation before that was about 10 years ago (at the bottom of another cycle). That doesnt make much sense to me.

Im, first and formost, against them charging for verifications of a state that probably is already worked, bought and paid for. Prior to now, you might turn in a state/country/mode/band you already had confirmed, and they would report ack to you it was a dupe, and they wouldnt sell you the verification - as you didnt need it. Yeah, 150 times 15 or 20 cents is not going to break anyone (if it does they shouldnt be playing this game), but its the principle of the thing. It all rolls back to the money thing. Few people who have been into hamming for more than a couple or three years need any more states. Now - if they keep track on their end, and see when you have achieved the deed, and just automatically send you a certificate, that would be a different thing. It would still encourage new LOTW membership, and indeed might even get more members, knowing it was a free award, and they would still have LOTW there to use for DXCC (thus paying for those verifications).

(1) Hans suggests the "Triple Play."
(2) ARRL sees it as a money-maker.
(3) ARRL institutes it and the number of LotW users skyrockets.
(4) Danny benefits because now there are more users than ever and his "chase" to ferret out the LotW users is enhanced.

They win - you win - where's the beef?

We have had WAS awards for some decades or so now. There is a 5 band WAS. Many of us have already worked that, even if we havent applied for it. Its just another set of rules to do what we are already, or have already done. Im not about to go buy

verifications for 150 more statiions, when I aleady have worked and
received cofirmations for all those. They didnt have the chintzpaw
to go ahead and accept the cards already in everyones queues, but
supposedly are letting everyone stqrt from the beginning. This one
might take the leaders a month or so, to be in there trying for
certificate number 1 - and Im sure some have already got the
majority needed.

The bottom line seems to be like I tell my wife when the official calls a penalty against "her" team:

"Honey, it's the rule."

She: "Well, it's a stupid rule!"

He: "Well, are you upset because of the rule or because the call was against your team?"

So why should the ARRL create an "ex post facto" award for all the stuff you already have?

It sounds too much like:

"Don't convince me with facts as my mind is already made up!"

Did you seriously think for one minute that when they called for W6/W7 that they were actually calling for people who had a 6 or a 7 in their call? Good grief!

Since they were on CW (I listened to them for quite a while a couple of different times when they did that), it was a devil of a lot easier to ask for W6/W7 than to ask for "stations west of the Mississippi because propagation is so difficult now we don't want to waste what little time we have working only the east coast."

It probably doesn't matter. I've heard SSB pileups before where the station asked for calls west of the Mississippi and there was a ton of guys who kept calling from the east coast anyway.

As bad as the propagation has been, the "window" for the west coast guys on 20 meters was about 20 minutes!

>
> I already have 40 confirmed, but called night after night on the band, cause still need ssb somewhere.- and its spretty much all I could hear from them. Never heard, and didnt see any rtty spots. Never made it. Didnt even get a maybe. They would call for 6s and 7s for long stretches, and I was calling each time, along with 2 or three others I could hear. Nada- they responded to no one, over and over again. Maybe there is a lesson here: Investigate your operating area, before setting up. One quick trip,prior to the operation, by anyone with a receiver, to the hotel would show them all the qrm from lifts, motors, etc. that they were going to have, and they could have gone elsewhere to a different location, when they all arrived. Of course the biggest bug-a-boo - Propagation. I wish all these groups would go during a high sunspot period , not at the bottom of the cycle. Supprising how many Ive looked back at, who have gone out this last couple of years, and the last operation before that was about 10 years ago (at the bottom of another cycle). That doesnt make much sense to me.

Wow! There's a novel approach. The "lottery" QSO! Send that 175 times and then send a QSL for each time you called. Maybe one of them will be the jackpot!

I just checked and I have 72 of the 150 LoTW confirmed, and it's
only 12 January. You are unlikely to ever get a Triple Play award
with that attitude. It is, you realise, the pinnacle of achievement
in Ham radio! Triple Play IS!

Lemmie elaborate on that. The mindset of those calling 'east' of the
Mississippi is that if one goes far enuf west of the river, eventually one
would get the the east coast thus one is 'far' west of the Mississippi!

Even with the "I can and do take my call with me when I move"
rule, isn't it a safe bet that most 1s and 2s are on the east coast
and mostly 6s and 7s (except N7DC) are on the west coast? Seems to
me if you decide to take your call with you when you move, you get to
enjoy the benefits and downfalls of doing so. I think a lot change
their call to reflect their new call area, but some do not. I see
nothing wrong with going by numbers instead of trying to use places
like the Mississippi river as a dividing line. Who knows if the guys
calling are really east or west of it?

On the other hand, if the DX asks for 6/7 calls, a W3 or a VE3
is not supposed to call and shouldn't be worked, no matter where he
lives. And while I may not know if VE1DX is east or west of the
Mississippi river, I know he doesn't have a 6 or a 7 in his
call. Just my 2 cents worth.

The failure to hear a DX station can lie on both parties, as well as propagation. But just maybe the propagation prome is because the DX isnt working the band/mode supported by propagation at the time. Over and over, we heard DX calling and not working areas that are hearing them. Who is at fault there? The DX needs to pay attention to prop charts, and experienced operators who know the band well. They simply cant say, "we are going to call Europe for 1 hour (or 10) and then call Asia for 2 hours and then America for 8 hours, and expect that any of those areas are going to be "in" at the time they have chosen. It has to be intelligently studied and planned, and then the plans carried out. If something like odd prop rears its ugly head, they have to make intelligent decisions as to changes, and not just be bull headed enough to continue with an unworkable plan, nor jump into another plan without knowing if there is a chance it will work.

None of this is particularly easy, but can be done, as many operations have shown us. Certainly, no one is going to be 100 percent satisified with whatever does happen. We will always have one area hearing the DX when they are working another, but hopefully that wont be the case in most instances. What we dont need is the incessant "why no EU" "why dont they work NA" "stupid expedition" etc etc just because things arent going the way the spotter thinks it should. We dont need those self-same "operators" calling when they know they shouldnt- and every one of them knows who they are. If the DX is working EU, there should be NO on-air comments from any other part of the world. Stateside operators should NOT be going on the DXs freq, making any sort of comment, tuning up, sending dits or any of the many stupid things we are hearing today. First of all, they interfere with the ongoing ability to hear the DX, secondly, do they really think the DX is listening to their own frequency, when working split?

Yeah- I know, preaching to the choir, but someone has to say it , hoping even one person reasons it out, and becomes part of the solution and not the problem.

I only listened on 40 CW but I never heard them at all. Heard the pileup OK.

If you can't hear them you can't work them. I can't blame the DXpedition for that - only the propagation gods.

Actually, I have to wonder about not being able to work them if you can't hear them. I repeatedly heard one station send his call, then "599 TU", then he was back at sending his call, and then "599 TU", then back at sending his call. Dunno what his logic was. Maybe he couldn't hear them either but hoped he would get into their log that way?

But, day after day, my wife would listen and call and call on 20 SSB relatively early in the morning. With no success, even when E44M was calling specifically for NA.

I showed her the graph from a popular propagation program.
Statistically, later in the morning should be better for 20M to NA from the Middle East.

Finally, two or three days before they QRTed, she worked them on 20, around 10 AM local time.

I managed to get 'em on 30 early one evening for a band fill and a new prefix. Never could get through on SSB.

My mind IS made up. We didnt need another WAS award. If you want WAS , earn it per band, per mode, etc. Those awards are available, and for those who have it, is it any kind of a big deal to do it all over again? Hey, I can spell "antenna today, could spell it yesterday, and will be able to spell it tomorrow - and dont need to prove it over and over. Those are the facts!

The bottom line seems to be like I tell my wife when the official calls a penalty against "her" team:

"Honey, it's the rule."

She: "Well, it's a stupid rule!"

He: "Well, are you upset because of the rule or because the call was against your team?"

So why should the ARRL create an "ex post facto" award for all the stuff you already have?

It sounds too much like:

"Don't convince me with facts as my mind is already made up!"

Prior to now, you might turn in a state/country/mode/band you already had confirmed, and they would report ack to you it was a dupe, and they wouldnt sell you the verification - as you didnt need it. Yeah, 150 times 15 or 20 cents is not going to break anyone (if it does they shouldnt be playing this game), but its the

principle of the thing. It all rolls back to the money thing. Few
people who have been into hamming for more than a couple or three
years need any more states. Now - if they keep track on their end,
and see when you have achieved the deed, and just automatically send
you a certificate, that would be a different thing. It would still
encourage new LOTW membership, and indeed might even get more
members, knowing it was a free award, and they would still have LOTW
there to use for DXCC (thus paying for those verifications).

I knew who they were calling for. W6 and W7. They know many of us live east of the Mississippi (always wanted to spell that in a message). When they call for W4, I dont reply. I am not a W4. I do hear a lot of W4sa tough, calling from out on the west coast. If they want the west coast - call for west coast. Then all the idiots from the central and east states who continue to call, will do it anyway - just like they did right thru the 6-7-8-9-0- period.

Did you seriously think for one minute that when they called for W6/W7 that they were actually calling for people who had a 6 or a 7 in their call? Good grief!

Since they were on CW (I listened to them for quite a while a couple of different times when they did that), it was a devil of a lot easier to ask for W6/W7 than to ask for "stations west of the Mississippi because propagation is so difficult now we don't want to waste what little time we have working only the east coast."

It probably doesn't matter. I've heard SSB pileups before where the station asked for calls west of the Mississippi and there was a ton of guys who kept calling from the east coast anyway.

As bad as the propagation has been, the "window" for the west coast guys on 20 meters was about 20 minutes!

> I already have 40 confirmed, but called night after night on the band, cause still need ssb somewhere.- and its spretty much all I could hear from them. Never heard, and didnt see any rtty spots. Never made it. Didnt even get a maybe. They would call for 6s and 7s for long stretches, and I was calling each time, along with 2 or

three others I could hear. Nada- they responded to no one, over and over again. Maybe there is a lesson here: Investigate your operating area, before setting up. One quick trip,prior to the operation, by anyone with a receiver, to the hotel would show them all the qrm from lifts, motors, etc. that they were going to have, and they could have gone elsewhere to a different location, when they all arrived. Of course the biggest bug-a-boo - Propagation. I wish all these groups would go during a high sunspot period , not at the bottom of the cycle. Supprising how many Ive looked back at, who have gone out this last couple of years, and the last operation before that was about 10 years ago (at the bottom of another cycle). That doesnt make much sense to me.

Here's my two cents:
Any station (especially DX) who goes by the numbers, MUST do so in a pattern that follows the prop. So that to me does not mean 1-2-3-4....etc. Lists and numbers annoy me. Two cents given.

Even with the "I can and do take my call with me when I move"
rule, isn't it a safe bet that most 1s and 2s are on the east coast
and mostly 6s and 7s (except N7DC) are on the west coast? Seems to
me if you decide to take your call with you when you move, you get to
enjoy the benefits and downfalls of doing so. I think a lot change
their call to reflect their new call area, but some do not. I see
nothing wrong with going by numbers instead of trying to use places
like the Mississippi river as a dividing line. Who knows if the guys
calling are really east or west of it?

On the other hand, if the DX asks for 6/7 calls, a W3 or a VE3
is not supposed to call and shouldn't be worked, no matter where he
lives. And while I may not know if VE1DX is east or west of the
Mississippi river, I know he doesn't have a 6 or a 7 in his

call. Just my 2 cents worth.

Agreed Dale, the chronological order of the numbers do not
follow propagation, and the more savvy DXpeditioners know
this. Lists annoy a lot of people, and some people like them.

I think going by call areas is necessary in many cases. If you
just say QRZ UP, you just hear a massive roar, and the QSO rate will
be low. Going by call areas (a/k/a numbers) can be frustrating, but
if they cycle through them fairly fast (10 per area), a guy doesn't
have to wait too long to get another shot at them. I've heard some
of the most famous and best DXers in the game resort to call areas,
at least in the initial few days. The really frustrating thing is
when they stick on a certain number for an hour. If you are going to
do it, whip through them fast so no one gets shut out listening to
propagation fade away.

So Danny, why do you chase this Marathon award year after year
working the same DX over and over?

Triple Play encourages more operating. Trying out new modes.
Joining LOTW.

--- In DX-IS@yahoogroups.com, "Danny Douglas" <n7dc@...> wrote:
>
> Im, first and formost, against them charging for verifications of a
state that probably is already worked, bought and paid for. Prior
to now, you might turn in a state/country/mode/band you already had
confirmed, and they would report ack to you it was a dupe, and they
wouldnt sell you the verification - as you didnt need it. Yeah, 150
times 15 or 20 cents is not going to break anyone (if it does they
shouldnt be playing this game), but its the principle of the thing.
It all rolls back to the money thing. Few people who have been into
hamming for more than a couple or three years need any more states.
Now - if they keep track on their end, and see when you have achieved
the deed, and just automatically send you a certificate, that would
be a different thing. It would still encourage new LOTW membership,
and indeed might even get more members, knowing it was a free award,
and they would still have LOTW there to use for DXCC (thus paying for
those verifications).

Going by numbers doesn't mean much anymore. A large number of the W6/W7s
that E44M was working were east of the Mississippi.

Doesn't matter where they are . . . there are two reasons for
going by the numbers (1) propagation -- although some are not in
their "home" call area, most are and (2) it theoretically* cuts the
pileup by 1/10th.

* This assumes the calls are evenly distributed, and they ate not. I
bet 6's outnumber 7s 10 to 1.

Marathon doesnt require us to pay for QSL checking, etc. every year. I only do it as I go along, and have yet to apply for the past two years, and probably wont. Also, I would rather get each of those QSOs from a different station, and on a new band or mode - all leading toward additional QSOs for the Challenge award. For the majority (at least those who have been operating in the past, I believe they have already been working all three modes.

Triple Play indeed may increase the numbers working RTTY, and that is to be determined. It may also draw in some who have, in the past, avoided contesting, because even tho it is a contest (to be won by one person, only one time) it reallyl doesnt require the cut-throat activity that other, normal contests do. I can see the next step - someone will push for it to be an annual activity, and the ARRL will agree - after all its the money with them.

Topic: 8454 Message: 8814

I suspect many of them were. But, I also suspect they didnt really work many. Every time I heard them going by the numbers like that, they were not working many stations, but rapidly running thru 6 thru 1, until they got back to 2 thru 5 where they worked many stations, then back to 6 thru 1 again, and again with few contacts. They often only called those 6-1` for trwo or three times, and ran right on to the 2 thru 5s, where they were hearing many more stations. There were stations there, calling with the correct numbers each time, but they didnt appear to really take the effort or time to try to dig out at least a couple of them. I sat one time, for 3 complete circuits, and they didnt copy even 1 of the 6s or 7s, giving each number less than one or two minutes before they abandoned it and went on to the next. Part of the reason for working by the numbers, is to attempt to get the other numbers (apparently stronger signals) to shut up so they can hear the weaker, less propagation capable signals from the other areas. If that is the case, then they need to listen a little longer, and harder to see if they can pick any out. This definitely did not appear to be the case.

Danny,

We must have been listening to different ops. The 8 hours I sat on 20 cw they only asked for NAs and then W6/W7. I never heard him ask for 1s thru 5s or 8s thru 0s. Did I miss something?

I guess so Win. I was listening to 40 meters SSB. Never heard a peep on 20 here, most days. I listened almost all night the next to last night they were there. (till 3 in the morning). During that period , early on, they did just as you mentioned. Working everyone, then asking for 6s and 7s., working few of either. Then back to everyone. The problem with that was, of course, they were apparently not hearing any 6s or 7s most of that time (and I could hear several calling). They kept slipping back and forth from Eu split to US splits, which is fine, giving both side of the ocean a chance. The final evening, they went as I stated before, and that was kept up for several hours. About 3 hours before they were due to pack up (or at least the published date for fold up, they just disappeared. I saw no spots other than one or two saying something about "RTTY TOO" Whatever that meant. I was NOT listening to European spots, since get tired of the BINGO statements, but apparently they had just shut down, at that time.

Paul,

My problem with going by the numbers is that I can't stand sitting around picking my nose for 90% of the time. That is no fun. If I try to take a break from the radio, inevitably I return to find them back on 1s. I am sure it is easier for the DX ops though, and it is not my job to critique their operation.

Danny,

You are probably correct too. I never heard them on 40.

Win

I just worked TS7C on 160M RTTY . . . it's getting pretty bad
when that is the thrill of the day. I didn't know there was even any
RTTY on 160, let alone DX. He's on 1.848 listening up about 1.2 and
quite loud. These guys sure like their RTTY.

However it doesn't count for WAS Triple Play. Darn!

Conditions were up and down. The "QRM" was OX3KQ and he was 44
but gave me a 55. Then he stopped the pileup and asked me to listen
for a friend of his. That turned out to be LA2FKA and he was 55 (and
gave me a 55.) I don't care for SSB on 160M . . . tough sledding, for sure.

Lots of activity on 160 tonight, but I can't get over the 3V on
RTTY. I guess they are going to work RTTY on all bands, Have them
160-17M RTTY except 80M. Could hear them earlier, but no luck on
that band. Oh well, you can't get everything everywhere.

Everyone that works them has to tell the world (I'm guilty of spotting them when I did it on 160M, but I was on cloud 9 after doing it on 1.8 MHz RTTY -- my first QSO on that band on teletype.) However, on other 3V bands it isn't very rare, and everyone needs to tell everyone connected to a cluster they worked them.

Some software used to not allow spots that were within 15 minutes and 2-3 KHz, but that seems to have disappeared. Go figure. It has its plusses and minuses. I'd really jump on it if I hadn't done it myself tonight! :-)

Fine Danny. Your objection is duly noted.

So let those who are interested in a 3-mode WAS particpate in it, and otherwise ignore it.

Since your mind is made up, I won't bother to try and discuss it with you. For everyone else on the list, though:

Personally, though, while I have no interest in the award at this time, I don't see a problem with it. It's certainly not going to be a "money maker," at best I think the League will break even on it (do the math). But, if it increases activity on the air and interest in operating... what's the harm?

Oh, and while I'm thinking of it... fair is fair. While Hans and I quite often don't see eye-to-eye on many subjects that pop up on this reflector, he did make the original suggestion, and deserves all the atta-boys and pats on the back that come with it. At least he did get credited... how often in life does the guy with the bright idea end up shoved aside in favor of those who insist on shining in the spotlight on someone else's inspiration and perspiration (which is another subject for another reflector for another day)

My mind IS made up. We didnt need another WAS award. If you want WAS , earn it per band, per mode, etc. Those awards are available, and for those who have it, is it any kind of a big deal to do it all over again? Hey, I can spell "antenna today, could spell it yesterday, and will be able to spell it tomorrow - and dont need to prove it over and over. Those are the facts!

Since WAS has little or nothing to do with DX. If you want something to do while waiting for the Sun to wake up, try to work ALL 3077 USA Counties. It took me just under a year to do it. After a year there may be DX again.

Fine Danny. Your objection is duly noted.

So let those who are interested in a 3-mode WAS particpate in it, and otherwise ignore it.

Since your mind is made up, I won't bother to try and discuss it with you. For everyone else on the list, though:

(516) 681-2922 / w2vu@...

Dave Morris, N5UP
Founder and Webmaster, eQSL.cc
N5UP@...

FOR IMMEDIATE RELEASE: January 13, 2009
CQ to Accept eQSL Confirmations for Award Credit

(Hicksville, NY and Bedford, TX, January 13, 2009) - CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately, CQ Editor Rich Moseson, W2VU, and eQSL Founder and Webmaster Dave Morris, N5UP, announced today.

There will be certain limitations and procedural differences for different awards, at least to start. Only confirmations from "Authenticity Guaranteed" members of eQSL will be accepted, and in accordance with existing eQSL policy, a membership level of bronze or higher is required in order to participate in award programs via eQSL.

"This is the first time that CQ has formally accepted anything other than traditional paper QSL cards for its awards," said Moseson. "We have been working with Dave Morris and his team for several months to assure that the integrity of our awards programs will be protected and to create mechanisms to make it easy for both award applicants and award managers to use eQSL credits toward our awards. All of our award

managers have been involved in this process and support this action."

"We want to express our great appreciation to Dave and his team for their willingness to do whatever was necessary to make this agreement possible," Moseson added. "It has been a pleasure working with them and we look forward to a long-lasting relationship."

"We are pleased to be adding CQ to the top of our list of amateur organizations that accept electronic QSLs," said Morris. "CQ has some of the most highly sought-after awards, and we have been working behind the scenes for years to create credit submission mechanisms that would ensure the integrity of their programs without introducing any additional labor for the award managers. We believe the electronic QSL can drastically reduce costs, and the award application mechanisms we have developed will provide for more efficient processing at reduced cost for both the applicant and the award manager."

Applicants for the CQ DX and CQ DX Field Awards must print out their eQSLs and submit them along with their traditional QSLs to a CQ checkpoint or to CQ DX Awards Manager Billy Williams, N4UF. eQSL has an automated process in place for applicants for CQ's Worked All Zones, WPX and USA-Counties awards. N5UP explains how that will work for the applicant:

"The applicant goes to the My Awards screen. He clicks on the particular award he wants to apply for. This brings up a list of the credits our system 'thinks' he is entitled to. There are checkboxes that allow him to check which ones he wants to use, and we automatically pre-fill one credit per category so he doesn't have to do anything if he wants to take the defaults. At the bottom of the screen are two buttons: 'Submit to CQ' and 'Print Paper Application'."

The "submit" button will place all the selected QSOs into a file for the award manager to access, while the "print" button will generate a printed list to be submitted along with the traditional application. PLEASE NOTE that ALL applicants must send the award fee payment to the CQ Award Manager, regardless of how the application is submitted. Some CQ award managers are now accepting PayPal; see individual award web pages for details. All awards will continue to accept traditional QSLs as well as eQSLs. For the USA-Counties Award (USA-CA), applicants must note on their record books (or printouts) whether each county has been confirmed traditionally (with an "X" to the right of the entry) or electronically (with an "E" next to the entry).

For more information on eQSL, visit http://www.eQSL.cc

For more information on CQ awards, visit the awards page on the CQ website at http://www.cq-amateur-radio.com. Please note that the award rules posted on the website have not yet been updated to reflect the acceptance of eQSLs. This will be done as soon as possible, but the policy takes effect immediately.

Okay - so from here on out, you are not allowed to use those "new guys" on LoTW! They are there for a totally different purpose than helping you out! They're off limits to you!

How's that? Obey the rules you like - ignore the ones you think are stupid.

I'd continue the debate and match wits some more but I thought it was polite not to fight with an unarmed man.

Topic: 8454 Message: 8831

Have you ever been in a DX location where you suddenly discover you're on the "wrong end" of the pileup?

If you don't have it already, download Morse Runner. It's free at dxatlas.com - if you can work any CW at all, you'll love it.

Run either the pileup mode or the HSC mode and let six to ten guys call you at one time. Then think what the DX station hears when there are 50 (or more) calling at the same time.

I heard a pileup one day on SSB. The poor guy was trying to work the pileup on simplex. He was very patient, but generally unsuccessful. He apologized profusely. He commented that when he was finally able to pick out a call, regardless of who he picked out, they were 59+ in the clear. But, in the pileup, it was an almost indistinguishable mass of sound. Even from my side, where I could hear a huge number of those who were calling, it was difficult to pull out calls.

ZL1AMO, OH2BH, G3TXF, DJ6SI, etc., learned how to do it because they've done it over and over and over. They and their ilk are the best - the cream of the crop, etc. My apologies to the many I've omitted. How many of those guys on the E44M dxpedition were experienced dxpeditioners? Everyone has to start somewhere.

My first dxpedition (very organized, a lot of fun and surprisingly comfortable) to Mozambique was a valuable lesson in what it's like to be on the other side. I practiced and practiced and practiced before I went because I didn't want to come home and see on the cluster that there were numerous posts about what a lid I was, a poor excuse for an operator, couldn't handle a pileup, didn't know jack squat about propagation, etc. The immediate goal was to make sure I didn't embarass myself.

When I got on the rig the first time and called CQ I was shaking like a leaf. About four QSOs into the shift and all hell broke loose. It suddenly sounded like every CW op in the world was calling C91JR. It was sheer bedlam. For a brief moment, I felt if I sneaked away, they might never really know I was there. It was like nothing I had ever heard. Of course, those poor dummies had no idea I was a rank beginner! I guess one assumes if I came on the radio I must know what I was doing!

Over the course of two weeks, I learned a lot about handling the pileup. One of the things I learned was that an enormous amount of the guys were pretty slick at discerning my operating habits. After a half dozen shifts, I was beginning to think I was hot stuff. Visions of "..great op, great ears..." posted on the cluster went

through my head. But then....

One day I got on for my next turn at one of the rigs, called CQ and a double-hell opened up. Europe *and* Asia were both 599+! It was damned near like starting over with the learning experience.

Throughout my trip, I intentionally avoided numbers. God forbid using a list! I personally abhor lists. After all was said and done and I would sometimes slowly settle into a pattern that would let me work reasonable quantities in a few hours, I promised myself I would never be critical of the guy trying to handle the hordes.

I truly belive that for every guy out there who's dynamite behind the mic or at the key, there are 75 others who are either learning, struggling to learn, wanting to learn and maybe still lacking. But their desire (and expense) to be there was paramount and it's our responsibility to help them make the best of it.

When was the last time any of us took a radio into some place where you could die so you could put one on the air for "the deserving?"

I've even hear Martti "do numbers." He generally doesn't, but the first few days of a brand new one (the most recent I remember is St. Barts) are, as you say, sometimes memorable.

When a spotted frequency is one that might be one or several modes, why not? If you spot something, for instance, such as the frequency 7.123, what is the mode there? I dont know for sure, and my software doesnt know for sure, since it is a "digital" assignment here in the states. Is it CW? RTTY? PSK? whatever? It could be any of the above. If you spot it with the indicator RTTY, then when I click on it, my software knows to put my rig in SSB, and software in RTTY. Otherwise, it can only go by an arbitrary configuration which has been preset - and quite often its wrong. Quite often, a spot is a new spot from someone who has just turned on his computer/radio, so he doesnt know about all those which have already been sent - thus there is certainly no harm in doing so, and a great help to be on the right mode when one clicks and gets there.

Subject: [DX-IS] Am I missing sump'in?

About every 2-3 spots on DX Summit for TS7C read something like this:
.......rtty
.......rtty on freq
.......rtty
.........rtty second call
.......rtty good op

.........am I missing something.........like they are on rtty? the freq has not changed? and the point is?

maybe they are operating rtty....

Holy smoke. Congrats. I woud not have thought that would be possible in that short a time. Im sure I have never done that, in all my years of hamming; even putting all my callsigns/locations together and touting them up. Not something I am interested in, but I know there are may that are. Im the only active hf op in Madison County Va, and ocassionally get an email requesting a QSO for that award, and happy to give them out. There are, of course, ocassinal mobile operators travelling thru, especially form a much larger ham population starting just the next county east and north of me (Culpeper), so during Virginia activity days I get a bit of competition.

Since WAS has little or nothing to do with DX. If you want something to do while waiting for the Sun to wake up, try to work ALL 3077 USA Counties. It took me just under a year to do it. After a year there may be DX again.

Fine Danny. Your objection is duly noted.

So let those who are interested in a 3-mode WAS particpate in it, and
otherwise ignore it.

Since your mind is made up, I won't bother to try and discuss it with you.
For everyone else on the list, though:

Personally, though, while I have no interest in the award at this time, I
don't see a problem with it. It's certainly not going to be a "money
maker," at best I think the League will break even on it (do the math).
But, if it increases activity on the air and interest in operating... what's
the harm?

Oh, and while I'm thinking of it... fair is fair. While Hans and I quite often don't see eye-to-eye on many subjects that pop up on this reflector, he did make the original suggestion, and deserves all the atta-boys and pats on the back that come with it. At least he did get credited... how often in life does the guy with the bright idea end up shoved aside in favor of those who insist on shining in the spotlight on someone else's inspiration and perspiration (which is another subject for another reflector for another day)

My mind IS made up. We didnt need another WAS award. If you want WAS , earn it per band, per mode, etc. Those awards are available, and for those who have it, is it any kind of a big deal to do it all over again? Hey, I can spell "antenna today, could spell it yesterday, and will be able to spell it tomorrow - and dont need to prove it over and over. Those are the facts!

8835. Re: [DX-IS] Re: Hans did it Superstition mountains

Yahoo group: DX-IS (2009)
Date: 2009-01-13 14:23:29 UTC
From: W4ABW@aol.com
Topic: 8757 Message: 8835

When living in AZ I often visited the Superstition mountains. LeBarge Canyon, First Water and at the foot of Weaver's Needle. I met some men who actually lived out there at the base of the Needle. One was a fellow named Ed Pipher. He always toted a 6 gun as did the others. Check out the Arizona Republic in the early 60s for stories about the Sups, skulls found and the like. Its probably tame now and the legends are fading of the Lost Dutchman.

8836. Re: [DX-IS] A new place to work Triple Play

Yahoo group: DX-IS (2009)
Date: 2009-01-13 14:45:13 UTC
From: Don Greenbaum
Topic: 8817 Message: 8836

The last two weekends were good opportunities to amass lots of triple play points. In the rtty roundup I worked 48 states and have 45 confirmed on lotw so far. In the NAQP CW last weekend I worked 45 states and in just 2 days 36 of them are confirmed. This weekend is the ssb portion of the naqp and of course there is the 160 test at the end of the month.

Why waste time on a net when you can work them more quickly in contests?

The NAQP tests are 100 watts and no packet, which makes it all the more rewarding.

8837. Re: [DX-IS] Re: E44M

Yahoo group: DX-IS (2009)
Date: 2009-01-13 17:02:05 UTC
From: CSM(r) Gary Huber
Topic: 8454 Message: 8837

Well said. Another observation; grey line propagation works 20M on down with decreasing smaller "openings". If the "method" is understood by the operators on both ends, there seems to be some increased measure of success. If not, frustration and fewer contacts into various areas.

Those with several call signs may have noticed this phenomena. As trustee for N1SF, I dropped the call into the P5/4L4FN 15M SSB pile-up when he was "only working ones, twos, and threes" with little success because propagation was favoring 8s, 9s, and 0s (sunset greyline was occurring) and worked him on the second or third call. Later when he decided to work "nines" after going through the numbers, I made a contact with my call, but it was difficult; the Titan 425 was running the legal limit, Heil HC-5, some processing and lots of calls.... and I was either the last nine worked that day or next to it. I seen this scenario played out by several DX-peditions. On the other end of the spectrum, those who plan to maximize their "Q rate" into various areas seem to be easy to work.

73 es DX,

Gary - AB9M

From: Danny Douglas
Sent: Monday, January 12, 2009 2:31 PM
To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] Re: E44M

The failure to hear a DX station can lie on both parties, as well as propagation. But just maybe the propagation prome is because the DX isnt working the band/mode supported by propagation at the time. Over and over, we heard DX calling and not working areas that are hearing them. Who is at fault there? The DX needs to pay attention to prop charts, and experienced operators who know the band well. They simply cant say, "we are going to call Europe for 1 hour (or 10) and then call Asia for 2 hours and then America for 8 hours, and expect that any of those areas are going to be "in" at the time they have chosen. It has to be intelligently studied and planned, and then the plans carried out. If something like odd prop rears its ugly head, they have to make intelligent decisions as to changes, and not just be bull headed enough to continue with an unworkable plan, nor jump into another plan without knowing if there is a chance it will work.

None of this is particularly easy, but can be done, as many operations have shown us. Certainly, no one is going to be 100 percent satisified with whatever does happen. We will always have one area hearing the DX when they are working another, but hopefully that wont be the case in most instances. What we dont need is the incessant "why no EU" "why dont they work NA" "stupid expedition" etc etc just because things arent going the way the spotter thinks it should. We dont need those self-same "operators" calling when they know they shouldnt- and every one of them knows who they are. If the DX is working EU, there should be NO on-air comments from any other part of the world. Stateside operators should NOT be going on the DXs freq, making any sort of comment, tuning up, sending dits or any of the many stupid things we are hearing today. First of all, they interfere with the ongoing

ability to hear the DX, secondly, do they really think the DX is listening to their own frequency, when working split?

Yeah- I know, preaching to the choir, but someone has to say it , hoping even one person reasons it out, and becomes part of the solution and not the problem.

Subject: Re: [DX-IS] Re: E44M

I only listened on 40 CW but I never heard them at all. Heard the pileup OK.

If you can't hear them you can't work them. I can't blame the DXpedition for that - only the propagation gods.

Actually, I have to wonder about not being able to work them if you can't hear them. I repeatedly heard one station send his call, then "599 TU", then he was back at sending his call, and then "599 TU", then back at sending his call. Dunno what his logic was. Maybe he couldn't hear them either but hoped he would get into their log that way?
:-)

It's difficult (and generally unfair) to criticize an operation.
But, day after day, my wife would listen and call and call on 20 SSB
relatively early in the morning. With no success, even when E44M was
calling specifically for NA.

I showed her the graph from a popular propagation program.
Statistically, later in the morning should be better for 20M to NA
from the Middle East.

Finally, two or three days before they QRTed, she worked them on 20,
around 10 AM local time.

I managed to get 'em on 30 early one evening for a band fill and a
new prefix. Never could get through on SSB.

This post sort of says it all about how many users of this reflector feel about the post after post on this and other non dx subjects.

I am deleting 99% of the posts lately. THEY ARE NOT DX NEWS, or even a discussion of DX in many cases. What you can or can't work is not DX news. Get a better radio, antennas etc. Posting how you can or can't hear a station doesn't interest us.

Let me remind everyone of the purpose of this reflector. It is for NEWS about DX. It is about getting better and working DX. If you want to carry on a conversation amongst a few of your ad finitum on a topic, send them to each other.

This is not a chat room. In the past week I have had 5 long time members complain to me about this list.

Thanks

Dave Morris, N5UP
Founder and Webmaster, eQSL.cc
N5UP@...

FOR IMMEDIATE RELEASE: January 13, 2009

CQ to Accept eQSL Confirmations for Award Credit
Hicksville, NY and Bedford, TX, January 13, 2009) - CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately, CQ Editor Rich Moseson, W2VU, and eQSL Founder and Webmaster Dave Morris, N5UP, announced today.

There will be certain limitations and procedural differences for different awards, at least to start. Only confirmations from "Authenticity Guaranteed" members of eQSL will be accepted, and in accordance with existing eQSL policy, a membership level of bronze or higher is required in order to participate in award programs via eQSL.

"This is the first time that CQ has formally accepted anything other than traditional paper QSL cards for its awards," said Moseson. "We have been working with Dave Morris and his team for several months to assure that the integrity of our awards programs will be protected and to create mechanisms to make it easy for both award applicants and award managers

to use eQSL credits toward our awards. All of our award managers have been involved in this process and support this action."

"We want to express our great appreciation to Dave and his team for their willingness to do whatever was necessary to make this agreement possible," Moseson added. "It has been a pleasure working with them and we look forward to a long-lasting relationship."

"We are pleased to be adding CQ to the top of our list of amateur organizations that accept electronic QSLs," said Morris. "CQ has some of the most highly sought-after awards, and we have been working behind the scenes for years to create credit submission mechanisms that would ensure the integrity of their programs without introducing any additional labor for the award managers. We believe the electronic QSL can drastically reduce costs, and the award application mechanisms we have developed will provide for more efficient processing at reduced cost for both the applicant and the award manager."

Applicants for the CQ DX and CQ DX Field Awards must print out their eQSLs and submit them along with their traditional QSLs to a CQ checkpoint or to CQ DX Awards Manager Billy Williams, N4UF. eQSL has an automated process in place for applicants for CQ's Worked All Zones, WPX and USA-Counties awards. N5UP explains how that will work for the applicant:

"The applicant goes to the My Awards screen. He clicks on the particular award he wants to apply for. This brings up a list of the credits our system 'thinks' he is entitled to. There are checkboxes that allow him to check which ones he wants to use, and we automatically pre-fill one credit per category so he doesn't have to do anything if he wants to take the defaults. At the bottom of the screen are two buttons: 'Submit to CQ' and 'Print Paper Application'."

The "submit" button will place all the selected QSOs into a file for the award manager to access, while the "print" button will generate a printed list to be submitted along with the traditional application. PLEASE NOTE that ALL applicants must send the award fee payment to the CQ Award Manager, regardless of how the application is submitted. Some CQ award managers are now accepting PayPal; see individual award web pages for details. All awards will continue to accept traditional QSLs as well as eQSLs. For the USA-Counties Award (USA-CA), applicants must note on their record books (or printouts) whether each county has been confirmed traditionally (with an "X" to the right of the entry) or electronically (with an "E" next to the entry).

For more information on eQSL, visit: http://www.eQSL.cc
For more information on CQ awards, visit the awards page on the CQ website at <http://www.cq-amateur-radio.com/>. Please note that the award rules posted on the website have not yet been updated to reflect the acceptance of eQSLs. This will be done as soon as possible, but the policy takes effect immediately.

FOR IMMEDIATE RELEASE: January 13, 2009
CQ to Accept eQSL Confirmations for Award Credit

(Hicksville, NY and Bedford, TX, January 13, 2009) - CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately, CQ Editor Rich Moseson, W2VU, and eQSL Founder and Webmaster Dave Morris, N5UP, announced today.

There will be certain limitations and procedural differences for different awards, at least to start. Only confirmations from "Authenticity Guaranteed" members of eQSL will be accepted, and in accordance with existing eQSL policy, a membership level of bronze or higher is required in order to participate in award programs via eQSL.

"This is the first time that CQ has formally accepted anything other than traditional paper QSL cards for its awards," said Moseson. "We have been working with Dave Morris and his team for several months to assure that the integrity of our awards programs will be protected and to create mechanisms to make it easy for both award applicants and award managers to use eQSL credits toward our awards. All of our award managers have been involved in this process and support this action."

"We want to express our great appreciation to Dave and his team for their willingness to do whatever was necessary to make this agreement possible," Moseson added. "It has been a pleasure working with them and we look forward to a long-lasting relationship."

"We are pleased to be adding CQ to the top of our list of amateur organizations that accept electronic QSLs," said Morris. "CQ has some of the most highly sought-after awards, and we have been working behind the scenes for years to create credit submission mechanisms that would ensure the integrity of their programs without introducing any additional labor for the award managers. We believe the electronic QSL can drastically reduce costs, and the award application mechanisms we have developed will provide for more efficient processing at reduced cost for both the applicant and the award manager."

Applicants for the CQ DX and CQ DX Field Awards must print out their eQSLs and submit them along with their traditional QSLs to a CQ checkpoint or to CQ DX Awards Manager Billy Williams, N4UF. eQSL has an automated process in place for applicants for CQ's Worked All Zones, WPX and USA-Counties awards. N5UP explains how that will work for the applicant:

"The applicant goes to the My Awards screen. He clicks on the particular award he wants to apply for. This brings up a list of the credits our system 'thinks' he is entitled to. There are checkboxes

that allow him to check which ones he wants to use, and we automatically pre-fill one credit per category so he doesn't have to do anything if he wants to take the defaults. At the bottom of the screen are two buttons: 'Submit to CQ' and 'Print Paper Application'."

The "submit" button will place all the selected QSOs into a file for the award manager to access, while the "print" button will generate a printed list to be submitted along with the traditional application. PLEASE NOTE that ALL applicants must send the award fee payment to the CQ Award Manager, regardless of how the application is submitted. Some CQ award managers are now accepting PayPal; see individual award web pages for details. All awards will continue to accept traditional QSLs as well as eQSLs. For the USA-Counties Award (USA-CA), applicants must note on their record books (or printouts) whether each county has been confirmed traditionally (with an "X" to the right of the entry) or electronically (with an "E" next to the entry).

For more information on eQSL, visit http://www.eQSL.cc

For more information on CQ awards, visit the awards page on the CQ website at http://www.cq-amateur-radio.com. Please note that the award rules posted on the website have not yet been updated to reflect the acceptance of eQSLs. This will be done as soon as possible, but the policy takes effect immediately.

In a way it makes sense. I was hoping that LOTW would have the capability of us printing out their card, as does eQSL. It would still be in their data base as a good contact, but something for those who want a "real" card to who off with too. With LOTW we have the capability of using both the electronic QSL data base, or we can turn in a real card, received via the mail or buro. We have a two-way capability of turning them in for credit, so looks like CQ wants just the one way, and since its not their database, doing it by paper is their choice.

Hi Mike,

I am an avid fan of QSLing, online, paper, bureau, direct. I have been on eQSL and LOTW since 2006. I support and just love the service they provide.

I also like the DXCC awards programs available. I have had a WIA DXCC award for years and have recently received an ARRL DXCC awards via LOTW.

What is amazing is that I didn't (till a few minutes ago) realise that the CQ magazine had a DX Awards program! Every time I saw the list in a CQ magazine (that I get a copy second hand occasionally) I just thought they were displaying ARRL DXCC Awards data.

Anyway, if the CQ magazine are going to have an award that accepts eQSLs, why would one need to send in their traditional QSLs? I can't see the reasoning in this. If I have the tradition QSL cards, I don't need to be a member of eQSL.

So in essence I am saying that if this is true "CQ to Accept eQSL Confirmations for Award Credit'
Then they need to trust the eQSL system. If they need Traditional Paper QSLs as well then it seems farcicle..

Is that making sense? Or am I missing something here?

73, Lance - VK6DU

Read it again, it doesn't say ..."each"... . I interpret it to mean you print out a list of QSL's you are requesting credit for.

I remember when the ARRL had you list each QSL on a paper app and send it in with the cards.

It seems to me to be a vindication of the LoTW program. CQ Magazine now wants to hop on the bandwagon and e-qsl is the only venue open to them.

As far as security, that's balderdash in my view. The DXCC program is not the Bank of England printing 20 Pound notes, these are mere pieces of paper. If you want to cheat, it's not going to affect me personally, it's between the cheater and his maker.

End of rant ---

One thing that I am not real sure about, within eQSL is getting emails from the persons who DONT match something I have logged, and they havent. That means that they find out that I have tried to get a match on something not in their log. If they decided they needed or wanted mine, they could just log the QSO, and my next upload would find it as a match. Or at least it appears that way to me.

Neither does it say "list" I interpet it to say "cards" meaning each and every one. Guess someone is gonna have to ask. I dont really care, at this point, since Im not intending to apply for anything thru them, even though I have the cards in hand to do so for WAZ etc.

Dave Morris, N5UP
Founder and Webmaster, eQSL.cc
N5UP@eqsl.cc

FOR IMMEDIATE RELEASE: January 13, 2009
CQ to Accept eQSL Confirmations for Award Credit

(Hicksville, NY and Bedford, TX, January 13, 2009) - CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately, CQ Editor Rich Moseson, W2VU, and eQSL Founder and Webmaster Dave Morris, N5UP, announced today.

There will be certain limitations and procedural differences for different awards, at least to start. Only confirmations from "Authenticity Guaranteed" members of eQSL will be accepted, and in accordance with existing eQSL policy, a membership level of bronze or higher is required in order to participate in award programs via eQSL.

"This is the first time that CQ has formally accepted anything other than traditional paper QSL cards for its awards," said Moseson. "We have been working with Dave Morris and his team for several months to assure that the integrity of our awards programs will be protected and to create mechanisms to make it easy for both award applicants and award managers to use eQSL credits toward our awards. All of our award managers have been involved in this process and support this action."

"We want to express our great appreciation to Dave and his team for their willingness to do whatever was necessary to make this agreement possible," Moseson added. "It has been a pleasure working with them and we look forward to a long-lasting relationship."

"We are pleased to be adding CQ to the top of our list of amateur organizations that accept electronic QSLs," said Morris. "CQ has some of the most highly sought-after awards, and we have been working behind the scenes for years to create credit submission mechanisms that would ensure the integrity of their programs without introducing any additional labor for the award managers. We believe the electronic QSL can drastically reduce costs, and the award application mechanisms we have developed will provide for more efficient processing at reduced cost for both the applicant and the award manager."

Applicants for the CQ DX and CQ DX Field Awards must print out their eQSLs and submit them along with their traditional QSLs to a CQ checkpoint or to CQ DX Awards Manager Billy Williams, N4UF. eQSL has an automated process in place for applicants for CQ's Worked All Zones, WPX and USA-Counties awards. N5UP explains how that will work for the applicant:

"The applicant goes to the My Awards screen. He clicks on the particular award he wants to apply for. This brings up a list of the credits our system 'thinks' he is entitled to. There are checkboxes that allow him to check which ones he wants to use, and we automatically pre-fill one credit per category so he doesn't have to do anything if he wants to take the defaults. At the bottom of the screen are two buttons: 'Submit to CQ' and 'Print Paper Application'."

The "submit" button will place all the selected QSOs into a file for the award manager to access, while the "print" button will generate a printed list to be submitted along with the traditional application. PLEASE NOTE that ALL applicants must send the award fee payment to the CQ Award Manager, regardless of how the application is submitted. Some CQ award managers are now accepting PayPal; see individual award web pages for details. All awards will continue to accept traditional QSLs as well as eQSLs. For the USA-Counties Award

(USA-CA), applicants must note on their record books (or printouts) whether each county has been confirmed traditionally (with an "X" to the right of the entry) or electronically (with an "E" next to the entry).

For more information on eQSL, visit http://www.eQSL.cc

For more information on CQ awards, visit the awards page on the CQ website at http://www.cq-amateur-radio.com. Please note that the award rules posted on the website have not yet been updated to reflect the acceptance of eQSLs. This will be done as soon as possible, but the policy takes effect immediately.

Dick,

Hans (that would be me) is an old timer, approaching 70 years old, who is being demonized here as the originator of the idea behind the new ARRL WAS award called "Triple Play".

Other than that, I'm just a guy who loves to play radio. I've been playing with my radio for over 50 years, and am completely turned off by the recent attacks here, including insinuations that somehow I'm receiving some kickback for the Triple Play idea.

That's who this "character" is.

From: Paul M Dunphy
Topic: 8857 Message: 8857

Can we get back on track and stop the personal attacks and the discussions about travel, etc.? I started the thread about the Triple Play as a complement to K0HB for suggesting it to the ARRL. It has drifted way off that. Let's not pursue it any further, nor anyone's vacation travels, etc.

Please re-read Don's message. How about we talk about DX? The LoTW/eQSL thread seems DX related to me. It's hot news, no matter which side of the fence you are on. Given where we are in the cycle, even WAS is becoming a DX topic! So was the discussions on E44M, and TS7C, etc. Don't forget that KP5 is coming up in a few weeks. There's lots to chat about.

This has never been a censored list, and it isn't going to be now. However, Don's 100% right. We've lost sight of the purpose of the list.

Danny, ARRL IS NOT charging for something that has already been done. There never has been a Tripple Play WAS award, therefore it never has been done. It's a new award (Duh!), and the only way to have a level playing field for a NEW AWARD is to set a new start date. Get some tighter shorts. The ones you have get in a wad too easilly.

From: Lance Martin
Topic: 8829 Message: 8862

It appears that way to me too Danny,

In my humble opinion, eQSL probably needs to address this issue. QSOs that don't match your log shouldn't show up. It makes it too easy to make up a QSO that didn't happen. Not that any of us would do this, but for the unscrupulous...

In LOTW, the call, time, date, band, mode must match for a confirmation to occur, the system deals with it (each users log). Which logistically is more secure.

On the other hand if IK1XYZ works me and I log him as IK1XYG (busted call) we will never get a confirmation in LOTW. In eQSL, my inbox would include a QSO from IK1XYZ (with request). I would then look through my log and see that it was in fact a busted call (missed off the last 'dit') as the time, date, mode and band would confirm to me thus.

I am guessing that the makers of eQSL have mulled over this and decided to stay with what they have.

In the end, users will vote with their feet...or in this case perhaps their mouse buttons...

One thing that I am not real sure about, within eQSL is getting emails from the persons who DONT match something I have logged, and they havent. That means that they find out that I have tried to get a match on something not in their log. If they decided they needed or wanted mine, they could just log the QSO, and my next upload would find it as a match. Or at least it appears that way to me.

Yes, the point you are missing is that if you only have eQSL's for 50 countries
you will have to come up with the other 50 somehow.

These can be "Hard Cards" or LoTW "Screen Shots" for the other 50 countries.

Anything other 100 eQSL's is a "Hybrid submission" and must be checked an
approved CQ Awards checker. The same thing goes using LoTW for ARRL awards.

CQ has already accepted LoTW "Screen Shots" for WAZ for a couple of years now.

Danny:
I get eQSL's all the time from stations I never worked. I even got some dated before I got my K1VU callsign, which had never been previously issued.

I finally decided NOT to "Reject" or email the other station on the basis that:
1- they didn't copy the call correctly and the QSO never took place. NIL !!!
2- they may be "Phishing" for a confirmed QSO. I suppose the could eQSL all the other calls starting with "K1V" and hope for a match.

I figure by totally ignoring the bad Eqsl this will be the closest thing I can do to make the QSO a "ZOMBIE" like in Lotw.

This morning I got an eQSL for a CW contact in last weekends NAQP which I didn't participate in. By not making any acknowledgment of the QSO he will get "Dinged" a few points. If I told him it was a bad QSO, he could try to correct his log after the contest ended. Bad, Bad, Bad !!!

Mike,

Here is their main web site:

http://www.ts7c.net/

The link to the logs is along the top, but I can't tell when
they were updated (I didn't read the entire web page so they might
say.) Judging by my QSOs, I'd say the logs were updated around 12 January.

Oh, I just clicked on the LOGS link and it says 13 January.

<rant>
What is it with these DXpeditions calling for COUNTRIES only? Some call
for JA [or no JA as the case may be]; now this guy is calling for USA only.

Why don't we hear calls like Uruguay only, or Luxembourg only? More to
the point, what about Canada only?

The real point that I'm trying to make here is that calling REGIONALLY
is one thing, but let's make sure that ALL the countries in the REGION
are included. Both Canada and Mexico are part of North America, so why
call USA ONLY? Sure, there are probably as many, if not more hams in
the US than in the rest of the World put together, and more than likely
if a CQ were to be called for North America, 90% plus of the responses
would be from the US; but there are XE1's and VE1's as well as
A/K/N/W1's, so let's give everyone a chance!

</rant>

Thanks for the opportunity to get that rant off my chest--if only I
could get rid of the cold in the same place as easily!!!

I don't quite get the hubbub about TS7C. 3V8BB has been active in practically every major contest for the last few years, at least. I have them worked and confirmed on all bands except 160 (the ops have done some WARC band operating outside the contests).

8878. RE: [DX-IS] CQ to Accept eQSL Confirmations for Award Credit

Yahoo group: DX-IS (2009)
Date: 2009-01-15 02:27:30 UTC
From: Ron Notarius W3WN
Topic: 8878 Message: 8878

From a database standpoint, there's really no practical reason why Logbook of the World couldn't be set up to generate a "QSL card" based on the information stored in each matching LotW entry.

Were the ARRL to change their stance and do this, you could legitimately expect a lot of loud expressions of unhappiness from the eQSL camp, on the lines of the ARRL poaching on their turf. And they'd be right, since the League said from the get-go with LotW (even before, let alone during, the beta test) that they weren't going to do this.

However, remember that the primary purpose of LotW is to provide an electronic logs depository for the purposes of ARRL (and eventually other) awards, and a secondary purpose of providing a long-long-term (is anything permanent?) repository for amateur radio logs in general. Too many paper logs suffer the fate of Gus Browning's storied records; as I recall, after he became a SK, the logs sat in a box or two unwanted (probably the family had little to no idea what they were or how valuable they might be considered by some) and eventually sent to the landfill. LotW provides an alternative.

The announcement (which I clipped out, I think we've all seen it repeated enough times!) seems to indicate that CQ isn't really that concerned about QSL "cards" for awards purposes. Further, it indicates that they may not have the capability of comparing a submitted awards submission against the eQSL database(s), which would explain why they want you to print out and include your "eCards."

Hmmm. Wonder if CQ will accept my P5SLIM e-card, that's STILL in the eQSL system after all these years...

Anyway... I thought I recalled reading at one time that both CQ and RSGB were talking to the ARRL about integrating their awards programs to some degree with LotW. Don't recall hearing much of anything about it since Wayne departed Newington for points West. (Coincidence?)

And without trying to stray too much away from the primary subject, I do wish N5UP could reign in some of his supporters. I've had a few nastygrams from eQSL supporters who demanded that I "AG" to make my eQSL log "valid."

And even so, that got topped a couple of days ago... which may tell you something about the validity of some of their logs. Noticed a new entry for 20 meter phone for me from last Field Day. Rejected it immediately -- this year, I only operated FD from my club's station, so even if I did make the contact (and I don't have access to the N3SH log to be sure), it wasn't under my call. Got a nastygram telling me off from the person who posted the log. Turned out he did this as a favor on behalf of HIS club, didn't really give a hoot about the validity of the logs, was tired of being told

about all the invalid entries, and just wanted us all to shut up, accept the QSO's, and quit bothering him with reject notices. After all, "real" eQSL users accepted them!

Some things make you feel like the AFLAC duck after hearing Yogi Berra say "and they give you cash, which is just as good as money!"

Subject: RE: [DX-IS] CQ to Accept eQSL Confirmations for Award Credit

In a way it makes sense. I was hoping that LOTW would have the capability of us printing out their card, as does eQSL. It would still be in their data base as a good contact, but something for those who want a "real" card to who off with too. With LOTW we have the capability of using both the electronic QSL data base, or we can turn in a real card, received via the mail or buro. We have a two-way capability of turning them in for credit, so looks like CQ wants just the one way, and since its not their database, doing it by paper is their choice.

8880. Suggestions

Yahoo group: DX-IS (2009)
Date: 2009-01-15 03:01:04 UTC
From: Ron Notarius W3WN
Topic: 8880 Message: 8880

Although there haven't been any annoucements about it lately, a small group of us are going to be down on St. Johns re-activating NP2SH around the time of the CQ WPX CW contest. (We will run NP2SH during the contest, some of us will run KP2/home calls before and after.)

My job on the team is to set up the two or three laptops for computer logging both before/after and during the contest.

So, rather than argue about travel plans and new League awards... anyone have any suggestions for software to use? I have some ideas, but I'm sure I don't know everything that's out there. We don't have to use the same package for the contest & other operating, but I don't want to use more than two.

Suggestions?

8888. change in the way DX-IS list works

Yahoo group: DX-IS (2009)
Date: 2009-01-15 13:20:35 UTC
From: Don Greenbaum
Topic: 8454 Message: 8888

After some thought, and seeing how many other Yahoo Groups work, I have made a small change in the way our list works so that the default setting of a reply is to the sender, not the whole list.

If you want to reply to everyone, add dx-is@yahoogroups.com to the TO: area. Otherwise the personal traffic is just that: comments are sent back to the sender.

I think this will cut down on the unnecessary traffic to the list.

Thanks,

Don

DX IS! - An edited version of the following report was published in this weeks QRZ DX.....

Band conditions the past week were less than we've been used to but there were a few surprises.... Morocco, Malta, Marshall Island and New Caledonia. Reunion Island and Saint Helena Island were also heard / seen again.

Is this antenna on the air yet? I would really like to hear the signal
from it.

Somebody asked me a question, and I responded. Sorry if it offended you.

When people were raking me over the coals, suggesting I was taking money from ARRL from Triple Play you didn't find it appropriate to play moderator, but for this innocent exchange you find it necessary to "make an example"?

SB DX ARL ARLD002
ARLD002 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

UGANDA, 5X. Peter, DL8SBQ is QRV as 5X4X from Arua until June. Activity is on 40 to 10 meters using SSB. He is active up until 2000z each day. QSL via DF5GQ.

SENEGAL, 6W. Tom, DL2RMC is here on holiday and is QRV as 6W/home call until January 29. He is active on all bands, holiday style. This includes an entry in the upcoming CQ WW 160 Meter contest. QSL via DL1RTL.

ALGERIA, 7X. Fred, ON6QR will be QRV from the Amateur Radio Algeria club station 7X2ARA on January 17 and 18. This includes an entry in the Hungarian DX contest. Activity will be on all bands using CW and SSB as propagation permits. QSL via 7X2ARA.

AZORES, CU. Operators CU8AS, HB9CRV and HB9CQL will be QRV as CU8W from Farol do Albarnaz Island, IOTA EU-089, from January 19 to 23. Activity will be on the low bands using CW and RTTY. QSL via operators' instructions.

URUGUAY, CX. A group of operators from Radio Grupo Sur will be QRV as CV5A from Flores Island, IOTA SA-030, from January 22 to 26. Activity will be on all HF bands and modes, with a dedicated RTTY/PSK31 station active as well. QSL via CX2ABC.

GERMANY, DA. Special event station DR09ANT is QRV during 2009 from the Upper Bavaria district for International Polar Year. They are active on as many bands and modes as possible. QSL via DL5MHQ.

NEW CALEDONIA, FK. Sam is QRV as FK8DD and has been active on 20 meters around 0900z. QSL via LZ1JZ.

REUNION ISLAND, FR. Daniel, F5LGQ is QRV as TO4IPA until January 31.

THAILAND, HS. Joerg, DL1MJF will be QRV as HS0ZGQ from Koh Samui Island, IOTA AS-101, from January 20 to February 12. QSL to home call.

DOMINICA, J7. Seth, SM0CCM will be QRV as J79XBI from January 17 to April 1 while on holiday. Activity will be on the HF bands using only SSB. QSL via SM0XBI.

GUAM, KH2. Yoshi, JE2EHP is QRV as K1HP/KP2 until January 19. Activity is on all HF bands, including 6 meters, using CW, SSB and RTTY. QSL to home call.

US VIRGIN ISLANDS, KP2. Operators JA1CJA, JA3BZO and JA3AVO will be QRV as KP2/AE6XY, KP2/AE6YQ and KP2/W3AVO, respectively, from January 17 to 22. Activity will be on 160 to 6 meters using CW, SSB and various digital modes. QSL to home calls.

LITHUANIA, LY. To mark the Millennium of Lithuania, a number of club members are QRV with the prefix LY1000 until March 1. Activity is on all bands and modes. QSL via operators' instructions.

BANGLADESH, S2. Operators S21RC, S21AM, S21DM, S21RO, S21SA and S21S are QRV as S21DX from St. Martin's Island, IOTA AS-127, until January 22. Activity is on 80 to 10 meters using SSB and RTTY. QSL direct via EB7DX.

MOUNT ATHOS, SV/A. Monk Apollo, SV2ASP/A, has been QRV on 160 meters around 0530 to 0630z on various days. QSL direct.

PALAU, T8. Mike, JA6EGL, Yas, JA6UBY, Yu, JE6DND and Hiro, JA6KYU are QRV as T88SM, T88CP, T88HK and T88HS, respectively, from Koror Island, IOTA OC-009, until January 18. Activity is on 80 to 10 meters using CW and SSB. QSL direct to home calls.

TURKEY, TA. Sadao, JA1PBV is QRV as TA7/KI6TIU until February 11. He expects to be active from Cappadocia, Antalya, Izmir and possibly others locations within Turkey as well. QSL to home call.

BERMUDA, VP9. In celebration of the 400th anniversary of the settlement of Bermuda, amateur radio operators here will use the special prefix VP9400 during 2009.

CAMBODIA, XU. Hiroo, JA2EZD is QRV using calls XU7AAA and XU7ADX until January 30. Activity is on 160 to 10 meters using CW and SSB. QSL via XU7AAA.

INDONESIA, YB. Adhi, YB3MM is QRV as YB3MM/9 from Nanggu Island, IOTA OC-150, until January 18 while on holiday. Activity is mostly

on 17 meters using CW and RTTY. His operating times vary. QSL via IZ8CCW.

THIS WEEKEND ON THE RADIO. The ARRL January VHF Sweepstakes, North American SSB QSO Party, NCCC Sprint, LZ Open CW Contest, Hungarian DX Contest and UK RTTY DX Contest are all on tap for this weekend. The Run for the Bacon QRP CW Contest is scheduled for January 19. Please see January QST, page 82, and the ARRL and WA7BNM contest web sites for details.

17 January 2009 A.R.I. DX Bulletin
No 924
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7X - Fred, ON6QR will be active from the Algerian Radio Amateurs Association's club station, 7X2ARA, from 20 UTC on 17 January until the early morning of the 18th. He will operate both CW and SSB during the Hungarian DX Contest. QSL via 7X2ARA. [TNX NG3K]
CT - Marq, CT1BWW says he will be active as CS6BWW during the main contests in January, February and March. QSl via bureau.
HS - Joerg, DL1MJF (HS0ZGQ) will be active from Thailand from 20 January to 12 February. He will spend one week on Koh Samui (AS-101) during that time frame. Look for HS0ZGQ/2 to operate CW and SSB on 40-10 metres with 100 watts into a dipole. QSL via DL1MJF.
I - The Amateur Radio Group of RAI (the Italian public service broadcaster) will be active as II2RAI until 31 December to celebrate two landmark anniversaries: the 55th of the first television broadcast (January 1954) and the 85th of the first radio broadcast (October 1924). QSL via bureau to IQ2RD. The logs will be uploaded to LoTW. [TNX IQ2RD]
J7 - Seth, SM0XBI will be active again as J79XBI from Dominica (NA-101) from 17 January until around 1 April. He will operate SSB only. QSL via home call, bureau preferred. [TNX NG3K]
LY - Celebrating the Millennium of Lithuania, fourteen LY1000 stations will be active at various stages until 31 August. Further information, including details on the relevant award, can be found on the Lithuanian Amateur Radio Society's website at http://www.lrmd.ivi.lt/en/awards.htm [TNX OPDX Bulletin]
LZ - Special event stations LZ8WHST and LZ17ARDF are active until September to promote the 8th World High Speed Telegraphy Championship (http://www.hst2009.eu) and the 17th IARU Region 1 ARDF Championships (http://www.ardf2009.eu/) that will be held in Obzor, Bulgaria on 11-15 and 16-21 September respectively. QSL LZ8WHST via LZ1PJ, QSL LZ17ARDF via LZ1ZF.
V3 - Gerd, DJ4KW (V31YN) and Gisela, DK9GG (V31GW) will be active from Belize from 19 January to early March, including a number of

contests. From 26 February to 3 March look for V31YN/p to be active from NA-180. QSLs via home calls (direct or bureau), or LoTW. [TNX The Daily DX]
VP8 - The group of YLs going to the Falkland Islands (SA-002) on 17-31 January [425DXN 899] includes Ruth/IT9ESZ (VP8YLI), Mio/JR3MVF (VP8YLF), Unni/LA6RHA (VP8YLD), Liz/M0ACL (VP8YLB), Nicky/M5YLO (VP8YLE), Chantal/PA3GQG (VP8YLH), Victoria/SV2KBS (VP8YLG) and Jeanie/WA6UVF (VP8YLA). QSL via home calls. They also expect to operate under the local YL club callsign (VP8YLC). Expect activity on 10-80 metres, mainly SSB, with four stations. Updates will be posted at http://www.radioclubs.net/aa_vp8yl_/
VP9 - The Radio Society of Bermuda reports that special prefix VP9400 has been authorized for use during 2009 to celebrate the 400th anniversary of the settlement of Bermuda by Sir George Somers. [TNX K1XN and The Golist]
W - The District of Columbia Amateur Radio Society (NW3DC) will be active as W3A on 17-24 January in honour of the inauguration of the 44th President of the United States, Barack Obama. Main activity is expected to be on 20 and 40 metres. QSL via W3DQ (direct), bureau and LoTW. [TNX K1XN and The Golist]
YB9 - Adhi, YB3MM will be active as YB3MM/9 from Nanggu Island (OC-150) on 16-18 January. He will operate holiday style, concentrating on 17 metres CW and RTTY. His operating times will also depend on the local electric supply. QSL via IZ8CCW, direct or bureau [TNX IZ8CCW]

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9A POSTAL RATES ---> Tom, 9A2AA reports a raise in Crotian postal rates. The new rates for surface mail letters to any country are 8 Kuna (up to 50 grams) and 15 Kuna (50-100 grams). The new rates for air mail letters up to 20 grams are 10 Kuna (to Europe), 11 Kuna (to USA), 11.2 Kuna (to Japan) and 12 Kuna (Australia and New Zealand). The exhange rate is 1 IRC = 10.5 Kuna, and 1 USD = 5 Kuna. IRCs without the issuing Post Office stamp in the left box cannot be redeemed.

CQ & EQSL CONFIRMATIONS ---> CQ Editor Rich Moseson (W2VU) and eQSL Founder and Webmaster Dave Morris (N5UP) announced on 13 January that "CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately". Read the announcement at http://www.eqsl.net/qslcard/PR-20090113CQ.cfm; for more information on eQSL and CQ awards, please visit http://www.eQSL.cc and http://www.cq-amateur-radio.com/ respectively.

HI9/EA3BT & HI9/EA3WL ---> Josep, EA3BT and Nuria, EA3WL have prepared a website for their 21-27 January operation from Cayo Levantado (NA-122)

[425DXN 923]. Please visit http://www.ea3bt.com for further information on this activity and on-line logs.

KP5 TEAM PREPARES FOR EUROPE ---> The KP1-5 Project is very aware of the need for Desecheo in Europe. Previous DXpeditions contended with an obstructed path to Europe making working this #3 most needed country, difficult at best. During the recent reconnaissance trip to the island, agreement was reached that will allow antennas to be placed on a ridgeline above the helipad that will give a clear path to Europe. See the photos showing the problem and the plan at http://www.kp5.us/ (click on News/Updates): the team wants to provide as many EU hams with a QSO as possible! Please visit also http://www.kp5.us/help.htm to support this DXpedition. [TNX NA5U]

LOGS ---> Roland, F8EN (TR8CR) is still active with his special callsign, TR50R. The first batch of QSOs is now available for on-line search at http://lesnouvellesdx.fr/voirlogs.php [TNX F6AJA]

QSL NA-086 ---> The QSL routes for the recent activities from IOTA group NA-086 are as follows:
CM6RCR/p 15-22 December via W3HNK
CO6LC/p 15-22 December via home call (direct)
CO7PH/p 15-18 December via W3HNK
T47C 19-21 December via W3HNK
Ed, CO7PH says that the operations have been approved for IOTA credit and the QSL cards are being printed.

QSL S52BB ---> Buzz, NI5DX is now the QSL manager for Zivko, S52BB. He will be able to answer all QSL requests once the new cards are received from the printer in about 4-5 weeks. [TNX K1XN and The Golist]

QSL VIA RA4LW ---> Vlad says he is the new QSL manager for either ER4DX and ER0WW. QSL direct only to Vladimir V. Ryabov, P.O. Box 2, Dimitrovgrad, 433508, Russia.

SRT DX CONVENTION ---> The 6th International DX Convention organized by the Strange Radio Team will take place on 18-19 April at the Best Western Hotel Esplanade, Paestum (Salerno). Please visit www.strangeradioteam.com for full details on the programme, or e-mail idxc@... for further information. [TNX IZ8EDJ]

TROPOSHERIC DUCTING ---> Information on the trans-Atlantic tropospheric ducting attempt between Namibia (V5/N7BHC) and Brazil (ZY6Y and PT1A) can be found at http://transatlantic.japydx.org and http://tinyurl.com/v51-n7bhc [TNX PY2ZX]

TS7C ---> The website (http://www.ts7c.net/) has been down since 15 January at around 22 UTC. It might be up and running again before the end of the expedition, but the on-line logs are unlikely to be updated. TS7C will go QRT at 7 UTC on 18 January, as the team will leave the island around 14 UTC. [TNX F5NQL]

WCA ---> The World Castles Award is for working stations operating from castles located in Belarus, Belgium, Czech Republic, England, France, Germany, Italy, Poland, Russia, Slovakia, Switzerland, The Netherlands and Ukraine. Complete information can be found at http://www.rz1cwc.qrz.ru/ [TNX RN1CW]

+ SILENT KEYS + Emil F. Malek, W6GVM passed away on 26 December 2008 at 92 years of age. Cab, N6OC says he was "very active in ham radio chasing DX, gaining Honor Roll Membership and #1 Honor Roll plaque, staying at the top to the end". Other recently reported Silent Keys include, Bill Moorwood (G3CAQ), Primo Bombardini (I4BNR), Lloyd 'Shally' Shallenberger (K6VHP), Linda Walworth (KE5TF), Olavo Rufino (PY5BAZ) and Anatolij N. Tselikov (UR5FJ).

Propagation Forecast Bulletin 3 ARLP003
>From Tad Cook, K7RA
Seattle, WA January 16, 2009
To all radio amateurs

SB PROP ARL ARLP003
ARLP003 Propagation de K7RA

A nice sunspot group, number 1010, appeared for five days from Friday, January 9 through Tuesday, January 13. Daily sunspot numbers ranged from 11 to 20, and this one was another Cycle 24 appearance. The Cycle 23 sunspots seem to be gone, while the new solar Cycle 24 isn't picking up very quickly.

1010 was here for five days, following a whole solar rotation--27 days of no sunspots since 1009 was visible for just three days, December 10-12. Prior to that were 23 spotless days since seeing sunspot 1008, visible for eight days from November 10-17.

This minimum looks longer and lower than the last solar minimum, but there are many ways to slice the data.

For instance, on http://solarcycle24.com/ search the rather cluttered home page and click the Sunspots tab to the right of Trend Charts toward the upper right on the page, then inspect the bar graph titled "Spotless Days vs. Cycle 23 Minimum," the second one down from the top on the right. Click on it to fill the page, and see the comparison of spotless days per month for the period June 2007 through November 2008 with the earlier period June 1996 through November 1997.

With all that red showing for spotless days in the recent period, this certainly looks like a big difference between the recent period and the one 11 years ago, but there is an inherent bias in comparing May 2008 and May 1997, for instance. This comparison might be valid if solar cycles were precisely 11.0 years long, or in this case, 11 years from a cycle minimum to the next cycle minimum, but of course this is not the case. 11 years is an approximation, and in fact if you average all 23 of the previous solar cycles, the average number is less than 11 years.

The problem becomes apparent if we look at the data and compare spotless days for the five months prior to the beginning of this graph, January through May.

It turns out that those months had a sixty-eight percent higher number of spotless days back in 1996 than the same months 11 years later. From January 1, 2007 through May 31, 2007 there were 40 spotless days. But January 1, 1996 through May 31, 1996 had a total of 67 spotless days.

Data that is uncertain is in August 2008, which is listed with all spotless days. But August 21-22 there was a brief sunspot appearance, although it wasn't widely reported because there was some speculation regarding whether it was big enough to be counted as a sunspot. Check http://www.spaceweather.com/ and on the archives area at the right side of the page, change the date to August 21, 2008, and note that under the Daily Sun on the left margin, it shows the daily sunspot number as 11. To the right of the daily Sun you can click on the photograph under the heading New Sunspots for a closer look.

Now check August 22, and see the same sunspot number 11.

It is easy to inspect this data and make comparisons if you download the Solar Data Plotting utility mentioned in our first bulletin of this year, Propagation Forecast Bulletin ARLP001, at http://www.arrl.org/w1aw/prop/2009-arlp001.html. The GRAPH.dat file for this program has sunspot and solar flux numbers since the start of 1989, and if you copy it into your documents folder and rename the file to graph.doc, you can page through it easily with a word processor. You can also take this file and load it into a spreadsheet program.

At least with our quiet Sun the geomagnetic indices continue to stay quiet.

Geophysical Institute Prague predicts quiet days from January 16-22, except January 18 to be unsettled, and January 19 at quiet to unsettled. NOAA Space Weather Prediction Center along with the U.S. Air Force predict quiet conditions with a planetary A index of five for the rest of January, except 8 on January 19, 10 and 8 on January 27-28, and 8 again on January 30.

Last week's propagation forecast bulletin mentioned the STEREO mission, and how to find out what the current satellite positions were, relative to earth and the Sun. John Fors, WD7Z of Capulin, New Mexico sent a link to a page which allows you to see the positions for any date or time at, http://stereo-ssc.nascom.nasa.gov/where/.

John said that from February 2011 onward, STEREO should get a detailed simultaneous view of all sides of the Sun. This will give a precise reading of activity soon to rotate into view.

Currently it shows the two satellites at nearly a 90 degree angle from each other. Six months from now the angle will be 104 degrees and a year from now it should be at 134 degrees. Two years from now they will be nearly opposite each other at 177.6 degrees. The last date I can generate the listing of angles for is January 21, 2012 when STEREO-B is 113.669 degrees relative to earth, and STEREO-A is 107.583 degrees relative to earth. Beyond that date users can continue to generate the visual plots, and ideally the two satellites and earth would all be ultimately positioned 120 degrees relative to each other for maximum coverage.

No 6 meter reports from North America this week, but there was one from Spain. Joaquin Montoya, EA2CCG reported that on January 12 he worked OE1SOW in Vienna, followed by another Austrian, then Poland, Germany, Croatia, Slovak Republic, and Slovenia.

He used a Moxon antenna (see http://www.moxonantennaproject.com/n2mh/n2mh.htm) that was broken during a recent ice storm and hanging from the tower, and signals were S5-S7 with QSB.

Joaquin said 10 meters was open on the same day, and that he could hear European beacons. He worked the TS7C expedition on Kerkennah Island in Tunisia on 10 meters that morning.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for January 8 through 14 were 0, 14, 17, 20, 12, 11, and 0 with a mean of 10.6. 10.7 cm flux was 68.7, 69.7, 70.9, 70, 69.3, 70.5, and 71.2 with a mean of 70. Estimated planetary A indices were 3, 4, 4, 2, 0, 3 and 5 with a mean of 3. Estimated mid-latitude A indices were 2, 4, 2, 1, 0, 2 and 6 with a mean of 2.4.

>Al, VE1AL

Hi Al,

My take on that is that the spotter probably heard someone work the VP8, but could not hear the VP8 himself. However, you or I might be able to hear the VP8, so I feel the spot is justified. My rationale is that it is a global spotting system, not like in the old days of localised packet where spots were almost certain to always be relevant to those connected (same general skip zone.) Hence it is useful for me to know a VP8 is on a given frequency. Even if I feel there is little chance of hearing him or her, if I need it on the band/mode spotted, I'll go have a quick listen.

I should point out that VE1 DXers, for whatever reason, generally seem reluctant to spot anything. Hence I am grateful for those who do spot DX along the US east coast and even further inland. I can handle the high volume because I have the stuff I do not need filtered out. There are actually quite a few band fills I need, and it's surprising at common things I've missed over the years.

A minor annoyance to me over the years is those DXers who work something and quietly log it and never spot it. Fair enough. No one is required to tell the world and have the hordes descend on the DX. I understand that point of view. However, at the same time, those same non-spotters are glued to the cluster screen, and are ready to pounce when something they need is spotted. It seem to me to be a case of all taking and no giving. Obviously common sense comes into play here as there is no need to be the 37th person to spot TS7C on 40M CW in a 30 minute period.

That is my view on DX spotting. I'm sure there are many other opinions just as valid as mine.

>Dale K8TS

That's fair enough, Dale. Would work for me. One hitch is that spots on exactly the bottom of the band are flagged by default by some software as BoB DX (Bottom of the Band.) This because no one operates on 7.000, 14.000, etc. A lot of guys were getting around DX Cluster sysops blocking incessant announcements by spotting BoB DX and using the comment field as an announcement. Like this:

DX de VE1DX 14000.0 K8TS Thanks for the QSL, Dale! <2025>

Recently most cluster software has been upgraded to support global talk messages to minimise this sort of misuse. In theory one should be able to, from any cluster node, just type TALK K8TS <message> and the software figures out where you are logged on and delivers the message just to you on your home node. That way everyone else doesn't have to see it.

I don't know that a lot of users realise this yet. The intent is to cut down on the abuse of global announcements and BoB DX spots. Anyhow, my 2 cents worth as well.

Hi Peg, et al,

I had an off-line discussion on this with another list member who felt that is was not DX related. (I certainly feel it is!) The DX Cluster idea was initially a localised tool employing VHF/UHF packet and a few users in the same skip zone. It has grown to a global network with thousands of users who have the ability to communicate with each other instantly. Many abuse this new found power with the BoB spots, announcements, etc. I hadn't encountered the use of the WX command to "chat", but I can see how that would also be a method of communications.

To prevent it from becoming the equivalent of an IRC chat room, thankfully software gurus like AA6YQ, VE7CC (and others) have written great telnet-like applications that we can use to filter out the vast majority of this unwanted material. Even without a special program on your PC, you can disable most of the unwanted chatter at the cluster with things like SET/NOANN, filtering to certain geographical areas, etc. The latest development is the TALK KB9LIE <message> feature that allows inter-node talking between users around the globe without anyone but the sender and recipient seeing it.

We can't control those who are unable or unwilling to stop misusing DX Clusters, but we can customize it for our needs. I tried a number of years ago to filter the daylights out of my node, but as a sysop I soon came to realise that, other than obvious obscenities, I couldn't censor spots without making some users unhappy. The onus is on the user to set the filtering, either on the cluster side or with their client software, to meet their needs.

A small minority feel DX Clusters are cheating or spoon feeding. This is just an up to date version of the old DX net argument. It's been beat to death. I think this is a good topic for discussion (how to get the best use out of a DX Cluster), but we need not drift off as to whether or not we should be using them. All serious DXers today do use DX Clusters. Those who chose not to really shouldn't be criticising the vast majority of us who do.

Anyhow, thanks for the input on the WX command. I hadn't
thought of that one! People can be creative, that's for sure.

That only means you're in a class by yourself!

All kidding aside (and that is meant in jest and in fun and as a compliment, honest)...

I have to admit that I've become less than thrilled about the way the cluster is used by too many, in recent months. I'm very glad that NB3C (nee KQ3DX) told me about VE7CC's program, which let's me do some serious filtering & puts the announcements on another tab altogether (and some of those people posting those are SERIOUSLY disturbed, but THAT is another story... and not DX related).

Still, I've reached the point where I don't even look at the spots anymore. (So much for broadband... I'm back to where I was when I only had dial-up and couldn't tie up the phone line for spotting for hours on end even if I wanted to!) I'm spending as much time as I can on 160 these evenings, and I can always tell when someone has been spotted... another trend we've discussed herein ad infinitum ad nauseum. Ahem. It's frustrating to actually find some decent DX or West Coast on my own, only to find my measly signal wiped out a few minutes later by the multitude. But, you know what Jim Croce sang so well about Leroy Brown... sometimes you just sigh, QSY, and keep hunting.

Hans, Hans, Hans...

That's just too good a straight line to pass up...

>> Now I'm told that "serious DXers" don't do that.
That only means you're in a class by yourself!

All kidding aside (and that is meant in jest and in fun and as a compliment, honest)...

I have to admit that I've become less than thrilled about the way the cluster is used by too many, in
recent months. I'm very glad that NB3C (nee
KQ3DX) told me about VE7CC's program, which let's me do some serious filtering & puts the announcements on another tab altogether (and some of those people posting those are SERIOUSLY
disturbed, but THAT is another story... and not DX related).

Still, I've reached the point where I don't even look at the spots anymore.
(So much for broadband... I'm back to where I was when I only had dial-up and couldn't tie up the
phone line for spotting for hours on end even if I wanted to!) I'm spending as much time as I can on
160 these evenings, and I can always tell when someone has been spotted... another trend we've
discussed herein ad infinitum ad nauseum. Ahem. It's frustrating to actually find some decent DX or
West Coast on my own, only to find my measly signal wiped out a few minutes later by the multitude.
But, you know what Jim Croce sang so well about Leroy Brown... sometimes you just sigh, QSY, and keep
hunting.

To each his own. For me, the thrill is in the hunt, tracking them down "in the wild".

Now I'm told that "serious DXers" don't do that.

8918. new on-line ham radio mag

Yahoo group: DX-IS (2009)
Date: 2009-01-22 00:53:38 UTC
From: Alan Leith
Topic: 8918 Message: 8918

I've just received the second issue of a new magazine published in France and distributed on-line. There's a lot of interesting information, including an article on the "European problem" by a well-known YO DXer. I think it is worth reading, and identifying the North Americans and Europeans you know who fall into the bad operator categories.

Here's the site: http://www.ham-mag.com

"amateur radio was better before sliced bread."

I sure hope that's your own opinion, Craig. It's not mine and that's not what I meant.

My point was that the misuse of the cluster system, both in terms of the way spots are posted and the way too many would-be DX'ers use the posts, makes it generally useless to me IMHO. That's all.

And that's just for chasing DX. More power to those who can use the cluster in a contest these days to their advantage; for the most part, I find it more distracting than useful. But that's another thread for another day on another reflector.

DX Bulletin 3 ARLD003
>From ARRL Headquarters
Newington CT January 22, 2009
To all radio amateurs

SB DX ARL ARLD003
ARLD003 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

GEORGIA, 4L. Team members 4L2M, 4L5DJ and 4L4CC will be QRV as 4L0G in the CQ WW 160 Meter CW contest as a Multi Op entry. QSL via operators' instructions.

UNITED NATIONS HEADQUARTERS, 4U1UN. Johnny, LA5IIA, will be QRV as 4U1UN in the CQ WW 160 Meter CW contest for a few hours late Friday and for a few hours during the day on Saturday. QSL via HB9BOU.

BAHAMAS, C6. Tom, C6ANM is QRV until April 1. He plans to be active with other operators in the CQ WW 160 Meter CW contest. He is normally active on 160 to 6 meters. QSL direct via WA2IYO.

CUBA, CO. Look for Juan, CO8TW to be active in the CQ WW 160 Meter CW contest. QSL via HB9SVT.

MOROCCO, CN. Team members CN8WK, IK2QEI, IV3ZXQ and IK1HJS will be QRV as CN3A as a Multi/Single entry in the CQ WW 160 Meter CW contest. QSL via I2WIJ.

CANARY ISLANDS, EA8. RD3AF plans to be QRV as EF8M in the CQ WW 160 Meter CW contest as a Single Op/All Band/High Power entry. This includes activity in the upcoming ARRL DX CW contest. QSL to home call.

ESTONIA, ES. Operators ES5TV, ES2RR, ES2MC, ES5JR and ES5RY will be QRV as ES9C in the CQ WW 160 Meter CW contest as a Multi op entry. QSL via ES5RY.

WALLIS AND FUTUNA ISLANDS, FW. A small group of operators will be QRV as FW5RE from Wallis Island, IOTA OC-054, from January 28 to

February 17. Activity will be on 160 to 10 meters using CW, SSB and RTTY with two stations active simultaneously. QSL via HA8IB.

SAN ANDRES AND PROVIDENCIA, HK0. Cal, WF5W, Mike, K5UO and Roberto, HK3CW are QRV as 5K0CW from San Andres Island, IOTA NA-033, until January 28. This includes an entry in the CQ WW 160 Meter CW contest as a Multi op entry. Outside the contest they are active on all bands using mostly CW and RTTY. QSL via W5PF.

MINAMI TORISHIMA, JD1. Masa, JA6GXK will be QRV as JD1BMM from Marcus Island from January 24 to February 9. In addition, look for Kingo, JK1PCN to be QRV as JD1BND. Activity is in their spare time. QSL JD1BMM via operator's instructions and JD1BND via JK1PCN.

LUXEMBOURG, LX. Look for DF1LON to be active from LX7I during the CQ WW 160 Meter CW contest. QSL via LX2A.

TURKEY, TA. Look for TA3D to be a Single Op/Low Power entry in the CQ WW 160 Meter CW contest.

GABON, TR. Roland, TR50R is usually active on 30 meters during his evening time. QSL via F6AJA.

KALININGRAD, UA2. Members of the UA2 Contest Club will be QRV as RK2FWA from during CQ WW 160 Meter CW contest. QSL via DK4VW.

BELIZE, V3. Gerd, DJ4KW and Gisela, DK9GG are QRV as V31YN and V31GW, respectively, until March. They also plan to be active as V31YN/p from Water Caye, IOTA NA-180, from February 26 to March 3. QSL to home calls.

AUSTRALIA, VK. Members of the Waverley Amateur Radio Society will be QRV using special callsign VI2BV90 from January 24 to February 1 in celebration of the club's 90th anniversary. QSL via bureau.

BERMUDA, VP9. Jeff, N1SNB will be QRV as VP9/N1SNB from January 22 to 25. This includes being a Single Op/Low Power entry in the CQ WW 160 Meter CW contest. QSL to home call.

INDIA, VU. Operators VU2FI, VU2LU, VU3ITI, VU2JHM and VU2ZUB will be QRV as special event station AT8FD from Tamil Nadu from January 24 to 26.

MEXICO, XE. Look for 160 Meter club station XE1RCS to be an entry in the CQ WW 160 Meter CW contest. QSL via operators' instructions.

UK SOVEREIGN BASE AREAS ON CYPRUS, ZC. David, G0OAB is QRV as ZC4DG in his spare time for about two weeks. He is generally active on 20 meters using SSB and possibly CW after 0300z. QSL to home call.

THIS WEEKEND ON THE RADIO. The CQ World Wide 160-Meter CW Contest, BARTG RTTY Sprint, NAQCC Straight Key/Bug CW Sprint, NCCC Sprint, YL-ISSB SSB QSO Party, REF CW Contest, MIE 33 CW Contest, UBA SSB DX

Contest, SPAR Winter Field Day will certainly keep contesters busy this weekend. The SKCC CW Sprint is scheduled for January 28. Please see January QST, page 82, and the ARRL and WA7BNM contest web sites for details.

8922. PJ7/FS DXpedition Feb. 4-11

Yahoo group: DX-IS (2009)
Date: 2009-01-23 00:26:36 UTC
From: Tom Anderson
Topic: 8922 Message: 8922

PJ7/FS DXpedition to the Caribbean

The "Buddies in the Caribbean" DX group which specializes in 100 watt or low power radios and the Buddipole portable antenna system is off again to a new DXpedition site Feb. 4-11.

This time the group will be operating at different times from BOTH the French and Dutch side of St. Bartholomey Island FS/PJ7. Various modes including phone, RTTY, and CW will be on the air, along with "golf cart mobile", or "bicycle mobile" operations and other unique operational situations. Each of the operators has extensive experience operating from "unique" locations or various DXCC entities.

In 2007, four of the eight operators on the 2009 DXpedition were part of the Montseratt VP2M Buddipole DXpedition.

The DXpedition headquarters will be at Villa Ait Na Greine on the French side of the island. The heaquarters (http://villaaitnagreine.com) is perched on top of a cliff overlooking the Caribbean with excellent take off angles toward North America and Europe. There will be other sites on the island, both on the French and Dutch sides, where operations will occur giving DXers a chance to work two separate DXCC countries.

The group's goal will be to work stations from all over the world using Buddipole™ antennas and other newly-developed Buddipole™ antenna accessory products. The operation will be the week before the Orlando Hamfest and two weeks before the KP5 DXpedition. Operators will be using FS/homecall and PJ7/homecall and plans call for contacts to be uploaded to LoTW, eQSL, and an on-line log. Those wanting hard copy QSLs should send a S.A.E. and appropriate return postage or an SASE to the homecalls of the operator(s) you've worked.

The "Buddies in the Caribbean" blog page will be http://caribbeanbuddies.blogspot.com/

The group consists of the following operators:

K8EAB Weymouth Walker who's operated from Jamaica as well as motels, high rise apartment buildings, a pontoon boat, mountain tops, and even "picnic table" portable during his 52 year ham career.

KC4VG Mike Greenwood was a member of the BUM's Montersatt group in 2007 as VP2MVG and has been licensed more than 25 years. He also has operated from the Bahamas C6 and other Caribbean locales. Unique QTHs have included operations from Alcatraz Island in the USA, a cruise ship, and the Marconi station on Cape Cod. He specializes in low power SSB operations. Many DXers have run into Mike at the Buddipole booth at the Dayton Hamvention where he helps Chris and Budd out with sales.

N7UN Guy Hamblen has operated from such unusual locales as the Appalachian Trail and from the top of several of Colorado's 14,000 ft. peaks. Previously he was K7YYK, AA7QZ, and his current call of N7UN. He has 334 DXCC countries confirmed.

KB9AVO Paul Van Dyke was a member of the 2007 Buddipole Montseratt DXpedition and held the VP2MVO call. He is a frequent contester as part of the KP4US contest team in Abonito PR. He

will be specializing in PSK, RTTY, and Slow Scan tv on FS/PJ7. He is also founding president of the Indiana-Michigan-Ohio Skywarn Association.

WW5L Tom Anderson is an avid DXer and has held the following DX calls since the 1980s: V31EF (Belize), G0/WW5L (UK), 7P8TA (Lesotho), and C91TL (Mozambique). He is on the DXCC Honor Roll and has also operated from the Battleship Missouri, KH6BB, at Pearl Harbor HI. He was a K2BSA staff member and radio merit badge counselor at the 1997 National Boy Scout Jamboree and has been invited back as a K2BSA staff member for the 2010 Centennial National BSA Jamboree. He is also planning on operating as HB9/WW5L from the Kandersteg World Boy Scout Camp in Switzerland in July.

N0TU Steve Galcchutt is a long time CW operator on Straight Key Night and enjoys "mountain top operation" as he's operated from several of Colorado's 14,000 ft. peaks. QRP CW operations are his main interest. He will also be the group's resident videographer - you may have seen his videos on YouTube under the pen name "the Goat Guy."

W3FF Budd Drummond is one of the principals in Buddipole. His main interest lies in making portable, "bicycle mobile", "golf cart mobile", and "walking" HF contacts from whatever location he finds himself in. Budd was one of the members of the 2007 Buddipole Montseratt DXpedition. His web page is http://www.qsl.net/W3FF. In September 2004 Budd worked every continent using 50 watts on his "bicycle mobile" and has logged more than 5,000 QSOs as "walking mobile" station.

W6HFP Chris Drummond is the president of Buddipole and his main interest, naturally, is HF portable operating and "lightweight" DXpeditions to remote locations. An avid backpacker and outdoorsman, Chris works to design products that will live up to his demanding expectations for rugged and versatile equipment for HF operating in the field. He was also a member of the VP2V Montseratt DXpedition with callsign VP2MHFP.

About the antennas: the Buddipole antenna system is designed to be a lightweight and versatile way to put an efficient station on the air in minutes in almost any terrain. By utilizing an interchangeable series of custom-made components the user is able to configure dozens of antenna designs optimized for their particular operating needs. The group to St. Martin expects to operate dipoles in various configurations, verticals, vertical beams, mini-yagis, and other antennas using only Buddipole parts. Several new products will make their debut including a lightweight rotor, super cap power supply, LifePo4 battery packs, folding capacity hats, and shockcorded masts.

>73, Zack W9SZ

I'm not a person who monitors beacons or the like, Zack, but I can tell you that even the low bands are not as good as they were last year. 40M used to be good to Europe (at least for us hear on the east coast) for 4-5 hours after dark. Now we are lucky to get a couple of hours.

80M is still OK late into the night, but the edge seems to be off of both 10 and 160. They are open all night most nights, but the long haul stuff isn't there. It might be that there is a "phase lag" (for lack of a better term) in that the ionosphere cools off slowly and it's taken until now for the reduction in UV radiation to really kick in.

The few sunspots we have seen this fall are certainly classified by the experts as having Cycle 24 polarity and they are high latitude. I believe the last sun "speck" of a day or two ago was classified as a Cycle 23 one, but as I understand it, they overlap. It it was close to the equator and only lasted a day or so. The concern is rate at which the new spots are showing up. This isn't like the beginning of previous cycles, at least not like ones when we had the technology to accurately measure things like we have had for the past 50 years or so.

My optimistic pal, VE1TK, but up a 5 element monobander last August, confident he's get a lot of use out of it this winter. So far he has been disappointed.

73, Paul VE1DX

24 January 2009 A.R.I. DX Bulletin
No 925
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4K - Once again Axel, DL6KVA will be active as 4K0CW from Vlad's (4K9W) QTH on 19-25 March, between the local evening hours (Azerbaijan is UTC +4) on the 19th and the local midday on the 25th. He will operate CW only on all the HF bands, with 100 watts and a 84-metre longwire, and will take part in the Russian DX Contest. QSL via home call. [TNX DL6KVA]
4U1UN - Johnny, NQ2G (LA5IIA) will be active for a few hours from 4U1UN, the UN Headquarters station, during the CQ WW 160M CW Contest. He is likely to operate a bit at the beginning of the contest and then again on Saturday, "for about six hours in total". QSL via HB9BOU. [TNX The Daily DX]
7Q - Harry, 7Q7HB is going back to Malawi for around two months. He will have to replace the broken rotator and repair the amplifier, then hopefully he will be QRV again. His preferred modes are PSK, RTTY and CW (SSB on request). QSL via G0IAS, direct only. [TNX G0IAS]
C9 - Bill/K5WAF, Dale/KG5U, Jim/N4AL, Madison/W5MJ, Paul/W5PF and Cal/WF5W will be active on 160-10 metres from Bilene, Mozambique from 25 March to 5 April, CQ WW WPX SSB contest included. They will have three stations (SSB, CW and digital modes) with two amplifiers, log periodics for 10-20 metres and vertical for the other bands. The QSL route for all their C9 callsigns (TBA) is via W5PF. Further information and on-line logs at http://www.tdxs.net/c91.html. [TNX W5PF]
CT3 - Rosel, DL3KWR and Hardy, DL3KWF will be active again as CT3/DL3KWR and CT3/DL3KWF from Madeira (AF-014) on 5-19 March. They plan to operate mostly CW and on 12, 17 and 30 metres. Hardy will also give RTTY and PSK-31 a try. QSL via home calls. E-mail requests for bureau cards can be sent to dl3kwr@... or dl3kwf@... respectively. Their web site is at http://www.mydarc.de/dl3kwr [TNX DL3KWF]
CY0 - Randy/N0TG, Murray/WA4DAN and Ron/AA4VK will be active as homecall/CY0 from Sable Island (NA-063) on 7-14 October. They plan

to have three complete HF stations, with three verticals, one "strategically placed" yagi and at least one wire antenna, and to operate SSB and CW on 160-10 metres, with an emphasis on Asia. Twenty metres are likely to provide most contacts, and they will try to have two stations (CW and SSB) on that band at the same time. QSL via home calls. The website for the expedition is at http://www.cy0dxpedition.com/ [TNX NG3K]

FS/PJ7 - The "Buddies in the Caribbean" DX group, which specializes in 100 watt or low power radios and the Buddipole portable antenna system, is off again to a new DXpedition. Wey/K8EAB, Paul/KB9AVO, Mike/KC4VG, Steve/N0TU, Guy/N7UN, Budd/W3FF, Chris/W6HFP and Tom/WW5L will operate SSB, CW and RTTY as FS/homecall (St. Martin) and PJ7/homecall (Sint Maarten) on 4-11 February. Their main QTH will be on the French side of the island. QSL via home calls. The logs will be uploaded to LoTW and eQSL. The group has a blog page at http://caribbeanbuddies.blogspot.com/ [TNX WW5L]

GM - The Kilmarnock and Loudoun ARC will be active as GB250RB from 25 January through the end of the year to celebrate the 250th anniversary of the birth of Robert Burns, Scotland's national poet and cultural icon. A website is being constructed at http://www.gb250rb.co.uk/

GM - Jim, MM0BQI will be active as Jim, MM0BQI/p from Lunga Island in the Treshnish Islands (EU-108) on 24-27 April. He will run 100 watts to verticals down by the seaside, and to be active on 20, 40 and 80 metres using CW, SSB and if time permits a bit of digi modes. QSL via home call, direct or bureau. Jim will upload the logs to LoTW. [TNX MM0BQI]

H40 - Siegfried, DK9FN provides further information on his 2-16 March activity as from Lata, Nendo Island (OC-100), Temotu Province [425DXN 923]. He hopes to get the same callsign he used back in 1999 (H40FN), and will operate CW only, while Bernhard, DL2GAC (H44MS) will work SSB as H40MS and Herrmann, DL2NUD will be on 2m EME (H40 callsign to be issued). They will have three separate stations with amplifiers. Siegfried thinks he will concentrate on 160-30 metres, as the current propagation predictions do not promise anything good on the higher bands. QSL H40FN via HA8FW: all of the QSOs will be confirmed automatically via the bureau, for those who need a direct card the address is Mihaly Bela, Csongradi SGT. 122/A, H-6724 Szeged, Hungary. Further information on this activity, including details on the antennas to be used, can be found at www.hari-ham.com/h40fn [TNX DK9FN]

JD1_mt - Masa, JA6GXK (JD1BMM) and Kingo, JK1PCN (JD1BND) will be active from Minami-Torishima (OC-073) from 24 January to 9 February. They plan to be QRV in their spare time on a daily basis. QSL JD1BMM via JD1BMM, direct (Masafumi Ishihara, 2-305 Loran, 2-5-35 Miyazaki, Chuo-ku, Chiba, 260-0806 Japan) or through the JARL bureau. QSL JD1BND via bureau to JD1BND. [TNX The Daily DX]

PA - The PA3FKN PACC Team will be active from the island of Ameland (EU-038) during the annual Dutch PACC Contest (http://pacc.veron.nl/) on 14-15 February. Twelve operators will

be active in the multi-multi category, with a wide range of antennas (including 2 phased verticals for 160m, 4 square dipoles for 80m and 4 square verticals for 40m). Further information and updates can be found at http://www.dx.to [TNX PG5M]
SV9 - Willi, DJ7RJ will operate SSB and CW as SV9/DJ7RJ from Crete (EU-015) for three weeks starting on 24 February. QSL via home call. [TNX AA1M]
V6 - Yuki, JH1NBN has been on a business trip to Micronesia since 19 January and is expected to be there until the first week of February. He will be visiting three islands - namely Pohnpei (OC-010), Kosrae (OC-059) and Chuuk (OC-011) - and he hopes to be able to operate in his spare time, possibly as V63AQ. [TNX The Daily DX]
VP8_sg - Lars, MM0DWF (DL9LB) will return to South Georgia (AN-007) in February, and expects to operate again as VP8DIF during his limited spare time. He will have a new soundcard interface, so he might try some RTTY, "but no promises". QSL via DJ9ZB, direct or bureau. Further information, including log search, can be found at http://www.lars-boehme.de/vp8dif/index.html
XT - Michael, F1IQH will be active again as XT2WC from Burkina-Faso starting on 25 January for two weeks. He plans to operate mainly on 20 metres. QSL via home call. [TNX F5NQL]
YN - Andrei, NP3D (EW1AR) will be active again as H7/NP3D and YN2/EW1AR from Nicaragua on 11-15 February, including an entry in the CQ WW WPX RTTY Contest as YN2S. He will operate CW and RTTY, with some SSB. QSL via NP3D (direct) or W3HNK or RW6HS (for Russia and CIS countries). The logs will be uploaded to LoTW. [TNX RW6HS]
YV0 - The 4M5DX Group's expedition to Aves Island (NA-020) [425DXN 916] is scheduled to take place in March, hopefully for a full week. A large team of operators will be active as YW0A on 160-6 metres SSB, CW and RTTY. QSL via IT9DAA (diret or bureau), or LoTW. Bookmark http://yw0a.4m5dx.info for updates.
ZS - A group of South African amateurs will participate in the CQWW WPX SSB contest (28-29 March) as ZT2V from the East Cape Province. It will be a Multi-2 entry from the QTH of Donovan, ZS2DL. Other participating operators include ZS2ACP, ZS2DK, ZS2EZ, ZS2GV, ZS2HK and ZS2Y, plus an eighth one to be selected. QSL via NI5DX. [TNX NI5DX]
ZS8 - Latest information posted on http://zs8t.net/ indicate that Petrus, ZS8T has renewed his licence and "showed on 20 meters last weekend for a few QSOs". There is not any sound information about his operating plans, but in an interview released on 20 January Petrus said that "for the next two or three months I will basically try being on the air as much as possible" (listen to the interview on the website).

SOUTH AMERICAN TOUR ---> Witek, SP9MRO and his wife Danuta, SP9SX will be active holiday style as ZP6/SP9MRO from Paraguay between 21 February and 3 March, and from Uruguay on 4-14 March. They plan to operate CW, SSB and RTTY, with main activity to be concentrated during the weekends and the

local night hours. [TNX SP9MRO]

CQ WW 160-METER DX CONTEST (CW) ---> Object of the contest is for amateurs around the world to work as many US States, Canadian provinces and countries as possible on 160 metres CW (http://cq160.com/rules.htm). The following stations have announced their partecipation in this year's event (from 22.00 UTC on 23 January through 22.00 UTC on the 25th):

Call	DXCC	QSL via
4L0G	Georgia	EA7FTR
4Z5J	Israel	W0MM
4U1UN	United Nations HQ	HB9BOU
5K0CW	San Andres & Providencia	W5PF
6W/DL2RMC	Senegal	DL1RTL
A71BX	Qatar	EA7FTR
C6ANM	Bahamas	WA2IYO
CE1/K7CA	Chile	NW7O

Do not forget to give a look at the Announced Operations listing maintained

by Bill, NG3K at http://www.ng3k.com/Misc/cq160c2009.html- good contest to you all!

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CLOSING LOGS ---> Dianna, KB6NAN is closing the logs for the following operations by the late Chuck Brady, N4BQW: VP5/N4BQW (2005, the log is on LoTW) and N4BQW/KH9 (Wake Island 2002 and 2003, paper logs). Dianna will keep these logs open for one more month. [TNX The Daily DX]

DX AWARDS ---> The K1BV DX Awards Directory is a 324-page book listing the rules for 3312 different awards from 119 countries. Some 150 new awards have been added, dead awards have been removed and hundreds of changes in addresses/rules/fees have been made in the 2009 Edition. For further information please visit http://www.dxawards.com/2009edition.htm

E44M ---> After fixing a glitch in the ADIF file, the logs for the recent operation from Palestine have been uploaded to LoTW. Should you have problems, please contact the QSL manager (qsle44m@...).

IOTA HONOUR ROLL ---> The deadline for the 2009 IOTA Honour Roll and Annual Listing is approaching. Applications or updates submitted online (www.rsgbiota.org) on or before 1 February will count for the 2009 tables so long as the supporting cards sent to checkpoints are postmarked no later than that date. Updates postmarked after 1 February will be processed in the normal way but scores will be held over to a later listing.

LOGS ---> Alex, RV1ZC is now active as R1ANC from Vostok base in Antarctica. Please visit http://www.qrz.com/r1anc for further information and on-line log, which is updated several times a week. [TNX RN1ON]

MOST WANTED SURVEY ---> The DX Magazine's (http://www.dxpub.com) annual Most Wanted Survey was conducted in September-October 2008 [425DXN 904]. The top 10 DXCC Entities are North Korea (P5), Yemen (7O), Navassa KP1), Glorioso FR/G), Marion (ZS8), Desecheo (KP5), Bouvet (3Y), Heard (VK0), Crozet (FT5W) and Amsterdam & St. Paul (FT5Z). Give a look at the 100 Most Wanted listing, which also shows the results of the 2007 survey for comparison, at http://www.dxpub.com/dx_news.html. The complete breakdown by continent is available in the January/February 2009 issue of "The DX Magazine"; a breakdown by mode as well as a listing for the low bands will be published in the March/April 2009 issue.

OH8X ---> The group at Radio Arcala will hit 160 metres with a 39-ton (80.000 lbs) 3-element full-size monster during the week of 19 January, culminating with the CQWW 160M Contest. OH8X is to be manned by OH2IW and OH6KN, still in a limited capacity while valuable data will be gathered in this first assault. Their partners for measurement purposes will be the

sister station CU2X operated by OH2BH/CU2KG and, in close proximity, the associate stations OH0E operated by OH2MM, and OG2P operated by OH2PM. Radio Arcala is cooperating with the University of Oulu in several areas of HF propagation study. They also welcome and acknowledge field reports (oh1wz@...). You may read about details of the monster construction at http://www.helsinki.fi/~korpela/PU/PU.html and study the overall mission at www.radioarcala.com. QSL for OH8X via OH2UA, CU2X via OH2BH, OG2P via OH2PM and OH0E via OH2MM. [TNX OH2BN]

QRZ INDIA ---> An amateur radio callsign database with all available details of licensed operators in India (some 11,000 callsigns at the moment, but the list in growing) can be found at http//:www.qrz.co.in [TNX The Daily DX]

QSL FM1HN ---> Buzz, NI5DX, is now the QSL manager for Julien, FM1HN. Buzz will be able to confirm any QSOs that are in Julien's log - he already has the logs, but is awaiting QSL cards. At the present time, QSLs for the special call (TO1YR) still go to FM1HN either direct or via the bureau. [TNX K1XN and The Golist]

+ SILENT KEYS + Tadeusz "Teddy" Barczyk (DL4DBR, ex SP9ERC) passed away on 2 January. On a weelchair since he was 17 years old, "he was a man who lived his life to the fullest despite his handicap", Kazik (PT5ZHP) says. He was the QSL manager for a few stations, including PT5ZHP and VK6DXI (aka 9M8DX, 9V1XE, 7X0DX, etc).
Zedan Hussein Abbas, JY3ZH passed away on 20 January. An amateur radio operator for forty years, he was the net controller of the well known "Arabian Knights Net" (14252 kHz) established by the late King Hussein (JY1) in the early Seventies.
Other recently reported Silent Keys include Dennis J. Wills (AK5D), Walter H. Kirst (HB9AQL), Laban Davis (VO1HLD), Donald L. Doughty (W6EEN), Donald G. Lemley (W8DL) and Christian Favier (F5OKD), who passed away on 22 January at only 46 years of age.

8927. CQWW 160 CW

Yahoo group: DX-IS (2009)
Date: 2009-01-23 18:19:22 UTC
From: OE8SOQ Helmut
Topic: 8927 Message: 8927

Hello group and greetings from Nuremberg,

there is another participant in the upcoming 160 m contest, transmitting
from southernmost Germany, (Bad Toelz).

http://www.darc.de/c07/projekte/winterbilder_dk0iw/index2.html

As there is no english description..... its a lambda 1/4 vertical..... and
about 3300 feet (1000m) of counterweight, located up on a hilltop, but see
the pics yourself.

This is a former radio beacon for international aviation, used for aproach
to Munich and Salzburg. Now the local Radio Club has aquired the aera there.

Good luck to all that participate.

vy 73 and good DX

Helmut

Propagation Forecast Bulletin 4 ARLP004
>From Tad Cook, K7RA
Seattle, WA January 23, 2009
To all radio amateurs

SB PROP ARL ARLP004
ARLP004 Propagation de K7RA

Monday revealed another shy sunspot. Sunspot 1011 appeared suddenly, then it was gone. Its configuration and location did not identify it as a Cycle 23 or Cycle 24 spot. On Monday, January 19 the sunspot number was 13.

Geomagnetic conditions continued to be very quiet, and yesterday, Thursday, January 22 was another exceptionally quiet day, similar to January 12, and December 28-30. You can check the web site http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt to see all those zeroes.

This bodes well for the CQ World Wide 160-Meter CW Contest this weekend. The Planetary A index is predicted to be at 5 until January 27-31, when the predicted values are 10, 8, 5, 8 and 5.

Geophysical Institute Prague predicts quiet geomagnetic activity January 23-25, quiet to unsettled January 26, unsettled January 27, quiet to unsettled January 28, and back to quiet by January 29.

Note in our data at the end of the bulletin we do not have solar flux resolved to a tenth of a point as we usually do. Thursday night and Friday morning we have not been able to access the data from the observatory in Penticton, so these are the numbers provided from NOAA.

Another hiccup in the data stream this week was on Thursday afternoon, when a geo-alert message via email from Australia's IPS Radio and Space Services (on the web at, http://www.ips.gov.au/) turned out to be a vicious anti-Semitic screed broadcast during a security breach. I phoned the duty forecaster in Sydney, New South Wales, who verified it was a security problem which their IT staff was investigating. You can subscribe to these alerts via their web page at, http://www.ips.gov.au/mailman/listinfo/ips-geo-warning.

Among many interesting web pages they have is one devoted to sunspot numbers, both past and predicted, at http://www.ips.gov.au/Solar/1/6.

Still another reporting glitch this week was from NOAA with the daily 45 day prediction of solar flux values and planetary A index. These are issued daily, and are available at, http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html. On some days they will issue more than one report if their forecast changes. But on Tuesday, January 20 the report at 2059z had four more reports until 0039z, and all of them appeared to contain identical data. We contacted Viola Raben at the Space Weather Prediction Center, who said the Air Force (which NOAA collaborates with on this forecast) had a glitch which caused the posting of an additional forecast every time they tested something in their system.

Steve Friis, WM5Z of Las Cruces, New Mexico reminded us of a nifty Firefox web browser extension that fetches solar indices automatically and displays them in the lower-right information bar. It is called "Propfire," and Steve notes that you can install it in Firefox by clicking on Tools at the top, then Add-ons.

In the search field enter Propfire, and N0HR Propfire will display. Clicking "Add to Firefox" installs it. Firefox is an open source web browser similar to Microsoft's Internet Explorer, but it is produced free by a community of programmers, similar to the way the Linux operating system is built and maintained. You can download Firefox at, http://www.mozilla.com/en-US/firefox/.

When I set it up, I noticed that it has an option to display current sunspot number in addition to the usual solar flux, A and K index.

Jeff Hartley, N8II of Shepherdstown, West Virginia reported disappointing conditions last Saturday, January 17. He wrote, "It seemed like the worst day I can remember for low solar activity, long skip zones, and early closure of 20M to EU. I took part in the HA DX contest and by about 1610Z, only a very few Europeans were left on 20M. Before that, signals were much weaker than normal, but some Moscow area stations were heard around 1300Z as well as Scandinavia, so there was no big disturbance. Then, the NAQP SSB started (North American QSO Party, sponsored by National Contest Journal) at 1800Z and skip zones were very long, only CA/OR were worked on 15M and 20M was the worst ever probably in NAQP with TX about the closest state that could be worked most of the day."

Jeff continues, "I worked two very loud unfluttery KL7s on 20 and loud VE7s, so the K had to be low. 40 was skipping over most of New England by about 2030Z (1-1/2 hours before sunset) and the closest signals to the south were in SC. Conditions did rebound a bit on Sunday and there was some sporadic E to the NW at times. I was able to work W0GXQ/M (a very hearty soul, not a necessary trip, just putting out counties for the county hunters) on 40 thru 10M from one county line in central ND around 16Z, and we made 15M a couple of

times. I heard MI loud around 21Z on 20M. There may have been an Es opening on 6M in the VHF SS, but I didn't take part."

Early this morning, January 23, Jeff followed up with, "Things seem much better this week with 2 nights of openings to EU on 30M at sunset as opposed to nothing after 1700-1800Z from EU in quite a few days. 160 was in great shape early Friday today with UA9MA, OY9JD (loud), 4Z5KJ, several UA3/4s working as far as AZ, and HA3MU S9 + 15 db in the 0100Z hour, SM4CAN was also S9+. And I worked 4S7NE on 80 CW at the same time."

An interesting email about possible meteor scatter communications on 60 meters arrived from Larry Jones, K5ZRK who operates next to Tallahalla Swamp in Sandersville, which is in southern Mississippi, about 31.78 degrees north latitude.

Larry wrote, "I operate only 60 meters and only operate QRP! I do a LOT of operating and run a lot of skeds, therefore propagation is VERY important. I use a quarter-wave vertical antenna insulated from ground, with 120 quarter wavelength radials, and all those are tied into a 1.6 acre chain link fence surrounding my property. I also use a 60 meter inverted-V on transmit when I am working close in stations. I use a LOW 60 meter inverted-V on receive so that I can reduce the noise and the preamp on my Icom 703."

Larry continues, "Frequently during skeds at night I hear what seems to be meteor burst. I also hear these early in the morning when working the gray line. This is not always the case so that makes me wonder if there are meteor bursts on 60 meters."

He goes on to say, "I was an avid meteor scatter operator back in the early 90s with my old call WB5KYK and I ran on 6, 2 and 432 but I sit there for hours listening to this when running skeds on 60 meters. I can remember on 6 meters I would get upset when there was E-skip during a meteor shower because the E-skip would ruin the shower, I would be working E-skip instead of meteor scatter. The propagation on this band is fascinating to me, the gray line is phenomenal on this band and running QRP (10 watts on SSB) I have worked into Hawaii, and California is not hard. Skeds are so interesting on this band but this phenomenon I am observing has me puzzled because it sounds like meteor scatter. If it isn't, then what is it? This can be a useful tool if I can just figure out what it is AND to further give you something to think about. I observe this even more so during meteor showers and during the early morning hours (1100-1239z which is when meteors are prevalent)."

Interesting information, and it makes sense that ionized trails from meteors could provide a sporadic-E like propagation path, even on 60 meters. Carl Luetzelschwab, K9LA commented that meteor scatter has been detected at 2 MHz, and pointed out a PhD thesis titled "Medium Frequency Radar Studies of Meteors," by Stephen I. Grant, July 2003 at the University Of Adelaide Department Of Physics that describes

this.

In a subsequent email, K5ZRK wrote, "Next month there will be two showers that are classed as medium showers. I HOPE to set up some skeds for both. I think one of the things that is interesting about meteor scatter on 60 meters is the antenna issue. What would be the best antenna for meteor scatter on this band? I feel this is something we will learn by experience and this band is not old enough yet for us to know what is going to work best, especially when it comes to propagation. It seems it would be somewhere between the propagation on 80 and 40 meters, but I have found this band to be a totally different creature!"

Finally, Spaceweather.com has a fun tool for displaying a graph of 11 years of smoothed sunspot numbers, centered on any date you choose, going back over 250 years. What was sunspot activity like when you were born? Check it out at, http://www.spaceweather.com/glossary/sunspotplotter.htm.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for January 15 through 21 were 0, 0, 0, 0, 13, 0, and 0 with a mean of 1.9. 10.7 cm flux was 71, 71, 72, 71, 71, 70, and 69 with a mean of 70.7. Estimated planetary A indices were 4, 2, 2, 2, 9, 3 and 2 with a mean of 3.4. Estimated mid-latitude A indices were 4, 2, 2, 2, 7, 1 and 2 with a mean of 2.9.

8929. PJ7/FS DXpedition Feb. 4-11

Yahoo group: DX-IS (2009)
Date: 2009-01-23 19:33:30 UTC
From: Tom Anderson
Topic: 8922 Message: 8929

Corrects DXCC Island name--my mistake in typing--Tom-WW5L

The "Buddies in the Caribbean" DX group which
specializes in 100 watt or low power radios and the
Buddipole portable antenna system is off again to a new
DXpedition site Feb. 4-11.

This time the group will be operating at different times
from BOTH the French and Dutch side of St. Martin
Island FS/PJ7. Various modes including phone, RTTY, and CW
will be on the air, along with "golf cart mobile",
or "bicycle mobile" operations and other unique
operational situations. Each of the operators has extensive
experience operating from "unique" locations or
various DXCC entities.

In 2007, four of the eight operators on the 2009 DXpedition
were part of the Montseratt VP2M Buddipole DXpedition.

The DXpedition headquarters will be at Villa Ait Na Greine
on the French side of the island. The heaquarters
(http://villaaitnagreine.com) is perched on top of a cliff
overlooking the Caribbean with excellent take off angles
toward North America and Europe. There will be other sites
on Saint Martin island, both on the French and Dutch sides, where
operations will occur giving DXers a chance to work two
separate DXCC countries.

The group's goal will be to work stations from all over
the world using Buddipole™ antennas and other
newly-developed Buddipole™ antenna accessory products.
The operation will be the week before the Orlando Hamfest
and two weeks before the KP5 DXpedition. Operators will be
using FS/homecall and PJ7/homecall and plans call for
contacts to be uploaded to LoTW, eQSL, and an on-line log.
Those wanting hard copy QSLs should send a S.A.E. and
appropriate return postage or an SASE to the homecalls of
the operator(s) you've worked.

The "Buddies in the Caribbean" blog page will be
http://caribbeanbuddies.blogspot.com/

The group consists of the following operators:

K8EAB Weymouth Walker who's operated from Jamaica as
well as motels, high rise apartment buildings, a pontoon
boat, mountain tops, and even "picnic table"

portable during his 52 year ham career.

KC4VG Mike Greenwood was a member of the BUM's Montersatt group in 2007 as VP2MVG and has been licensed more than 25 years. He also has operated from the Bahamas C6 and other Caribbean locales. Unique QTHs have included operations from Alcatraz Island in the USA, a cruise ship, and the Marconi station on Cape Cod. He specializes in low power SSB operations. Many DXers have run into Mike at the Buddipole booth at the Dayton Hamvention where he helps Chris and Budd out with sales.

N7UN Guy Hamblen has operated from such unusual locales as the Appalachian Trail and from the top of several of Colorado's 14,000 ft. peaks. Previously he was K7YYK, AA7QZ, and his current call of N7UN. He has 334 DXCC countries confirmed.

KB9AVO Paul Van Dyke was a member of the 2007 Buddipole Montseratt DXpedition and held the VP2MVO call. He is a frequent contester as part of the KP4US contest team in Abonito PR. He will be specializing in PSK, RTTY, and Slow Scan tv on FS/PJ7. He is also founding president of the Indiana-Michigan-Ohio Skywarn Association.

WW5L Tom Anderson is an avid DXer and has held the following DX calls since the 1980s: V31EF (Belize), G0/WW5L (UK), 7P8TA (Lesotho), and C91TL (Mozambique). He is on the DXCC Honor Roll and has also operated from the Battleship Missouri, KH6BB, at Pearl Harbor HI. He was a K2BSA staff member and radio merit badge counselor at the 1997 National Boy Scout Jamboree and has been invited back as a K2BSA staff member for the 2010 Centennial National BSA Jamboree. He is also planning on operating as HB9/WW5L from the Kandersteg World Boy Scout Camp in Switzerland in July.

N0TU Steve Galcchutt is a long time CW operator on Straight Key Night and enjoys "mountain top operation" as he's operated from several of Colorado's 14,000 ft. peaks. QRP CW operations are his main interest. He will also be the group's resident videographer - you may have seen his videos on YouTube under the pen name "the Goat Guy."

W3FF Budd Drummond is one of the principals in Buddipole. His main interest lies in making portable, "bicycle mobile", "golf cart mobile", and "walking" HF contacts from whatever location he finds himself in. Budd was one of the members of the 2007 Buddipole Montseratt DXpedition. His web page is http://www.qsl.net/W3FF. In September 2004 Budd worked every continent using 50 watts on his "bicycle

mobile" and has logged more than 5,000 QSOs as "walking mobile" station.

W6HFP Chris Drummond is the president of Buddipole and his main interest, naturally, is HF portable operating and "lightweight" DXpeditions to remote locations. An avid backpacker and outdoorsman, Chris works to design products that will live up to his demanding expectations for rugged and versatile equipment for HF operating in the field. He was also a member of the VP2V Montseratt DXpedition with callsign VP2MHFP.

About the antennas: the Buddipole antenna system is designed to be a lightweight and versatile way to put an efficient station on the air in minutes in almost any terrain. By utilizing an interchangeable series of custom-made components the user is able to configure dozens of antenna designs optimized for their particular operating needs. The group to St. Martin expects to operate dipoles in various configurations, verticals, vertical beams, mini-yagis, and other antennas using only Buddipole parts. Several new products will make their debut including a lightweight rotor, super cap power supply, LifePo4 battery packs, folding capacity hats, and shockcorded masts.

8930. Ohio/Penn DX Bulletin #893

Yahoo group: DX-IS (2009)
Date: 2009-01-23 21:34:14 UTC

Ohio/Penn DX Bulletin No. 893

The Ohio/Penn DX PacketCluster
DX Bulletin No. 893
BID: $OPDX.893
January 26, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL DX Bulletin, AA1M, K1XN & GoList, N1SNB, NC1L, NJ1Q, N2RHL, W2VU, K3LR, NG3K, K4ZLE, N4AA & QRZ DX, W4GKR, KR50O, N5FRT, W5PF, N6OC, K8YSE, N0TG, DX-IS News Site, Pete's-DX-Newsdesk, A35RK, CO8TW, DK8JB, DL6KVA, DL7MAE & The DX News Letter, F5NQL & UFT, G0IAS, I1JQJ/IK1ADH & 425 DX News, OH2BN, RSGB IOTA Web Site, VA3RJ & ICPO, VE1AL, VE2MBS/VE2QQ, VK4FW and VP9LP for the following DX information.

*** SPECIAL NOTICE FROM THE EDITOR (by KB8NW): This week's bulletin was sent out earlier than normal because there was no bulletin last week and to accommodate the CQ 160-Meter CW Contest announcements. A complete listing of all the participants is available at the NG3K Contest page at: http://www.ng3k.com/Misc/cq160c2009.html
I hope to have everything caught up and back to normal next week....
73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 17th/January, through Saturday, 24th/January there were 214 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E3, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FW, FY, G, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2008 MOST WANTED SURVEY (DX Magazine's Results). The DX Magazine's "2008 Most Wanted Survey" has been posted on the Web site. The survey that most DXers go by is now available at: http://dxpub.com/dx_news.html
Editor Carl, N4AA, states, "The listing shows the top 100 World-Wide 'weighted' mixed mode results. It also includes the ranking for 2007, for comparison. Some 2007 rankings are shown as 'NA' which only means that particular country was NOT on the list for 2007. The Top 100 results, broken down by continent and NA time zone, are published in the January/ February 2009 issue of THE DX MAGAZINE. A further breakdown will be published in the March/April 2009 issue. That listing will include the top 50 for CW, SSB, Digital and this year a listing for Low Bands (160-30 meters.)" The "Top Ten Most Wanted" are as follows:

2008	PREFIX / COUNTRY	2007	2008	PREFIX / COUNTRY	2007
1	P5 NORTH KOREA	1	6	KP5 DESECHEO	7
2	7O YEMEN	2	7	3Y/B BOUVET	5
3	KP1 NAVASSA	3	8	VK0H HEARD ISLAND	10
4	FR/G GLORIOSO	4	9	FT5W CROZET	9
5	ZS8 MARION ISLAND	6	10	FT5Z AMSTERDAM	11

4K, AZERBAIJAN. Axel, DL6KVA, will once again be active as 4K0CW from Vlad's, 4K9W, QTH in Baku between local evening time on March 19th and local midday on March 25th. Activity will be CW only on all HF bands (depending on the band conditions) using 100 watts into a 84m long wire (station of 4K9W). Axel also plans to participate in the Russian DX Contest (March 21-22nd) as a Single-Op/Low-Power/CW entry. QSL via DL6KVA (Bureau OK).

4L0, GEORGIA. Operators 4L5DJ/Shota, 4L2M/Mamuka and 4L4CC/Levan will be active as 4L0G in the CQ 160-Meter CW Contest (January 23-25th) as a Multi-Single entry. They will use a TS-950SDX w/1KW PA into a full size Delta loop and Vertical; RX Antenna 2 beverages. QSL via EA7FTR (UA9LP for Russia; UT7QF for Ukraine).

4U1U, UNITED NATIONS HEADQUARTERS. According to the ARRL DX Bulletin, Johnny, LA5IIA, will be active as 4U1UN in the CQ WW 160 Meter CW Contest for a few hours late Friday and for a few hours during the day on Saturday. QSL via HB9BOU.

4Z, ISRAEL. Operators Victor/RV2FW, Alexey/4Z5TA, Mony/4X6ZK and Alex/ 4Z5KJ will be active as 4Z5J during the CQ 160-Meter CW Contest (January 23-25th) as a Multi-Single entry. QSL via W0MM.

7Q, MALAWI. By the time you read this, Harry, 7Q7HB, should be back in Malawi. QSL Manager Allan, G0IAS, informs OPDX that Harry has a new rotator to fit the mast he has and new parts to replace in his amplifier. Then depending on his work load, he will once again be active. He will operate mainly on the Digi modes and CW, but he does have a Mic, so if you need him on SSB, please ask him. Length of his stay will be around 2 months. QSL ONLY DIRECT to G0IAS.

AN8, CANARY ISLANDS. Operators Luis/EA8AY and Jeronimo/EA8NC will use the special callsign AN8R during the ARRL DX CW Contest (February 21-22nd) as a Multi-Single entry. QSL via EA8AY. Visit the Web page with a Web cam on it at: http://www.ea8ay.com/an8r_arrl/

BX5, TAIWAN. Jimmy, BX5AA, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA.

C9, MOZAMBIQUE. Members of the Texas DX Society are pleased to announce their next Dxpedition. Six members will travel to Bilene in the Maputo Province, March 25th to April 5th. Bilene is 180km from the capital city of Maputo. The team will include Cal/WF5W, Dale/KG5U, Madison/W5MJ, Jim/N4AL, Bill/K5WAF and Paul/W5PF. They will be on all bands 160-10 meters and will operate CW, SSB and RTTY. There will be 3 stations, two with amplifiers. Antennas will include log periodics for 20-10m and various verticals for the low bands. They will operate in the CQWW WPX Phone Contest. Callsigns have not yet been assigned but will be announced when available. QSL Manager for all callsigns will be W5PF. Logs will be uploaded to LoTW after the trip. Further details are available on the team's Web site at: http://www.tdxs.net/c91.html

CN, MOROCCO. Operators Ahmed/CN8WK, Stefano/IK2QEI, Maurizio/IV3ZXQ and Carlo/IK1HJS will be active as CN3A during the CQ 160-Meter CW Contest (January 23-25th) as a Multi-Single entry. QSL via LoTW or via I2WIJ.

CO, CUBA. Juan, CO8TW, will be active during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op entry. QSL via HB9SVT. The log will be online after the contest at: http://www.qsl.net/co8tw/

CT3/CS9/CT9, MADEIRA ISLANDS. Helmut, DF7ZS, will be active as CT3/homecall between March 24-31st. His activity will include the CQWW WPX SSB Contest (March 28-29th). QSL via DJ6QT or CS9L. He will sign CS9L (or CT9L) for the contest. Look for casual operation before the contest. Visit his Web page at: http://www.df7zs.de

CT9, MADEIRA ISLANDS. Operators Rastislav/OM3BH, Jozef/OM3GI and a Madeira Contest Team will be active as CT9M during CQ 160-Meter CW Contest (January 23-25th) as a Multi-Op entry. QSL via CT3EE.

CY0, SABLE ISLAND. Operators Randy/N0TG, Murray/WA4DAN and Ron/AA4VK have received approval from the Director of Marine Programs and the Canadian Coast Guard, and will activate Sable Island between October 7-14th. Callsigns will be homecall/CY0. Part of their team from previous operations from KP1 and KP5, CY9 are reuniting for this operation from Sable Island. Operations are planned for 160-10 meters, CW and SSB. More details are forthcoming. Visit their Web page at: http://www.cy0dxpedition.com

D4, CAPE VERDE. Operator Girts, YL2KL, will be active as D4C between February 11-22nd. He hopes to do some activity on 30 meters, but plans to be active during the CQ World-Wide WPX RTTY Contest (February 14-15th) as a Single-Op/All-Band/Low-Power entry and the ARRL DX CW Contest

(February 21-22nd) as a Single-Op/All-Band/High-Power entry. QSL via CT1ESV by the Bureau or IZ4DPV for direct. For the latest information, check the D4C Web page at: http://www.d4c.cc

DAYTON HAMVENTION NEWS (ed. Gee, is it that time already..WOW!)......
* 24th Annual DX Dinner: Jay, K4ZLE, reports: "The SouthWest Ohio DX Association is pleased to sponsor the 24th annual DX Dinner to be held in conjunction with the 2009 Dayton HamVention. The dinner will be Friday evening, May 15th, at the Crowne Plaza Hotel, located in Dayton city center. This is the same venue as in previous years. The program details are not final yet and will be released as soon as they are finalized. As in the past, there will be some nice attendance prizes. Last year the main prize was an Icom IC-756 Pro III, but this year ICOM has promised something new! Attendees will have their choice of either a steak dinner or a vegetarian dinner. We must be informed when the tickets are ordered if you want the vegetarian option. Tickets are 39.00 USDs per meal, payable in U.S. funds to SWODXA. (Sorry, we do not process PayPal or Credit Card payments.) Please advise if you want a vegetarian meal when you order. You may order from Pete Meyer, N0FW, at his CBA. SASE is requested. We attempt to honor group seating requests when tickets are ordered together. There is not a bad seat in the house, but seating is definitely limited. Come join us for an evening of fun and fellowship. Up-to-date information may be found on the club's website: http://www.swodxa.com
Pete's E-mail address is n0fw <at> live <dot> com
ADDED NOTE: Last year Yaesu joined us in sponsoring the DX forum during HamVention. They have agreed to partner with us again for 2009. There will be a FT-2000 with PEP raffled off at the end of the DX forum. The winner does not have to be present. Tickets for a chance on the FT-2000 are 5.00 USDs each or 5 for 20.00 USDs. For your convenience, they may be ordered at the same time you purchase your DX dinner tickets. All proceeds from this raffle are used by SWODXA to assist in providing DXpedition grants. We look forward to helping make HamVention a more enjoyable experience for all DXers. C U there?"

* 17th Annual Dayton Contest Dinner: The North Coast Contesters are proud to announce: "2009 Contest Dinner tickets are on sale now exclusively via the WEB again this year! Thanks to Scott, KA9FOX and QTH.com for designing, building and running our Web site: http://www.contestdinner.com
Master of Ceremonies for the Dayton Contest Dinner is CQ Magazine Contest Editor John Dorr, K1AR. The 2009 CQ Contest Hall of Fame Inductions will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST. Our excellent keynote dinner speaker will be announced soon. The Contest Dinner will be held on Saturday night, May 16, 2009 at 6:30 PM (Cash bar opens at 5:30 PM). Located at the Crowne Plaza Hotel (Official Contest Hotel), 5th and Jefferson Streets (Next to the Convention Center) Dayton (Downtown), Ohio in the VAN CLEVE BALLROOM. Seating is random. Tables are set in rounds of 8." Tim, K3LR, Dayton Contest Dinner Chairman, states that tickets are ONLY available via the Web page listed above. He also mentions,

"Many contest operators from around the world attend this event. If you enjoy radio contesting, you do not want to miss this Contest Dinner in Dayton, Ohio. We expect a quick sell out just like past years. Go to the web and get your tickets early!"

DXCC SUBMISSION REPORT. A report was announced that the OX/NA1SA operation in May 2007 was rejected by DXCC desk for "No documentation received".

EA8, CANARY ISLANDS (AF-004). Jyrki, OH6CS, will be active as EA8/OH6CS during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (15m) entry. QSL via LoTW. QSL is also "OK" via OH6CS, direct using the QRZ.com address.

EF8, CANARY ISLANDS (AF-004). Operator Valery, RD3AF, will be active as EF8M during the CQ WW RTTY WPX Contest (February 14-15th) as a Single-Op/All-Band/High-Power entry. Using the same callsign, he will also be active in the ARRL DX CW Contest (February 21-22nd) as a Single-Op/All-Band/High-Power entry. QSL both operations via RX3DU (QRZ.com). ADDED REMINDER: Also look for Valery (using EF8M) during this weekend's CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/High-Power entry.

ER0, MOLDOVA. Serge, UR5FEO, will be active as ER0FEO during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/Low-Power entry. QSL via UU0JM.

ER0, MOLDOVA. Vladimir, will be active as ER0/UT0FT during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/Low-Power entry. QSL via UT0FT.

ES9, ESTONIA. Operators Tonno/ES5TV, Toivo/ES2RR, Arvo/ES2MC, Juri/ES5JR and Toomas/ES5RY will be active as ES9C during the CQ 160-Meter CW Contest (January 23-25th) as a Multi-Op entry. QSL via ES5RY.

FR, REUNION ISLAND (AF-016). Gerhard, OE3GEA, will be active as FR/OE3GEA between February 1-13th. Activity will be on all bands, but CW only. QSL via his home callsign, direct or by the bureau.

GJ/MJ0, JERSEY. Richard, K2WR, will be active as GJ2A during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/High-Power entry. QSL via K2WR or GJ3DVC. Look for him outside of the contest signing MJ0AWR.

HS, THAILAND. Joerg, DL1MJF, is expected to be active from here again as HS0ZGQ between January 20th and February 12th. Activity will be on 40-10 meters CW/SSB using a Kenwood TS-50 and a dipole antenna. If possible, Joerg may stay for one week on the Island of Koh Samui (AS-101) and operate as HS0ZGQ/2. QSL via DL1MJF.

IOTA NEWS.....
EU-108. Jim, MM0BQI, will be active as homecall/p from the Treshnish Isles, April 24-27th. Look for activity on or near the usual island and IOTA frequencies. QSL via his home callsign, direct or by the bureau.

EU-146. Operators Will/PE1OPM, Manfred/PE1OXV and Jeroen/PD5CW will be active from Schouwen Duiveland, July 24-26th. Activity will be on 80-10 meters, using mainly CW and SSB. They will also be in the RSGB IOTA Contest (July 25-26th). QSL via their home callsigns, direct or by the bureau.

OC-135. Jerry, P29ZAD, will be active from Buka Island between February 7-27th. Activity will be limited because he is working just North of Buka Town. QSL via NI5DX, direct or by the Bureau. More information can be found at: http://p29zad.blogspot.com

J3, GRENADA (NA-024). Colin/G3VCQ and Sharon/M3VCQ will be in Beru from March 12-26th. Colin will be active as J38CW in the BERU CW Contest (March 14-15th). Colin will only work Commonwealth stations during the contest. Outside of the contest, look for activity to be on 80/40/30/20/ 17/15/12/10 meters using CW and SSB. Sharon will also be active and sign J38/M3VCQ (still to be cofirmed yet) in between sunbathing! All QSLs are via G3VCQ, direct or by the bureau.

J7, DOMINICA. Seth, SM0XBI, will be active again as J79XBI (while on holiday) between now and around April 1st. Activity will be SSB only. Over the past week he has been mainly on 20 meters with some activity on 80 and 40 meters. QSL to his home callsign, bureau preferred.

LX, LUXEMBOURG. Lars, DF1LON, will be active as LX7I during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

NH7, HAWAII. Al, NH7A, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via F5VHJ.

NP4, PUERTO RICO. Alfredo (Al), WP3C, will be active as NP4A during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/High-Power entry. QSL via W3HNK.

OR3/OR4, ANTARCTICA. Operator Willy/ON5AX and XYL Magda/ON3AX will be active as OR4AX and OR3AX, respectively, from the RV Professor Khromov (Spirit of Enderby) and from the region of the Ross Sea in Antarctica between February 9th and March 10th. QSL via ON5AX.

PJ2, NETHERLANDS ANTILLES. Fred, PA1FJ, will be active as PJ2/PA1FJ from the Island of Curacao (SA-006, WLOTA LH-0942) between September 24th and October 7th. QSL via his home callsign, direct, by the Bureau or eQSL.

QSL INFO AND NEWS.....
NEW QSL MANAGER. Buzz, NI5DX, is now the QSL Manager for Zivko, S52BB. Buzz will be able to answer all requests for cards once new cards are received from the printer (4-5 weeks).

NEW QSL ROUTE. Rich, W4GKR/DK4GKR, has announced that all QSL requests for his past operations be QSLed via the Texas address listed on QRZ.com. Operations included: DK4GKR (Oct. 2007-present), DL/, EA8/, HB/, G/, GW/ and TI5/.

S21DX LOGS. The on-line logs for the S21DX operation are available at:
http://s2iota.eb7dx.com/index.php?option=com_searchlog&Itemid=60

TS7C LOGS. The on-line logs for the TS7C operation are available at:
http://www.ts7c.net/searchlog_adif.php

VX1RNS/P QSL STATUS. It was mentioned by VE1AI that the cards for last year's IOTA operation from NA-081 have been printed and direct cards will be sent next month for VX1RNS/p. Bureau cards will follow.

QSLS VIA LOTW: 9N7CQ, E44M, FO0SUC, FT5ZH, PY2GWF/0, SO7WW, TJ3SP, TL5A, XX9TKV, XZ1N and ZA1A

QSLS RECEIVED VIA MAIL: 3B8/SP2JMB, 3X5A, 4U1UN, 4W6AAB, 5X1GS, 7P8BA, 7U5CI, 9H1XT, 9M6/N2BB, AH0V, BD1DRJ/2, BQ9P, EA9/SP2JMB, ER4ER, FO/DJ7RJ, GW3KGV, GW3YDX, HS0ZEE, J6/W0SA, JX9JKA, KH6/JA6REX, MD0CCE, OX5AA, PZ5TT, RA4LW, T209DX, TC4X, TL8CK, TN5SN, TT8JT, V51AS, VU4RG, YO5BRZ, ZA0/I8LWL, ZK2QQ, ZS2EZ and ZS6GAV

QSLS RECEIVED VIA THE BUREAU: 3XD2Z, 4Z4BS, 8P1A, 9K2SR, C50C, EA1EVR, EC5ANF, EI2VNO, F8DQZ/P, IG9/IZ1DFG, IQ3GA/3, IR2M, K0ARY/VP9, MM/DH5JBR/m, NB7PX, OY/DK7MCX, R450KB, RK3MWD, RP3ZD, RW3XZ, S50HQ, S57RTH, SL1HF, SM5U, SV1DPI, SV8/IZ7FLP, TA2MW, TC18M, TC1ATA, TK/DL2EEO, TM7F, UA3AP, UE3SFF/1, UE80MC, UZ7U and Z35T

RK2, KALININGRAD. Members of the UA2 Contest Club will be active as RK2FWA during the CQ 160-Meter CW Contest (January 23-25th) as a Multi-Op entry. QSL via DK4VW.

SILENT KEYS.....
W2PUX - Joseph J. Brohman, became a SK on January 11th at the age of 100. He born on June 15,1908. Joseph was a HAM operator for 75 years.

W6GVM - Emil F. Malek, became a SK on December 26th, 2008, at the age of 92. He was very active in ham radio chasing DX, and gaining Honor Roll Membership and #1 Honor Roll plaque, staying at the top to the end. Listed in the 2007 DXCC Yearbook's Annual Listing : Phone/Mixed # 1 at 388 Entities. Emil loved Ham Radio, DXing, Mentoring, Helping others.

JY3ZH - It was announced that Zedan, JY3ZH, has became SK on January 20th. He is best known for being the net controller for the Arabian Knights Net on 14.252 kHz.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned. They all will be surely missed.

SV9, CRETE. Willi, DJ7RJ, will be active from here for three weeks beginning February 24th. His callsign in the past has been SV9/DJ7RJ. Willi operates CW and SSB. QSL via his home callsign by the CBA.

TA, TURKEY. Yasar, TA3D, will be active during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/Low-Power entry. QSL via TA3D.

TO5, MARTINIQUE. Dim, UT5UGR, will be active as TO5WA from Laurent's, FM5BH, QTH and station during the ARRL DX CW Contest (February 21-22nd) as a Single-Op/High-Power entry.

TO5, MARTINIQUE. Albert, F5VHJ, will be active as TO5A during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band entry. QSL via F5VHJ.

V2, ANTIGUA. Operators Bob/W4OWY and Mark/W9OP will be active as V25WY and V25OP between March 10-19th. Activity will be on 160-6 meters. QSL via their home callsign or by the bureau. Logs will also be uploaded as before to LoTW and eQSL.

V6, MICRONESIA. Mike/KM9D and Jan/KF4TUG as of 0220z, January 15th, have anchored the "SV Don Henry" in Kolonia Harbor on Pohnpei Island. No word on their radio plans at the moment.

VK9L, LORD HOWE ISLAND (Update). Bill Horner, VK4FW, member of Oceania Amateur Radio DX Group Inc. (ODXG), reports that the VK9LA March departure date is fast approaching, and all team members are ready to go. Operations will between March 23rd and April 3rd. The total list of operators are: Tony/IZ3ESV, San/K5YY, Bob/N2OO, Lance/N2OZ, Stan/SQ8X, Peter/SQ9DIE, Victoria/SV2KBS, Alex/VK1TX, Luke/VK3HJ, Chris/VK3QB, John/VK4IO, Catherine/VK4VCH, Chris/VK5CP, John/VK5PO, Julian/W5SL and Bill/VK4FW. Bill, VK4FW, will travel to Lord Howe on March 22nd to immediately begin unpacking. On March 23rd, 4 other operators will arrive and the rest will arrive as originally planned on March 24th. Bill states (edited), "We will assemble 7 full HF stations at 2 seperate sites as well as one for 6m. Modes of operation are SSB, CW and RTTY. We will use mono band yagis and mono band verticals to allow us to possibly have 2 actual stations on the same band similtaneously. There are also a quantity of wire antennas for the low bands. A full list of operating frequencies will be designed to enhance our plans. With the rising fuel prices and the international economy crashing around us, we have been able to secure a vessel to freight all of our equipment. We are still trying to get more support to cover this cost, so please be so kind to visit our Web site and make a donation at: http://www.odxg.org/vk9la.htm
The QSLing chores will be handled by VK4FW. We will set up an online QSLing system that will permit you to apply online to help cut your postage costs. More on this later. QSL cards will be printed very quickly by UX5UO." For more updates, details on the DXpedition and how to donate to this operation, please visit the ODXG and VK9LA Web pages at:
http://www.odxg.org
http://www.odxg.org/vk9la.htm

VK0B, ANTARCTICA. Bob, VK0BP, is currently working at Antarctic Davis Base Station (AN-016, Gridsquare MC81xk) until November 1st. His activity is limited due to his workload, but he is expected to be on all HF bands. However, due to local scientific experiements cetain bands may be un-available at times. He seems to like 20 meters between 1500-1800z.

Operations have been on SSB and PSK31, but he plans to operate on other modes later on during his stay at the Davis Station. QSL via VK2CA. PLEASE NOTE: There is also a possibility of Bob activating other field huts in the area, and he will sign as VK0BP/P. Look for more details on his Web page at: http://www.vk0bp.org

VP2, BRITISH VIRGIN ISLANDS. Eric, K6VVA, will be celebrating his 65th birthday with a trip to Tortola (NA-023) between February 20-24th. He will sign VP2V/K6VVA and be active mainly on CW. Eric will also be in the ARRL DX CW Contest (February 21-22nd) as VP2VVA. QSL via N6AWD.

VP9, BERMUDA. Jeff, N1SNB, will be active as VP9/N1SNB between January 21-25th. Activity will include the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op/Low-Power entry. QSL via N1SNB.

VP9400, BERMUDA (Special Event). Rose, VP9LP, Secretary of the Radio Society of Bermuda, announced that the year 2009 is the 400th anniversary of the settlement of Bermuda by Sir George Somers. Look for most local organizations to have some kind of special event during the year. The Radio Society of Bermuda has been issued with a special callsign that can be used all year; it is VP9400/xx. The xx suffix is the operator's callsign suffix (i.e. VP9400/LP). There are a few novice licence holders who have a 3 digit suffix (i.e. VP9400/NMT). Look for special pictorial postcards to be used to QSL.

WAS LOTW ACCOUNT INFORMATION. Bill Moore, NC1L, ARRL Awards Manager, announced: "Some users may have noticed that their WAS totals have changed or have completely gone away. On January 1, 2009, LoTW refreshed all WAS accounts to accommodate the new Triple Play award. Your Triple Play record is shown as a sub award in your WAS account just as band and mode sub-awards are shown. If your account had no QSO rules then the system had no way of applying your QSO credits. This is easily fixed by adding a rule to your WAS account. All WAS accounts must have at least one rule. To add a rule to your WAS account simply access your WAS account then select 'MODIFY ACCOUNT'. Follow these steps to complete the process:

Click 'Add Rule To QSO Set'
Next, select the type of rule you want to apply. Drop the box down, make your selection then click 'Add Rule'

(Next it may ask you here to select a callsign if you have more than one account. If so, select the callsign you want to change).

If there is only one callsign in the account the next screen will say 'Save Account Changes'

Click this and your account should be OK now.

Note, if you feed more than one WAS account for different locations you must do this for each account. Some accounts are very simple and will only require a callsign rule. Other accounts may be more complex requiring multiple rules to accommodate your operations. WAS accounts

can be configured to automatically select those of your QSOs that both qualify for a WAS award and also match a set of rules you specify. A QSO Set is a list of rules that define QSOs that will be matched. Your account can include more than one QSO Set if needed to encompass all of your QSOs that are eligible for the awards. The rules that make up a QSO Set each compare the value of a field related to the QSO. The fields that may be used for this comparison are the callsign you used to make the QSO, the QSO date, and several geographical fields. At least one rule must be included in a QSO Set in order to match any QSOs. If more than one rule is present in the QSO Set, you may choose whether the QSOs must match all of the specified rules or any of the specified rules."

WORLD'S LARGEST AMATEUR RADIO ANTENNA DEPLOYED ON 160M AT OH8X. Jarmo, OH2BN, reports: "With the aim of pushing the always challenging Northern envelope on low bands and verifying their own engineering skills, the group at Radio Arcala will hit 160M with a 39-ton (80.000 lbs) 3-element full-size monster during the week of January 19, culminating with the CQWW 160M Contest. OH8X is to be manned by OH2IW and OH6KN, still in a limited capacity while valuable data will be gathered in this first assault. Their partners for measurement purposes will be the sister station CU2X operated by OH2BH/CU2KG and, in close proximity, by the associate stations OH0E operated by OH2MM, and OG2P by OH2PM. You may catch all these stations during the coming week. Radio Arcala is co-operating with the University of Oulu in several areas of HF propagation study. They also welcome and acknowledge field reports at <oh1wz@...>
You may read about details of the monster construction at <http://www.helsinki.fi/~korpela/PU/PU.html> and study the overall mission at <www.radioarcala.com>
QSL for OH8X via OH2UA, CU2X via OH2BH, OG2P via OH2PM and OH0E via OH2MM."

WORLDRADIO ONLINE LAUNCHED (February Issue Now On The Web!).....
Richard Moseson, W2VU, Editorial Director, for CQ Communications, Inc., announced on January 21st, 2009,: "First Issue of 'WorldRadio Online'
Posted on Web -- The inaugural issue of 'WorldRadio Online' has been posted on the World Wide Web, appropriately, on Inauguration Day!
'WorldRadio Online' is the first wide-distribution general-interest ham magazine to be published exclusively online.
The February issue of 'WorldRadio Online' features articles on a ham station aboard a still-sailing Victory Ship, as well as a very handy primer on basic knots. Most familiar columnists are there as well, including 'Krusty' Aerials columnist Kurt N. Sterba.
The issue is in a downloadable PDF file. It may be accessed without charge by going to the CQ magazine home page at
http://www.cq-amateur-radio.com/
and clicking on the 'WorldRadio Online' link.
'WorldRadio Online' is published monthly by CQ Communications, Inc."

XU7, CAMBODIA (Just A Reminder!). Peter, NO2R, will be active as XU7ACY from Sihanoukville during the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op entry. QSL via W2EN.

XU7, CAMBODIA (Just A Reminder!). Tom, KC0W/ZD7X, active as XU7XXX is expected to be in the CQWW 160-Meter CW Contest (January 23-25th) as a Single-Op/Low-Power entry. His 160m antenna is a dipole/vertical placed on the beach 5 meters from salt water. QSL via KC0W, direct only.

XW, LAOS (Just A Reminder!). Bruce, XW1B, will be active in the CQ 160-Meter CW Contest (January 23-25th) as a Single-Op entry and the ARRL DX CW Contest (February 21-22nd) as a Single-Op/Single-Band (possibly 40m - if his new yagi is up by then) entry. QSL via E21EIC.

XT, BURKINA FASO. Michael, F1IQH, will once again be active as XT2WC from BoboDioulasso starting January 25th, for two weeks. Activity will be mainly 20 meters (other bands are possible according to the propagation) with only 100 watts and a G5RV. QSL via F1IQH.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) will be active as Z37M during the CQWW WPX RTTY Contest (February 14-15th) as a Multi-? entry. Operators mentioned are: Milosev/Z31MM, Igor/Z32ID, Dance/Z32XU, Ozren/Z35T, Chris/Z35X, Tone/Z36N, Venco/Z36W and possibly others. QSL via Z37M, by the Bureau or info on QRZ.com.

ZL7, CHATHAM ISLANDS. There has been a leak of a possible operation here. Details are expected to be released. STAY TUNED!

ZS8, MARION ISLANDS. Petrus, ZS8T, showed on 20 meters last weekend for a few QSOs. According to Rhynhardt, ZS6DXB, ZS8T Press Officer, "the ZS8T license has expired on the 31st of December 2008 with an expiry window period up and until 31 January 2009. Renewal and payment off the existing license has been made and Petrus, ZS8T, is licensed to operate from Marion Island up and until December 2009. All contacts made to date with the ZS8T callsign are legitimate and legal. The team is currently awaiting the paper copy off the new license that only expires in December 2009 Petrus can remain active with ZS8T for the remainder of his stay on Marion Island." Petrus, ZS8T, has unveiled some more details about his operation from Marion Island in an interview which be available this past week thanks to the South Africa Amateur Radio League (SARL). He states that he will be there three months before leaving and plans to be active as much as he can during this time. To listen to the complete interview and see the latest pictures from Petrus, go to:
http://zs8t.net/interview-with-petrus-zs8t/
For updates and official announcement of ZS8T operation, please visit the official ZS8T Web site at: http://zs8t.net

ZT2, SOUTH AFRICA (Rare PFX). Look for eight South African amateurs to operate as ZT2V in the CQWW WPX SSB Contest (March 29-30th). This will be one of the rare times the ZT prefix has been used, and the first time South Africa's East Cape Province (ZS2) has had a team operation entry in a major contest. The Multi-2 operation will take place from the Port Elizabeth region QTH of Donovan, ZS2DL, who will serves as team leader. Other experienced contest participants include Barry/ZS2EZ, Mitch/ZS2DK, Thiaan/ZS2Y and Andre/ZS2ACP. Operators Henning/ZS2HK and Glen/ZS2GV will be making their major contest debuts. One other operator, not yet selected, will round out the team. The 2 stations will consist of a FT2000 and a

Quadra amplifier into a SteppIr beam and a FT1000MPMKV and an Ameritron amp into a HyGain TH5. An antenna for 40 and 80 meters will also be used. While the group is hoping to score well, the primary goal is to put Port Elizabeth on the map and give the prefix hunters a rare one. The QSL route for ZT2V will be Buzz, NI5DX.

8931. ZL7T - Chatham Island DXpedition

Yahoo group: DX-IS (2009)
Date: 2009-01-24 09:24:28 UTC
From: Lee Jennings
Topic: 8931 Message: 8931

ZL7 CHATHAM ISLAND: A team of nine ZL operators will be activating Chatham Island in March 2009. The team leaders are Lee ZL2AL and Morrie ZL2AAA, The rest of the team will be Lee ZL2LE, John ZL1BYZ, Mike, ZL2CC, Phil ZL2RVW, Mark ZL3AB, Wayne ZL2WG AND John ZL1ALZ. Chatham Island is located about 550 Km east of New Zealand about 3 hours by air. Although ZL7 is not particularly rare but is in the top 100 at 87 needed for DXCC and it still generates much activity on the bands. Our Pilot will be Duncan ZL3JT in Christchurch zl3jt@... The team will be hosted at the Chatham Fishing Lodge in the fishing village of Kaiangaroa on the north eastern tip of the Chatham Islands. www.chathamfishingexperience.co.nz/ .

We will be looking for newer ops wanting to work ZL7 for the first time and will be listening for VK/ZL and Pacific stations at the end of each hour for a few minutes. We will not be working specific call areas or any region to the disadvantage of any other region. The ICOM four station setup with amplifiers will operate 160M to 10M with CW, SSB, RTTY and PSK modes. Wire loops will be used on 80M and 40M, a vertical on 30M and Yagis on 20, 17, 15, 12 and 10M. We also will try 160M alternating with the 80M station from time to time.

Most of the experienced operators are DXCC members and look forward to the pileups. Frequencies will be in the usual SSB and CW DX haunts on each band with SSB split up 5 kHz and CW split up 3 kHz. Our callsign will be announced at the beginning of the operation on March 6, 2009 and ending on March 11, 2009. Although ICOM New Zealand has offered limited sponsorship, donations would be appreciated as the team will have to cover all expenses including the QSL printing. Donations would be appreciated. The website will be up and running in a few weeks and the URL is www.zl7t.com <http://www.zl7t.com/> Logsearch will be available on the team's return. QSL via Buro or Direct via ZL2AL CBA or QRZ.com

We will be uploading the logs to LoTW in approximately 6 months and we will also QSL via the Buro

73, Lee ZL2AL Team Leader

Hello !

After the publication of the "2008 MOST WANTED SURVEY"
by the DX Magazine (tnx Carl for this very usefull list).
You can see the complete list for the most 100 wanted.

here http://www.dxpub.com/dx_news.html

And if you wish to see some cards for the TopTen, please have
a look here:

http://www.lesnouvellesdx.fr/galerie/galerie.php?page=listtopten

and you will find more than 300 cards for the Topten countries
for the last 5 years (2004 to 2008)

If you don't speak french and can use an automatic translator
(see on the left side of the page).

For sure some cards are missing and your cooperation is
welcome.

Your comments are also welcome.

Have a good visit!

Best wishes.

Clicking on
http://www.va3hj.ca/QslDesignAndPrint+Installation+Instructions sez that QslDesignAndPrint uses Microsoft's .NET 3.5 Framework found at:
http://www.microsoft.com/downloads/
Ok, going to MS download site I found .Net 3.5 Service Pack 1 but find this:
Others who downloaded Microsoft .NET Framework 3.5 Service Pack 1 also downloaded:
1.. Microsoft .NET Framework 3.5
Question is, what do I download, 3.5 or 3.5 SP1?

TIA - Rene

[what do I download, 3.5 or 3.5 SP1?] go with the lesser without the service pack. No sense adding
minimum needed to run (QslDesignAndPrint). But if there are problems install the SP1. Not a big deal
as service packs are just an accumulation of all past updates rolled into one.

Craig

luckily he moved down to 300.

He's S1-2 now in Massachusetts.

He's been on for hours.

I made the log a few weeks back when he was testing antennas so possible from this area.

Since most of the updates are usually security updates it generally
makes more sense to take the latest version i.e the one with the
service pack. The problem generally is that if the unpatched version
resides on your computer it may leave you open to have you computer
compromised just by surfing the net. Especially since there are web
apps out there that will seize upon an unpatched version and allow
your computer to be taken over or worse.

Agreed 100%. Always keep your system as up-to-date as
possible. The Microsoft updates are a PITA at times because they
almost always require a re-boot, but if the computer is exposed to
the Internet, an unpatched system is open to anything a hacker can dream up.

I stand clarified (no pun intended). Personally my XP Pro machines, whether it be Microsoft Office
etc, I installe every SP. Then there is the poor gentleman who installs a service pack and his/her
machine is never the same. Mircosoft wouldn't be Microsoft? Use caution and good judgment whomever the
installer/updater.
Craig

8941. KP5 press release

Yahoo group: DX-IS (2009)
Date: 2009-01-26 15:38:26 UTC
From: Paul M Dunphy
Topic: 8941 Message: 8941

FOR IMMEDIATE RELEASE

We have reserved the special call sign K5D for our upcoming Desecheo operation. The operation will begin late in the day on Feb 12th.

QSO philosophy...because Desecheo is so very rare (#6 worldwide, #3 in Europe and # 2 in Asia) there are many, many hams worldwide that need KP5 for an all-time new one. Therefore, we are asking that you not contact the Dxpedition on any band/mode that you have confirmed from a previous DXpedition. This will allow the people who really need a new DXCC entity a better opportunity to get through the pileups.

Our objective is not to establish a world record for contacts...there will be no "greenies", no boxes to check, no competitions for most band/mode QSOs, no certificate or awards for contacting the Dxpedition more times than anyone else. So, if you have KP5 already confirmed on a particular band/mode, we respectfully ask that you exercise restraint. If, late in the DXpedition, we are calling CQ for contacts, we will welcome your call.

The team has encountered higher expenses than anticipated. These mainly involve the transportation and feeding of other personnel that will be traveling to the island with us. Approximately ten other personnel will share our campsite and facilities for the duration of the DXpedition. They will be on Island with us to provide security and carry out field research. Therefore, we ask that you consider a contribution to the DXpedition to help with these incremental expenses. Just go to <http://www.kp5.us/>www.kp5.us and click the button that reads" How you can Help".

We are all counting the days until we assemble in Puerto Rico on Feb 7th.

Bob Allphin- K4UEE
Glenn Johnson-W0GJ
K5D co-leaders

Subject: [DX-IS] PJ7/FS DXpedition Feb. 4-11

PJ7/FS DXpedition to the Caribbean

The "Buddies in the Caribbean" DX group which specializes in 100 watt or low power radios and the Buddipole portable antenna system is off again to a new DXpedition site Feb. 4-11.

This time the group will be operating at different times from BOTH the French and Dutch side of St. Bartholomey Island FS/PJ7. Various modes including phone, RTTY, and CW will be on the air, along with "golf cart mobile", or "bicycle mobile" operations and other unique operational situations. Each of the operators has extensive experience operating from "unique" locations or various DXCC entities.

In 2007, four of the eight operators on the 2009 DXpedition were part of the Montseratt VP2M Buddipole DXpedition.

The DXpedition headquarters will be at Villa Ait Na Greine on the French side of the island. The heaquarters (http://villaaitnagr eine.com) is perched on top of a cliff overlooking the Caribbean with excellent take off angles toward North America and Europe. There will be other sites on the island, both on the French and Dutch sides, where operations will occur giving DXers a chance to work two separate DXCC countries.

The group's goal will be to work stations from all over the world using Buddipole™ antennas and other newly-developed Buddipole™ antenna accessory products. The operation will be the week before the Orlando Hamfest and two weeks before the KP5 DXpedition. Operators will be using FS/homecall and PJ7/homecall and plans call for contacts to be uploaded to LoTW, eQSL, and an on-line log. Those wanting hard copy QSLs should send a S.A.E. and appropriate return postage or an SASE to the homecalls of the operator(s) you've worked.

The "Buddies in the Caribbean" blog page will be http://caribbeanbud dies.blogspot. com/

The group consists of the following operators:

K8EAB Weymouth Walker who's operated from Jamaica as well as motels, high rise apartment buildings, a pontoon boat, mountain tops, and even "picnic table" portable during his 52 year ham career.

KC4VG Mike Greenwood was a member of the BUM's Montersatt group in 2007 as VP2MVG and has been licensed more than 25 years. He also has operated from the Bahamas C6 and other Caribbean locales. Unique QTHs have included operations from Alcatraz Island in the USA, a cruise ship, and the Marconi station on Cape Cod. He specializes in low power SSB operations. Many DXers have run into Mike at the Buddipole booth at the Dayton Hamvention where he helps Chris and Budd out with sales.

N7UN Guy Hamblen has operated from such unusual locales as the Appalachian Trail and from the top of several of Colorado's 14,000 ft. peaks. Previously he was K7YYK, AA7QZ, and his current call of N7UN. He has 334 DXCC countries confirmed.

KB9AVO Paul Van Dyke was a member of the 2007 Buddipole Montseratt DXpedition and held the VP2MVO call. He is a frequent contester as part of the KP4US contest team in Abonito PR. He will be specializing in PSK, RTTY, and Slow Scan tv on FS/PJ7. He is also founding president of the Indiana-Michigan- Ohio Skywarn Association.

WW5L Tom Anderson is an avid DXer and has held the following DX calls since the 1980s: V31EF (Belize), G0/WW5L (UK), 7P8TA (Lesotho), and C91TL (Mozambique) . He is on the DXCC Honor Roll and has also operated from the Battleship Missouri, KH6BB, at Pearl Harbor HI. He was a K2BSA staff member and radio merit badge counselor at the 1997 National Boy Scout Jamboree and has been invited back as a K2BSA staff member for the 2010 Centennial National BSA Jamboree. He is also planning on operating as HB9/WW5L from the Kandersteg World Boy Scout Camp in Switzerland in July.

N0TU Steve Galcchutt is a long time CW operator on Straight Key Night and enjoys "mountain top operation" as he's operated from several of Colorado's 14,000 ft. peaks. QRP CW operations are his main interest. He will also be the group's resident videographer - you may have seen his videos on YouTube under the pen name "the Goat Guy."

W3FF Budd Drummond is one of the principals in Buddipole. His main interest lies in making portable, "bicycle mobile", "golf cart mobile", and "walking" HF contacts from whatever location he finds himself in. Budd was one of the members of the 2007 Buddipole Montseratt DXpedition. His web page is http://www.qsl. net/W3FF. In September 2004 Budd worked every continent using 50 watts on his "bicycle mobile" and has logged more than 5,000 QSOs as "walking mobile" station.

W6HFP Chris Drummond is the president of Buddipole and his main interest, naturally, is HF portable operating and "lightweight" DXpeditions to remote locations. An avid backpacker and outdoorsman, Chris works to design products that will live up to his demanding expectations for rugged and versatile equipment for HF operating in the field. He was also a member of the VP2V Montseratt DXpedition with callsign VP2MHFP.

About the antennas: the Buddipole antenna system is designed to be a lightweight and versatile way to put an efficient station on the air in minutes in almost any terrain. By utilizing an interchangeable series of custom-made components the user is able to configure dozens of antenna designs optimized for their particular operating needs. The group to St.

Martin expects to operate dipoles in various configurations, verticals, vertical beams, mini-yagis, and other antennas using only Buddipole parts. Several new products will make their debut including a lightweight rotor, super cap power supply, LifePo4 battery packs, folding capacity hats, and shockcorded masts.

8945. FW5RE spots

Yahoo group: DX-IS (2009)
Date: 2009-01-27 19:06:45 UTC
From: Alan Leith
Topic: 8945 Message: 8945

My won't-go-away-cold has me home from work early today and in scanning the cluster spots I saw several for FW5RE. Aside from wanting a QSO myself, I was dumbfounded by a spot from a KC3 who felt he needed to post, to the world, that he could not hear the FW5 in W. PA. A WA1 in Washington (bet that really confused the FW5) had posted that he was workable on the left coast, as did several other left coast stations, and a W0 added that he also could hear the FW5.

I am incredulous that the KC3 would waste valuable space posting that he DID NOT HEAR the station. Like that's important?

What's wrong with us, collectively, when we have to boast that we can't hear a particular station.

8958. 160M SSB Contest

Yahoo group: DX-IS (2009)
Date: 2009-01-29 18:01:45 UTC
From: RICHARD SOLOMON
Topic: 8958 Message: 8958

I see there is a 160 SSB Contest in February. I had a lot of fun in the CW contest last week, so guess I'll try this one.

I know there is no CW sub-band, but do the SSB guys operate anywhere during the contest or do they congregate in any special portion of the band.

You might have surmised that my 160 operating time has been limited (close to zero !!).

Thanks, Dick, W1KSZ

They go pretty much anywhere from 1.800 MHz to 1.900 MHz, Dick.

73, Paul VE1DX

8960. Re: [DX-IS] 160M SSB Contest

Yahoo group: DX-IS (2009)
Date: 2009-01-29 18:33:53 UTC
From: Peg Haese KB9LIE
Topic: 8958 Message: 8960

Also it depends on where your antenna is resonant, I don't remember going much above 1900 for contests. When calling CQ, I try to stay away from the lower end so the CW guys don't get too defensive. If I find someone calling CQ down there, that's different.

I am trying to work DX stations of course and also finish my WAS on 160. Need to find a Wyoming for my last state to work, plus confirm Delaware and Hawaii. I worked a Hawaii several months ago but have not got a card back yet. Also worked a Delaware several years ago. That fellow did not keep his contest logs back very far.

Did get Maine in the CW contest and it's on LOTW already, so down to the three.

73 de Peg KB9LIE in far SW Wisconsin USA
FP/KB9LIE in July from beautiful Miquelon for the IARU contest

To all radio amateurs

SB DX ARL ARLD004
ARLD004 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AGALEGA AND ST. BRANDON ISLANDS, 3B6. Rashid, 3B8FQ is QRV as 3B7FQ from St. Brandon Island, IOTA AF-015, until February 12. He is here doing maintenance on the meteorological station, so he is active as time permits. Activity is on all bands, but mostly on 30, 20 and 17 meters using CW and SSB. QSL via K5XK.

TANZANIA, 5H. Sigi, DL7DF will be QRV as 5H1DF from Zanzibar Island, IOTA AF-032, from February 3 to 12 while on holiday. Activity will be on 160 to 10 meters using CW, SSB, RTTY and SSTV. QSL to home call.

MALAWI, 7Q. Harry, 7Q7HB is here for the next two months. Activity is on all bands using mostly CW, RTTY and PSK but will also use some SSB. QSL direct via G0IAS.

AZORES, CU. Operators CU8AS, HB9CQL and HB9CRV are QRV as CU5T from Sao Jorge Island, IOTA EU-137, until January 2. QSL via CT1GFK.

REUNION ISLAND, FR. Gerhard, OE3GEA will be QRV as FR/OE3GEA from February 1 to 13. Activity will be on all bands using only CW. QSL to home call.

SCOTLAND, GM. Members from the Kilmarnock and Loudoun ARC are QRV as GB250RB until December 31, 2009 in celebration of the 250th birthday of Scottish poet Robert Burns. QSL via operators' instructions.

THAILAND, HS. Joerg, DL1MJF is QRV as HS0ZGQ until February 12. Activity is on 40 to 10 meters using CW and SSB. He may try to be

active as HS0ZGQ/2 for one week from Koh Samui Island, IOTA AS-101. QSL to home call.

DJIBOUTI, J2. Elvira, IV3FSG is QRV as J20SE until February 12. She is active using SSB and RTTY mostly on 20 meters. QSL via IK3GES.

SAINT MARTIN, FS. Members of the Buddies of the Caribbean will be QRV as FS/homecalls from February 4 to 11. Activity will be on 160 to 10 meters using CW, SSB and RTTY. QSL direct to home calls.

ST. MAARTEN, SABA, ST. EUSTATIUS, PJ5. In addition to their Saint Martin DXpedition, members of the Buddies of the Caribbean will also be QRV as PJ7/homecalls from St. Maarten during February 4 to 11. Activity will be on 160 to 10 meters using CW, SSB and RTTY. QSL direct to home calls.

BELIZE, V3. Johnny, LA5IIA will be QRV as V31IA from February 2 to 6. Activity is most likely during his morning and evenings on 80 to 30 meters using CW and 20 meters using CW and RTTY. QSL via LA4YW.

MICRONESIA, V6. Yuki, JH1NBN, is QRV as V63AQ from the islands of Pohnpei, IOTA OC-010, Kosrae, IOTA OC-059 and Chuuk, IOTA OC-011, until February 7 while on a business trip. QSL to home call.

ANTARCTICA. Bob, VK0BP is currently working at Antarctic Davis Base Station, IOTA AN-016, until November 1. Activity is on the HF bands during his spare time. He is generally active on 20 meters from 1500 to 1800z using SSB and PSK31. He may also be active using other modes as well. QSL via VK2CA.

FALKLAND ISLANDS, VP8. Ghis, ON5NT is QRV as VP8/ON5NT until February 7. QSL to home call.

SOUTH GEORGIA ISLANDS, VP8. Lars, MM0DWF is currently on work assignment on South Georgia Island, IOTA AN-007, and will try to be active as VP8DIF in his spare time. Activity will be on the HF bands and he may try to use RTTY as well. QSL via DJ9ZB.

BERMUDA, VP9. In celebration of the 400th anniversary of the settlement of Bermuda by Sir George Somers, members of the Radio Society of Bermuda will be QRV as VP9400/xx. The xx suffix is the operator's callsign suffix. QSL via operators' instructions.

BURKINA FASO, XT. Michael, F1IQH is QRV as XT2WC from BoboDioulasso for two weeks. Activity is mainly on 20 meters, but also on other bands as propagation permits. QSL to home call.

PRINCE EDWARD AND MARION ISLANDS, ZS8. Petrus, ZS8T has been intermittently active on 20 meters from Marion Island, IOTA AF-021. He is here until March 31. QSL via LZ3HI.

THIS WEEKEND ON THE RADIO. The NCCC Sprint, WAB Top Band Phone Contest, QRP Winter Fireside SSB Sprint, EPC World Wide DX BPSK125 Contest, Black Sea Cup International 2009 and the ARS Spartan CW Sprint are all on tap for this weekend. Please see January QST, page 82, February QST, page 82 and the ARRL and WA7BNM contest web sites for details.

31 January 2009 A.R.I. DX Bulletin
No 926
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B7 - License in-hand, Rachid (3B8FQ) expects to be active as 3B7FQ from St. Brandon Island (AF-015) from 30 January until 12 February. This will primarily be a working trip for maintenance on the meteorological station on St. Brandon, with on-air operations as time allows. Rachid expects the 30, 20 and 17 metre bands to be the most productive, but will try all bands (80-10m), SSB and CW. He will be using 100 watts and a G5RV. QSL via K5XK. [TNX K5XK]
5H - Sigi, DL7DF will be active as 5H1DF from Zanzibar Island (AF-032), Tanzania on 3-13 February. It will be a holiday trip, but he plans to operate "as often as possibile" on 160-10 metres CW, SSB, RTTY and SSTV. QSL via home call, direct or bureau. Further information can be found at http://www.dl7df.com/5h/index.html
9A - Special event station 9A48IFATCA will be active until 31 December to celebrate the 48th annual conference (Cavtat, 20-24 April) of the International Federation of Air Traffic Controllers' Associations, the worldwide organisation representing more than fifty thousand Air Traffic Controllers in 130 countries. QSL via 9A4WW. [TNX 9A4WW]
9M6 - John, 9M6XRO, and Steve, 9M6DXX, will be active from Sabah (OC-088) between 7 and 10 February. 9M6XRO will operate on 10-160 metres mainly CW from 7 to 10 February, concentrating on 80 and 160m CW; 9M6DXX will operate on 10-80 metres SSB only on 7 and 8 February, concentrating on 40 and 80m. They will use one station with full legal power (400W) to a Butternut HF6V vertical very close to the ocean on 10-80m, and a 17m-high inverted-L on 160m, again within a few metres of the ocean. Sunset in 9M6 is at 10.27 UTC, sunrise is at 22.33 UTC. QSL both 9M6XRO and 9M6DXX via M0URX. [TNX 9M6DXX]
CU - The Union of Radioamateurs of the Azores will operate as CU3URA from Contendas Lighthouse on 31 January and 1 February. Expect activity of all bands SSB, CW and digital modes. [TNX CT1END]
FR - Gerhard, OE3GEA will operate CW only as as FR/OE3GEA from Reunion Island (AF-016) on 1-13 February. QSL via home call, direct or

bureau. [TNX www.rsgbiota.org]
FT - Gildas, TU5KG has left for another fishing campaign in the
Southern Indian Ocean. His new callsigns are FT5WP (Crozet) and
FT5XS (Kerguelen). He will be sailing in the areas of Crozet
(until about 7 March) and Kerguelen (between about 10 March and 15
April), but it is not clear if he will be able to land and operate
from the islands, or if his activities will be limited to /MM
operations. QSL via F4EFI, direct or bureau. [TNX F4EFI]
G - Tim, G4STH and his wife Hazel, G4YLO will be active as GB5OBH from
3 February until 3 March. The special callsigns commemorates the
50th anniversary of the death of the singer Buddy Holly. QSL via
G4STH, direct or bureau. [TNX G4STH]
KC4 - KC4USV from McMurdo Station on Ross Island (AN-011), Antarctica
will be QRV for Europe on 31 January and 1 February from 17 to 18
UTC on 14243 kHz. QSL via K1IED. [TNX VA3RJ]
P2 - Jerry, P29ZAD expects to be active in his spare time from Buka
Island (OC-135) on 7-26 February. QSL via NI5DX, direct or bureau.
[TNX www.rsgbiota.org]
PJ6 - Chris/W6HFP, Steve/N0TU and Guy/N7UN, all part of the 4-11
February DXpedition to Saint Martin and Sint Maarten [425DXN 925],
will take a side trip to Saba Island (PJ6, NA-145) on 6-7
February. The "Buddies in the Caribbean" DX group has a blog page
at http://caribbeanbuddies.blogspot.com [TNX The Daily DX]
V3 - Johnny, LA5IIA (NQ2G) will be active holiday style as V31IA from
Placencia, Belize on 2-6 February. Expect him to operate CW on
80-30 metres and RTTY on 20 metres. QSL via LA4YW. [TNX The Daily
DX]
ZL7 - A team of nine operators from New Zealand (namely John/ZL1ALZ,
John/ZL1BYZ, Mike/ZL2CC, Lee/ZL2LE, Phil/ZL2RVW, Wayne/ZL2WG,
Mark/ZL3AB and team leaders Lee/ZL2AL and Morrie/ZL2AAA) will be
active as ZL7T from Kaiangaroa, Chatham Islands (OC-038) on 6-11
March. They will have four stations with amplifiers and be active
on 160-10 metres CW, SSB, RTTY and PSK. Their pilot will be
Duncan, ZL3JT (zl3jt@...). Further information can be
found at http://www.zl7t.com; a logsearch will be available after
the team returns home. QSL via ZL2AL, direct or bureau. Logs will
be uploaded to LoTW by September. [TNX ZL2AL]

Direttore Responsabile I2VGW

DESECHEO 2009 ---> K5D is the callsign reserved for the upcoming operation
from Desecheo Island, which is due to begin late in the day on 12 February
[425DXN 923].
In their latest press release, dated 26 January, the team asks "that you
not contact the DXpedition on any band/mode that you have confirmed from a
previous DXpedition", in order to "allow the people who really need a new

DXCC entity a better opportunity to get through the pileups". K5D will neither try "to establish a world record for contacts" nor encourage "competitions for most band/mode QSOs", so "if you have KP5 already confirmed on a particular band/mode, we respectfully ask that you exercise restraint".
The team has encountered higher expenses than anticipated. These mainly involve the transportation and feeding of other personnel (about ten people) that will be on the island with K5D to provide security and carry out field research. Please consider a contribution to the DXpedition to help with these incremental expenses - just go to http://www.kp5.us/ and click "How you can Help". [TNX K4UEE]

FW5RE ---> The Hungarin team on Wallis Island became active as FW5RE around 5 UTC on 27 January. They have a websiste at http://ha0du.com, where it is possibile to find updates and latest information. QSL via HA8IB.

LOGS ---> The log search for ZS8T (http://zs8t.net/online-logsearch/) now includes the QSOs Petrus logged through 25 January.

MIDWAY ATOLL ---> The U.S. Fish & Wildlife Service has announced that they would once again allow amateur radio operators an opportunity to operate from Midway Atoll "on a trial basis". To ensure the safety of the wildlife on the Refuge, the USFWS said that Amateur Radio operations will be permitted for two weeks only, from 5 to 19 October 2009. Read the full story on http://www.arrl.org/news/stories/2009/01/27/10596/?nc=1

QSL ZA1KP ---> Please note that Alfredo, IK7JWX is not the QSL manager for ZA1KP. QSL direct only to Miftar Fana, Klub Partizani, P.O. Box 1439, Tirana, Albania. [TNX IK7JWX]

+ SILENT KEYS + Hartmut "Hal" Weber (DJ7ST), the founder of the QRP Contest Community (www.qrpcc.de), passed away on 9th January. Other recently reported Silent Keys include: Solofo Randrenjason (5R8ET), John A. Crux (G3JAG), Bob Okas (W3CD), Gary N. Gompf (W7FG), Mohammad Balbisi (JY4MB), Stan Zway (ZS6SDZ) and Joseph J. Brohman (W2PUX), who passed away on 11 January at the age of 100.

QSLs received direct or through managers: 1A4A, 3B8/SP2JMB, 3B8CF, 3D2JU, 3DA0OK, 3DA0VB, 3X5A, 4J4K, 4S7NE, 4U1UN, 4W6AAB, 5H3VMB, 5N/IZ5CMB, 5N/LZ1QK, 5R8VB, 5X1GS, 5X1VB, 6V7M, 6W/DL4JS, 6Y1V, 7P8BA, 7Q7HB, 7Q7VB, 7U5CI, 7X5VRK, 8Q7IU, 9G5ZZ, 9H1SP, 9H1XT, 9J2VB, 9L1X (AF-056), 9M2AX, 9M6/N2BB, 9U0VB, 9V1F1, 9X0VB, A25VB, A5100A, A92GR, AH0V, AP2DKH, AT2RS (AS-199), BD1DRJ/4 (AS-135), BU2AI, BY1TX/3, C57R, C6AAQ, C6AMS (NA-080), C6APR (NA-113), C6ATA, C91VB, C91VB/4, C91XO, C98RF, CK7IG/1 (NA-010), CP6AA, CW2C, D20VB, D4C, D60VB, D9D (AS-045), DV1JM, E27EK, E51NOU, E51QQQ, EA9/SP2JMB, EA9IB, EK3SA, EL2DX, EP3PK, ER4DX, ER4ER, ES5GB, ET3AA, EY8MM, EZ21BO, EZ8BO, EZ8CQ, FJ/OH2AM, FJ/WJ2O, FM5CD, FO/DJ7RJ, FO/JJ2NYT, FO5RH, FS5KA, GB4HI (EU-124), GM3VLB/P (EU-123), H44MY, HC1HC, HC1JQ, HC2FN, HF0POL (AN-010), HK3JJH/HK0B (NA-133), HQ3Z, HQ7R, HS0ZEE, J20VB, J28JA, J3/DL7CM, J37T, J39BS, J49XB, J6/W0SA, J68V, J79WI, JD1BLY, JD1BMM, JT1BV, JT1KAI, JX9JKA, K5S (NA-082), K7A, KC4AAA, KH0AB, KH0ABT, KH6/JA6REX, KH6LC, KH6MA, KP2M, MD0CCE, MD4K, MS0DGR (EU-123), N3MK (NA-139), OA4BHY/2

Propagation Forecast Bulletin 5 ARLP005
>From Tad Cook, K7RA
Seattle, WA January 30, 2009
To all radio amateurs

SB PROP ARL ARLP005
ARLP005 Propagation de K7RA

In last week's Propagation Forecast Bulletin ARLP004, we did not have the solar flux values resolved down to a tenth of a point like we always do. Really, resolving the solar flux down to that resolution is probably not very useful, but for those who use the WA4TTK solar plotting program to suck up the data and who are compulsive enough, here are the values for January 15-21, so you can correct your data: 71.1, 70.8, 71.9, 71.1, 70.8, 70.4, 69.4, with the mean value at 70.8.

On Tuesday, January 27 we saw another one of those "almost-a-sunspot" emerge in the Sun's low latitude, so it was probably an old Cycle 23 spot. The next day it was gone.

Geomagnetic conditions continue to be very quiet, although a bit unsettled on January 26. The forecast is for more of the same. Planetary A index should stay around five, and solar flux around 70.

Geophysical Institute Prague predicts unsettled conditions for January 30, quiet to unsettled January 31, and quiet February 1-5.

This week we received one report about last weekend's CQ WW 160 Meter CW contest. Rod Swiderski, NU2M of Watermill, New York, reported that band conditions were outstanding. He writes, "I worked 13 countries, 47 states, my first Alaskan station KL7RA (on 160) and 320 contacts. All with a mere 100 watts and a 160 dipole at 35 feet. I find it simply amazing how that band only appears 'open' during a contest."

Floyd Chowning, K5LA of El Paso, Texas wrote about excellent conditions on 6 meters on Sunday, January 25. He had just put up a new 5-element antenna, and said, "This morning I was running JT6M contacts with K7JIZ (DN40) and W6OUU (DN22) around 1541 UTC and signals were strong and steady. It must be sporadic-E skip. From then on the band opened up to California, Arizona, New Mexico,

Texas, Louisiana, Missouri, Florida and Iowa. Also, I heard a KP4 in Puerto Rico this morning but missed his call. This afternoon I worked several stations in Mexico in EK09, DK89 and DL90 beginning around 2040 UTC. I also worked TI7/N5NEK (EK70), TI8II (EJ01) and YN2N (EK71). I worked all the stations on USB. What a day for DX on 6 Meters. I also heard HP1AC on CW but did not work him. I heard stations as close as Albuquerque, Phoenix, and Odessa, Texas, less than 300 hundred miles. I had my radio on 144.2 MHz but nothing broke my squelch."

Floyd mentioned JT6M, which is a tool for running meteor scatter communications. For more about JT6M, see http://www.jt6m.org/.

This week I received a copy of a remarkable old letter, sent by Jim Mast, W8HOM, of Fort Wayne, Indiana. It was written on the last day of 1975 by Ed Tilton, W1HDQ, the ham who originated the ARRL Propagation Bulletin and wrote it until 1991. This letter was addressed to Jim back when his call was K9UNM. The letter talks about 10 meter propagation via meteor scatter and the recent 1975 ARRL 10 Meter contest. It mentions W4IWZ, the call sign that belonged to Francis Harper, of Nokesville, Virginia. The letter was typed on an old manual typewriter.

Here is what the letter said.

Dear Jim:

We certainly have heard of 10-meter meteor propagation. The date of the contest was chosen with the Geminids shower in mind. This best of the winter showers has been a factor in the contest results for all three runnings of the affair in "modern" times.

I think the 1975 contest may have hit the shower at the most opportune time, as the effects seemed very apparent almost continually during the whole weekend. The Geminids show more night-time activity than any other shower, but there seemed to be a considerable amount of meteor burst propagation right through the whole period this year. There is always a tendency to have E propagation in mid-December, and this was also a factor in the date selection. I hope that the propaganda some people have generated for a change of season does not prevail. To my mind, this is an excellent choice.

For some reason I didn't get to work W4IWZ in this contest. He and I used to be in touch almost daily, when I was at home every day, in 1973 and early 1974. I guess we've worked by means of about every form of propagation there is, at one time or another, and have seen the effects of several meteor showers. At slightly over 300 miles, he is at a very interesting distance from me. We have found that we always have a basic tropo-scatter signal, and can recognize each other on CW at almost any time. He has at least a 10-dB advantage in power, but somehow he manages to hear me every time I call him.

Needless to say, I read him better than he reads me, with my 40 watts output, maximum, we have had many good QSOs, by back-scatter and short sporadic-E skip. His signal is mildly affected by tropospheric bending, too, though I'm sure we'd get more of that on higher frequencies. We see every kind of ionospheric effect on this path, at one time or another, and have had many backscatter QSOs, from many different directions.

Meteor ionization, being an E-region phenomenon, is very common on 28 MHz. The only reason why I can account for the unawareness of it on the part of many 10-meter buffs is that most of them tend to disregard weak signals, or they expect the band to be dead for 3 or 4 years out of every 10. You can hear meteor bursts any morning, 365 mornings per year, on 10. Keep morning skeds for a while, with people at distances where the direct signal is weak, and you'll hear them much better than on 144 or even 50 MHz. During major showers they even give the impression that that band is 'open'-- which it always is, anyway. Ask Harper - he'll tell you that!

vy 73
Ed Tilton, W1HDQ

I thought this letter was so interesting and timely, considering recent discussions about meteor scatter propagation on HF, that it should run here in its entirety. Thanks, Jim, for hanging on to it for 33 years, and sharing it with us.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for January 22 through 28 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 69, 70, 68.8, 69.8, 69.9, 69.7, and 69.5 with a mean of 69.5. Estimated planetary A indices were 1, 1, 1, 1, 10, 4 and 2 with a mean of 2.9. Estimated mid-latitude A indices were 0, 1, 1, 1, 9, 2 and 1 with a mean of 2.1.

Topic: 8967 Message: 8967

the pile-up busting technique, that is:

10103.0 A61Q 31-Jan-2009 2046Z listen for me A6 <K2HVN>

Don't forget, folks, when you are rare DX or on an expedition -
stop working the callers, log into a DX cluster, and watch for
people asking you to listen up for Generals, go to 160, why no
RTTY, or can't hear in Podunk.

I was turning the big knob in the middle of the radio yesterday
and heard FW5RE calling CQ on 14005. Nobody was calling, so after
he'd CQed a few times I gave a shout and worked him simplex. Nobody
else called for a few mins, then a W5 called and worked him, then no
other callers for a minute or so. None of us spotted him on the
cluster. It was just like the Olde Dayes.

I must be getting old...

Worked a few stations in the EPC contest using PSK125 (neat mode
. . . fast compared to PSK31.) Anyhow, as far as DXCC is concerned,
are they equivalent to RTTY QSOs?

That's some fairly good DX, Gary. These new digital modes (I guess PSK31 isn't really very new) do have some advantages. There are times when they pull signals out of the noise that simply shouldn't be there.

WSJT (never used it or even seen it in use) reportedly can haul 50-MHz and VHF/UHF signals out of the noise that cannot be detected by ear. I gather the 6M and EME types are making QSOs with it that they never could have done with CW/SSB/RTTY.

I still like the traditional three (CW/SSB/RTTY), but these newer digital modes do offer advantages in a time of poor propagation and marginal conditions. I worked a ZL on PSK125 yesterday and they are rare right now from Nova Scotia.

At the top of the cycle they were all over the place, but with the flux stuck at 69-70, we may all be operating PSK31, etc.

73, Paul VE1DX

8974. W7A ???

Yahoo group: DX-IS (2009)
Date: 2009-02-01 20:44:02 UTC
From: Alan Leith
Topic: 8974 Message: 8974

I've heard W7A several times today and just worked whoever it is. I can't find anything on the net that tells me why this call is being used and I don't recall reading anything about it recently. Anyone know who/what/where/why?

For any US 1x1 call, one can consult the 1x1 call sign database at
<http://www.ncvec.org/1x1.php>

For W7A we find: Football Superbowl Fun Activity Event, 28 Jan 09 to 02
Feb 09

73,

Thanks, Mike and Don. I'm afraid I'm not a fan of the Stupid Bowl (I'm not a fan of Canadian football either). However, thanks for that URL. I shall consult it in the future.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th/January, through Sunday, 1st/February there were 221 countries active. Countries available: 3A, 3B6, 3B8, 3DA, 3V, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JX, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TN, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2V, VP5, VP6, VP8, VP8/g, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B7, ST. BRANDON ISLAND (Update). Ron, K5XK, updates OPDX that Rachid, 3B8FQ, has license in-hand, and expects to activate St. Brandon Island (AF-015) for almost two weeks between Friday, January 30th and Thursday, February 12th. The callsign will be 3B7FQ. This will primarily be a working trip for maintenance on the meteorological station on St. Brandon, with on-air operations as time allows. Rachid expects that the 30/20/17

meter bands to be the most productive but will try all bands, 80-10 meters. Rachid will use CW and SSB. On CW, look for Rachid near the bottom of the band, "on the 8's" such as 10108, 14008, and 18078 kHz. He will be using only 100 watts and a G5RV antenna. He also plans to be active later in the year as 3B9FQ (from Rodriguez Island) while on holiday in July. QSL 3B7FQ, 3B8FQ, 3B6FQ and 3B9FQ via K5XK per instructions on QRZ.com.

5H, TANZANIA (IOTA Op). Just a reminder that Sigi/DL7DF and his XYL Sabine will be on holiday in Zanzibar (AF-032), February 3-13th. Look for Sigi to sign 5H1DF and be active on 160-10 meters using CW, SSB, RTTY and SSTV as often as possible. His equipment consists of a trans-ceiver, a linear TY900, a 18m Lowband Vertical, a Vertical R7, as well as a laptop computer. QSL via DL7DF, by the German QSL Bureau (DARC) or direct to: Sigi Presch, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. For updates and more details, visit: http://www.dl7df.com/5h/index.html

ANTARCTIC ACTIVITY WEEK NEWS.....
PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

Just a reminder that the Worldwide Antarctic Program's (WAP) 6th Antarctic Activity Week (AAW) will take place between 0000z, February 16th and 2400z, February 22nd. For details, see: http://www.waponline.it This year's WAP AAW event is in collaboration with Italian Air Force, the National Antarctic Museum (MNA-Genova) and the Italian Ham Radio Association: ARI Mondovi, ARI-Genova and ARI Massa-Carrara. The AAW is an unique world-wide event where Hams are "celebrating and working to improve Worldwide interest around the Antarctic Continent and its related matters, to understand and share what the Nations and Organizations are doing to study and protect this still non contaminated corner of the world and share from there, a message of peace." Gianni, I1HYW, states (edited), "A number of operators (see list below) will be activating radio stations from at least 13 countries world-wide. The aim of AAW (also next March 1st, will see the end of the International Polar Year), is precisely that of gathering international scientific activities and the Ham's AAW, with particular reference to logistic and weather-related aspects, developed jointly with the major world-wide scientific organ-izations and international scientific community in a climate of mutual practical data sharing, with respect of the economic forces and logistic elements vital to the continuation of scientific research in a corner of the world which harbors the very secret of our existence."
The AAW is celebrated every year during the last week of February, and it also coincides with Argentine's celebration of their Antarctica Day (see http://www.marambio.aq) on February 22nd. As of print time, the following stations are expected to be active during the AAW event:
WAP-002 IR1ANT via I1HYW WAP-128 DA0ANT via DC2SF

WAP-126 OE3AGA/AAW via OE3AGA

For an updated list, please visit the WAP Web page at:
http://www.waponline.it/Default.aspx?tabid=113

* Phil, K6EID, from Marietta, Georgia, informs OPDX that he will be signing K4A for the AAW. He wants to remind everyone that in the past many of the AAW operators append "/ANT" to their callsign for AAW. He has refused to do that because Russian hams have used "/ANT" while they were in Antarctica, and he doesn't want to mislead anyone. It is possible that many of the newbie hams can be fooled by this, thinking they are working Antarctica. So, please remember that during the AAW there will be a lots of stations with zany callsigns operating, and some will inevitably append "/ANT." They are not in the Antarctica, they are in the home country indicated by the prefix. There are no current Antarctic stations signing "/ANT". Most of these special event station callsigns will issue a special QSL, but they are not the Antarctica!

C2, NAURU. Dani, EA4ATI, who is now active as 9M2TI from Malaysia, informs OPDX that he is preparing for a DXpedition (with a team of operators) to activate Nauru in the Pacific sometime in May. The callsign will be C21TI. Travelling through Australia to get to Nauru, tentative dates will be either from May 3-17th (after the cyclone season) or May 16-30th. Dani states, "I am preparing the logistics with a friend from Nauru that I met in Malaysia during a ITU workshop last November, but we will probably stay in the Od'N Aiwo Hotel." This is the same location that previous DXpeditions to Nauru have used (such as C21BH, C21SX, C21XF, etc). The composition of the team is not finished yet, but Dani is looking for CW, SSB and RTTY operators. Ruben, C21RK, was mentioned as part of the team. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:
CW - 1825.5, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.5, 3799, 5371.5, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
6m - 50.115 MHz (CW/SSB)

They currently have two transceivers with HF amplifiers and will use a yagi beam antenna for 20/15/10 meters and several dipole antennas (ed. they are looking for additional antennas). Dani mentions that they will have a satphone for data connection. QSL will be via EA4ATI. A Web page has been created for the DXpedition (still not finished) at: http://c21ti.madrono.net/index.php?newlang=3Denglish
A study of propagation with a proposed band plan for the DXpedition will be posted on their Web page. This study will be done by the Technical University of Malaysia. They have not yet estimated a QSO target, but it will not be less than 20,000. The estimated budget for their DXpedition is 14,500 USDs and the team is looking for funding as well as more operators. If interested in helping, see details on the Web page. ADDED NOTE: You may know Dani, EA4ATI/9M2TI, from the following operations: XT2ATI, XT2TI, HP2PL, Z39A, 6W1EA, 6W1/EA4ATI, HP1/EA4ATI, HI5/EA4ATI, HI3CCP, HI3C, 3XY9B, etc.....

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ) and Kevin/K4PG (C6APG) will once again be active between February 18-22nd. Look for them to be active on 30/17/12 meter bands between antenna jobs. Bob and Kevin currently plan on operating 160 meters and either 40 or 80 meters in the ARRL DX CW Contest (February 21-22nd). Kevin states, "There is no third person with us this year. Not too late! Please look for us; we need the work! Thanks." QSL to their home callsigns, direct or by the Bureau.

C6, BAHAMAS. Operators Mark/NA6M, Renee/N5RNA, Craig/W5TSN, Scott/K2CK and Pete/K9OWQ will be active as C6AMS from New Providence (Nassau, NA-001, WLOTA LH-1115), June 1-14th. Activity will be on 160-10 meters using CW, SSB and digital modes. QSL via NA6M, direct only. Updates and more information can be found at: http://www.c6ams.com

EA8, CANARY ISLANDS. Simon, M0VKY, will be active as EA8/homecall from Lanzarote Island (AF-004, DIE S-007, WLOTA LH-0099) between March 31st and April 5th. Activity will be on 40/20/15 meters using a FT-857D and 1/2 wave dipoles. QSL via his home callsign, direct or by the bureau.

ES, ESTONIA. Operators Juri/ES5GP, Toomas/ES5RY and Vilnis/YL2KF will be active as ES5Q during the CQWW WPX RTTY Contest (February 14-15th) as a Multi-Single entry. QSL via ES5RY.

FP, ST. PIERRE AND MIQUELON (NA-032). Operators Paul/K9OT and Peg/KB9LIE plan on operating from Miquelon Island as FP/homecalls, July 10-18th. They will also participate in the IARU HF World Championship Contest (July 12-13th). Activity outside of the contest will be on 160-6 meters using CW and SSB. Paul/K9OT prefers CW on 30 meters and down, while Peg/KB9LIE likes SSB, especially on 17, 20 and 40 meters. Location will be Room 5 at Motel de Miquelon (formerly Maxotel). QSL direct with return postage; bureau and LoTW okay. No eQSL. Their Web site is at: http://hamradio.pnpfarms.com

FT5W, CROZET ISLAND (Update). Reports indicate that Florentin, F4DYW, was heard as FT5WO this past Sunday, on 14222 kHz between 1445-1640z. Signal reports were very weak. Remember, he will stay there until the

end of November 2009, and will return back home in early 2010. QSL via F4DYW, direct or by the bureau after he returns back home. Look for updates on: http://f4dyw.free.fr/index.php?langue=fr&contenu=ft5wo.html

FT5W & FT5X, CROZET AND KERGUELEN ISLANDS. Gildas, TU5KG, is once again sailing in the Southern Indian Ocean on a fishing boat. As he sails around the Crozet region between now and March 7th, there is a possibility that he may land on Crozet and operate as FT5WP. Also, beware that Gildas is expected to sail around the Kerguelen region between March 10th and April 15th. Again, he may be active from Port aux Francais possibly on March 7th. A stop on Kerguelen at the beginning of March is necessary before the return trip. PLEASE pay attention to his callsign. He may be signing as maritime mobile "/mm". QSL via F4EFI, by the REF Bureau 29 or direct.

FW, WALLIS & FUTUNA ISLANDS (Update). Eli, HA9RE, and a team of operators are now active from Wallis Island as FW5RE until about the end of February. Activity will be on 160-10 meters, including 30/17/12 meters, using CW, SSB and RTTY. Two stations will be on the air. The group has been very active on the lower bands. QSL Manager is HA8IB. A Web page is up and running now with updates, pictures and a log search at: http://www.ha0du.com/index.php

GD8/GT4/GT6, ISLE OF MAN. Members of Barry Amateur Radio Society (BARS) from South Wales will be going on a expedition to the Isle of Man from Saturday, March 28th to Saturday, April 4th. The team will consist of Glyn/GW0ANA, Curtis/MW0USK, Franz/DJ9ZB, Jan/DJ8NK, Thomas/DJ6OI, Alois/ DL8RBL and Yasu (a JA DX operator), Lois/MW3LOI (YL) and their wives & partners. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK. The 6 meter band will be monitored for openings. The callsign to be used during the CQ WPX SSB Contest (March 28-29th) will be GD8K. The callsign OUTSIDE of contest will be GT4BRS (Please note the GT prefix is special callsign for the Isle of Man. GW0ANA states, "Remember TT Races on IOM".) The callsign for the DATA Modes (RTTY, PSK31) will be GT6BRS. All QSL cards are via the QSL Manager GW0ANA, by the Bureau or direct. For direct cards only use one IRC or 2 USDs.

H40, TEMOTU PROVINCE. Operators Siegfried/DK9FN, Bernhard/DL2GAC/H44MS and Herrmann/DL2NUD will be active (possibly as H40FN, H40MS and H40??) between March 2-16th. Activity will be on 160-10 meters and 2m EME. Look for Siegfried/DK9FN to operate only CW, Bernhard/DL2GAC on SSB and Herrmann/DL2NUD on 2m EME. QSL Manager for H40FN is via HA8FW (Siegfried states that all QSOs will be confirmed automatically via the MRASZ QSL Bureau by QSL card when he returns home). QSL the other callsigns via their home callsign. For more info, pictures of DK9FN's last operation from Temotu and possibly updates, visit DK9FN's Web page at: http://hari-ham.com/h40fn

H81, PANAMA (Lighthouse Activity). Members of the Radio Club of Panama (HP1RCP) and Panama Canal Amateur Radio Association (PCARA) will be activating Miraflores Lock's Lighthouse (PAN-030) in the Panama Canal using the special callsign H81L between February 14-15th. Activity will

be on all bands and modes. QSL via HP1RCP. Visit the following Web page to see a picture of the lighthouse at:
http://www.geocities.com/canallights2000/miraflorespics.html

HC, ECUADOR. Dr. Rick, NE8Z, tells OPDX that he will once again be heading south to Ecuador and plans to be active with the following callsigns from various locations as follows:
HC1MD/HC4 - February 20-27th; QTHs: Same & Tonsupa, Esmeraldas Province (Pacific beach homes)
HC1MD - February 28th-March 8th; QTH: Tumbaco, Pichincha Province
Activity will be on 160-10 meters using CW and SSB. QSL via K8LJG: John Kroll, 3528 Craig Drive, Flint, MI 48506 USA. Rick suggests to view the the HC/Ecuador and HC8/Galapagos DX-Diplomas on the following Web page at: http://webpages.charter.net/ne8z

HI, DOMINICAN REPUBLIC. Operators Edwin/HI3K, Tino/HI3CCP and Andy/VE9DX will be active in the ARRL DX SSB Contest as HI3K (March 7-8th) from Lomas del Toro in Santiago (Lomadeltoro Contest Team's HI3CCP station):
http://www.lomadeltoro.com

IOTA NEWS.....
AF-019. (REAL EARLY ANNOUNCEMENT) Operator Luigi, IK8HCG, will be active as IG9R from Lampedusa Island, African Italy, during the next CQWW DX SSB Contest (October 24-25th). QSL via IK8HCG.

AS-115. Rene, DL2JRM, will be active as TA0/DL2JRM/p from Kekova Island, Turkey, February 23-25th. Activity will be on 40-10 meters CW. QSL via his home callsign, direct or by the bureau.

EU-029. Ben, DO1BEN, will be active as OZ/homecall from Lolland Island (DIA SJ-015), April 9-17th. Activity will be on all HF bands using SSB and sometimes digital modes. Location is 5 meters from the Baltic Sea. QSL via his home callsign, by the bureau or direct.

EU-146. Rene, DL2JRM, will be active as PA/DL2JRM/p from Schouwen Duiveland, February 14-15th. Activity will be on 80-10 meters CW. QSL via his home callsign, direct or by the bureau.

NA-102. Iiario, IV3CGJ, will be active as FB/IV3CGJ/p from Marie Galante Island (DIFO FG-008, WLOTA LH-4241), Guadeloupe, February 13-24th. Activity will be holiday-style on 80-10 meters. QSL via his home callsign, direct or by the bureau.

J7, DOMINICA. John, K3TEJ, will active from here between February 11-27th. Activity will be on CW and RTTY with a focus on 160/30/17/12 meters. He will also be in the CQWW WPX RTTY Contest (February 14-15th) and the ARRL DX CW Contest (February 21-22nd) as Single-Op/All-Band entries signing J7N for both contests. QSL via K3TEJ.

JD1/M, MINAMI TORISHIMA (OC-073). Operators Masa/JA6GXK (JD1BMM) and Kingo/JK1PCN (JD1BND) are now active until February 9th. Activity will

be limited because they are on a business trip to the island, so they will be active during their little spare time. Over the past week Masa was on 160/80/40 meters. QSL JD1BMM by the JARL Bureau or direct to: Masafumi Ishihara, 2-305 Loran, 2-5-35 Miyazaki, Chuo-ku, Chiba, 260-0806 Japan). QSL JD1BND by the bureau to JD1BND.

KH4, MIDWAY ISLAND (Amateur Radio Operations to Begin Again). The ARRL Web page reports, "The U.S. Fish and Wildlife Service (USFWS) announced on Monday, January 26th, that they would once again allow Amateur Radio operators the opportunity to operate from Midway Atoll. This is the first time that USFWS has allowed amateurs to operate from the wildlife refuge since 2002. The USFWS started a program earlier this month to encourage visitors to experience Midway's wildlife, history and culture, as well as non-wildlife-dependent activities -- including Amateur Radio. To ensure the safety of the wildlife on the Refuge, the USFWS said that Amateur Radio operations will be permitted for two weeks only, from October 5-19th, 2009. 'Radio operation will be allowed only within a designated area on the north side of Sand Island and the use of portable generators will not be permitted,' said Midway Atoll Refuge Manager Matt D. Brown. 'There is 120 V power available at the operation site. Any modifications to the island power grid/infrastructure must be approved in advance and be paid for entirely by the radio operators.' All participants will be required to attend a refuge orientation shortly after arrival that is designed to enhance visitor safety, wildlife protection and overall enjoyment of the wildlife refuge." To read the complete press release, go to: http://www.arrl.org/news/stories/2009/01/27/10596/

NAQCC PRESS RELEASE (Preserve and Encourage CW Activity in 2009!!). New Years 2009 may have come and gone, but it's never too late to resolve to help preserve and encourage CW activity across our amateur bands. To celebrate the new year, come and join the NAQCC (North American QRP CW Club), a club for any and ALL CW enthusiasts around the world.
Our members include "Big Gun" contesters, hard-core QRPers, experimenters, ragchewers and SWLers; young and old alike. As different as we may be, we all share one thing in common, and that is our love for CW.
We welcome all who want to help support CW and have at least some interest in using QRP from time-to-time. Our club runs monthly sprints and challenges. Plus we sponsor some additional special on-air activities during the year.
Membership is FREE and once you join you're automatically a lifetime member! So sign up today and help us keep CW alive and well.
Visit our web site at http://www.usatek.net/~yoel/. You'll find info on all of our various activities plus an online membership application.
We look forward to your support and hope to soon see your call added to our membership roster.... 73, Paul/KD2MX, NAQCC Membership Recruiter
On behalf of: Tom, WY3H - NAQCC President
John, K3WWP - NAQCC Vice President
Larry, W2LJ - NAQCC Asst. Publicity Director
Dave, VA3RJ/VE3JDR - NAQCC Publicity Officer

PJ2, NETHERLANDS ANTILLES. Jan, PA4JJ, informs OPDX that he will be on a short holiday trip to the Island of Curacao (SA-006, WLOTA LH-0942) and will be active as PJ2/PA4JJ. He will leave Amsterdam on March 30th and expects to be on the island until April 11th. Jan states that he will be the only ham in a party of 4, so he will try to be active as much as he can. Activity will be on all ham bands with a focus on 30/17/12 meters and the DIGI modes (RTTY and/or PSK31). QSL cards are direct to PA4JJ. If Jan has access to the Internet, he will provide an online log on his Web site (or as soon as possible after his return home) at: http://www.pa4jj.nl/html/pj2_pa4jj.html

PJ2, NETHERLANDS ANTILLES (Update - Referendum on Curacao). Hans Timmerman, PB2T, President of the European DX Foundation (EUDXF), reported on the EUDXF Web page on Friday, January 30th: "Where I had the impression that Curacao had a clear position on its future political status it appears that another referendum will be necessary to decide on the future of this island. On Curacao a committee has been installed that will lead a referendum that addresses the planned political change. On February 2nd, 2009, at the latest, this committee will propose the date for the referendum and it will propose the exact question for the referendum. A final decision will be taken by the local government of the island. In the meantime the chairman of the committee stepped down because he appeared to be too controversial. To be continued...."

QSL INFO AND NEWS.....
LOTW REACHES 200 MILLION QSOS! "The ARRL Letter" reports that on January 16th, the "Logbook of The World" (LoTW) hit the 200 million mark during the upload of four years' worth of logs (about 25k QSOs), by Vic Kean Jr., K1LT, of Carroll, Ohio. To celebrate Kean's submission of the 200 millionth QSO, the ARRL has awarded him lifetime free LoTW credits and free ARRL Awards as he qualifies for them. Read the complete press release at: http://www.arrl.org/news/stories/2009/01/22/10576/?nc=1

LOGBOOK OF THE WORLD NOW EASIER THAN Ever! Bill Moore, NC1L, ARRL Awards Manager, reports: "In order to better accommodate new users as well as existing account holders, ARRL's Logbook of The World (LoTW) has been updated. According to ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, these improvements were made based on tracking Manager LoTW help questions and listening to users. 'Through the efforts of Membership and Volunteer Services Dave Patton and Information Technology Manager Jon Bloom, we have also added an automated results table on the LoTW Users Home Page that lists members in numeric order who have achieved the Triple Play Award,' said ARRL Chief Operating Officer Harold Kramer, WJ1B. 'IT personnel have also fixed a number of long standing issues with Logbook in recent weeks, and some additional enhancements are underway.'
Some things that have been added:
* An LoTW User's Corner that includes quick links to log onto your account, save or renew a certificate and ways to address PC failure.

* The GET STARTED section <http://www.arrl.org/lotw/start.html> has been simplified with links for each of the four steps in the

certificate process.

* LoTW instructions are now available in nine languages: English, Dutch, French, German, Italian, Russian, Slovenian and Spanish. Options to select a language have always been available, but they have now been moved up front to the GET STARTED page. The languages are identified with icons of flags to represent each language.

* The GET STARTED pdf file has been updated to include new screenshots and refinement of some of the processes.

* The software download section now consists of only three icons representing the three operating systems for which software is available: Windows, Mac and Linux. The user simply selects their operating system and they are redirected to the download specific to their system.

* A new link has been added for QSL Manager, Club Calls and DX-peditions. This link gives details on establishing an account for these special operations and includes a section for 1×1 call signs.

* A new PowerPoint overview is available from the LoTW site. This presentation has also been added to our multimedia library. <http://arrl.org/multimedia>
The program is an overview of LoTW and what users can expect from the service. There are screenshots of LoTW pages, as well as a condensed version of the certificate and award application process.

With more than 200 million QSOs submitted, ARRL's Logbook of The World system is a repository of log records submitted by users from around the world. When both participants in a QSO submit matching QSO records to LoTW, the result is a QSL that can be used for ARRL award credit. Yaesu is the principal sponsor of the LoTW Web site."

NOT THE QSL MANAGER. Alfredo, IK7JWX, reports that he is NOT the QSL Manager for ZA1KP. QSL ZA1KP only direct to: Miftar Fana, Klub Partizani, P.O.BOX 1439, TIRANA, Albania.

QSL MANAGER NEEDED. Omar, 4L5O, from Tbilisi, informs OPDX that he is looking for or is in need of a QSL Manager in the USA. If interested in being his QSL Manager, please contact him at:
4L@... -or- OMARI@...

SILENT KEY. It was reported by Ben, PA5BW, that Solofo Randrenjason, 5R8ET, became a "Silent Key" (SK) unexpectedly in the hospital on January 19th, "during a more or less routine surgery". Ben states, "Solofo was my colleague and later even my 'second man' at the Radio Netherlands shortwave station in Talata Volonondry in Madagascar, where I worked there back in 1993-1995. Together we started the Madagascar Amateur Radio Association in 1995. His keen interest in radio and shortwave lead to his amateur radio license in 1994, using a simple transceiver borrowed from visiting Japanese hams and a homebrew dipole antenna. Solofo was the first local ham to obtain an amateur radio license. All licensees before that were foreigners that traded in their foreign calls for a local ham radio permit. Several other local hams were to follow him which led to the first ever 5R8 Ham Dinner in Antananarivo in 1995, counting nine (!) 5R8 hams on 10 square meters. The highest 5R8-concentration ever. I remember Solofo as a very friendly and kind man, a real friend (and a very loyal one) and a committed amateur radio DXer. For me it is very hard to understand that I will never meet him again. The world will be a little bit colder without him. Our hearts go out to those that are left behind: his family, his colleagues at the radio station, his fellow radio amateurs."

TOP BAND DINNER ANNOUNCEMENT. Steve, WB6RSE, reports: "Registration for the Top Band Dinner at the 2009 Visalia International DX Convention is now open. First come, first served." The dinner will be held Friday, April 17th, at the Holiday Inn Visalia - Birch Room (6:30 PM No-host Bar, 7:15 PM BBQ Buffet Dinner). The program will be "Top Band from KP5, Desecheo, February 2009" by Glenn Johnson, W0GJ, Co-leader, Desecheo DXpedition. Door Prizes! Thanks to these fine organizations for their generous donations: ARRL, NCDXF, Idiom Press, CQ, QRZ-DX, Yaesu, Water-proof Log Books, The Daily DX, Photoqsls.com .... AND ..... from Array Solutions - their new Beverage transformer system: http://www.arraysolutions.com/Products/singlewirebeverage.htm#top%20of%20page
Dinner will be "Miner 49er BBQ Buffet" (COST IS 36 USDs/per person - includes, all taxes, gratuity, and room charges AND Door Prize eligibil-ity). TO REGISTER: Send an E-mail to Steve, WB6RSE, to check on availa-bility and indicate the number of registrations you want. Send an E-mail to: wb6rse1@...
You will receive a return E-mail with additional information and registra-tion details. Last year's event was a sellout. Advanced registration is absolutely required. Registration at the door will be very limited IF any! REGISTER EARLY!

TOP TEN MOST WANTED. Jean-Michel, F6AJA, informs OPDX that the Les Nouvelles DX Web page has an interesting listing of the QSL cards of past operations from the entities mentioned in "The DX Magazine's" -- "2008

MOST WANTED SURVEY". QSL cards of the "Top Ten Most Wanted" can be viewed at: http://www.lesnouvellesdx.fr/galerie/galerie.php?page=listtopten You will find more than 300 cards for the "Top Ten" entities for the last 5 years (2004 to 2008). If you don't speak French, you can use the automatic translator (see on the left side of the page).

V3, BELIZE. The "two contests in two weeks team" is at it again. As part of their "Adventure Before Dementia" program they are returning to Belize, this time with two other operators to help share the insanity. Phil Yasson, AB7RW/V31RW, and his XYL Barbara, AC7UH/V31UH, will join Rick, KT7G/V31TB, and Jake, N7WO/V31WO. The group will be active from February 10th to 24th. During the CQWW WPX RTTY Contest (February 14-15th) they will use V31TB (QSL via KT7G) and for the ARRL International DX CW Contest (February 21-22nd) they will use V31WO (QSL via N7WO). Outside the contests, QSL via the operator's instructions. Activity is planned for 160-15 meters including WARC bands.

VK9C, COCOS-KEELING ISLAND (OC-003). Bernd, VK2IA, will once again be active as VK9AA between March 14-27th. Activity will be on 160-10 meters using CW and SSB. QSL via DL8YR (QRZ.com).

YN2/H7, NICARAGUA. Andrei, NP3D, will be active as H7/NP3D and YN2/EW1AR between February 11-15th. Activity will include the CQ WW RTTY WPX Contest (February 14-15th) and he will sign YN2S for the contest. QSL direct to NP3D. QSLs are also "OK" via W3HNK and RW6HS.

YN, NICARAGUA. Eric, K9GY, will be active possibly as YN2/K9GY from Octavio's, YN2N, QTH in Grenada, during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign, direct or by the bureau.

YW0, AVES ISLAND (Update). The 4M5DX Group will once again activate Aves Island (NA-020) in March for one week. A team of more than 15 operators (team almost complete) will be active on 160-6 meters using CW, SSB and RTTY. The logistic support is ready (transportation will be made by the Venezuelan Navy. QSL via IT9DAA, either direct, by the bureau or LoTW. The QSL Manager is authorized to receive any donation. For updates, visit the DXpedition's Web page at: http://yw0a.4m5dx.info

ZL7, CHATHAM ISLANDS (Update). Lee ZL2AL, informs OPDX that a team of 9 operators will be activating Chatham Island as ZL7T during March from the fabulous Chatham Fishing Lodge in the fishing village of Kaiangaroa on the far Northeastern tip of the island. The operators are: Lee/ZL2AL, Morrie/ZL2AAA, Lee/ZL2LE, John/ZL1BYZ, Mike/ZL2CC, Phil/ZL2RVW, Mark/ZL3AB, Wayne/ZL2WG and John/ZL1ALZ. The pilot station will be Duncan/ZL3JT. The four station setup will operate 160-10 meters, using CW, SSB, RTTY and the PSK modes. Operations will be on between March 6-11th. Donations would be appreciated. The ZL7T Web site is available at: http://www.zl7t.com A logsearch will be available on the team's return. Logs will be uploaded to LoTW within 6 months. QSL via ZL2AL, by the Bureau or direct (CBA or QRZ.com).

ZP6, PARAGUAY (Possibly CX). Witek/SP9MRO and XYL Danuta/SP9SX will be here between February 21st and March 3rd. Activity will be holiday style (mainly on the weekends and local night hours) with operations on CW, SSB and RTTY using the callsign ZP6/SP9MRO. They also plan to go to Uruguay (CX) between March 4-14th.

ZS8, MARION ISLANDS. Very few QSN reports on Petrus, ZS8T, this past week. BEWARE OF PIRATE ACTIVITY! However, the very first portion of QSOs logged by Petrus (as of January 25th) are now available at:
http://zs8t.net/online-logsearch/
Also available are sound clips of Petrus on the Web page listed below. For updates and official announcements of the ZS8T operation, please visit the Web site at: http://zs8t.net

8978. A lot of WAS awards??

Yahoo group: DX-IS (2009)
Date: 2009-02-01 23:58:15 UTC
From: Paul M Dunphy
Topic: 8978 Message: 8978

I just checked my LoTW "Awards" for WAS. I see I have been
credited for *some* states on all of the following 42 bands or band/modes:

Basic
160M
80M
40M
30M
20M
17M
15M
10M
6M
CW
Phone
RTTY
Digital
Digital-PSK31
Digital-PSK125
160M Phone
160M CW
80M Phone
80M CW
80M RTTY
80M PSK31
40M Phone
40M CW
40M RTTY
40M PSK125
40M PSK31
30M CW
20M Phone
20M CW
20M RTTY
20M PSK125
20M PSK31
17M Phone
17M CW
15M Phone
15M CW
15M RTTY
10M Phone
10M CW
6M Phone
6M CW

Triple Play

Of course I do not have 50 state confirmed on all of them, but
it begs the question: If/when I do, can I get 42 separate and
distinct WAS awards? (For example, if I work all 50 on 40M PSK125,
can I get a certificate for WAS 40M PSK125? And 40M Phone, 40M CW,
40M RTTY, and 40M Phone?)

There are 42 possibilities listed where I've worked
something. I don't have any PSK QSOs on 15 meters, for example, so
that isn't in the list. I assume if I do it will show up as award
#43. Does the ARRL really offer more WAS awards than there are states?

73, Paul VE1DX

8981. A better frequency?

Yahoo group: DX-IS (2009)
Date: 2009-02-02 16:57:57 UTC
From: Paul M Dunphy
Topic: 8981 Message: 8981

I don't know who decided on 14.300 MHz for the ZS8T guy (maybe he did himself), but I don't think they could have found a worse one. That net is not going to move come hell or high water, and those who were around in the 1990s will recall the wars and even legal battles fought over that and 14.313 MHz.

Might be a good idea for someone to alert Petrus or his pilot guys in South Africa to try somewhere else like 14.260 or the like. I don't need ZS8 on 20M, but for those in NA who do, this is going to be a hard go unless he finds another QRG. I don't know it the net is audible in EU, so it might just be an issue in NA.

I sent an email to Rhys, ZS6DXB, regarding this issue about a week ago.

I don't know if that's the appropriate contact.

I do wish he'd move... this could really be a nightmare for DXer vs.
net operator PR, and will just cause a big mess.

Petrus picked a spot where he heard no QRM. Unfortunately it was in use
and he didn't hear it. Remember, propagation down there meant he didn't
hear the net (they never heard him either--it was the European pileup that
was the issue).

Today he showed up on 14.305 so it appears he got the message.

Looks like the bad spots are continuing today (3 Feb):

DX de IK0GGR: 14300.0 ZS8T 44 A ROME 5UP 1801Z

From zs8t.net:

"The ZS8T team would like to report that all dx posts posted on Feb.
2 are 100% bogus. Petrus wasn't operating that day at all.

We would also like to inform the Ham Radio Community that 14.300.00
is NOT ZS8T's operating frequency and that he will tune any other
legal clean freq. to operate on 20m."

I note IK0GGR is not listed on QSZ.COM, either.

73, Paul VE1DX

8987. Ahh, it brings back memories

It's not 20 meters this afternoon, but 40. CW.

I can hear VK6AU, F5RRS, TA1AX, PT2ZHA. Back in 1990 this was all on 20 at night, around midnight local time! Now it's gray line on 40. Well, I will take whatever I can get on any band at this point.

Does anyone know the qth for this guy?
Worked him on 14012 at 2203z - but never gives any qth or qsl route info.
Google doesn't provide any clues either.

could be either of the following
HK0#* Malpelo I.
HK0#* San Andres & Providencia

There seems to be an increase in sour grapes operating.

Either
1) As soon as station says NA only CQ's from EU appear on the operating freq
2) Spots of semirare DX generate the same. This morning it was 4K9W

Nothing new but the frequency seems to have increased.

Wouff Hong time.

SB DX ARL ARLD005
ARLD005 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

EAST MALAYSIA, 9M6. John, 9M6XRO and Steve, 9M6DXX will be QRV from Sabah, IOTA OC-088, from February 7 to 10. Activity will be on 160 to 10 meters using CW and SSB. QSL both calls via M0URX.

ANDORRA, C3. Finn, OV8FM and Martin, 5P1M will be QRV as C3/OV8FM and C3/5P1M, respectively, from February 10 to 13. Activity will be on 40 and 20 meters using SSB, RTTY, SSTV and PSK. QSL via OV1A.

ENGLAND, G. Tim, G4STH and Hazel, G4YLO are QRV using special event callsign GB50BH until March 3 to commemorate the 50th anniversary of the death of the singer Buddy Holly. QSL via G4STH.

DOMINICA, J7. John, K3TEJ will be QRV as J7N from February 11 to 27. Activity will be on 160, 30, 17 and 12 meters using CW and RTTY. This includes entries in the upcoming CQ WW RTTY and ARRL DX CW contests as Single Op/ALL Band entries. QSL to home call.

ST. VINCENT, J8. Nigel, G3TXF is QRV as J88XF from Mayreau Island, IOTA NA-025, one of the smaller Grenadine islands, until February 9. Activity is on 40, 30, 20 and 17 meters using only CW. QSL to home call.

DESECHEO ISLAND, KP5. Look for a group of operators to be QRV as K5D from February 12 to 26. Activity will be on 160 to 6 meters using CW, SSB and RTTY. QSL via N2OO.

PAPUA NEW GUINEA, P2. Jerry, P29ZAD is QRV from Buka Island, IOTA OC-135. QSL to home call.

SOUTH GEORGIA ISLAND, VP8. Lars, VP8DIF ha been QRV on 20 meters using RTTY around 1630 to 1900z. QSL via DJ9ZB.

NICARAGUA, YN. Andrei, NP3D will be QRV as H7/NP3D and YN2/EW1AR from February 11 to 15. This includes activity as YN2S in the upcoming CQ WW RTTY contest. QSL direct to home call.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Bhutan, A5100A, 2008 operation; Afghanistan, T6EE, Additional documentation has been received to include 2006 and 2007 operations. If you had a QSO rejected for these dates send a note to dxccarrl.org to be placed on the list for an update; Republic of the Congo, TN5SN, current operation effective October 2008; Chad, TT8HA, operations for 2007 and 2008; Chad, TT8SK, operations for 2008 and 2009; Albania, ZA/F4DTO, 2008 operation; and Albania, ZA0/I0SNY, ZA0/I8LWK, ZA0/I8YGZ, ZA0/IK2AQZ and ZA0/IK7JWX, operations in 2008.

THIS WEEKEND ON THE RADIO. The Mexico RTTY International Contest, North American CW Sprint, NCCC Sprint, Vermont QSO Party, YL-ISSB CW/RTTY QSO Party, 10-10 International Winter Phone Contest, Black Sea Cup International, World Wide PMC CW Contest, Minnesota QSO Party, FYBO Winter QRP Sprint, British Columbia QSO Challenge, AGCW Straight Key Party, Delaware QSO Party and the New Mexico QSO Party will certainly keep contesters busy this upcoming weekend. The ARRL School Club Roundup runs from February 9 to 13. The NAQCC Straight Key/Bug Sprint and RSGB 80-Meter Club Data Championship are both scheduled for February 11. Pleased see February QST, page 82 and the ARRL and WA7BNM contest web sites for details.

8994. CallSign History

Yahoo group: DX-IS (2009)
Date: 2009-02-06 17:06:20 UTC
From: Art Burke
Topic: 8994 Message: 8994

I'm not old enough to truly remember where lots of calls were used in '"the good old days."

Sometime in the 70s (maybe up until the 80s?), KA2xx was used for American Forces in Japan. A KA1xx was (and still is?) used for Minami Tori Shima (JD1) since way, way back.

While entering QSOs for Rene (WB6PSY) I came across a KA6xx call and either I accidentally flagged it as Okinawa or DXKeeper did, one or the other.

Was the KA6 2x2 group ever used for Okinawa?

Is there a site somewhere that attempts to track callsign history - at least for U.S. and possessions? I know a lot of the KG6, KC6, KX6 type stuff disappeared and was replaced by things like V6, T8, etc.

Art - N4PJ

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B - Piotr, SP2JMR and Slavo, SP2JMB will be active as 3B9/homecalls from the Rodrigues Islands (AF-017) on 1-8 April, and as 3B8/homecalls from Mauritius Island (AF-049) on 9-17 April. They plan to operate SSB and CW on all bands. [TNX SP2JMB]
9G - Rob, PA3DEW and Vincent, PA3FQX will be active again from Dormaa Ahenkro, Ghana starting on 14 February. They will be QRV as 9G1AA in their spare time; look for them around 16 UTC on 14140 kHz. QSL via PA3ERA. [TNX PA3AWW]
C3 - Finn, OV8FM and Martin, 5P1M will be active as C3/OV8FM and C3/5P1M from Andorra on 10-13 February. They plan to operate SSB, RTTY, PSK31 and SSTV on 20 and 40 metres. QSL via OV1A. [TNX OV1A]
CE - Members of Radio Club La Portada will be active as XR1A from Puerto Antofagasta lighthouse on 21-22 February for the South American Lighthouses Weekend (see "Good to Know" below). They will operate CW and SSB mainly on 20 and 40 metres. QSL via XQ1IDM. [TNX XQ1IDM]
CN - Russell, G5XW will be active again as CN2XW from Morocco on 13-23 February. This is another backpacking type holiday, so he will be running 100 watts into some sort of basic antenna. QSL via home call, direct only. [TNX G5XW]
CT - CT1AHU, CT1EHX, CT1GFK, CT1GPQ, CT1IUA and CT2IHP will be active as CQ1A from the island of Nossa Senhora do Rosario (DIP AL-19) on 8 February. They plan to operate SSB and CW with two stations on 40 and 20 metres, from around 8 UTC to 13 UTC. QSL via CT1GFK. [TNX CT1IUA]
D4 - Girts, YL2KL will be active as D4C from Cape Verde on 11-22 February, including SOAB entries in the ARRL DX CW and CQ WW WPX RTTY contests. He hopes for some activity on 30 metres. QSL via IZ4DPV. [TNX NG3K]
DU - David, BA4DW is currently active as DU9/BA4DW from Mindanao Island (OC-130) until 10 February. He operates in his spare time with 100 watts and wire antennas. QSL via home call. [TNX BA4DW]
FG - Ilario, IV3CGJ will be active as FG/IV3CGJ/p from Marie-Galante,

Guadeloupe (NA-102) on 13-24 February. QSL via bureau to home call. [TNX www.rsgbiota.org]
GD - The Barry Amateur Radio Society will operate from the Isle of Man (EU-116) from 28 March to 4 April. Thomas/DJ6OI, Jan/DJ8NK, Franz/DJ9ZB, Alois/DL8RBL, Glyn/GW0ANA, Yasu/JR1AIB, Curtis/MW0USK and Lois/MW3LOI will be active on 160-10 metres (6m will be monitored for openings) SSB, CW, RTTY and PSK under three callsigns: GT4BRS for SSB and CW, GT6BRS for data modes and GD8K during the CQ WW WPX SSB Contest (28-29 March). All QSL cards via GW0ANA, direct or bureau.
HC - Rick, NE8Z will be active again from Ecuador between late February and early March. He will operate CW and SSB on 160-10 metres as HC1MD/HC4 from Same and Tonsupa (Esmeraldas Province) on 20-27 February, and as HC1MD from Tumbaco (Pichincha Province) from 28 February to 8 March. QSL via K8LJG. Information on the Ecuador and Galapagos DX Awards can be found at http://webpages.charter.net/ne8z [TNX NE8Z]
HP - The Radio Club of Panama and the Panama Canal Amateur Radio Association will be active on all bands and modes as H81L from Miraflores Lighthouse (ARLHS PAN-030) on 14-15 February. QSL via HP1RCP. [TNX HP1AC]
I - Luigi, IV3LNQ is active as IA3GM until 31 December to commemorate the 100th anniversary of the Nobel Prize in physiscs awarded to Guglielmo Marcnoni. QSL via home call, direct or bureau. [TNX IV3LNQ]
I - Celebrating the 141st anniversary of the birth of Paul P. Harris, the founder of Rotary International, Rotary Club "Siracusa Monti Climiti" (Sicily) will be active on 20, 15 and 40 metres as IO9ROTA between 19 April and 19 May. The operator will be Adriano, IT9CCB. [TNX IT9CCB]
J7 - John, K3TEJ will be active as J7N from Dominica (NA-101) on 11-27 February, including a SOAB entry in either the CQ WW WPX RTTY and the ARRL DX CW contests. Outside the contests he will concentrate on 160, 30, 17 and 12 metres CW and RTTY. QSL direct to K3TEJ. [TNX K3TEJ]
J8 - Nigel, G3TXF has been active as J88XF from Mayreau Island (NA-025) since 5 February, and will remain there until the 9th. He operates CW only, mainly on 40, 30, 20 and 17 metres. QSL via home call. The webpage for this trip can be accessed from http://www.g3txf.com/index.html
KP2 - Look for John, KP2/K3CT (QSL via home call) to be active from the US Virgin Islands (NA-106) on 18-25 February, with an emphasis on 30, 12 and 17 metres before and after the ARRL DX CW Contest. He will participate in the ARRL DX CW Contest as KP2M (QSL via AI4U). [TNX K3CT]
PA - Rene, DL2JRM will be active as PA/DL2JRM/p from Schouwen Duiveland (EU-146) on 14-15 February. He will operate CW on 80-10 metres. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
PJ - Jan, PA4JJ, will be active as PJ2/PA4JJ from Curacao (SA-006), Netherland's Antilles between 31 March and 11 April. He will

operate holiday style on various bands, with a focus on 30, 17 and
12 metres and RTTY/PSK31. QSL via home call. A logsearch will be
available at http://www.pa4jj.nl/ and the log will be uploaded to
LoTW. [TNX PA4JJ]
PY - PT2OP (as PX6T) and PY6KW (af PY6KW/p or with a special callsign)
will be active from Tinhare Island (SA-080) on 20-24 February and
from Boipeba Island (SA-080) from 25 February to 1 March. They
plan to operate SSB mainly on 20 and 40 metres, with 100 watts
into G5RV. QSL via home calls. [TNX PT7WA]
SV - Demetrius, SV2GWY and other operators will be active as SX2CM
14-15 February, 10-11 May, 24-25 May and 5-7 July. The special
callsign is in honour of the brothers saints Cyril and Methodius.
All of the QSOs will be confirmed automatically via the bureau;
the QSL manager for direct cards is SV2GWY. Further information
can be found at http://sx2cm.blogspot.com [TNX SV2GWY]
TI - Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS,
Rene/DL2JRM and Daniel/DL5YWM will be active with a TI7 callsign
TBA from San Jose, Murcielago Islands Island (NA-191)on 17-20
April. They plan to operate around the clock on 80-10 metres SSB,
CW, RTTY and PSK31. QSL via DK6AO, direct or bureau. The website
for the expedition is at www.ti7.info. [TNX www.rsgbiota.org]
UA - A few activities for the World Flora Fauna Award (www.wff44.com)
are expected to take place between 6 and 8 February. Look for
UE1RFF/3 to operate CW and SSB on 20, 40 and 80 metres from three
different locations. QSLs via UA1RJ. [TNX RW3GW]
V2 - Peter, G3TKK will be active holiday style as V25TK from Antigua
(NA-100) from 27 February to 12 March. He plans to operate CW on
40-17 metres. QSL via G3TKK, direct or bureau. [TNX G3TKK]
V3 - Phil/AB7RW (V31RW), his wife Barbara/AC7UH (V31UH), Rick/KT7G
(V31TB) and Jake/N7WO (V31WO) will be active from Placencia,
Belize on 10-24 February. They will participate in the CQ WW WPX
RTTY Contest as V31TB (QSL via KT7G) and in the ARRL DX CW Contest
as V31WO (QSL via N7WO). Outside the contests QSL via the
operator's instructions. [TNX N7WO]
V4 - Nick, G4FAL will be active as V4/G4FAL from Rawlins Plantation, St.
Kitts (NA-104) on 12-17 March, including participation in the RSGB
Commonwealth Contest (BERU) on 14-15 March as V47CD. He plans to
operate only CW on 80, 40, 20, 15 and 10 metres. QSL via home call
or LOTW. [TNX G4FAL]
V5 - Klaus, DJ4SO will be active again as V5/DJ4SO from Namibia from 14
February to 12 March. He will operate mostly CW and RTTY/PSK31 on
160-10 metres. QSL via home call, direct or bureau. The logs will
be uploaded to LoTW. [TNX The Daily DX]
V8 - Sam, G4OHX will be active as V8FHX from Brunei on 11-23 February.
He plans to operate mainly CW on 80, 40 and 20 metres, but he may
also get on 30m. QSL via home call (direct only).[TNX The Daily DX]
VK9C - Bernd, VK2IA reports the will be active again as VK9AA from Cocos
(Keeling) (OC-003) on 14-27 March. He will operate CW and SSB on
160-10 metres. QSL via DL8YR.
VK9N - Willy, ON5AX and his wife Magda, ON3AX will be active as

VK9N/ON5AX from Norfolk Island (OC-005) on 15-22 March. QSL via ON5AX. [TNX ON5AX]
VP2V - Rick, K6VVA will celebrate his 65th birthday operating from Tortola, British Virgin Islands (NA-023) on 20-24 February. Expect him to operate mostly CW as VP2V/K6VVA (QSL via N6AWD), and to participate in the ARRL DX CW Contest as VP2VVA (QSL via N6AWD). [TNX NG3K]
VU - VU2DSI, VU2ROE, VU2SMN and VU2SMS will be active as AU30SHI on 21-22 February to commemorate the birth of Chhatrapati Shivaji Maharaj (19 February 1627), the founder of the Maratha Empire. They will operate from Shivneri Fort, the historic military fortification where Shivaji was born; suggested frequencies are 7070, 14250, 14215,21280 and 28290. QSL via VU2DSI. [TNX VU2DSI]
W - Dennis, WA2USA will be active as WA2USA/4 from Bogue Banks (NA-112) on 12-24 February. He plans to operate RTTY, CW and SSB on 160-10 metres, and to participate in the ARRL DX CW and CQ WW WPX RTTY contests. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]

ANTARCTIC VOYAGE ---> Willy, ON5AX and his wife Magda, ON3AX will be active as OR3AX and OR4AX from on board the "Spirit of Enderby" and from the Ross Sea region in Antarctica between 9 February and 10 March. QSL via ON5AX. [TNX ON5AX]

PACIFIC TOUR ---> Bill, N7OU and Bob, W7YAQ will be active as 3D2OU and 3D2NB from the Fiji Islands on 11-16 February. From 17 February through 2 March they will operate from Tuvalu (T2, callsigns TBA), including a M/S entry in the ARRL DX CW Contest. Operation will be 160-10 metres, mostly CW with some SSB and RTTY. QSL via home calls. [TNX NG3K]

425 DX NEWS MAGAZINE ---> The latest issue (January 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

DXCC NEWS ---> The following operations have been approved for DXCC credit:
A5100A Bhutan 2008 operation
T6EE Afghanistan 2006 and 2007 operations [*]
TN5SN Congo Current operation effective October 2008
TT8HA Chad 2007 and 2008 operations
TT8SK Chad 2008 and 2009 operations
ZA/F4DTO Albania 2008
ZA0/I0SNY Albania 2008
ZA0/I8LWK Albania 2008
ZA0/I8YGZ Albania 2008

ZA0/IK2AQZ Albania 2008
ZA0/IK7JWX Albania 2008
[*] Additional documentation has been received from T6EE to include 2006 and 2007 operations. If you had a QSO rejected for these dates send a note to dxcc@... to be placed on the list for an update.
The DXCC Blog has been renamed Century Club Awards Web, and its new URL is http://www.arrl.org/blog/Century%20Club%20Awards [TNX NC1L]

HE8CIC ---> "After 600 QSOs and two contests with the call HE8CIC it seems that most of the amateurs are not informed about the HE8 activities", Josef, HB9CIC says. "Very often I had to repeat many times the prefix and lost a lot of time". Please note that amateur radio operators from Switzerland can replace their HB9 or HB3 prefixes with HE8 and HB8 respectively until 31 December [425DXN 921], to celebrate the 80th anniversary of USKA, the Swiss IARU Society.

IARU R1 BAND PLAN ---> The IARU Region 1 new HF Band Plan will become effective on 29 March 2009. It can be found at http://www.iaru-r1.org/Spectrumbp.htm

K5D ---> A third interview with Glenn Johnson, W0GJ, expedition co-leader, can be found on the Documentary Archive's Desecheo special web page (www.dokufunk.org/desecheo). The interview was given to Wolf Harranth, OE1WHC on 6 February.

LIGHTHOUSE WEEKEND ---> The first South American Lighthouses Weekend will be held from 12 UTC on 20 February until 24 UTC on the 22nd. A list ("Listado Oficial") of partecipating stations and further information on the event can be found at http://www.grupodxbb.com.ar/faros.htm

PMC CONTEST ---> The International Association of Peace Messenger Cities (www.iapmc.org) was established twenty years ago to recognize and encourage the role and responsibility cities have in creating a culture of peace. The Radio Club Slovenj Gradec, S59DCD (ex YU3DCD) sponsors the WW PMC Contest, to promote contacts between stations located in the Peace Messenger Cities (currently 93) and the rest of the world. The contest (CW and SSB) will be held on 12 UTC on 7 February 2009 until 12 UTC on the 8th. Complete details can be found at http://www.s59dcd.si/english/index.php [TNX S54X]

QSL 7X0DX & 9M8DX ---> The new QSL route, for either past and future QSOs, is via SP5UAF, direct (Tomasz Barbachowski, Zeromskiego 10, 05-070 Sulejowek, Poland) or bureau. The former QSL manager (Tadeusz "Teddy" Barczyk, DL4DBR) passed away on 2 January [425DXN 925]. Those who worked 7X0DX in September 2008 and sent their cards to Teddy, please be patient and do not send second requests. Teddy's wife (Renia, DL3DBR) will send the QSLs and other documents to SP5UAF as soon as possible. [TNX SP5UAF]

QSL LY70W ---> Sam, LY5W says that the QSLs for LY70W (72,000 QSOs in two months) arrived from the printer on 4 February. The first batch of 180 direct cards was mailed on the 5th, bureau cards will follow.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now
available at http://www.425dxn.org/awards/toplist/index.html. Please note
that QSOs confirmed through LoTW or included in on-line logs are eligible
for listing. Send send your scores, as well as any request for further
information, to Erminio Pandocchi, I2EOW (i2eow@...)

QSLs received direct or through managers: 3B8GT, 3DA0VB, 3X5A, 3XD2Z, 4A3A,
4L0A, 4O3A, 4S7NE, 4W6R, 4X4DK, 5H3VMB, 5N/LZ1QK, 5R8IC (AF-090), 5R8IG,
5R8VB, 6V7M, 6W/DL4JS, 7Q7VB, 7X4AN, 7X5VRK, 8P5A, 8R7USA, 9J2VB, 9L1BTB,

Art,

KA6XX was used for Kyrshu, southern Japan.

KR6XX was used for Okinawa.

73 Don K5AQ

7J1AEF, 9V1SH, ES5AQ

ARLP006 Propagation de K7RA

ZCZC AP06
QST de W1AW
Propagation Forecast Bulletin 6 ARLP006
>From Tad Cook, K7RA
Seattle, WA February 6, 2009
To all radio amateurs

SB PROP ARL ARLP006
ARLP006 Propagation de K7RA

K7RA is on the road this week from Charleston, South Carolina.

Still no hint of sunspots or sunspots to come. We did see some geomagnetic activity on February 4 from a possible coronal mass ejection. This raised the planetary A index to 16 that day.

Current prediction is for quiet conditions. Geophysical Institute Prague predicts quiet conditions for February 6-12. NOAA and USAF predict quiet geomagnetic conditions with planetary A index at 5, but it jumps to 8 on February 15, then back to 5 until February 22-24, which has a predicted planetary A index of 10, 8 and 8. While we don't see much excitement at the high end of the HF spectrum, the quiet conditions and winter nights are great for the lower frequencies.

There were many comments on the fascinating several decades old letter from Ed Tilton, W1HDQ, the editor of this bulletin until 1991. I've never learned when this bulletin began, and if Ed always wrote it.

I remember copying it on CW from W1AW as a boy in the mid 1960s, and it was written by W1HDQ then. No one currently at ARRL HQ seems to know either.

Starting out as a 12-year-old ham in the 1960s, I was always accustomed to having some source for info from an older ham. For instance, if I wanted to know how experimenters set up spark stations in the early 20th century, there were plenty of people still around in the late 20th century who had done it themselves when they were younger, and could lend me their first-hand knowledge. But now after 44 years as a ham, there aren't that many people older than me who I can ask these sorts of questions.

Jim Muiter, N6TP of San Mateo, California commented on the W1HDQ letter. Jim wrote, "Ed's letter pointed out there are many layers to ten-meter propagation and the selection of the date for the ten-meter contest was no accident. The three hundred mile path makes good sense. I believe the British Chain Home Radar system of Battle of Britain fame used frequencies in that range, perhaps 30 to 50 MHz. In effect it was partially an over the horizon radar and may have relied on tropo inadvertently."

Just after last week's bulletin, Jeff Hartley, N8II of Shepherdstown, West Virginia wrote, "The highlight of the week was Monday (January 26) working FW8DX on 75 meters at sunrise. 17 meters was barely open to Europe all week long except on Monday conditions were good enough for a brief opening on 15 meters to F/EA/sw DL from 1510-1545Z."

He continues, "I heard double hop Es on 10 meters Sunday evening (January 25) into New Mexico and Arizona, but no QSOs as they were fairly weak here and they had a good opening going with the SE USA with S9 reports."

Jeff goes on to say, "By all accounts, the CQ WW 160 had the best conditions ever; I was too tired to operate past my normal bedtime, but did manage to work over 1000 QSOs and 51 DXCC countries with 6W/DL2MDU being a new one. Conditions were so good that many East Coast stations worked UA9 and several caught EY8MM."

Mike Schaffer, KA3JAW of Tampa, Florida likes to hunt commercial broadcast television DX, and reports that last winter he didn't see any, but on January 25 he reported, "I just snagged my initial 2009 winter season television DX on channel two coming from HIJB Tele Antillas, Santo Domingo, Dominican Republic. I saw the station logo (TA) several minutes before 17:00 GMT. The audio level was about equal to the video quality in this case, but normally the audio is loud compared to the video level. The distance from me here in Tampa, Florida to Santo Domingo city is 1,045 miles. Half this distance, 523 miles, would place the Es plasma cloud near south-west of George Town, Bahamas."

Mike copied the signal for less than 3 minutes.

Later that same day he copied WKAQ on channel 2 at 2313z from San Juan, Puerto Rico, 1,232 miles away. He said the sporadic-E opening that day ran from 1530-2320z. The next day, also on channel 2 he copied a TV station in Managua, Nicaragua.

A new month began since the last bulletin, so we can calculate another 3-month average of daily sunspot numbers. This new one will be centered on December 2008, and includes data from November 1 2008 through January 31 2009. We were of course hoping for an uptick, but the new average is 3.7, lower than the previous average of 4.4.

Bill Van Alstyne, W5WVO of Rio Rancho, New Mexico had some information and comments after this bulletin mentioned some weak signal methods for VHF.

Bill said the web site we mentioned deals with some European practice in Region 1. Stations in North America, Region 2, use different protocols. He writes, "The Region 2 protocols are the default settings in the WSJT software as it is downloaded from Joe Taylor's website (http://physics.princeton.edu/pulsar/K1JT/). Please, download the manual as well as the software."

Bill continues, "JT6M is only one of the transmission modes contained within the WSJT suite intended for meteor scatter work. The original MS mode, FSK441, remains the primary mode used for MS in North America. Of course JT6M will often work, but as stated in the web page, you need a decodable burst of at least one second duration. While it is much more likely to get pings this long on 6 meters than on higher-frequency bands, it is likewise true that most 6-meter meteor pings are shorter than that, and hence won't contain a full message. Using FSK441, a full message can be transmitted and decoded in as little as 150 ms."

He goes on to say, "The trade-off between these two MS modes is sensitivity versus time. FSK441 is faster because it takes up more bandwidth and is therefore less sensitive; a signal at least 1 dB above the noise floor is necessary. JT6M, on the other hand, can decode a message as much as 12 dB or more below the noise floor! But

the signal must be present for at least one second, and more reliable decodes are obtained when the signal is present for an even greater length of time."

He ends with, "The best use of JT6M, in the opinion of many, is not actually 6-meter meteor scatter, but rather very-weak-signal tropo, ionoscatter, or sporadic-E."

For newcomers, Bill recommends the WSJT Yahoo Group at, http://groups.yaho.com/group/WSJTgroup. The group has a web site at, http://www.ykc.com/wa5ufh/.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin see, http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at, http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for January 29 through February 4 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 69.3, 69.1, 69.4, 69.5, 69.1, 69.3, and 69.5 with a mean of 69.3. Estimated planetary A indices were 4, 4, 7, 3, 2, 4 and 16 with a mean of 5.7. Estimated mid-latitude A indices were 3, 3, 4, 1, 0, 2 and 10 with a mean of 3.3.

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K4UEE and W0GJ for the following DX information.

The following press release was provided by Bob Allphin/K4UEE and Glenn Johnson/W0GJ.

Desecheo 2009 Press Release # 5
February 6, 2009

FOR IMMEDIATE RELEASE

Today several team members leave their homes and start their journey to Desecheo via Puerto Rico. The entire fifteen man team will assembled by Saturday evening in San Juan. Sunday morning will be devoted to the required UXO (unexploded ordnance) training and afterward the team will travel to Rincon, Puerto Rico, the closest landfall to Desecheo. The Lazy Parrot Hotel will be the team headquarters for the following 4 days.

All equipment and antennas that we shipped have arrived and are in storage. Most of our infrastructure supplies and equipment has been purchased locally is also in our storage facility.

The team will spend Monday through Wednesday completing team training, finalizing assignments, testing generators and pre-assembling antennas. The remaining shopping will also be completed.

The SUP (Special Use Permit) will be presented to us in a special ceremony scheduled for Monday night. With that in hand, we will finally be ready to activate the #6 "most wanted" DXCC entity from February 12th-26th. We hope to be QRV late in the day on the 12th, weather depending.

Visit the new "K5D Store" (the button is about 2/3 down on the Welcome page) on the our website: www.kp5.us There is a good selection of memorabilia including nice polo shirts, t-shirts, caps, mouse pads, and mugs.

Financial support is being sought and very welcome. The "How you can help" tab on the website makes it easy. For larger contributions; they can be made tax-deductible (consult your tax advisor) if directed through the Northern California DX Foundation. Details are found on our website.

9001. Okinawa

Yahoo group: DX-IS (2009)
Date: 2009-02-07 03:02:37 UTC
From: WB6PSY
Topic: 9001 Message: 9001

Hey guys, just got my paper logs back from Art and verified a call that showed as Okinawa in DXKeeper. In October of 1979 I worked KA6DH and in the comments section I have 'Okinawa Is.' and in my scratch sheet I have WBØSMS as manager. Evidently I didn't send off for a card as probably someone told me it was a US call. Any of you 'oldtimers' have any comments or ideas?

Topic: 8994 Message: 9002

I vaguely remember KA6CC being active even in early 80s when I got my clubstation operating lis. He also gave 90 as his ITU zone (which was actually correct but created lots of confusion). It was a very exotic QSO.

1a. CallSign History
Posted by: "Art Burke" aburkefl@... aburkefl
Date: Fri Feb 6, 2009 9:06 am ((PST))

I'm not old enough to truly remember where lots of calls were used in '"the good old days."

Sometime in the 70s (maybe up until the 80s?), KA2xx was used for American Forces in Japan. A KA1xx was (and still is?) used for Minami Tori Shima (JD1) since way, way back.

While entering QSOs for Rene (WB6PSY) I came across a KA6xx call and either I accidentally flagged it as Okinawa or DXKeeper did, one or the other.

Was the KA6 2x2 group ever used for Okinawa?

Is there a site somewhere that attempts to track callsign history - at least for U.S. and possessions? I know a lot of the KG6, KC6, KX6 type stuff disappeared and was replaced by things like V6, T8, etc.

Subject: RE: [DX-IS] Okinawa

Hi Rene,

I have the following cards from "KA*xx" stations:

KA1NC Minami Torishima 1978
KA2DF Japan 1973
KA6BV (no QTH) 1973 -- I believe Japan but maybe Okinawa
KA6WW Okinawa 1980
KA8RB Japan 1980

I never got a card for the ONE station on Okinawa (KR6) who would have
counted for DXCC.

All KA6* and KA6*** calls, as I recall, are continental USA. I don't know
if there are any KR6* or KR6*** calls.

From: WB6PSY
Topic: 9004 Message: 9004

Hi ya'all,
The topic came up about Art's logging in my DXK KA6DH as Okinawa and KA6JD as Japan. I've bookmarked Rod's site for old callsigns at:
http://www.ac6v.com/oldprefix.htm
Look down in List of Contributors and see if any callsigns are familiar! Maybe his site may help someone.

Just got my paper logs back from Art, N4PJ who received my logs on January 5th and sent them back January 31st. Imagine, entering 7687 QSO's and having to decipher some of my entries. He did a wonderful job in such a short time. Out of that many, only one was missed so I got to use the New button. I had to reclassify three entries as DXK thought they were a different country including VKØKH DXK thought was Heard Island when in fact it was just Macquarie Is. - boo his. Art was able to classify all 18 Russian countries I worked before the big change. North & South Cooks were correct. He even found the time to enter while his wife, Marsha was having surgery. I think he was entering on a laptop while she was asleep in the hospital. Art would send my zip files every few days for me to enter into DXK so it was like Xmas weekly! I'm still way overwhelmed by his efforts. DXK is a wonderful program when and if I ever learn all its functions.
Kudos to you Art - you're the best!

Hi Frank:

The oldest QSO that I got a confirmation for was Oct of 2005 for 80 meter CW, so there is a bit of slightly older stuff. Got two new bands & two challenge credits out of the 3 contacts. I'll take it. Maybe he is starting with current Q's and working back.

Yep, I'm having trouble with that. If I click on "Reply all" my response
still does not go to the list. May have to ask Paul to change it back
so "Reply" goes to the list. Us old folks need all of the help we can get.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, K3CT, K3TEJ, NG3K, N4AA & QRZ DX, K6AM, K8YSE, N8OFS, KK9A, W9KNI, DX-IS News Site, Pete's-DX-Newsdesk, DJ7IK, DK8JB, DL7MAE & The DX News Letter, F5NQL & UFT, F8DVD, HA5BWW, I1JQJ/IK1ADH & 425 DX News, LU4DXU, OE1WHC, PA4JJ, PY2SEX, RSGB IOTA Web Site, SP5UAF and VA3RJ & ICPO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st/February, through Sunday, 8th/February there were 220 countries active. Countries available: 3A, 3B6, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, FT5W, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8 & 3B9, MAURITIUS AND RODRIGUES ISLANDS. Polish operators Piotr/SP2JMR and Slavo/SP2JMB will be active as 3B9/homecalls from the Rodrigues Island (AF-017) between April 1-8th. After this operation they will then be active as 3B8/homecalls from Mauritius (AF-049) between April 9-17th. Activity is expected to be on all bands using CW and SSB.

3D2, FIJI (Also T2). Operators Bill/N7OU and Bob/W7YAQ are expected to be active this week as 3D2OU and 3D2NB, respectively, from Nadi, Viti Levu Island (OC-016, WLOTA LH-0055), between February 11-16th. Activity will be 160-10 meters, mainly CW but with some SSB and RTTY. QSL via their home callsign. They will leave Fiji and head to Tuvalu. Callsigns will be announced later, but they will be there between February 17th and March 2nd. Their activity on the island will include the ARRL DX CW Contest (February 21-22nd) as a Multi-Single entry.

4S, SRI LANKA (AS-003). Stavros, 5B4AFM, will be active as 4S7FMG between February 9-12th. Activity will be holiday style on 40 and 30 meters using only 100 watts into a vertical on CW and SSB. QSL via M0BBB.

6V,SENEGAL. Belgian operators Patrick/ON4HIL and Guido/ON4BAG will be active as 6V7P and 6V7O, respectively, between February 22-28th. Their QTH will be Le Calao about 70 km from Dakar. Activity will be on 160-6 meters using SSB and digital modes (RTTY, PSK31). Suggested frequencies are: SSB - 1844, 7090, 14245, 18160, 21295, 24985, 28475 and 50150 kHz
RTTY - 7040, 14085, 21085 and 28085 kHz
QSL via their home callsigns, by the bureau or direct (QRZ.com). They have a blog page at: http://www.bloggen.be/6v7o_6v7p

8Q, MALDIVES. Stavros, 5B4AFM, will be active as 8Q7FM from Lhaviyani Atoll (AS-013) between February 13-19th. Activity will be holiday style on 40 and 30 meters using only 100 watts into a vertical on CW and SSB. QSL via M0BBB.

ANTARCTIC ACTIVITY WEEK EVENT NEWS (February 16-22nd). In commemoration of the 6th Antarctic Activity week, Francois, F8DVD, will be using the special callsign TM8ICE between February 8-21st. The WAP reference number is 154. The activity will take place from his home QTH in Macon, the eastern part of France. A special color QSL card showing the TARA polar vessel will be issued. QSL via F8DVD, by the Bureau or direct to:
Francois Bergez, 6, Rue Liberte, F-71000 MACON, FRANCE.

PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

C3, ANDORRA. Operators Finn/OV8FM and Martin/5P1M will be active as C3/OV8FM and C3/5P1M, respectively, between February 10-13th. Activity will be on 40 and 20 meters using SSB, SSTV, RTTY and PSK31. QSL via OV1A.

C6, BAHAMAS. Operators Frederick/K9VV, Henry/N6NC, Victor/WA0USA and Brian/KP2HC will be active as C6AKU from Freeport during the CQWW WPX CW Contest (May 30-31st) as a Multi-2 entry. QSL via K5WW or the LoTW.

CANADIAN SPECIAL EVENT CALLSIGNS. To celebrate 50th anniversary of the opening of the St. Lawrence Seaway, look for Canadian amateurs to use the following prefix between April 1st and May 31st:
XL -> VA XN -> VO
XM -> VE XO -> VY

CN, MOROCCO. Russell, G5XW, will once again be in CN-land between February 13-23rd. He will spend 4 days in Meknes then 6 days in the Middle Atlas Mountains. This is another backpacking type holiday, but he plans to be active as CN2XW using only 100 watts into some sort of wire vertical/ dipole. He may experience some sudden power outages. QSL via G5XW.

CT3/CT9, MADEIRA ISLANDS. A group of German operators will be active as CT9L during the ARRL DX CW Contest (February 21-22nd) as a Multi-2 entry. QSL via DJ6QT. Operators mentioned are: Walter/DJ6QT, Falk/DK7YY, Wolfgang/ DK9VZ, Ulf/DL5AXX, Tom/DL5LYM and Frank/DL8WAA. Outside the contest, operators will probably sign CT3/homecall. QSL via their home callsigns. PLEASE NOTE: DJ6QT and DK7YY will be active between February 17th and March 10th. The rest of the team leaves February 24th.

CT3/CT9, MADEIRA ISLANDS. A group of German operators will be active as CT9L during the ARRL DX SSB Contest (March 7-8th) as a Multi-? entry. QSL via DJ6QT. Operators mentioned are: Adam/DJ0IF, Walter/DJ6QT and Falk/DK7YY. Outside the contest operators will probably sign CT3/homecall. QSL via their home callsigns.

D4, CAPE VERDE. A group of German operators from Bonn and Potsdam will be active from Sal Island (AF-086) between March 11-25th. Each operator will have their own callsign. Activity will be on 160-10 meters using CW, SSB, RTTY, PSK31, Hell, Amtor and SSTV. They plan to have 7 stations with 100 watts and vertical antennas. Operators mentioned (with their callsign) are: Helmut/DL3KBQ (D44TXQ), Holger/DL1COP (D44TXP), Jurgen/ DJ2VO (D44TXO), Gerd/DG3KAF (D44TXF), Henry/DL2RSI (D44TXR), Peter/DH2KI (D44TXI) and Franz/DL3PS/HB9EHQ (D44TXS). QSL via their home callsign, except D44TXS via HB9EHQ.

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operations are approved for DXCC credit:
A5100A - Bhutan; 2008 Operation
T6EE - Afghanistan; Additional documentation has been received to include 2006 and 2007 operations. If you had a QSO rejected for these dates, send a note to dxcc@... to be placed on the list for an update.
TT8HA - Chad; Operations for 2007 and 2008
TT8SK - Chad; Operations for 2008 and 2009
TN5SN - Republic Of The Congo; Current operation effective October 2008
ZA/F4DTO - Albania; 2008 Operation
ZA0/I0SNY - Albania; 2008 Operation
ZA0/I8LWK - Albania; 2008 Operation
ZA0/I8YGZ - Albania; 2008 Operation
ZA0/IK2AQZ - Albania; 2008 Operation
ZA0/IK7JWX - Albania; 2008 Operation

ADDED NOTE: The URL for the DXCC blog has changed. Please point your browser to this address, also, the site has been renamed Century Club Awards Web log to reflect all ARRL awards and certificate programs: http://www.arrl.org/blog/Century%20Club%20Awards

E44M WRAP-UP. The E44M team made 29170 QSOs (CW/10489, SSB/16856, RTTY/1790, PSK31/34 and SSTV/1). A short 4 minute video is now available on their Web at: http://www.dxcoffee.com/e44m/

FR, REUNION ISLAND. Cedric, F4EGZ, will be active as FR/F4EGZ during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (40m)/Low-Power entry. He will use a vertical antenna with only 100 watts.

FW, WALLIS & FUTUNA ISLANDS (Update). The Hungarian team of Eli/HA9RE, Laszlo/HA0NAR and Sara/HA9SDA, active as FW5RE, continue to please many low band operators on 160/80/40/30 meters. There has been some activity over the past weekend on 17 meters CW and 20 meters CW/RTTY. The team will be there until about the end of February. QSL Manager is HA8IB. A Web page is up and running now with updates, pictures and a log search at: http://www.ha0du.com/index.php

GB50, ENGLAND (Special Event). Operators Tim/G4STH and his XYL Hazel/G4YLO will be active as GB50BH between now and March 3rd. Their activity is to commemorate the 50th anniversary of the death of the singer Buddy Holly. Activity this past week has been on 80 meters SSB between 1700-1730z around 3777 kHz. QSL via G4STH, direct or by the bureau.

HA130, HUNGARY (Special Event). Members of a high school radio club called "Puskas Tivadar" (HA5KHC) in Budapest will activate HA130HALLO until March 31st. Activity is to celebrate the 130th anniversary of first appearance of the telephone in Hungary. Operations will be on all bands, mostly on CW, but some activity on SSB, PSK and RTTY. QSL via HA5KHC, by the bureau. No e-QSL please. Listen for details on how to receive a special HA130HALLO memorial diploma.

IOTA NEWS.....
NA-092. Fred, N5IVZ, plans to activate South Padre Island (USI TX-007S, Cameron County, Texas), on February 28th (1400-2300z). There was no mention of a special callsign. This is a special IOTA operation to celebrate 90 years of the U.S. Coast Guard in the Rio Grande Valley of South Texas and to honor the U.S. Coast Guard Auxiliary service of the present, past and future Guardians of the Sea. QSL via his home callsign, direct only.

NA-191. (Update) Operators Klaus/DK6AO, Gunter/TI7WGI, Andy/DH8WR (EA2CRX), Norbert/DL2RNS, Rene/DL2JRM and Daniel/DL5YWM will be active as TI7*** (TBA) from San Jose Island (Guanacaste Province), Costa Rica, between April 17-20th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. QSL via DK6AO, direct or by the bureau. For updates and more info, please visit their Web page at: http://ti7.info

OC-135. By the time you read this, Jerry, P29ZAD, should be active from Buka Island, Soloman Islands, until February 27th. He is there working just North of Buka Town. If possible, Jerry will operate if he has time. QSL via NI5DX, direct or by the Bureau. For more information, please visit Jerry's Blog at: http://p29zad.blogspot.com

SA-080. Operators Orlando/PT2OP and Marcelo/PY6KW will activate Tinhare Island (DIB BA-05), Brazil, between February 20-24th. Look for PT2OP to use the special callsign PX6T, while PY6KW will use homecall/p or possibly a special callsign. PLEASE NOTE: This operation will also count for the Lighthouse of Morro de Sao Paulo (DFB BA-06, ARLHS BRA-157). The team will also activate Boipeba Island (DIB BA-04) in the same island group between February 25th and March 1st. PT2OP will use the special callsign PX6B, while PY6KW will use homecall/p or possibly a special callsign. Activity on both islands will be mainly 40 and 20 meters SSB using only 100 watts into a G5RV antenna. QSL PX6T and PX6B via PT2OP. QSL PY6KW/p via his home callsign.

J7, DOMINICA (Update). John, K3TEJ, will be active as J7N from Dominica (NA-101) between February 11-27th. Activity will be on CW and RTTY with participation in both the CQWW WPX RTTY Contest (February 14-15th) and the ARRL CW DX Contest (February 21-22nd) as Single-Op/All-Band entries. Outside of the contests he will focus on 160/30/17/12 meters. QSL via K3TEJ.

KH4, MIDWAY ISLAND. There seems to be an announcement of a possible operation as K4M between October 5-19th. More details are forthcoming.

KP2, U.S. VIRGIN ISLANDS (NA-106). John, K3CT, will be active as KP2/K3CT between February 18-25th. QSL via his home callsign. Activity will include the ARRL DX CW Contest (February 21-22nd) using the callsign KP2M (QSL via AI4U). Outside of the contest activity will have an emphasis on 30/17/12 meter bands.

KP5, DESECHEO ISLAND DXPEDITION (Update). The Documentary Archive Radio Communication provides, on its Web site <http://www.dokufunk.org>, another special (third) exclusive interview with Co-Team Leader Glenn Johnson, W0GJ, on the coverage of the upcoming K5D Desecheo (KP5) DXpedition. This interview has the latest information on the upcoming operation scheduled for February 12-26th. Listen to the interview at: http://www.dokufunk.org/desecheo
Remember, for updates visit the KP5 Web page at: http://www.kp5.us
Look for K5D this week... Good luck in the pile-ups!

P4, ARUBA (Update). John, KK9A, informs OPDX that he will be in Aruba between February 28th-March 9th and March 25-30th. He plans to be active as P40A again and do a casual effort in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Single-Op entry. He will also be in the ARRL DX SSB Contest (March 7-8th) and the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. John states that he will not be very active outside the contests but will likely spend sometime on 40 meters CW. QSL via WD9DZV.

PJ2, NETHERLANDS ANTILLES (URL Change). Jan, PA4JJ, informs OPDX that he will be on a short holiday trip to the Island of Curacao (SA-006, WLOTA LH-0942) and will be active as PJ2/PA4JJ. He will leave Amsterdam on March 30th and expects to be on the island until April 11th. Jan states that he will be the only ham in a party of 4, so he will try to

be active as much as he can. Activity will be on all ham bands with a focus on 30/17/12 meters and the DIGI modes (RTTY and/or PSK31). QSL cards are direct to PA4JJ. If Jan has access to the Internet, he will provide an online log on his Web site (or as soon as possible after his return home) at: http://www.pa4jj.nl/html/pj2_pa4jj_log.html

PY2, BRAZIL (New Callsign and City). Alex, PY2SEX (aka PY1KS), informs OPDX that he has moved from Campinas to Sao Paulo because of a new job and is back on the air trying to work the new "Triple Play Award" (TPA). He states that he will be on every night on 20 meters calling CQ on RTTY or PSK31. Alex states, "Whatever digital mode and of course if someone wants to go to another mode, I will glad to do that." Also, look for him to be in the ARRL DX CW (February 21-22nd) and PHONE Contest (March 7-8th) to improve his achievement for the TPA. QSL via his home callsign, by the Bureau, direct (see QRZ.com) or LoTW.

QSL INFO AND NEWS.....
NEW QSL MANAGER. With the passing of Ted/DL4DBR (see below under "Silent Key"), Tom, SP5UAF, reports, "For many years Ted was the QSL Manager of Mirek, VK6DXI/SP5IXI, for numerous Mirek's calls. Mirek is a good friend of mine and we are in touch via E-mail all the time. I will be the QSL Manager for his calls 7X0DX and 9M8DX - for past and possible future activities. If you sent your QSL via DL4DBR for the latest 7X0DX activity (September 2008) and still have no answer, please QRX. Teddy, DL4DBR, was very ill during his last weeks and was not able to take care of the QSLing. As soon as possible his wife, Renia, DL3DBR, will send us QSL documents from the last period of time. So from now on, QSL info for 7X0DX and 9M8DX is via SP5UAF. OK to QSL via Polish QSL Bureau, or direct (if you prefer) to: Tomasz Barbachowski, Zeromskiego 10, 05-070 Sulejowek, Poland."

http://www.radioamador.org.br/qsl-busca/qsl.htm

HAVE PATIENCE! More QSL cards are still being received for the many UA4WHX operations. Vlad is still sending them out.

QSLS VIA LOTW: 4A1DXXE, 9M6XRO, 9M6XRO/p, 9M8Z, A25OOK, D4C, F5IN, F5UTN, F6BEE, GM0VRP, GM3MZX, HB9FAP, HI3TEJ, HK0CW, KP4ED, LY9Y, NP2KW, OK1FAK, OX3DB, PA5O, RV6FG, SK3W, SV9CVY, TK5EP, UZ7U, V8FRO, VK9DWX, YB4IR, YS4/K9GY, YS4RR, YV4A, ZD8UW and ZF2XD

QSLS RECEIVED VIA MAIL: 3B8GT, 4A3A, 4W6R, 5R8IC, 8P5A, A25/DL7DF, 9L1X, AM5KB, C57R, CE0Y/N6NO, DU1ZV, E76AQ, EA6VQ, EL2DX, ER/RW3AH, FO/DJ7RJ, FY1FL, GW3YDX, H44MY, H44TO, HK3CQ, HP1/LA5IIA, J3/DM2AYO, KP2/NY6X, KP2/W3AVO, OM7CW, PJ2T, PJ7/W6JKV, S53MM, SV9/DL5AXX, T04X, V31XX, VU4RG, VU4MY, VU7SJ, XU7ABN, YU1AB, YW1TI, Z360M, ZK3AH and ZY0K

QSLS RECEIVED VIA THE BUREAU: 4O60BH, 6K5VRQ, 6L0NJ/4, BX1AD, DK1YF, DR1A, EM10KDR, ER10KDR, ET3JA, J3/S50B, OG5M, OL30SPACE, S51FB, UP21B, UR5LCV, VU7MY, VU7RG, YQ90U and Z360M

SILENT KEY. Tom, SP5UAF, informs OPDX that Tadeusz "Teddy" Barczyk (DL4DBR, ex-SP9ERC) became "SK" on January 2, 2009. Tom states, "We lost a very good friend and solid QSL Manager." For more info, please visit: http://www.qrz.com/dl4dbr
OPDX and its reader would like to send out our deepest sympathy to the family and friends of Dl4DBR. ADDED NOTE: See "QSL INFO AND NEWS" above (under QSL Manger "SK") for details on QSLing changes.

SPECIAL EVENT (6m Op). Andy, N8OFS, will be active as N8O "portable caboose" from Jefferson, Ohio, between June 13-15th, during 1800-0300z. Activity is to celebrate the 25th anniversary for the Ashtabula Carson & Jefferson Railway (AC&J). Look for him to be on FM (52.525, 51.500 and 50.300 MHz) and USB on 50.200 MHz. QSL via N8OFS: Andy Sargent, PO Box 517, Jefferson, OH 44047. For more details about the railroad, visit the Web page at: http://www.acjrscenic.net/history.htm

V2, ANTIGUA (NA-100). Peter, G3TKK, will be active as V25TK between February 27th and March 12th. Activity will be holiday style on 40-17 meters using CW. QSL via G3TKK, direct or by the Bureau.

V5, NAMIBIA. Klaus, DJ4SO, will once again be active as V5/DJ4SO between February 14th and March 12th. Activity will be on 160-10 meters using mostly CW and RTTY/PSK31. QSL via his home callsign, direct or by the bureau. His logs will be uploaded to LoTW.

V8, BRUNEI DARUSSALAM (OC-088). Just a reminder that Sam, G4OHX, will be active as V8FHX between February 11-23rd. QSL via his home callsign.

VK9X, CHRISTMAS ISLAND. Haru, JA1XGI/W8XGI, has changed his trip to the Pacific and will go to Christmas Island (VK9) instead of Central and Western Kiribati (T31 and T30) in November. Look for him to sign as VK9XGI between April 4-11th. Activity will be on all bands, including the lower bands, using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

VY, CANADA. Operators Jeff/N1SNB and Flex/DL7FER will be active from VY2TT QTH as VY2/N1SNB during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Multi entry.

WAAB AWARD AVAILABLE. The radio club "Rio de la Plata" began issuing the W.A.A.B. (Worked Argentine Antarctic Bases) to radio amateurs and SWLs as of April 1st, 2008. To get the award the applicants must show they have worked and confirmed by QSL cards, at least 3 different Argentine Antarctic Bases. Contacts can go back as far as November 9, 2001. The current list of active Argentine Antarctic Bases are:
LU1ZA S.Orkney LU1ZD San Martin LU1ZS Camara
LU1ZAB Matienzo LU1ZG Belgrano II LU1ZV Esperanza
LU1ZB Melchior LU1ZI Jubany LU2ZD Primavera
LU1ZC Deception LU1ZR Petrel LU4ZS Marambio

The W.A.A.B. award is available by E-mail requests to the Award Manager Horacio Ledo, LU4DXU - lu4dxu@... or P.O.Box # 22, Martinez (1640) Buenos Aires, ARGENTINA. He can also supply the rules and fees for the award or visit the following Web page at: http://www.waponline.it/WapAwards/tabid/61/Default.aspx

YN2, NICARAGUA (Update/Callsigns). Operators Stan/AC8W (YN2WW), Hank/K8DD (YN2DD), Jim/KB8TXZ (YN2TX) and Lee/N8LJ (YN2LJ) will be active for one week between February 17-24th. Their activity will include the ARRL DX CW Contest (February 21-22nd) using the callsign YN2DD. Emphasis will be on 160/80 meters and 30/17/12 meters. QSL via info on QRZ.com.

YN2/H7, NICARAGUA. Jeff, N1SNB, will be active from here between March 5-9th for ARRL DX SSB Contest (March 7-8th) from the QTH of Octavio, YN2N. He hopes to sign YN2NB during the contest and H7/N1SNB outside of the contest. He will enter ARRL DX SSB as a Single-Op/All Bands/possibly High-Power or Low-Power (TBD). QSL via his home callsign.

ZF, CAYMAN ISLANDS (Update/NA-016). John, K6AM, will be active as ZF2AM between February 18th and March 4th. He will also be active during the ARRL DX CW Contest (February 21-22th) as a Single-Op/All-Band/High-Power entry, and also the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Single-Op/High-Power entry. John informs OPDX that he will be doing mostly antenna work outside of the contests, but may get on the WARC bands or even 6 meters a bit as time permits. QSL via K6AM, direct or by the Bureau or LoTW.

ZS8, MARION ISLANDS (News). As warned last week, BEWARE OF PIRATE ACTIVITY! The ZS8T Web states, "The ZS8T team would like to report that all DX posts posted on Feb. 2 are 100% bogus. Petrus wasn't operating that day at all. We would also like to inform the Ham Radio Community that 14.300.00 is NOT ZS8T's operating frequency, and that he will tune any other legal clean freq. to operate on 20m." Also, mentioned this week (on February 7th), (edited) "QSL cards for ZS8T are ready to be printed next week. We are proud to present the card which will be received by all stations who managed to contact Petrus on Marion Island. The card has been designed by Stan, SQ8X, and will be printed/sponsored by Emil, LZ3HI. We expect first cards to be sent as soon as mid February." The QSL can be viewed at:
Front - http://zs8t.net/wp-content/uploads/zs8t_front_small.jpg
Back - http://zs8t.net/wp-content/uploads/zs8t_back_small.thumbnail.jpg
Pictures on the QSL were taken by Nico de Buyrn (another scientist working on Marion Island) who has been generously contributing to the ZS8T site several times. For updates and official announcements of the ZS8T operation, please visit the Web site at: http://zs8t.net

9014. Cushcraft MA-160V Antenna

Yahoo group: DX-IS (2009)
Date: 2009-02-09 03:00:38 UTC
From: RICHARD SOLOMON
Topic: 9014 Message: 9014

Is anyone on the list using this antenna ? I find that when it rains,
the resonant frequency goes down by 25 KHz or so. It may not seem
a big deal, but I am curious if this is normal or not.

73, Dick, W1KSZ

9015. Re: [DX-IS] Cushcraft MA-160V Antenna

Hi Dick,

It's been my experience that rain and wet weather in general
tend to lower the resonant frequency of most antennas. Not 100% sure
why, but it must have to do with how they capacitively couple with
ground. It happens with all of my dipoles and both Yagis. Not a
lot, but like you say, 25 KHz or so. Some of my DXing pals have also
mentioned this over the years.

I'm not familiar with the Cushcraft MA-160V, but I'm guessing
it's a 160M vertical?

73, Paul VE1DX

9016. Re: Cushcraft MA-160V Antenna

Water has an extremely high dielectric constant at RF frequencies because it's easy to polarize. If air = vacuum = 1, water = 80.

So it does affect the electric fields around the antenna, like you say, it changes the capacitance.

It's normal. I notice it most on my 160m vertical too, because it's a short base loaded one and has a relatively high electric field as a result. Antennas with a lot of capacitive reactance have it because the energy stored around them is largely stored in the electric field. The stored magnetic field energy that brings them to resonance is fairly localized to the loading coil.

The opposite situation would be a magloop type antenna, where the electric field storage is almost entirely localized to the area between the tuning capacitor plates. I'd actually expect a magloop to detune much less in the rain as long as you kept the area around the capacitor dry. I think that sort of antenna is the only type that would be immune to rain detuning, just because the electric field is contained instead of stored around the high voltage bits of the antenna out at the ends.

9017. M1 calls

Yahoo group: DX-IS (2009)

Hi Rene,

M1C was San Marino in 81-82 I have that. Based on that M1V was most likely to be also. No clue on M6T. Another from that era M1IPA in 82 was also San Marino.

Hey - yur right, Derek ! A contest group. M1Y & M1C was San Marino as per my notes in the log book. M1Y was my confirmed League contact. Dick, yes - I put M* in DXK and all of my 10 contacts came up. Bob, yup, wkd M1C in 1980 and again in 1982 for San Marino. No notes on M1V. Also worked M2000A in 2000 - probably a special event station in England.
tnx for the comments, guys - rene

Update on the K5D DXpedition.....

February 8, 2009
Everyone arrived safely in San Juan PR yesterday; the last group at about midnight. Last night we executed a contract for a helicopter to transport our heavier items including transceivers, amps, generators and shelters.

Fifteen Team Members plus a half-dozen USFWS personnel completed UXO (UneXploded Ordnance) training this morning.

Today was spent transiting from San Juan to our team HQ hotel in Rincon PR. On the way, we stopped at the Arecibo Radio Telescope (http://www.naic.edu), visit courtesy Angel, WP3R.

More news posted here (http://www.kp5.us/) as it becomes available.

Here are some photos taken today from Rincon; click HERE.

---
Operating Modes and Frequencies
These are planned bands, modes and frequencies. Of course these may get adjusted because of QRM:

BAND CW SSB RTTY
---- ------------ --------- -------
160m 1826 up or dn 1843.3 up --
80m 3523 up or dn 3781 up or dn 3589 dn
40m 7023 up 7084 up or dn 7089 up or dn
30m 10106 up -- 10149 dn
20m 14023 up 14190 up or dn 14089 dn
17m 18072 up 18165 dn 18108 dn
15m 21023 up 21295 up 21089 up

12m 24892 up 24987 dn --
10m 28023 up 28470 up 28089 up
6m 50106 up 50130 up

Special Notes:
160m CW: RX - JA -10 kHz; Rest of the world up

80m CW: RX - Rest of the 3525 and up
JA - 0830z QSY ti 3502 and listen up

75m SSB: RX - Americas 3800 kHz and above; Rest of the
world 3799 kHz and below
JA WINDOWS - 3704-3716, 3747-3770 and/or 3793-3805

40m SSB: RX - Americas 7228 kHz and above; Australia 7103 kHz
and above; Rest of the world down

40m RTTY: 7089 will be good for NA, but EU has a hard time hearing
above 7070. They might want to transmit 7050 or so IF they
don't QRM their 40m CW operations
JA RTTY WINDOW: 7025-7045

KP4-5 SSB Transmit windows: 7075-7099, 7125-7300
[They might need to transmit SSB on 7295 (listen down) if
interference with CW on 40m]

Note: On 6m there will be only CW/SSB operations.

Note: They are fully aware of the (U.S.) bands plans and they will
also listen above 14225 kHz.

This is truly sad news. I have quite a few entries in my log with Jim and always enjoyed chatting with him and listening in while he worked a pile up.

Phil
N9LAH

-------- Original Message --------

Please pass on to interested parties I am sorry if I have not included everyone:

It is with deep sadness that I inform you that Jim (VK9NS) passed peacefully away on Norfolk Island at 15:40 local time on 10 February 2009 after a short illness.

Jim is survived by his wife Kirsti (VK9NL) and his four children: Bruce (G3HSR), Stuart, Sheena and Fraser (all living in the UK).

Jim's contribution to Amateur Radio, DX-ing and IOTA is inestimable. He will be sadly missed.

Further information and condolences can be sent to Kirsti at jimkirsti@... <mailto:jimkirsti@...>

Bruce (G3HSR)

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network the KP5 Web Page and VH2HV for the following DX information.

JIM SMITH VK9NS (SK).....
Bruce (G3HSR) reports (via VK2HV): It is with deep sadness that I inform you that Jim (VK9NS) passed peacefully away on Norfolk Island at 15:40 local time on 10 February 2009 after a short illness.
Jim is survived by his wife Kirsti (VK9NL) and his four children: Bruce (G3HSR), Stuart, Sheena and Fraser (all living in the UK).
Jim's contribution to Amateur Radio, DX-ing and IOTA is inestimable. He will be sadly missed. Further information and condolences can be sent to Kirsti at jimkirsti@...

FROM THE EDITOR (by KB8NW): After coming home from work today, I was shocked when I read my very first E-mail about Jim. Dxers throughout the world have lost one of their greatest icons in DXing. Noted for his DXpeditions to rare place, the "Heard Island DX Association" <http://www.hidxa.nlk.nf>
and keeping Norfolk Island active on the air, Jim will surely be missed. Many will probably remember Jim for his famous 1983 VK0JS Heard Island DXpedition (along with his wife Kirsti/VK9NL signing VK0NL). If you are new to DXing and do not know about Jim, please take a few minutes to visit the Web page above and learn about this DX legend.
OPDX and its readers would like to send out our deepest sympathy to Jim's wife Kirsti and his four children Bruce/G3HSR, Stuart, Sheena and Fraser. Jim's signal will surely be missed on the air.

K5D DXpedition Update
Dated - February 10, 2009

The K5D Team continues to prepare for its early Thursday AM departure for Desecheo Island. Last night the team met and had dinner with USFWS participants, law enforecement personnel and members of the field research

team. Due to continued questionable weather (which for some weeks has
included large waves, dangerous surf, high winds and rain unusual for
this time of year), the Team has made an important strategic decision.

For safety reasons, all personnel and equipment will be transported to
Desecheo Island by helicopter. The possibility of Team members and crew
members being injured, vessels being damaged and equipment being lost
during a sea landing was too great a chance to take.

Today, all of the equipment, supplies, antennas, generators, food,
shelters, tables, chairs and so forth were unloaded from the storage
facility and loaded into a large moving van for transfer to the helicopter
pad.

Tomorrow, representatives of the helicopter company will meet the Team,
examine the cargo and prepare it for transit via sling load on Thursday
morning. A second helicopter will ferry personnel. Because we're limited
to only fourteen days on the island, doing it this way will allow us to get
on the air sooner, stay on the air longer -- and all with a higher degree
of safety.

The Team has voted, if necessary, to contribute more money of their own
to help contain these incremental costs.

If you're inclined to contribute more to help, it would be appreciated.

If anyone else got a notification that the URL http://www.hidxa.nlk.nf is "suspicious" just copy & paste it into your browser. Or, you can enter HIDXA into Google and it will point you in the right direction.

Does anyone know how old Jim was at his passing?

SB DX ARL ARLD006
ARLD006 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MALDIVES, 8Q. Stavros, 5B4AFM is QRV as 8Q7FM from the Lhaviyani Atoll, IOTA AS-013, until February 19. Activity is on 40 and 30 meters using CW and SSB. QSL via M0BBB.

GHANA, 9G. Rob, PA3DEW and Vincent, PA3FQX will be QRV as 9G1AA from Dormaa Ahenkro beginning February 14. They plan to be active on 20 meters around 1600z. QSL via PA3ERA.

TONGA, A3. Bert, CX3AN will be QRV as A35HA from Tongatapu Island, IOTA OC-049, beginning February 14 for one week. Activity is on 40 to 6 meters, with an emphasis on 30 and 17 meters, using CW and SSB. QSL to home call.

CAPE VERDE, D4. Girts, YL2KL will be QRV as D4C as a Single Op/All Band/Low Power entry in the CQ WW WPX RTTY contest. QSL via CT1ESV.

ESTONIA, ES. Station ES5Q will be a Multi/Single entry in the CQ WW WPX RTTY contest. QSL via ES5RY.

HUNGARY, HA. Members of the Puskas Tivadar radio club are QRV from Bucharest using special event callsign HA130HALLO until March 31 to commemorate the first telephone usage in Hungary 130 years ago. Activity is on all bands using mostly CW but also in SSB, RTTY and PSK. QSL via HA5KHC.

THAILAND, HS. Champ, E21EIC is QRV as E21EIC/8 from Southern Thailand until February 16. This includes an entry in the CQ WW WPX RTTY contest. Japanese stations QSL via JR5XPG and all others via E21EIC.

PANAMA, HP. Members of the Radio Club of Panama and the Panama Canal ARA will be QRV as H81L on February 14 and 15 from the Lighthouse ARLHS PAN-030 at Miraflores Locks. Activity will be on all bands and modes. QSL via HP1RCP.

DESECHEO ISLAND, KP5. A group of operators are QRV as K5D until February 26. Activity is on 160 to 6 meters using CW, SSB and RTTY. QSL via N2OO.

GREECE, SV. Demetrius, SV2GWY will be QRV as SX2CM on February 14 and 15 to honor the brothers Cyril and Methodius. QSL direct to home call.

BELIZE, V3. Operators AB7RW, AC7UH, KT7G and N7WO are QRV as V31RW, V31UH, V31TB and V31WO, respectively, until February 24. This includes being an entry in the CQ WW WPX RTTY contest as V31TB. QSL via operators' instructions.

NAMIBIA, V5. Klaus, DJ4SO will be QRV as V5/DJ4SO from the Matunda Guest Farm from February 15 to March 12. Activity will be on 160 to 10 meters using CW, RTTY and PSK. QSL via bureau.

BRUNEI, V8. Sam, G4OHX is QRV as V8FHX until February 23. Activity is on 80, 40 and 20 meters using mostly CW. QSL direct to home call.

TURKS AND CAICOS ISLANDS, VP5. John, KX7YT and Rob, N1KEZ are QRV as VP5/homecalls from Providenciales, IOTA NA-002, until February 15. This includes being entries in the CQ WW WPX RTTY contest. QSL to home calls.

INDONESIA, YB. Look for YE1ZAT to be a Multi/Single entry in the CQ WW WPX RTTY contest. QSL via bureau.

NICARAGUA, YN. Operators K8DD, AC8W, N8LJ, KB8TXZ will be QRV as YN2DD, YN2WW, YN2LJ and YN2TX from February 17 to 24. Activity is on all bands and modes. This includes an entry in the upcoming ARRL DX CW contest as YN2DD. QSL via operators' instructions.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Chad, TT8JT, 2008 operation.

THIS WEEKEND ON THE RADIO. The CQ World Wide RTTY WPX Contest, NCCC Sprint, North American SSB Sprint, YLRL YL-OM Contest, PODXS 070 Club Valentine Sprint, New Hampshire QSO Party, Asia-Pacific Spring CW Sprint, Dutch PACC Contest, KCJ Topband CW Contest, Louisiana QSO Party, OMISS SSB QSO Party, FISTS Winter CW Sprint and RSGB 1st 1.8 MHz CW Contest will certainly keep contesters busy this upcoming weekend. The Run for the Bacon QRP Contest is scheduled for February 16. The AGCW Semi-Automatic Key Evening is scheduled for February 18. Please see February QST, page 82 and the ARRL and WA7BNM contest web sites for details.

K5D DXpedition Update
February 12, 2009

Per Glenn W0GJ: 1600z: "About half done moving gear to island. Things going well. Very, very HOT!"

At 1240Z the first helicopter with five Team Members aboard took off from Rincon and a few minutes later landed safely on Desecheo Island. The K5D Desecheo 2009 DXpedition is officially ON!

QRV (single transmitter only) still planned near 0200Z tonight.

K5D DXpedition Update
February 12, 2009

February 12, 2009
Per Glenn W0GJ and Bob K4UEE @ 23:45Z: "Heavy winds during the day delayed several helicopter flights so we're running quite a bit behind schedule. For example, we had to wait until the last helicopter trip to begin erecting shelters. We're all exhausted and have quite a bit of infrastructure work yet to do (in the dark). Regrettably, this will delay our planned QRV until (hopefuly) near 1600Z tomorrow (Friday). We're sorry to disappoint those expecting us on the air tonight.

9033. What's up with YT3AA

Yahoo group: DX-IS (2009)
Date: 2009-02-13 13:52:18 UTC
From: Paul M Dunphy
Topic: 9033 Message: 9033

I worked YT3AA once in my life on 13 Oct 2008. He gets on 20M
and calls CQ various times, but if I call him he sends "VE1DX QSO B4"
and resumes calling CQ. Is this some sort of special event
station/contest/marathon? It's not like he has a pileup. Sometimes
he's calling CQ 4-5 minutes with no takers. He's done this to me
twice in the past month, so obviously I won't ever call him again.

QRZ.COM says, "Radio Amateurs, if You have 5 QSO from Denominate
Signs, you get Free Degree only 2 IRC. And if you have 9 QSO from
Denominate Signs you get Special Award" so maybe it's an award thing.

Anyone know what is special with this station, or is it just me
he doesn't like? :-)

73, Paul VE1DX

Paul:

His QRZ.com listing looks like he is publicizing some kind of award for working specified numbers of the call signs which are listed. Could be a club or maybe calls he's used for special events. It's not among the awards from Yugoslavia listed in my Directory. The information is hard to understand, I agree.

+ JIM SMITH, VK9NS +

The DX community worldwide mourns the loss of James B. Smith, VK9NS, who passed peacefully away on Norfolk Island on 10 February after a short illness. First licenced in 1947 as VS1BQ (Singapore), over sixty years Jim operated under a large number of callsigns and from many countries all over the world, including new and rare DXCC entities and IOTA groups (A35MR, A51JS, A52JS, H40AB, S21ZA, T31JS, T33JS, VK0JS, VK9WW and W1RZ/KH9, just to name a few). "I mention being dragged 'kicking and screaming' into the hobby", he said in his autobiography ("The Old Timer"), "but once there now feel that I have participated in the hobby in many ways. I have been lucky (if that is the right word) to have travelled extensively and often the travel has been related to Amateur Radio in the sense of DXpeditions. I have always been interested in DXing and being able to give something back to the hobby has been lots of fun and dare I say it often hard work". The stories of a number of his DX operations can be found on the website of the Heard Island DX Association (www.hidxa.nlk.nf), formed in 1980. Jim's inestimable contribution to DXing was acknowledged in 1986, when he was inducted into the CQ DX Hall of Fame.
Jim is survived by his wife Kirsti (VK9NL) and his four children: Bruce (G3HSR), Stuart, Sheena and Fraser, all living in the UK. Condolences can be sent to Kirsti at jimkirsti@...
"A Tribute to Jim B. Smith, VK9NS" can be found on the Documentary Archive Radio Communication's website (http://www.dokufunk.org/vk9ns).

>>> K5D * DESECHEO ISLAND <<<

Due to continued questionable weather (large waves, dangerous surf, high winds and rain unusual for this time of year), the K5D Team decided that all personnel and equipment (more than seven tons) would be transported to Desecheo Island by helicopter. The first flight with five team members took off from Rincon, Puerto Rico at 12.40 UTC on 12 February, but heavy winds during the day delayed several helicopter flights. The team was quite a bit

behind schedule, and K5D became QRV at 16 UTC on 13 February.
The team consists of 22 operators: eight of them (K4UEE, K9SG, N4GRN, NA5U, VE7CT, W0NB, W0RUN and W8OI) will remain on the island through 26 February; other seven (K0IR, K5AND, N6MZ, W0GJ, W2GD, W6IZT and WB9Z) will leave Desecheo on 19 February and be replaced by the third group of seven (K0JGH, K1KD, K5AC, N4NX, NP4Z, VA7DX and WP3MW).
K5D will be QRV on 160-10 metres CW, SSB and RTTY, with eight stations for the HF bands, plus one station for 6 metres (SSB and CW). Suggested frequencies (please read the Special Notes on the website) where to find K5D are: 1826, 3523, 7023, 10106, 14023, 18072, 21023, 24892, 28023 and 50106 kHz (CW); 1843.3, 3781, 7084, 14190, 18165, 21295, 24987, 28470 and 50130 kHz (SSB); 3589, 7089, 10149, 14089, 18108, 21089 and 28089 (RTTY).
Bookmark www.kp5.us for updates, propagation charts, on-line logsearch and detailed information on how to contribute, as financial support is still being sought and very welcome.
An Online QSL Request System (OQRS) will be activated after the DXpedition goes QRT. You will be able to request your QSLs one of four ways: OQRS Direct, OQRS Bureau, direct mail to N2OO (Bob Schenck, P.O. Box 345, Tuckerton, NJ 08087, USA) or via bureau to N2OO.

8Q - After operating as 4S7FMG from Sri Lanka (AS-003, 9-12 February), Stavros, 5B4AFM has moved to the Maldives (AS-013) and will be active holiday style as 8Q7FM until 19 February. He operates CW and SSB mainly on 30 and 40 metres. QSL for both calls via M0BBB. [TNX NG3K]
C6 - Once again Bob, N4BP (C6AKQ) and Kevin, K4PG (C6APG) will be active from the Bahamas on 18-22 February. They plan to operate on 160 metres and either 40 or 80 metres during the ARRL DX CW Contest, and to concentrate on 30, 17 and 12 metres between antenna jobs. QSL via home calls. [TNX NG3K]
GU - Lionel, MU0GSY will air two special event callsigns from Guernsey (EU-114) to celebrate the 40th anniversary of the Worked All Britain Awards Group: GP4WAB on 14-15 February and GP7WAB on 21-22 February. All of the QSOs will be confirmed automatically via the bureau. [TNX VA3RJ]
J3 - Bill, K4LTA (J37BO) and Ruby, K4UPS (J37RO) will be active again from Grenada from 18 February until 4 March. Bill will participate in the ARRL DX CW Contest as J38A. They will be joined by AK4Z, KT4E and KE4TG, who will be QRV as J3/home call. [TNX QRZ-DX]
PY - Participating stations in the South American Lighthouses Weekend (20-22 February, http://www.grupodxbb.com.ar/faros.htm) include Hamilton, PY6HD as ZZ6Z from Subauma Lighthouse (QSL via PY6HD); Ramon, PY6KY as PS6T (requested call) from Itapua Lighthouse (QSL via PY6KY) and Scout station PY1GE from Ponta Negra Lighthouse (QSL via PY1NEZ). [TNX PY1NEZ]
PY - PX6B is the callsign that Orlando, PT2OP will be using from Boipeba Island (SA-080) on 25 February-1 March [425DXN 927]. QSL via home call. [TNX PY1NEZ]
TU - Paolo, F8ENY will be active as TU/F8ENY from San Pedro, Ivory Coast from 16 February to 2 March. He will operate mainly on 20

metres. [TNX F5NQL]
UA_ant - Nick, RW6ACM (ex R1ANL) is active as R1ANB from the Russian Antarctic station Mirny. He operates CW and SSB on the HF bands and will remain there for the next few months. QSL via RN1ON, direct or bureau. [TNX RN1ON]
UR - Celebrating the 50th anniversary of Ukrainian club station UB5KFF, special callsign EM50KFF will be aired on all bands and modes from 14 February to 1 March. QSL via US0KW, direct or bureau. [TNX US0KW]
V6 - Mike, KM9D (V63MY) and Jan, KF4TUG (V63TO) are now lying to anchor in the lagoon of Nukuoro Atoll (OC-259), Micronesia. They will remain there "for not less than 3 days". QSL via OM2SA. Their next stop might be Kapingamarangi Atoll (OC-163), some 300 kilometres south of Nukuoro. Keep an eye on their course at http://www.findu.com/cgi-bin/track.cgi?call=KM9D [TNX The Daily DX]
YN - Hank/K8DD (YN2DD), Stan/AC8W (YN2WW), Lee/N8LJ (YN2LJ) and Jim/ will be active on all bands and modes from Nicaragua on 17-24 February. They will participate in the ARRL DX CW Contest as YN2DD. Check www.qrz.com for QSL information. [TNX K8DD]
YS - Eric, K9GY will be active again from El Salvador on 18-23 February, including an entry in the ARRL DX CW Contest (21-22 February). He plans to concentrate on 160, 30, 17 and 12 metres before the contest. QSL direct to home call, or (preferably) via LoTW. [TNX The Daily DX]
Z3 - Members of the Macedonian Telegraphic Group (MCWG) will be active as Z30MCWG from 20 February through 31 December. They will operate mainly CW on all of the HF bands. QSL direct to Z35M. [TNX Z35M]

ANTARCTIC ACTIVITY WEEK ---> The Worldwide Antarctic Program has announced that the sixth Antarctic Activity Week will be held from 16 to 22 February. The aim of this annual event is to promote worldwide interest in the Antarctic continent. Several special event callsigns from around the world are expected to take part in this year's AAW. Participating stations (QSL via operator's instructions) are announced from the following countries:
Austria OE3AGA/AAW, OE3AIS/AAW, OE3HM/AAW, OE3KKA/AAW, OE3RPB/AAW, OE3SGA/AAW, OE3WWB/AAW
Bulgaria LZ06ANT, LZ09IPY
Canada VA2WAP, VA3AAO, VA3WAP, VA7AAW
England GB0ANT, GB4IPY
EU Russia UE6ICE
France TM0ANT, TM1ANT, TM5ICE, TM8ICE
Germany DA0ANT, DR09ANT
Italy IA0IPY, II2ANT, II5AM, II5ANT, IP9IPY, IR1ANT, IR1WAP, IR2WAP, IU2ANT, IU8ANT, IY8WAP
Morocco 5D0IPY
Slovenia S50IPY
Spain EG2ANT
Switzerland HE8ICE
Ukraine UR2XO/WAP, UR5KCC/WAP, UR5KGG/WAP, UR8LV/WAP, UT1KY/WAP, UT7UA/WAP

USA K4A, N5T/ANT, W6A
Full information on the AAW can be found at http://www.waponline.it

ANTARCTIC ADVENTURE ---> CE9XX, FT5YJ and VP8DLM are the callsigns issued to Mehdi, F5PFP for the Antarctic cruise [425DXN 888] that will take place between 18 February and 17 March (http://www.french-polar-team.fr/). Plans are to visit and operate from several Antarctic bases located in the South Shetlands (AN-010) and Palmer Archipelago (AN-012), as well as on the Antarctic mainland (AN-016). Mehdi and Jean-Pierre, ON7ZM plan to operate mainly SSB on 20 metres (14315 kHz), with some activity on 17, 30 and 40 metres. QSL via F5PFP, direct or bureau. [TNX F5PFP]

CQ WW WPX RTTY CONTEST ---> A number of changes have been made in the 2009 rules, including the SWL category (thanks to Marek, SP7DQR, who has written SWL log check software and to Dan, I1-12387, who will lead the SWL log checking). Please visit http://www.cqwpxrtty.com/ for complete information on the contest. The following stations have announced their participation in this year's event (14-15 February):

Call	Category	DXCC	QSL
4M5DX	M/S HP	Venezuela	IT9DAA
D4C	SOAB LP	Cape Verde	qrz.com
EF8M	SOAB HP	Canary Is	RD3AF
ES5Q	M/S	Estonia	ES5RY
HI3CCP		Dominican Republic	ON4IQ
HI3TEJ	SOAB LP	Dominican Republic	ON4IQ
J7N	SOAB	Dominica	K3TEJ
LQ0F	SOSB 40m LP	Argentina	EA5KB
LS1D	M/S	Argentina	LW9EOC
LT0H	SOAB HP	Argentina	EA7FTR
LT2F	SOAB LP or SOSB 20m	Argentina	EA5KB
LV6D	M/S	Argentina	EA5KB
NP3U	M/2	Puerto Rico	WP4U
TC3EC	M/S	Turkey	TA3GO
UU7J	M/?	Ukraine	UU0JM
V31TB	M/?	Belize	KT7G
WA2USA/4		USA	WA2USA
WP4I	SOSB 80m	Puerto Rico	W3HNK
YN2S		Nicaragua	W3HNK
Z37M	M/?	Macedonia	Z37M

Do not forget to give a look at the Announced Operations listing maintained by Bill, NG3K at http://www.ng3k.com/Misc/cqrjwpx2009.html - good contest to you all!

14TH IOTA DINNER ---> The 14th Annual Islands On The Air (IOTA) Dinner will be held on Friday, 17 April 2009, in the Plaza Room of the Holiday Inn Hotel and Conference Center, in conjunction with the 60th annual Visalia International DX Convention (http://dxconvention.org/). For additional information regarding this event, please contact Ray Benny, N6VR (rbenny@...) or Will Costello, WC6DX (wc6dx@...). [TNX N6VR]

ANDORRA ---> The Andorran Radioamateurs Union (URA) reminds that the local administration has not implemented the CEPT Recommendation T/R 61-01. Therefore any C3/homecall activity should be regarded as illegal. The up-to-date list of licenced amateurs can be found at http://www.ura.ad/

DXCC NEWS ---> TT8JT (Chad, 2008 Operation) has bee approved for DXCC credit. [TNX NC1L]

IARU NEWS ---> Balloting by IARU Member-Societies on four proposals presented to them in September 2008 was completed on 10 February 2009. Seventy-three Member-Societies cast votes or abstentions on the four proposals, which have been adopted. They concerned the ratification of the nominations of Timothy S. Ellam (VE6SH/G4HUA) and Ole Garpestad (LA2RR) to serve respectively as President and Vice President of the IARU for a five-year term beginning on 9 May 2009, and the admission to the IARU of the Emirates Amateur Radio Society (EARS) and the Kazakhstan Federation of Radiosports and Radioamateur (KFRR).

QSL 9M6JC ---> Buzz, NI5DX is the new QSL manager for John Lee, 9M6JC. Buzz will be able to answer all requests for contacts made with John, but there will be a delay in sending out cards until 9M6JC sends some blank cards to NI5DX. New cards will be ordered shortly and will take about 5 weeks to arrive after the order goes to the printer. [TNX K1XN and The Golist]

WAAB AWARD ---> Sponsored by the Radio Club Rio de la Plata (www.lu5da.org.ar), is it issued to licenced amateurs and SWLs for contacting amateur radio stations located at the various Argentine Antarctic bases. The Award Manager is Horacio Ledo, LU4DXU (lu4dxu@...). [TNX W9KNI]

+ SILENT KEYS + Other recently reported Silent Keys include George Beasley (5B4AGC/G3LNS), Niklaus Oser (HB9EAA), Bill Leahey (K0ZL), Karyn W. Allen (KA0K), Harry Nishiyama (KH6FKG), Luis Soares Beirao (S92LB), Leo J. Boberschmidt (W3LEO/MM0LEO), Donald G. Lemley Sr (W8DL) and Brice Anderson (W9PNE).

SB PROP @ ARL $ARLP007
ARLP007 Propagation de K7RA

ZCZC AP07
QST de W1AW
Propagation Forecast Bulletin 7 ARLP007
>From Tad Cook, K7RA
Seattle, WA February 13, 2009
To all radio amateurs

SB PROP ARL ARLP007
ARLP007 Propagation de K7RA

Sunspots returned this week, or one did, but it is an old Cycle 23 spot. Sunspot 1012 has been visible the last couple of days, February 11-12. It is down near the Sun's equator, which is typical for spots from a previous cycle. Nice to have a sunspot, but it doesn't indicate activity from the new Cycle 24, which has been so eerily quiet.

We saw a few days this week when the geomagnetic activity was very, very low. Look at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt and note all the zeroes from February 8-10 in both the middle latitude and high latitude numbers.

We could see some geomagnetic activity this weekend due to energy from a solar wind stream. The predicted planetary A index from NOAA for February 13-19 is 5, 10, 15, 10, 5, 5 and 5. Geophysical Institute Prague sees slightly earlier activity, with quiet on February 13, unsettled February 14, quiet to unsettled February 15, and quiet February 16-19.

If we get at least a few days that have a sunspot number of 11 (this is the minimum non-zero sunspot number), it makes a difference in the MUF of many paths. For instance, with no sunspots, the projected path from Philadelphia to France for today shows MUF values every half hour from 1500-1900z as 17.7, 18.2, 18.5, 18.6, 18.5, 18.4, 17.4, 16.5 and 15.4 MHz. With a sunspot number of 11 for several days, the MUF values change to 19.4, 20, 20.1, 20.1, 20, 19.5, 18.3, 17.3 and 16.2 MHz.

Over the same path, with no sunspots over the same time period the odds of communication on 17 meters would be 25-50% at 1500z, 50-75% at 1530-1730z, 25-50% at 1800z, and less than 25% at 1830-1900z.

With a sunspot number of 11 for several days, the same Philadelphia to France path would have odds of success on 17 meters of 75-100%

from 1500-1700z, 50-75% at 1730-1800z, 25-50% at 1830z, and less than 25% at 1900z.

Last week's Propagation Forecast Bulletin ARLP006 contained a comment about 10-meter propagation, and that Great Britain used a system operating from 30-50 MHz in the World War II era for over-the-horizon radar, known as Chain Home.

This brought an interesting email from Brett Graham, VR2BG about Chain Home, and later HF OTH radar systems. Brett says Chain Home operated on 20-30 MHz. For images of Chain Home antenna towers, look at, http://static.panoramio.com/photos/original/5004131.jpg, http://static.panoramio.com/photos/original/5173635.jpg and http://tinyurl.com/dx3h38.

You can watch an online video of Brett explaining the history of OTH radar and modern uses at a multimedia messaging server at, mms://max-server.net/2008_vr2bg. Just click on that link, or paste it into your web browser's URL field without the usual http at the front. This was recorded at the 2008 Asia-Pacific DX Convention in November in Osaka, Japan.

Many of us recall the Russian Woodpecker OTH system of past years, and the huge amount of QRM it generated all over the HF spectrum. Check out some photos of those systems at, http://www.techblog.tomksoft.com/data/duga-3/receiver-antenna.jpg, http://2.bp.blogspot.com/_Yaoe2Ha8Lpk/SFHwGDeOQGI/AAAAAAAABVs/oUCKSlQsjPI/s320/Duga3.jpg
and http://www.techblog.tomksoft.com/data/duga-3/antennas.jpg.

I believe at least one of those images is from inside the Chernobyl exclusion zone. Brett comments on the video that it took a lot of electrical power to drive those huge arrays. On the video Brett gives a great deal of information concerning current HF OTH systems operated by different countries, and the type of threat they present to HF communications.

Joe Schroeder, W9JUV of Glenview, Illinois sent this memory of Chain Home signals after World War II:

"N6TP's comment on Chain Home radar really brought back memories! I was a newly minted ham in 1946 and when 10 (the only HF band the military had released for ham use!) opened to Europe in the fall we used the Chain Home buzz on the high end of the band to judge band conditions to Europe. I was using a home made two element Yagi roped to the top of the chimney and 50 watts to an 807. When the FCC gave us the 27 Mc band we'd sometimes work Europe duplex by calling CQ continuously on 11 and announcing 'Tuning 28.3 to 28.4 for any calls.'"

He continues, "My 807 and I had 52 countries worked when I finally went high power with a rebuilt pre-WWII amp running a pair of

TZ-40s. Heady days for a young high school kid!"

Richard Weil, KW0U of St. Paul, Minnesota wrote to tell us about working DX with a modest station. He has a half-wave 20 meter dipole in the attic of his condo, and runs around 100 watts. He wrote, "On 31 January at 2310Z I was listening on 14.247 when BX5AA, Jimmy in Taiwan, came in clear. We had a solid 2-minute QSO. Checking later I realized we were right on the greyline--my sunset time matched his sunrise. (Years ago I did just the reverse to nail Marion Island.) Watching for conditions like this can sometimes be surprising--and rewarding!"

You can see a photo of Richard and more of his comments at, http://www.qrz.com/db/kw0u/.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for February 5 through 11 were 0, 0, 0, 0, 0, 0, and 11 with a mean of 1.6. 10.7 cm flux was 70.1, 70.1, 71.1, 71.2, 70.7, 67.6, and 70.3 with a mean of 70.2. Estimated planetary A indices were 7, 2, 3, 4, 4, 3 and 5 with a mean of 4. Estimated mid-latitude A indices were 6, 1, 1, 0, 0, 0 and 2 with a mean of 1.4.

9039. Power Line Noise and Cure

Yahoo group: DX-IS (2009)
Date: 2009-02-13 21:47:34 UTC
From: RICHARD SOLOMON
Topic: 9039 Message: 9039

Last week I started to hear +30dB over S9 noise pulses on the FT-2000.
They were random, so I eliminated electric fences.
I called my power company and found out that they have an RFI specialist
who has a truck load of equipment and just deals with power line problems.

The fact that he is a Ham also didn't hurt !

He was out the next day and a few days later had a line crew out fixing
the problems. One problem he couldn't touch was a losse ground wire on
a competitors power pole. But, their RFI guy came out and he is also a
Ham.

Now if this were back in the Boston area, first, you couldn't find an RFI
guy and second, they would only respond after the problem intensified
to the point that something blew up !!

Needless to say, I am suitably impressed.

73, Dick, W1KSZ

9040. Re: [DX-IS] The king of PSK

Yahoo group: DX-IS (2009)
Date: 2009-02-14 02:10:07 UTC
From: CSM(r) Gary Huber
Topic: 9034 Message: 9040

Thanks for the kind words Paul. I do not yet have DXCC on PSK-31 but that is a goal. Checking DXKeeper, for PSK-31 I have 56 worked, 21 confirmed in LOTW in a little over four months. I am trying to generate more DX activity on PSK-31 by spotting what I'm hearing / seeing on the Stations Heard screen of WinWarbler in the DXLab Suite then generating a weekly QSN Report using SpotCollector which I email to Carl Smith for publication in QRZ DX.

I try to listen for / work PSK-31 DX stations mornings just after local sunrise and late afternoon using my Corsair II and TH7 at 50'. I also try to verify each station callsign with Pathfinder and I use PropView and DXView to try to validate the more rare / unique stations. To be honest I enjoy the QSN Reporting and don't call as often as I should to get stations in my DXKeeper log and LOTW.... maybe I should see if I can get DXCC PSK-31 via LOTW before Dayton this year.

I'll look for you at the DX Dinner "Happy Hour"

Best regards,

Looks like you are whipping them off on PSK31, Gary. Some pretty good stuff there. I need to hone my PSK31 skills . . . you must have DXCC on the mode! Congratulations.

If you find out, Peg, let us know. I'm no more interested in them (RTTY, PSK, any of the digital stuff) than I am in another hole in my head and I'd sure love to get rid of the spots also.

BTW, I called for a little while in the zoo on K5D on 20 earlier but gave up. I also called on 30 for a while but gave up because they weren't working much north of New England and I didn't hear a single VE worked in more than 40 minutes. I need some band fills, especially the WARC bands, and, believe it or not, 80 CW.

SpotCollector determines a spot's mode by inspecting its notes and considering its frequency. You can filter by mode -- and by many other parameters. Its free via www.dxlabsuite.com .

Dave's recommendation applies to the DX Labs suite, which I use and highly recommend. (SpotCollector is a module of this package.) However, if you are simply using a telnet client to connect to a DX Cluster, you should be able to use the cluster's Help command to figure out how to filter out digital modes.

The problem is I can't tell you exactly how because there are various flavours of DX Clusters (AR Cluster, CC Cluster, DX Spider, etc.) The filter commands vary slightly from system to system. All I can suggest is learn the band segments where the digital modes are prevalent, and use the appropriate filters on your cluster to suppress spots in that range.

Like anything else, the digitals modes are an integral part of Ham radio. Maybe instead of trying to filter them out, get a program that supports them (such as DX Suites' WinWarbler) and spend an hour or so learning how to use it. RTTY and PSK open up a whole new world of DXing, and at the bottom of the cycle when the action is slow, perhaps the thrill of chasing a new DXCC mode is more interesting than learning how to filter out the spots. I did it (and still do), and it was/is fun.

73, Paul VE1DX (DXCC RTTY #467 in 1993)

9045. K5D observations

Yahoo group: DX-IS (2009)
Date: 2009-02-14 20:14:17 UTC
From: Mark Lunday, WD4ELG
Topic: 9045 Message: 9045

20 meter CW, first full day of ops, 2000 UTC. I worked them from NC with 100 watts into a hex beam. Took about 40 minutes of calling. Here are some thoughts from my end:

1. Whoever is doing the CW on 20 is OUTSTANDING. Keeps the rate going consistently at 2 per min, and insists on call repeats with "DL? KN" and does not tolerate tail-enders.

2. How the ops listen to the overwhelming CW signals is amazing, it is a real CRUSH of tones. And it sounds like TOTAL chaos. These guys are top notch.

3. I tried to use the technique of "follow the pack" but so many stations calling even when he asks for a specific station, I can't tell what freq he is listening to. So I picked a frequency in the middle that sounded fairly clear, crossed my fingers, and kept at it. Finally paid off. Luck!

4. There are as many EU stations being worked as there are NA, and this is a good thing.

Number 252, and I will be sending a donation to these guys!

DX IS!

I do not see any of the big guns in the K5D log. This lil pistol made 3 qso's and I am not in log, yet.

K5D 15M SSB - "bye the numbers" ..... I heard the SSB Op "spread them out" by "listening 21305 to 21315". Then I observed he was working eights at 21310. When he went to NINES, I called on 21310 and was the one he came back to.

Subject: [DX-IS] K5D observations

20 meter CW, first full day of ops, 2000 UTC. I worked them from NC with 100 watts into a hex beam. Took about 40 minutes of calling. Here are some thoughts from my end:

1. Whoever is doing the CW on 20 is OUTSTANDING. Keeps the rate going consistently at 2 per min, and insists on call repeats with "DL? KN" and does not tolerate tail-enders.

2. How the ops listen to the overwhelming CW signals is amazing, it is a real CRUSH of tones. And it sounds like TOTAL chaos. These guys are top notch.

3. I tried to use the technique of "follow the pack" but so many stations calling even when he asks for a specific station, I can't tell what freq he is listening to. So I picked a frequency in the middle that sounded fairly clear, crossed my fingers, and kept at it. Finally paid off. Luck!

4. There are as many EU stations being worked as there are NA, and this is a good thing.

Number 252, and I will be sending a donation to these guys!

DX IS!

Congratulations, Mark! These guys are indeed a class act, and
they have on CW operator that seems to have the operation prowess Don
Miller reportedly had. On 40 tonight he was listening to the pileup
for 10 seconds and then pealing off 2-3 calls and reports at 30+ WPM,
repeatedly. Seemed to be hauling the calls out from memory after
just that 10 second listen. How he could keep all that straight and
log at the same time is beyond comprehension! An operator like that
comes along once every 10-20 years at most.

The pileups I've listen to have been well behaved also. Given
the rarity of KP5, especially in EU and AS, there has been very
little jamming, etc. This one, if it continues as it is, is going to
challenge the VP6DX record for the best DXpedition ever.

The way this is going, one can expect a KP1 operation soon. Who
would have thought? That's how this stuff works. BS7H was

considered impossible and it happened. These two were off the air for 15 years or so, and it looks like that has ended. Don't write off 70 or P5 either. When we least expect it, something will change and they'll come on. They always do!

73, Paul VE1DX

Agree with Pauls remarks 110%!

Just could not compete on 40 and 20, so just kept bangging away on 30. Must have at lest 4 "maybes" But finally got a for sure late this evening. (and at only 100w, Paul no VE kw)

If I can do it with a vertical any NA shuuld be able to also.

Crack operators

I can't find any on-line log for K5D and I believe they have no internet connection on Descecheo at this time. While I have KP5 on many bands, I did not have it on 30 until earlier today. I also need it on 80 CW and spent a long time trying tonight to work it for a new mode, with no success. I don't need it on 20 or 40 but did work them on 20 SSB & CW because it took only one call on each mode. I don't think I robbed anyone of a QSO. On 40 I couldn't figure out where the operator was listening (up or down) and could hear none of the stations he worked.

It is an undisciplined madhouse but the operators have worked through the obstacles well -- especially working the station they intended, despite the out of turn callers who can't copy. But we don't have to go there again......

I agree, of course, that the operators I have heard are top-notch but disagree about deliberate interference. There's been lots of that, unfortunately, but they're so strong here that it is not a problem. It would be outside North America.

If these guys continue as they have started, they are on their way to equalling VP6DX. Both will be remembered as superb operations, rivaling each other but sharing top spot in my unofficial record book.

They are using microwave back to PR. Unfortunately I heard one qso where they said the hardware was not functioning right.

I got them on 1 call this morning on 160, not much action at 4 am East Coast time. Only band I needed them on. I'm done. 1 Q until I hear them CQing.

I'm in London for a few days, and did it remotely back to my new K3. First QSO I have ever made remoting back home.

Neat stuff. HRD for rig controls, parallel port relays to turn on rig, Skype for listening, memories in keyer for sending.

I'll never regret a biz trip interferring with radio again. :-)

9060. K5D - 17M SSB

Yahoo group: DX-IS (2009)
Date: 2009-02-15 15:22:59 UTC
From: Alan Leith
Topic: 9060 Message: 9060

I've just gone through the pain of listening to a rank amateur trying to control the initial (i.e. early in the DXpedition) pileup on 17M SSB on a Sunday morning. Unbelievable.

While I understand the desire to separate the pile-up into areas, this guy couldn't even handle that well. Admittedly, there were some problems while someone tried to tune the amplifier for him. Then he started on Zeros (no problem) but spent far too long on them before going to Ones, on whom he spent several fewer minutes. Had I been operating, of course I would have done things differently.

That's not the point.

I would have expected the operations manager to have put his starting line-up on the air for the first few days, not one of the guys who should be mopping up at the end, perhaps on 10 or 12M.

And no, I did not get through. I think he worked a couple of North American 1s, including only one Canadian -- VO1MP -- who runs tremendous power and big antennas on 17. My 100W and a 40M inverted vee didn't cut it, of course, but maybe the mop up guy will hear me next weekend.

Agreed about last night on 40 & 80. However, they've changed to a new operator on 17 and he's 400% better than the guy who started. This guy has worked more stations in 6 minutes than the other guy did in 20. I hope he's working NA later 'cause he's only working EU right now.

It'll all come out in the wash.

Subject: Re: [DX-IS] K5D - 17M SSB

Last night (after 0400 UTC) the 20M SSB op was begging for Qs.... one call w/ less than 100W on the freq he stated he was listening on and I'm in the log. But on 75 SSB it was BAD.... the OP said he had no RX antenna but was trying to work Europeans with a rate of one difficult (multiple requests for callsign of the calling stations) every two or three minutes.... seems like the band and the corresponding geographic area producing rate at the time would have been the western hemisphere but I guess its easy to second guess the operations manager. Perhaps his review of the first 48 hours will cause an improvement.... time will tell and I'm sure it'll be discussed at Dayton.

9063. K5D 40m operations

Yahoo group: DX-IS (2009)
Date: 2009-02-15 17:24:25 UTC
From: Frank T Brady
Topic: 9063 Message: 9063

Greetings dxers,
15, 17, and 30 were tough, but I had another rare 'got him on first call' experience on 20m this morning.
Now that I'm getting ready to go all out on 40 and 80, I wonder if anyone knows if there is a predictable operating pattern on 40m?

I hadn't experienced an expedition flipping back and forth between up and dn.
At times, there were just as many calling up as dn - incredible numbers each direction.
Do they sometimes work both up and dn at the same time?
Also, the 'up' side runs into a lot of strong RTTY above 7027.

They will probably be easy after a few days thins out the crowd, but I'm just curious about 'up' and 'dn' patterns.

tx, 73, and gl

Thanks Phil,
Maybe the crowds I heard on the up side were just assuming 'up'?

Also, if this were a weak dxpedition, the 40m qrm lids would really make it difficult.
K5D was so strong that he blew right through the qrmrs.

73,
frank w0ecs

I wasn't listening on 40 myself but was on a chat with some who were,
and they said that K5D was working some people out of both the "UP" an
"DN" pile but was sending "UP"

The Ohio/Penn DX PacketCluster
DX Bulletin No. 896
BID: $OPDX.896
February 16, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, KI3O, NG3K, KO4MA, N4AA & QRZ DX, W7LPF, N5FG, N6VR, K8GG, K8YSE, AC0W, DX-IS News Site, Pete's-DX-Newsdesk, CT1GFK, DK8JB, DL5YWM, DL7MAE & The DX News Letter, EA3RKR, EA5RM, F4EBT, F4EGZ, F5NQL & UFT, F6EXV, F6FQK, G3RWF, G3VOF, I1JQJ/IK1ADH & 425 DX News, JA1XGI, JR3TVH, OE1WHC, RSGB IOTA Web Site, VA3RJ & ICPO, VK6HZ, VU2TS, YT3W and Z35M for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/February, through Sunday, 15th/February there were 224 countries active. Countries available: 3A, 3B6, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7O, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FS, FT5W, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV9, T2, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZL, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5C, MOROCCO (IOTA Op). Alfredo, IK7JWX, informs that he is preparing for a DXpedition (with 9 operators) to activate Mogador Island (AF-065) in April. Activity will be on all HF-VHF bands and all modes. More details should be forthcoming. UPDATE! Alfredo, advises OPDX that the DXpedition will take place between April 18-26th. Look for the following operators (with callsigns to be active: Oscar/IK2AQZ (5C2A), Carlo/IK6CAC (5C2C),

Ernesto/I2FUG (5C2F), Del/IZ7GWZ (5C2G), Alfredo/IK7JWX (5C2J), Leo/I8LWL (5C2L), Simon/IZ7ATN (5C2SG), Pino/I8YGZ (5C2Z) and Nicola/I0SNY (5C2Y). QSL via their home callsign. ADDED NOTE: Some of the reference numbers to be activated during this operation are:
Mogador Island - AF-065; WW.Loc. IM51CM; ITU 37; CQ 33
Essaouira Island - WW.Loc. IM51CL
ARLHS Lighthouses (callsign/m):
MOR-019 Cape Sim-Essaouira; WW.Loc. IM51CL
MOR-036 Sidi Magdul-Essaouira; WW.Loc. IM51BJ
MOR-040 Grand Jetee-Agadir; WW.Loc. IM50EJ
Activity will be on all bands (HF-VHF) and modes (CW, SSB, RTTY PSK31). The group is looking for sponsors and donations. If you can help, please contact Alfredo, IK7JWX, via E-mail at: ik7jwx2003@...

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH. He will be in Fort Portal in western Uganda starting March 11th for about two months. Nick informs OPDX that he bought a (U.S.) vertical for 40 and 80 meters, so he feels that he will do a bit better on those bands this time. However, he will not have a 160 meter antenna (states, "there is simply not enough room for an antenna, unless I visit my friend 5X1GS and use his antennas - which I might well do."). He also mentions, "I prefer CW but I have now worked over 20k CW QSOs, so I have it in mind to work some data (RTTY and PSK31). Will work SSB whenever signals are good enough." Nick informs that one of the problems in 5X is unreliable power (it is difficult to promise that there will be power at any particular time). He plans to buy or rent a car battery this trip because he will not have a vehicle to tap into. Since he is doing voluntary work there, look for Nick on the air mainly during the early mornings, evenings and weekends. QSL via G3RWF.

9K48, KUWAIT (Special Event). Members of the Kuwait Aamateur Radio Society will activate the special callsign 9K48NLD from their K2RA Headquarters [PLEASE NOTE: Not from IOTA AS-118 as initially planned.] between February 25-26th. Activity is to celebrate Kuwait's National Independence and Liberation Day. Look for them to be on 40 and 20 meters using CW and SSB. QSL via 9K2RA. Visit their Web page at: http://www.KARS.org

ANTARCTIC ACTIVITY WEEK EVENT NEWS (February 16-22nd). PLEASE REMEMBER - Stations that are active and signing "/ANT" may NOT be in the Antarctic!

ANTARCTIC OP & CRUSIE. By the time you read this, Mehdi/F5PFP and Jean-Pierre/ON7ZM should be getting ready for their expedition to the Antarctic peninsula. Their sailboat is expected to leave Ushuaia on Wednesday, February 18th, depending on the weather conditions. They plan to visit several Antarctic bases which include the South Shetland Islands (AN-010), Palmer Archipelago (AN-012) and the Antarctic mainland (AN-016). According to Mehdi, both Jean-Pierre and himself will mainly be active on 20 meters SSB (14315 kHz), with some activity on 40/30/17 meters. [90% on SSB, 10% on CW, 80% on 20m] They plan to have one station continuously on the air with a trapless vertical using 500 watts and another station sporadically active using a trapless vertical and 100 watts. Operating times are between 1800-2200z, earlier and later when it is possible. Callsigns mentioned are

CE9XX, FT5YJ and VP8DLM. Expedition will last through March 17th. QSL via F5PFP, by the bureau or direct: Mehdi Escoffier, Les Closures, 38440 Saint Jean de Bournay, FRANCE. You can download and see the route of the sailboat on GoogleEarth at:
http://www.french-polar-team.fr/Antarcticexpedition2009/maps.html

AU30, INDIA (Special Event). Dutta/VU2DSI and friends Suhas/VU2SMN, Manju/VU2SMS and Ronald/VU2ROE will operate with special event callsign AU30SHI between 1830z, February 21st and 1829z, February 22nd. Activity is to commemorate the birth date of the Great Emperor Cnatrapati Shivaji (1627-1680). Operations will be from Shivneri Hill Fort near Junnar in Pune District, Maharashtra, India, birth place of Shivaji. Suggested frequencies are: 7070, 14250, 14215, 21280 and 28290 kHz. QSL via VU2DSI.

C3, ANDORRA. We have been informed by several sources that "the Andorran Radioamateurs Union (URA) reminds that the local administration has not implemented the CEPT Recommendation T/R 61-01. Therefore any C3/homecall activity should be regarded as illegal." An up-to-date list of licensed amateurs can be found at: http://www.ura.ad

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via W7EJ.
See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

DAYTON HAMVENTION NEWS (Top-band Dinner). George/K8GG and George/W8UVZ report: "All 160 meter band enthusiasts are cordially invited to the Top Band Dinner on Friday evening of the 2009 Hamvention in Dayton. This annual event brings together 160 meter operators from around the world for food, drink and camaraderie. We will, again, be at the Barnsider Restaurant - same location for the past three years. Here are the particulars:
Date: Friday, May 15, 2009
Time: Social Hour 6:30 PM (Cash bar)
Dinner: 7:30 PM
QTH: The Barnsider Restaurant (Near Hamvention Arena),
5202 N Main Street, Dayton, Ohio -- (937) 277-1332
Located on Route 48 just north of Needmore Ave
Fare: Salad, roll and butter, dinner entree, dessert & beverage
Choose from Chicken, Fish, Pork or Beef entries - selected from restaurant server. This is a plated dinner - not buffet.
Cost: 29 USDs, mailed in advance. Includes complete dinner, taxes and gratuity. Price has been the same for last 4 years. Please note that all reservations need to be paid in advance, both USA and overseas.
Program: We'll have a presentation by one of the K5D - Desecheo Island Ops on their low-band operation.
Reserve: Now via email, snail mail and pay cost in advance (due before 4-25) to: George Guerin, K8GG, 14322 A Drive North, CERESCO, MI 49033 -- Email: k8gg@... or gmguerin@...
We are looking forward to another great gathering of Top Band enthusiasts."

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following operation is approved for DXCC credit:
TT8JT - Chad; 2008 Operation

E5, SOUTH COOK ISLANDS. Tim, NL8F/VK4COF, will be active for 14 days from Rarotonga Island (OC-013) sometime between March 21st and April 4th. Activity will be on 80/40/20/15/10 meters SSB and possibly 17 meters. QSL Manager for this operation is K8NA.

EG3, SPAIN (Special Event). Special event station EG3LB was on the air this past weekend to celebrate the 200th anniversary of the birth of Louis Braille, inventor of the Braille system for blind. This station will also be in the air February 20-22nd and February 27th-March 1st. Activity will mainly be on CW and the Digital modes (RTTY/PSK). The bands may vary; operations over the past weekend were on 40 and 20 meters. A special QSL will be issued commemorating the event. QSL via EA3RKR, by the Bureau or direct (QRZ.com). SWLs can also send for QSL but should send a report for listening to a complete data QSO. More information is available on the Web at: http://www.gratisweb.com/ea3rkr

FG, GUADELOUPE. Pat, F4EBT, will be active as FG/F4EBT from the area of Sainte Rose on north Basse-Terre Island (NA-102) in the Guadeloupe Island group between March 21st and April 11th. Activity will a "holiday style operation", SSB only on 80/40/20/17/15/12/10 meters using a TS-50 w/100 watts into a FD4 Multiband antenna.

FR, REUNION ISLAND (Update/Change). Cedric, F4EGZ, will be active as FR/F4EGZ during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. He informs OPDX that he will be there for 3 weeks but will only be on the air for the contest. During the contest, he states he will be active only on 20 meters band with a moxon antenna using 500W. However, he also states that at the beginning (of the contest) he will be active on 40 meters but does not think there will be a large open window to Europe and USA.

GB6, ENGLAND (Special Event). Martin, G3VOF, informs that he and six other operators will be putting GB6GEO on the air again this year during the European Geo Parks Communication Event which takes place on Saturday, May 23rd and Sunday, May 24th. Activity will be from Cavern in Torquay, right in the heart of the English Riviera Global Geopark. This callsign (along with many others) will be going on the air bringing awareness to the beautiful "Geo Parks" in the UK and around different parts of the world. Suggested frequencies are: 3680, 7080, 14180, 21180 and 28180 kHz. If you live in France, Spain, Italy, Austria, Romania, Czech Rep, Norway, Brazil, or China and are interested in participating in this event plus can obtain the special "GEO" suffix, please contact Martin as soon as possible via E-mail at: martin@...
For more details, see GB6GEO at: http://www.qrz.com/callsign/GB6GEO

IOTA NEWS.....
AS-056. This one was received late for this week's bulletin, but worth mentioning. Activity this past weekend by Joe, JA4PXE, as JA6PXE/6 was from Danjo-Archipelago a rare IOTA. This is

a very narrow sheer rock or steep rocky island located 130
miles west of Kyushu Island in the South China Sea. Joe was
only on 40 meters CW using an IC-703 running 10 watts into
a Inverted V antenna. QSL via his home callsign, direct or
by the Bureau.

EU-008. Operators Doug/GM0ELP and Simon/M0GBK will be active as MM3T
from the Isle of Skye (IOSA NH07, SCOTIA CN14, WW Loc. IO67QN),
Inner Hebrides), during the RSGB IOTA Contest (July 25-26th)
as a Multi-Op/All-Bands/Low-Power/Mixed/Assisted/Expedition/
24-hours. QSL only via eQSL. Visit their Web site at:
http://freespace.virgin.net/douglas.maxwell/MM3T/mm3t.htm

OC-164. John, VK6HZ, will once again be visiting Rottnest Island this
year. Dates of operation will be March 3-9th. Operation will
be holiday style (he states "in between beer, swimming and,
of course, quality time with my family!) Equipment will be
IC-7000 running 100w into a Buddipole, running all modes.
QSL via VK6NE. Online log will be available after the trip
at: http://www.vk6hz.com
All logs will be uploaded on LoTW.

KH6, HAWAII. Bill, AC0W, will be operating KH6/AC0W during the ARRL
International DX Phone Contest (March 7-8th) from OC-019. Activity will
be on 80-10 meters. There is a possibility of some operations a few days
before and after the contest, as time allows. QSL LoTW and AC0W.

KP5, DESECHEO ISLAND DXPEDITION (News/Update).....
* The K5D DXpedition to Desecho Island is now on the air until February
26th. Activity will be on 160-6 meters using 6-8 stations on CW, SSB
and RTTY. QSL via N2OO.

* UPDATE February 14, 2009 (2330z): "Because of higher-than-expected winds
which delayed helicopter trips, we were unable to complete our full
setup on Thursday. At this writing, those problems are behind us and
the camp and all antennas are in place and working.
The QSO count is just under 10,000 in the first 24 hours with only
two stations operable for most of that time. We now have five stations
on the air hoping for two or three more tomorrow. We have no internet
connectivity as our satellite link and our 900 MHz terrestrial link both
failed. We have a plan that should get them both working in a day or
two. In the meantime, no logs have been uploaded and, of course, no
photos. When the links are working you'll learn about it here.
The Team is in high spirits and the weather is good now, nice breeze,
calm seas but hotter than expected.
Last night we were forced to move our 40M operation away from our
planned frequency. This was because of the RTTY contest which wiped
out most of the band for us below 7.1MHz. The contest ends tomorrow
and we expect much better 40M performance especially to Europe.
We're sensitive to the fact that some EU countries/amateurs cannot
transmit above 7.1MHz; this problem will self-resolve when the RTTY

contest ends late tomorrow." (KP5 Web page)

* ACTIVITY ON THE BIRDS. Thanks to the support of AMSAT-NA, the team is equipped with a Kenwood D7 HT and Arrow antenna, as well as training on using the FM satellites. Satellite operation is not expected to begin until the second half of the DXpedition, and then only on an as available basis. A second repeater on AO-51 (145.88/435.150) will be activated on February 16th and reserved -only- for contacts with K5D while within sight of the island. K5D may be active on either AO-51 repeater, SO-50 or the ISS voice repeater modes if available. Users attempting contact with K5D should be aware the the DXpedition does not wish to exchange grid squares during the QSO in order to allow more operators the chance for a QSO. Their grid square is FK68, same as most of Puerto Rico. Please be courteous and limit yourself to one QSO.

* ONE LESS OPERATOR. OPDX was informed that Brad Farrell, K4RT, did not make the trip due to a family illness.

* Remember, for updates visit the KP5 Web page at: http://www.kp5.us

MAJOR PACIFIC DXPEDITIONS (Not One, But Two!). Well-known DXpeditioners Hrane/YT1AD (Team Leader) and David/K3LP (Co-Team Leader) are in the process of organizing two (2) upcoming South Pacific DX-Peditions:
1 - Tokelau Island (ZK3) and Central Kiribati (T31, Ex-Canton Island), planned for April 2010 or end of September 2010
2 - Conway Reef (3D2C) planned for the end of September 2011

On the most wanted list, Tokelau Island (ZK3) ranks #47, Central Kiribati (T31) ranks #27 and Conway Reef (3D2C) ranks #22.

Hrane/YT1AD and Miki/YU1DW will travel between April 20th and May 7th (2009), in the South Pacific islands to organize these DXpeditions.

Hrane and Miki will be active from the following islands. The schedule will be as follows:
April 22nd - Samoa; callsigns 5W8A (YT1AD) and 5W0DW (YU1DW)
April 22-24th - American Samoa; callsign KH8/N9YU (YT1AD)
April 25th-May 4th - Fiji; 3D2AD (YT1AD) and 3D2DW (YU1DW)
April 27-29th - Western Kirbati; callsigns T30M (YT1AD) and T30DW (YU1DW) on Tarawa Island

More information will be forthcoming soon in March 2009 on the following Web page at: http://www.yt1ad.info/t31

OA, PERU. Operators Daniel/DL5YWM and Rene/DL2JRM will be staying in Lima between April 7th and the beginning of May. In their spare time they will operate as OA4/homecall mainly on CW with the focus on the lower bands. During this stay, they will make a small detour to Costa Rica to participate in the German DXpedition to San Jose Island (NA-191, in the Guanacaste Province), between April 17-20th. See OPDX.895 or visit the Web page: http://www.ti7.info

Any activity from Peruvian IOTAs will be decided "last minute".

P4, ARUBA (SA-036). Andy, AE6Y, will be active as P49Y during the ARRL DX CW Contest (February 21-22nd) as a Single-Op/All-Band entry. QSL via AE6Y.

PACIFIC TOUR. Operators Minekazu/JA2NQG (SSB) and Yuji/JH2BNL (CW/RTTY) will be active from the Western Pacific during March from the following islands and IOTAs. Their schedule and callsigns are as follows:
March 4-6th - Chuuk Island (OC-011); Micronesia; V63AR and V63WW
March 6-9th - Pohnpei Island (OC-010); Micronesia; V63AR and V63WW
March 9-11th - Kosrae Island (OC-059); Micronesia; V63AR and V63WW
*Also, callsigns V63C, V63P and V63K will be active during these dates.
March 11-14th - Majuro Island (OC-079); V73J and V73M
March 14-16th - Palau Island (OC-009); T88CD and T88WW
March 17-19th - Guam (OC-026); NH0AA and AH0F/KH2

QSL V63AR, V73J, T88CD and NH0AA via JH2BNL.
QSL V63WW, V73M, T88WW and AH0F/KH2 via JA2NQG.

QSL INFO AND NEWS.....
QSL ROUTES by Johannes, DK8JB:
7N4OGU via 7J1ADS AO3RKR via EA3RKR
9W2KGV direct DF2UT via 7J1ADS

4L1DA QSL STATUS. Joe, W7LPF, QSL Manager for 4L1DA, informs that almost 6 pounds of QSL cards were sent this past week to the Bureau for David/4L1DA. He states, "I am sorry for the delay, but the health had a 'blip' [wrong medicine given to me after hernia operation - that almost took out my liver!!]. I am getting back to normal [?] - and should have the backlog caught up by the end of the month. Please - if you are waiting for a card from 4L1DA - send me an E-mail and I will advise if it is 'in the mail to buro' - no need for more dupes. Again, my apologies to all." Joe's E-mail address is: ottuser@...

Buzz, NI5DX, is pleased to announce that he is now the QSL Manager for John Lee, 9M6JC. John has sent Buzz his log file, and Buzz will be able to answer all requests for cards from contacts made with 9M6JC. There will be a delay in sending out cards until 9M6JC sends some blank cards to NI5DX. New cards will be ordered shortly and will take about 5 weeks to arrive after the order goes to the printer.

9V1YC QSL STATUS. Floyd, N5FG, reports that the QSL Mnager Joe, N5ID, has been in the hospital since November 4th of last year. So, Joe has asked Floyd to spread the word that he is getting better and hopes to be home in the next couple of weeks. He asks patience on getting a 9V1YC QSL from him until he is back on his feet.

LOG & VIDEO ONLINE. A video for last Sunday's CS6A operation from Rosario Island (DIP AL-19) is now online at: http://algarvestar.no.sapo.pt Log for this activity and many other CTs and CUs (portable, lighthouses, etc...) operations are online at: http://logonline.no.sapo.pt

QSLS VIA LOTW: 5K0CW, C6APG, CT1ILT, CU2JT, J88XF, JA8BNP, KL5DX, KL7J, LY9Y, ON6AB, R1FJT, RU0AW, TF3SG, VK9DWX, VP8CMH/MM and ZC4VJ

QSLS RECEIVED VIA MAIL: 3A2MD, 4W6R, 4Z5J, 6V7D, 7W0AD, 7Z1SJ, BD7MVZ, BG7MVZ, C21XF, C57R, C6AXD, CW2C, EK3SA, ER4ER, FJ/G3TXF, FM1HN, HH4/AF4Z, HI3TEJ, HI8ROX, HI0C, HQ8R, HQ9R, JT1Y, JX9JKA, KG4SS, KL7J, ON4IQ, OZ1AA, P40W, R1FJT, T88CJ, TF3CW, VK9DWX, VU4MY and ZP0R

QSLS RECEIVED VIA THE BUREAU: None reported this week!

S0, WESTERN SAHARA. An international team of operators (known as the Tifariti Gang) composed of Juan/EA1CJ, Agustin/EA1KY, Roberto/EA2RY, Gerard/EA3EXV, Antonio/EA5RM, Manuel/EA7AJR, Bernard/F9IE, Fabrizio/IN3ZNR, Valery/UT7CR and Dimitri/UY7CW will be on the air from Western Sahara from April 12-17th using the callsign S04R. Activity will be on all bands from 160-10 meters using CW, SSB and the Digital modes. QSL via EA5RM. Ruben, EA5BZ, will be the pilot station. Look for additional information to become available on the S04R Web site at: http://www.dxfriends.com

TP60, FRANCE. To celebrate the 60th anniversary of the Council of Europe, there will be four TP60CE operations planned during 2009. The first operation will take place for three days between February 27th and March 1st. Activity will be on CW, SSB, RTTY and PSK. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

TU, COTE D'LVOIRE. Paolo, F8ENY, will be active as TU/F8ENY from San Pedro between February 16th and March 2nd. Activity will mainly be on 20 meters.

V4, ST.KITTS AND NEVIS. Mark, K0EJ, will be active as V49A during the ARRL DX CW Contest (February 21-22nd) as a Single-Op/All-Band/Low-Power entry. Look for activity outside of the contest (signing V44/K0EJ). QSL via V44NK.

VISALIA DX CONVENTION (IOTA Dinner). The 14th Annual Islands On The Air (IOTA) Dinner will be held on Friday, April 17th, in the Plaza Room of the Holiday Inn Hotel and Conference Center, 9000 W. Airport Drive, Visalia, CA 93277, in conjunction with the 60th annual Visalia International DX Convention. The Convention Web site is:
http://dxconvention.org/
This dinner is open to all who are interested or active in the IOTA program, or would like enjoy a meal and see what some real Island expeditions look like. The program agenda is as follows:
1730-1830 Doors open, socializing and eyeball discussions
(Drinks available on order)
1830 Dinner served, buffet style -- Welcoming/Introductions
1845 IOTA Programs begin
G3ZAY - ZD8UW, and the RSGB IOTA Program Overview
K9AJ - Rockall, EU189 and KD6WW, NA-229
AD6E, K6MYC and W5GAI - P29NI, OC-041 & 0C-181
N3QQ, EX UL7BEF & UA9OPA - KL7DX, NA234 (New)
2200 Closing
The dinner will be served buffet style in the Birch Room at a cost of

31 USDs per person, payable at the door, cash only, (service charge and tax included). The buffet menu will contain entree choice of beef and chicken along with salad, vegetables, dinner rolls, dessert, and a beverage (coffee, ice water, or ice tea). A vegetarian meal is available with two weeks notice. Wine and liquor can be purchased separately.
Reservations are not required but we'd like to know if you are attending. There is buffet service for 60 persons. Admission is free for those wishing only to watch the programs without dinner. As usual, seating will be "first come, first seated".
The Holiday Inn is sold out of rooms. If you are attending from overseas, contact the Conference committee, they often have rooms reserved for DX attendees. For additional information regarding this event, please contact:
Ray Benny, N6VR, IOTA Dinner Coordinator,
home phone - 805 649-9696 or rbenny@...
-- or --
Will Costello, WC6DX, home phone: 831 375-8133 or wc6dx@...

VK9NS (SK) TRIBUTE. The Documentary Archive Radio Communication (DARC) Web page now provides on its site "A Tribute to Jim B. Smith, VK9NS" at: http://www.dokufunk.org/vk9ns
On the page there is a great collection of QSL cards from many of the DXCC entities he activated.

VK9X, CHRISTMAS ISLAND (Update). Haru, JA1XGI/W8XGI, informs OPDX that his callsign will be JA1XGI/VK9 instead of VK9XGI as first announced. Activity will take place between April 4-11th, on all bands including the lower bands using CW and the digital modes. QSL via JA1XGI, by the bureau or direct.

VP9, BERMUDA (NA-005). Doug, KF4VTT, will be active as VP9/KF4VTT from June 11-17th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via his home callsign, by the LoTW, Bureau or direct.

Z30, MACEDONIA. Members of the Macedonian Telegraphic Group (MCWG) will be active with the special callsign Z30MCWG between February 20th and December 31st. The activity will be mostly on CW on all HF bands. QSL via Z35M (Secretary of the MCWG) to the address: Vladimir Kovaceski, Sava Kovacevic 47 g / 55, Skopje 1000, Republic of Macedonia.

The pipeline extends to Illinois too. I worked him first call there. I spent all day yesterday and most of today calling and got 3 QSO's so far. That one on 20 SSB was the easiest.

9074. New problem in CW pile up

Yahoo group: DX-IS (2009)
Date: 2009-02-16 14:00:52 UTC
From: CSM(r) Gary Huber
Topic: 9074 Message: 9074

Saturday morning (UTC) the K5D 20m CW OP seemed to be having problems with my call and kept asking me to repeat. Sunday I see a K5D spot by a "new" DXer, AB9ML . I figure its going to be interesting for both parties. There is a local, AB9MP, whose QSLs I sometimes receive. Now I wonder who is going to get the NIL and who is going to get the K5D QSLs.

Best regards,

CSM(r) Gary Huber - AB9M

9077. QRL vs. QRL?

Yahoo group: DX-IS (2009)
Date: 2009-02-17 11:24:32 UTC
From: Art Burke
Topic: 9077 Message: 9077

What is so cotton-pickin' difficult to understand about "Q" signals and the difference between adding the "?" and not adding it?

This morning, T27A was on 7012, working split, both into the US and Japan. Some twit came up on frequency with the ubiquitous tune up. Someone sent QRL - twice. Then, some other twit responds "YES."

Why doesn't the average CW op seem to understand that QRL means "Hey, dude, this frequency is busy, go somewhere else!" while QRL? means "I want to camp here, is anyone on this frequency that maybe I'm not hearing?"

Sometimes I think the exams should include more questions about operating. In the oldie-goldie days, there were a few countries that actually required potential hams to be SWLers and prove some skills before being issued a license.

One would think common sense might be sufficient, but no one apparently issues (or tests!) that any more! LOL

Hark back to those first days when you (and I) first started. Where did you learn about pileups and split operating? I just wish there was an easy way to teach some of these skills - to both old and new!

The theme two years ago at Visalia was to "mentor" new DXers. How do we find them in the first place???

9078. Online Logs for K5D

Yahoo group: DX-IS (2009)
Date: 2009-02-17 11:31:03 UTC
From: Art Burke
Topic: 9078 Message: 9078

Good news, bad news!

Logs are available at logsearch.de - but there have been so many hits that many are being locked out. The web manager has removed the search capability for all calls *except* K5D in hopes the hits wouldn't overwhelm the system.

Unless or until their internet access is improved, a lot of people are going to have to learn to be more patient.

From the appearances of spots all over the dial, it looks like K5D has everything running now. I see spots for SSB and CW on the same bands.

From: John Peters
Topic: 9060 Message: 9081

If you want expeditions in the future you have to train operators on current expeditions. Most of the operators have done fairly well and on the next expedition they'll be better. Anyone who has NOT been on a DXpedition to a remote site has no idea what condx are like. No one should criticize until they have been on the other end and done it better.

Just because you can hear them is no reason to believe they can hear you.

From: Tom Anderson
Topic: 9060 Message: 9083

Fellow DXers:

I haven't heard the op referred to on KP5, I worked NA5U Mike Thomas on 17m, who was one of the big boosters of the KP1-5 project from day one. Mike is a great op and I've known him for close to 20 years. Besides he picked out my call after just a couple tries.

You really have to be on the "other" end to know the condx there.

Feb. 4-11 I operated as FS/WW5L and PJ7/WW5L from Saint Martin/Sint Maarten Island in the Caribbean. Some days I could pick out calls every few seconds, log 'em, and go onto the next station, but other days we had 7-9+ and even a 20db noise levels from our QTH, yes the meter on my Kenwood TS480SAT just sat at 20db on receive from the QRM and it was not from stations calling me.

Some of the stronger stations I could copy, said I had a heck of a pileup going, but most of them I couldn't even hear, and when I could hear them it would sometimes take 5-6 attempts to get the whole call in the log. Several of the 7 other ops that were on the FS/PJ7 Buddipole DXpedition reported similar noise condx. Although when we operated for a time from PJ7 it was a lot quieter. Who knows why?????.

As an FYI, the FS QTH was atop a cliff 500+ feet, probably closer to 1,000 feet above the Caribbean on the NW side of the island with excellent takeoff angles toward the USA and EU. Only problem was we had a cell tower behind the villa.

The PJ6 Saba Island ops had to do yeoman work to get a signal out. They had to climb a 1,000 ft. or so mountain on the island, lug batteries with them and used a Yaesu 857 and a Buddipole from the top of the mountain. They also spent the night on the mountain. The airstrip on the island is like landing on an aircraft carrier. Both ends of the landing strip overlook tall cliffs. If you're on the short take off and landing prop that goes to the island, pray the motors don't conk out if your pilot overshoots or doesn't have enough runway left to stop, so he can gun them and go around for another try.

If you worked any of the FS/PJ7 stations we all used Buddipoles in various configurations and 100 watts max. Some guys were QRP and still got 5/9 reports in the USA. I hope some of you were able to work the FS stations who were on 160 the last couple nights we were there. We kept all of the other stations off the air to keep from causing QRM with 160 since supposedly FS was semi-rare on 160. But Budd, W3FF, designed the most unusual set up (in the field) for a Buddipole and 160 operation. He made a Buddipole do things on 160 I didn't know the antenna could do.

If you run into him at a hamfest ask him about the 160 antenna.

This is not a commercial for Buddipole, just an FYI.

From: Zack Widup
Topic: 9060 Message: 9084

I've been very impressed with the operation so far. I spent the whole day Saturday trying to get a QSO on various bands with no results. But on Sunday I worked them on 15 CW after calling for a few hours. In the evening we seemed to have a pipeline between us on 20 meters and there were no takers to the K5D op's CQ's on SSB. I called once and got a reply. An hour later the same thing happened on 20 CW. And then shortly the same thing happened on 30 CW. On Monday I worked them on 80 CW. I remember a couple of the ops being W2GD and K0IR.

40 meters has been a nightmare so far. Pileups are still huge. I haven't worked them there. But I keep trying. Last night the op, whoever he was, sent the signal reports as "599" instead of "5NN." Also when he started he'd send "(Call) 599 (Call)" - repeating the call of the station he worked twice. Not sure who he was. He was still a great op. I just couldn't tell where he was listening because I couldn't hear ANY of the stations he worked.

Larry NF6S told me after the last KP1 DXpedition that the noise was extreme on the low bands during their operation and it was very difficult to make QSO's on 80 and 160. So noise can be a big problem on these islands.

SB DX @ WW < KB8NW $OPDX.896.1
Ohio/Penn DX Special Bulletin No. 896.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 896.1
BID: $OPDX.896.1
February 18, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and the OH2BN for the following DX information.

For immediate release:

February 18, 2009

JOIN A DIFFERENT KIND OF AMATEUR RADIO COMPETITION

There is no doubt that our time-honored hobby is going through turbulent times with the intake of new hams decreasing in many countries. The overall Amateur Radio population has diminished dramatically.

As an independent body, the group at Radio Arcala, OH8X is poised to try some new methods to attract young people congregating in many non-traditional hangouts such as Virtual World on the internet. The Arcala radio station is the first-ever amateur radio station to be active in Virtual Reality. Millions of computer-minded youngsters gather there daily in an easy-going leisure mood.

The overall Radio Arcala strategy is spelled out on the OH8X Webpages but one of the key buttons - ON YOUNG PEOPLE'S TERMS - is still to be drafted.

See http://www.radioarcala.com

We now challenge members of our fraternity of all ages to draft the text for this button in a way that is both appealing and informative enough to encourage today's youth to take the step we once took.

CONTEST OUTLINE

Consider yourself as another 18-year old enthusiastic ham of today. Challenge yourself to talk to a bunch of young people ranging from 15-20 years of age in a large room with the occasion devoted only to yourself. Your mission is to tell them about the excitement of being an amateur radio operator today and why those in the audience should join our ranks.

Draft your paper/talk to be no more than 250 words in length in English or Spanish.

Remember a few things:

1: These people have many other tempting options to occupy their youthful and modern mind and time.

2: They can take only a certain amount of history at once. Be balanced.

3: Consider that one of the current obstacles is the license exam; it is an entry barrier not found with many other hobbies. Address that issue, too.

4: Remember that electronics has become a highly complex science and that experimentation may not exist as an option the way it did before.

5: Find the most positive and truly unique features that Amateur Radio has. Highlight the positive and truly unique features of Amateur Radio.

6: And finally, take this not only as a fun game but consider that, indeed, the future of this hobby is in the hands of people like you.

Deadline:

Please submit your paper by email no later than March 15, 2009 to oh8x@... (English) or yv5amh@... (Spanish).

More than one text can participate and more than one submission can be selected, if seen practical.

The body to review the not-to-be-disclosed papers with their national focus group is composed of the following individuals: Hans Blondeel Timmerman, PB2T, IARU Region 1, (Chairman); Reinaldo Leandro, YV5AMH, IARU Region 2; Dave Sumner, K1ZZ (ARRL); Olaf Lundberg, G0CKV (for RSGB); Tonno Vahl, ES5TV, (ERAU); Hans Johansson, SM0IMJ (SSA) and Juha Hulkko, OH8NC and Martti Laine, OH2BH (Radio Arcala).

Prizes:

In addition to the award of first, second and third prizes in the form of three (3) amateur radio contest-like plaques, the winning text will be made available to a large group of people in Virtual Reality. You will be invited to be part of a Radio Arcala working group drawing up a next-generation recruitment campaign. Your work will be featured in national magazines by the above jury plus on the DX Summit and the Radio Arcala Website. You will be pleased with your achievement. Be aware that the review committee can for editorial reasons make style changes to the text before publication.

Note for editors:

By sending a note to Radio Arcala at oh8x@...
you can obtain high-resolution pictures taken from the virtual space at the first amateur radio station there - OH8X. Please note that the pictures are high-resolution, 6.5MB each, and assume an address that can receive such files.

9086. RE: [DX-IS] K5D - 17M SSB

Yahoo group: DX-IS (2009)
Date: 2009-02-18 22:34:12 UTC
From: Alan Leith
Topic: 9060 Message: 9086

This is a response to W3WN where his call suggests he is and to K1ER whose call doesn't.

If your reference, John, to "Anyone who has NOT been on a DXpedition to a remote site has no idea what condx are like. No one should criticize until they have been on the other end and done it better." is a reference to me, John, you're very, very wrong. And, you don't have to train operators on DXpeditions. That's absolutely and patently ridiculous. You train them in contest operating conditions.

I have been on two major DXpeditions and have been DXing for a very long time. I know what I'm talking about and I stand by what I said.

On the first weekend of a major expedition, second string rookies should not be trained to handle pile-ups. PERIOD.

I agree that training is necessary but it should be done in times when the expectations of the masses are not ignored.

You are absolutely correct that a station like the one I operate should not expect to be heard through stations running power and reasonable antennas for the band in question. I didn't. Not everyone can run the type of monster station that you run and be recognized by a cough or a dit. But that has absolutely no bearing on my comment.

As for the other operators I have heard on the K5D operation, ALL have been FB, except for the one rookie who shouldn't have been assigned to his shift.

To Ron: good luck on your "DXpedition." As a rookie DXpeditioner, take heart: your pileups will be a breeze compared to K5D.

To: DX-IS@yahoogroups.com
Subject: Re: [DX-IS] K5D - 17M SSB

If you want expeditions in the future you have to train operators on current expeditions. Most of the operators have done fairly well and on the next expedition they'll be better. Anyone who has NOT been on a DXpedition to a remote site has no idea what condx are like. No one should

criticize until they have been on the other end and done it better.

Just because you can hear them is no reason to believe they can hear you.

Well, that's encouraging.

You see, after over 35 years licensed, I've been invited to be part of the NP2SH group in May, and as far as a DXpedition goes, I'll be a 'rank amateur' as well.

Attitudes like this may me wonder why I want to bother.

Sheesh.

Subject: [DX-IS] K5D - 17M SSB

I've just gone through the pain of listening to a rank amateur trying to control the initial (i.e. early in the DXpedition) pileup on 17M SSB on a Sunday morning. Unbelievable.

While I understand the desire to separate the pile-up into areas, this guy couldn't even handle that well. Admittedly, there were some problems while someone tried to tune the amplifier for him. Then he started on Zeros (no problem) but spent far too long on them before going to Ones, on whom he spent several fewer minutes. Had I been operating, of course I would have done things differently.

That's not the point.

I would have expected the operations manager to have put his starting line-up on the air for the first few days, not one of the guys who should be mopping up at the end, perhaps on 10 or 12M.

And no, I did not get through. I think he worked a couple of North American 1s, including only one Canadian -- VO1MP -- who runs tremendous power and big antennas on 17. My 100W and a 40M inverted vee didn't cut it, of course, but maybe the mop up guy will hear me next weekend.

I can't answer that question, Dick, but I can offer
congratulations on achieving what I (and many others) consider a very
significant milestone in the chase toward the pinnacle of achievement
in Ham radio. 5BWAZ is 1000 times more difficult than 5BDXCC. I
realise you still have 5 zones to go to get them all, but it is now
well within your grasp.

The last and only time I applied for a WAZ award (mixed) was
just the 40 zones on any band, and that went to K1MEM. However, that
was many years ago and Jim is no longer with us. I don't know who
looks after that now.

I have fond memories of Jim, he gave me a picture of Desecheo when he went

there. On the back was a handwritten confirmation for my 160 Mtr Q. I used

that one for my DXCC submittal.

He sometimes would look over my QSL collection, to verify that a card he got

was legit. I did have a couple he didn't have, but not many !!

Thank you for those kind words,

73, Dick, W1KSZ

9090. Propagation software/knowledge about Polar openings

Yahoo group: DX-IS (2009)
Date: 2009-02-19 04:45:43 UTC
From: Lance Martin
Topic: 9090 Message: 9090

Hi Guys,

I am looking for some information on propagation that will help me determine when the South and/or North Pole would be open to support radio wave propagation.

I use W6EL and it's usually pretty good/reliable, I have also used VOAProp, HFprop . But none of them will tell me when the poles will open.

Is there any software or even a web page that provides information that will tell me? (perhaps this is asking too much).

For example; K5D is workable one day but then we hardly hear them the next...same solar flux, same SSNs.

Managed to finally get K5D on 40m CW, was jumping for joy here, new one on CW, just need them on RTTY now.

Periodically I see comments posted on the various reflectors and/or clusters critical of the operation at Desecheo, and have seen it during previous operations.

Before you demonstrate how bad your infection with oral diarrhea and mental constipation is, please go to the Desecheo page and look at the pictures showing what it is taking to pull this operation off. Before a single QSO is ever made those guys have worked their fannys off just getting there and getting set up. Keep in mind that this operation is only 14 miles from Puerto Rico. I don't even want to think about what the 3Y0 folks went through. Now, think about the fact that these operators are only half done with the transportation and set-up/take-down effort. Also remember that all of this is being done under the watchful eye of some government weenie, and that if in the end ONE gum wrapper is accidentally left on the island, KP1 won't happen.

Finally, as you look at the pictures, consider how much planning and up front money was required to pull this off, _then_:

kwitcherbitchin!

I think they [K5D] have a superb operation.

I have listened for their operating procedures and have them in the log on 5 bands [80, 40, 30, 20 and 17 meters] all CW. My total operating time over the three days was less than 2 hours.

They have great ears and superb skills.

Periodically I see comments posted on the various reflectors and/or clusters critical of the operation at Desecheo, and have seen it during previous operations.

Before you demonstrate how bad your infection with oral diarrhea and mental constipation is, please go to the Desecheo page and look at the pictures showing what it is taking to pull this operation off. Before a single QSO is ever made those guys have worked their fannys off just getting there and getting set up. Keep in mind that this operation is only 14 miles from Puerto Rico. I don't even want to think about what the 3Y0 folks went through. Now, think about the fact that these operators are only half done with the transportation and set-up/take-down effort. Also remember that all of this is being done under the watchful eye of some government weenie, and that if in the end ONE gum wrapper is accidentally left on the island, KP1 won't happen.

Finally, as you look at the pictures, consider how much planning and up front money was required to pull this off, _then_:

kwitcherbitchin!

Zack, here in NH the 40 meter pile was a constant S9+20 [++] more than 8 KHz wide in the afternoon to early evening until the band went out.. An absolute MESS!!

I got up early in the next morning [1030Z] and worked them on second call on 40 meters. They had a not too bad pileup. The operator was working his/her way up the pile from 7025 towards 7027 KHz. So, I camped on 7027.1 KHz and listened for their 7027 TU 599 response. Immediately after their K5D UP I waited about 4 or 5 seconds and sent my call twice. In the log!!

I assume there were/are many new DXers who simply call in the pile and hope to be heard. I found years ago to observe the DX operator for his/her method. Then work to that method.

DD

Amen Dave:
They are doing a great job. I already have KP5 confirmed on 160 & 40, so only needed the others. So far I have worked K5D on 80, 30, 20, 15, & 17, all CW, and ran the amp only on 80. I hope 10 & 6 wake up before they leave. I have been trying to work them on 20 RTTY, but my skills on RTTY aren't so great, and I have trouble figuring out where they are listening and what their habits are.

They have great ears and superb skills.

A friend in the UK was surprised to hear them on 7195,
"listening for Europe above 7200", though!

They probably had callers there, too :-)

DX Bulletin 7 ARLD007
>From ARRL Headquarters
Newington CT February 19, 2009
To all radio amateurs

SB DX ARL ARLD007
ARLD007 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SENEGAL, 6W. Patrick, ON4HIL and Guido, ON4BAG will be QRV as 6V7P and 6V7O, respectively, from February 22 to 28. Activity will be on 160 to 6 meters using SSB and various digital modes. QSL to home calls.

BAHAMAS, C6. Bob, N4BP and Kevin, K4PG are QRV as C6AKQ and C6APG, respectively, from Little Bahama Bank Group, IOTA NA-080, until February 22. Activity is on the HF bands. This includes entries in the ARRL DX CW contest. QSL direct to home calls.

CUBA, CO. Look for CO8TW to be QRV as a Low Power/Single Band entry on 160 meters during the ARRL DX CW contest. QSL via HB9SVT. CO8LY will be a Low Power/Single Band entry on 80 meters during the contest. QSL via EA7ADH. And, CM8CAD will be a Low Power/Single Band entry on 15 meters in the contest. QSL to home call.

ITALY, I. To celebrate the 100th anniversary of Guglielmo Marconi's Nobel Prize in Physics, special event station IY1GM is QRV until March 31. QSL via IK1UGX.

GRENADA, J3. Bill, K4LTA and Ruby, K4UPS are QRV as J37BO and J37RO, respectively, until March 4. Activity is on 80 to 10 meters, and possibly 6 meters. They will be active as J38A in the ARRL DX CW contest. In addition, look for AK4Z, KT4E and KE4TG to be QRV as J3/homecalls. Activity is on all bands using CW, SSB and various digital modes. QSL to home calls.

US VIRGIN ISLANDS, KP2. K3CT is QRV as KP2/K3CT until February 25. He will be active as KP2M in the ARRL DX CW contest. Outside the

contest, he is active generally on the newer bands. QSL KP2M via AI4U and KP2/K3CT to home call.

PUERTO RICO, KP4. Jim, N6TJ will be QRV as NP3U in the ARRL DX CW contest as a Single Op/All Band entry. QSL via WP4U.

ARUBA, P4. Andy, AE6Y plans to be QRV as P49Y from Sabana Basora, IOTA SA-036, in the ARRL DX CW contest as a Single Op/All Band entry. QSL to home call.

BONAIRE, CURACAO, PJ2. A group of operators will be QRV as PJ2T from Signal Point Station on Curacao, IOTA SA-006, during the ARRL DX CW contest. QSL via N9AG.

CRETE, SV9. Willi, DJ7RJ will be QRV as SV9/DJ7RJ beginning February 24 and be here for three weeks. Activity will be on the HF bands using CW and SSB. QSL to home call.

TUVALU, T2. Bob, W7YAQ and Bill, N7OU are QRV as T27A and T27OU, respectively. Activity is on 160 to 10 meters using mostly CW with some RTTY. They will be QRV as T27A as Multi/Single entry in the ARRL DX CW contest. QSL to home calls.

TURKEY, TA. Rene, DL2JRM will be QRV as TA0/DL2JRM/p from Kekova Island, IOTA AS-115, from February 23 to 25. QSL to home call.

COTE d'IVOIRE, TU. Paolo, F8ENY is QRV as TU/F8ENY from San Pedro until March 2. Activity is mainly on 20 meters. QSL to home call.

UKRAINE, UR. Ukrainian club station UB5KFF is QRV as EM50KFF until March 1 in celebration of its 50 years. Activity is on all bands and modes. QSL via OS0KW.

ST. KITTS AND NEVIS, V4. Mark, K0EJ will be QRV as V49A in the ARRL DX CW contest as a Single-Op/All-Band/Low-Power entry. Outside the contest, he is active as V44/K0EJ. QSL via V44NK.

BRITISH VIRGIN ISLAND, VP2V. Rick, K6VVA is QRV as VP2V/K6VVA until February 24. He will also be active as VP2VVA in the ARRL DX CW contest. QSL both calls via N6AWD.

INDIA, VU. Operators VU2DSI, VU2ROE, VU2SMN and VU2SMS will be QRV as AU30SHI on February 21 and 22. Activity will be on 40, 20, 15 and 10 meters. QSL via VU2DSI.

CAYMAN ISLANDS, ZF. John, K6AM is QRV as ZF2AM until March 1. This includes an entry in the ARRL DX CW contest as a Single Op/High Power entry. He will also be active in the upcoming CQ 160-Meter SSB contest. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL International DX CW Contest, NCCC Sprint, REF SSB Contest, Feld Hell Sprint and the High Speed Club CW Contest will certainly keep contesters busy this weekend.

Please see February QST, page 82 and the ARRL and WA7BNM contest web sites for details.

I finally got them on 40 last night. I think the pileups are getting thinner.

All my QSO's have been with the barefoot TS-850. No amp at all, including on 80m. If you're a little pistol, I think it's often a matter of luck if you end up on a frequency that is free of QRM and if they happen to tune to that frequency.
I don't know what their plans are but I'll bet they concentrate on SSB and 6 meters during the ARRL DX contest.

73, Zack W9SZ

21 February 2009 A.R.I. DX Bulletin
No 929
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

6W - Patrick, ON4HIL and Guido, ON4BAG will be active as 6V7P and 6V7O from Senegal on 22-28 February. They plan to operate SSB, RTTY and PSK31 on 160-10 metres. QSL via home calls, direct or bureau. [TNX VA3RJ]
7Q - Allan, G0IAS will be active as 7Q7AH from the shack of Harry, 7Q7HB on the southern shore of Lake Malawi starting on 23 February for one month. Being aware that Malawi is needed on Top Band, they will try to erect an antenna for 160 metres. QSL via G0IAS, direct only. [TNX G0IAS]
9A - A team of seven members of IOCA Group (Franjo/9A2MF, Daki/9A2WJ, Boki/9A3KB, Dado/9A3TA, Emir/9A6AA, Sven/DF9MV and Matt/DL5MFL) will be active as 9A0CI from Vela Palagruza Island (EU-090, CI-084) and lighthouse (LH-0057, CRO-012) on 8-16 May. They will operate SSB, CW and digital modes on 10-80 metres. QSL via DE0MST, direct or bureau. They also plan to operate SSB as 9A/homecall and homecall/p from Mala Palagruza Island (EU-090, CI-461) and from the islet of Kamik Od Tramuntane (CI-960, new one for the IOCA programme). QSL via home calls. Further information will be available on http://www.inet.hr/9a6aa/iocaplan.htm [TNX 9A6AA]
9K - Celebrating Kuwait's National Liberation Day, special event station 9K48NLD will be active on 20 and 40 metres SSB and CW on 25-26 February from the KARS headquarters. QSL via 9K2RA. [TNX NG3K]
AP - AP2ASHF (the suffix stands for Axel Helmut Scholz, Foreigner) is the callsign issued to Axel, DL7UPN. He expects to visit Pakistan "several times" before June and to operate CW, RTTY and PSK. QSL via DL7UPN. [TNX DX Newsletter]
C5 - Stewart, GW0ETF will be on holiday in the Gambia between 23 February and 8 March and hopes to do some casual operating from the hotel with 100w and a 20m dipole, mainly CW but maybe some RTTY/PSK31. He must apply for the licence upon arrival, and he hopes to get C56/GW0ETF. QSL via home call (QSLling instructions at qrz.com). [TNX GW0ETF]

D4 - A group of seven German operators will be active from Sal Island (AF-086), Cape Verde on 11-25 March as D44TXQ (Helmut/DL3KBQ), D44TXP (Holger/DL1COP), D44TXO (Juergen/DJ2VO), D44TXF (Gerd/DG3KAF), D44TXR (Henry/DL2RSI), D44TXI (Peter/DH2KI) and D44TXS (Franz, DL3PS/HB9EHQ). They plan to operate on 160-10 metres CW, SSB, RTTY, PSK31, Hell, Amtor and SSTV, with seven stations running 100 watts into vertical antennas. QSL D44TXS via HB9EHQ, others via home call. [TNX DL3PS]
EA - Celebrating the 200th anniversary of the birth of Louis Braille, special event station EG3LB will be active again on 20-22 February, 27-28 February and 1 March. Expect activity on SSB, CW and digital modes. QSL via EA3RKR, direct or bureau. [TNX EA3RKR]
EI - The Galway Radio Experimenters Club will celebrate St. Patrick's Day (17 March) operating as EJ4GRC from Inishmore, Aran Islands (EU-006). They will be active on all bands and modes, and a commemorative QSL card will be sent to all stations worked. [TNX EI7DMB]
F - The Council of Europe Radio Amateur Club (TP2CE) will be active as TP60CE from 27 February to 1 March to celebrate the 60th anniversary of the Council of Europe. QSL via F5LGF. A logsearch will be available at http://ewwa.free.fr [TNX F6FQK]
FG - Nicolas, F5TGR will be active as FG/F5TGR from Guadeloupe (NA-102) on 15-28 March. He plans to operate CW and SSB on 10-40 metres. QSL via home call, direct ore bureau. [TNX F5TGR]
FG - Patrick, F4EBT will be active as FG/F4EBT from Basse-Terre, Guadeloupe (NA-102) from 21 March to 11 April. He plans to operate holiday style on SSB. [TNX F4EBT]
FH - Phil, G3SWH and Richard, G3RWL will be active from Mayotte (AF-027) between 26 February and 5 March [425DXN 919]. Both of them will use the single callsign of FH/G3SWH, and their activity will be mainly on 80-10 metres CW. Subject to QRN and site conditions, there may be some 160m CW activity, and Richard may also operate some later in the trip. They plan to have two stations on the air for as many hours every day as possible. QSL via G3SWH, direct or bureau (on-line form for bureau cards can be found at http://www.g3swh.org.uk). [TNX G3SWH]
FM - Dim, UT5UGR is active as FM/KL7WA (QSL via UT5UGR) from Martinique (NA-107) until 24 February. He will participate in the ARRL DX CW Contest as FM5KC. [TNX UT5UGR].
FM - Al, F5VHJ will participate in the ARRL DX SSB Contest (7-8 March) as TO5A from Martinique. QSL via F5VHJ (direct or bureau), or LOTW. [TNX F5VHJ]
J6 - Celebrating the 30th anniversary of their country, all amateur radio operators from St. Lucia are permitted to include the number 30 in their callsigns immediately after the prefix J6 (for instance, J630B = J69B and J630KZ = J69KZ) until 25 February. [TNX The Daily DX]
J6 - John, W5JON will be active as J6/W5JON from Marigot Bay, St. Lucia (NA-108) from 24 March to 2 April, CQ WPX SSB Contest included. He will operate SSB on 160-6 metres, using 400 watts, dipoles and a

3-element yagi for 6 metres. QSL via home call. [TNX W5JON]
JD1_oga- Look for JD1BLK (QSL via JM1LJS), JD1BMH (QSL via JG7PSJ) and JD1BLY (QSL via JI5RPT) to be active from Chichijima (AS-031), Ogasawara from 29 April to 12 May. They plan to operate CW, SSB and digital modes on 160-6 metres, plus satellite. Logsearches and further information will be available on their individual websites: http://radio-dream.com/jd1blk/e/ (JD1BLK), http://sapphire.ganko.tohoku.ac.jp/jd1bmh/ (JD1BMH) and http://www.ji5rpt.com/jd1/ (JD1BLY) [TNX JI5RPT]
KH6 - Bill, AC0W wil be active as KH6/AC0W from Maui, Hawaii (OC-019) for the ARRL DX SSB Contest (7-8 March), with some possible activity on 10-80 metres SSB a few days before and after the contest. QSL via home call. Bill will upload his log to LoTW. [TNX AC0W]
KH6 - Al, F5VHJ will participate in the CQ WW WPX SSB Contest (28-29 March) as NH7A from Hawaii. QSL via F5VHJ (direct or bureau), or LOTW. [TNX F5VHJ]
KG4 - Dan, W0CN will be active as KG4CN from Guantanamo Bay (NA-015) from 26 February to 9 March. He will operate SSB and some CW on 160-10 metres, and will participate in the ARRL DX SSB Contest. QSL via W0CN, direct, bureu or LoTW. [TNX W0CN]
PY0F - Fabio/PY2AAZ, Anderson/PY2TNT, Alex/PY2WAS and Bob/N6OX will be active as ZY0F from Fernando de Noronha (SA-003) from around 23 UTC on 10 June through around 13 UTC on the 15th. Expect activity on 160-10 metres CW and SSB, plus 60m under a special licence granted by the Brazilian authorities. QSL via PY2WAS, direct or bureau. [TNX PY2WAS]
S0 - A multi-national team of ten operators (namely EA1CJ, EA1KY, EA2RY, EA3EXV, EA5RM, EA7AJR, F9IE, IN3ZNR, UT7CR and UY7CW) will be active as S04R from Western Sahara on 12-17 April. They will operate SSB, CW and digital modes on 160-10 metres with at least three stations. The pilot station will be EA5BZ. QSL via EA5RM. Further information is available at http://www.dxfriends.com [TNX EA5RM]
SV - George/SV1QN, Fotis/SV1AIN, Giannis/SV1GYG and Nikos/SW1GYN will be active as homecall/8 from Zakynthos Island (EU-052) on 23-29 March. They will operate on 160-6 metres all modes. QSL via home calls. [TNX SV9AHZ]
TA - Rene, DL2JRM will be active as TA0/DL2JRM/p from Kekova Island (AS-115) on 23-25 February. He will operate CW on 40-10 metres. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
UA - Look for special callsigns UE3YAR (QSL via RV3YR) and UE3YRA (QSL via RA3YC) to be aired until 24 February for the AFARU (Armed Forces Amateur Radio Union) and RDA activity programmes. [TNX RV3YR]
VE - Heinz, VA7AQ will be active as VE9/VA7AQ from Grand Manan Island (NA-014) on 20-25 March. QSL via home call, direct or bureau. [TNX VA7AQ]
VE - Cezar, VE3LYC will try to operate from the Fox Islands (NA-186) between 31 March and 3 April. This IOTA group was activated only

once and very briefly by WT2O/VE8 sixteen years ago, and sits at #1 on the Most Wanted NA-IOTA List. He will operate SSB and CW with 100 watts and a multi-band vertical antenna, with a focus on 20, 30 and 40 metres. Information about callsign and QSLing (direct and bureau) will be posted on QRZ.com before the expedition. The islands are polar bear resting areas, and a special permit has been obtained for this operation from the Manitoba Conservation Authority. Cezar will be accompanied by two professional guides for the duration of his stay. Costs of this operation are considerable and both group and individual donors are sought and will be graciously acknowledged. [TNX VE3LYC]
VK - Chris, G0WFH will be active as VK7ACG from Tasmania (OC-006) from 19 October to 17 November. He will operate SSB on 160-10 metres, with a focus on the low bands. QSL via home call, direct or bureau. [TNX G0WFH]
VK9L - The Oceania Amateur Radio DX Group will operate as VK9LA (http://www.odxg.org/vk9la.htm) from Lord Howe Island (OC-004) from 23 March to 3 April, CQ WW WPX SSB Contest included. A large group of operators (IZ3ESV, K5YY, N2OO, N2OZ, SQ8X, SQ9DIE, SV2KBS, VK1TX, VK3HJ, VK3QB, VK4FW, VK4IO, VK4VCH, VK5CP, VK5PO and W5SL) will be active on 160-6 metres CW, SSB and RTTY, with seven HF stations plus one for 6m, monoband yagis, monoband verticals and a quantity of wire antennas for the low bands. QSL via VK4FW.
VK9M - AA7JV and HA7RY will be active as VK9GMW from Mellish Reef (OC-072) between 22 March and 6 April (actual operating dates are subject to change due to weather). This will be "another low-key, simple DXpedition", with a strong focus on the low bands (although George and Tomi intend operate on all HF bands). QSL direct to HA7RY. The logs will be uploaded to LoTW. Please visit http://www.vk9gmw.com for further information, including detail on how contribute to the DXpedition. [TNX AA7JV]
VP2M - Bob, AA1M (VP2MPL) and Mike, W1USN (VP2MPR) will be be active from Montserrat (NA-103) from 25 February to 7 March. They plan to operate CW, SSB and PSK31. QSL via home calls. [TNX AA1M]
W - Fred, N5IVZ will be active from South Padre Island (NA-092) on 28 February, from 14 UTC to 23 UTC. QSL via home call, direct only. [TNX VA3RJ]
ZF - Bob, K3UL will operate mainly CW as ZF2UL from the Cayman Islands (NA-016) from 28 February to 7 March. He will be active holiday style, but he plans to spend at least two nights on the low bands. QSL via home call. [TNX The Daily DX]

PACIFIC TOUR ---> Yuji, JH2BNL (V63AR, V73J, NH0AA) and Mine, JA2NQG (V63WW, V73M, AH0F) will be active from Micronesia, the Marshall Islands, Palau and Guam as follows:
04-06 March Chuuk (OC-011) V63AR, V63WW and V63C (club call)
06-09 March Pohnpei (OC-010) V63AR, V63WW and V63P (club call)
09-11 March Kosrae (OC-059) V63AR, V63WW and V63T (club call)
11-14 March Majuro (OC-029) V73J and V73M

14-16 March Palau (OC-009) T8 callsigns TBA
17-19 March Guam (OC-026) NH0AA/KH2 and AH0F/KH2
They plan to operate CW, SSB and RTTY on 160-10 metres. QSL via home calls; the QSL route for the three V6 club calls is via JH2BNL. [TNX JA2NQG]

PACIFIC TOUR ---> Hrane, YT1AD and David, K3LP are planning two DXpeditions to three DXCC Entities: Tokelau (ZK3) & Central Kiribati (T31) to take place in April or September 2010, and Conway Reef (3D2C) for late September 2011. In order to organize these operations, Hrane and Miki (YU1DW) will be travelling to a few South Pacific islands between 20 April and 7 May this year, and be active as follows:
22 April Samoa 5W8A (YT1AD) and 5W0DW (YU1DW)
22-24 April American Samoa KH8/N9YU (YT1AD)
25 April Fiji Islands 3D2AD (YT1AD) and 3D2DW (YU1DW)
27-29 April Western Kiribati T30M (YT1AD) and T30DW (YU1DW)
4 May Fiji Islands 3D2AD (YT1AD) and 3D2DW (YU1DW)
More information will be available at http://www.yt1ad.info/t31 [TNX YT3W]

A DIFFERENT KIND OF AMATEUR RADIO COMPETITION ---> The overall Amateur Radio population has diminished dramatically, and the group at Radio Arcala (OH8X) is poised to try some new methods to attract young people congregating in many non-traditional hangouts such as Virtual World on the internet.
The overall Radio Arcala strategy is spelled out on the OH8X Webpages but one of the key buttons - "On Young People's Terms" - is still to be drafted. Radio Arcala challenges members of our fraternity of all ages to draft the text for this button in a way that is both appealing and informative enough to encourage today's youth to take the step we once took. Please submit your paper (no more than 250 in length in English or Spanish) by email no later than 15 March to oh8x@... (English) or yv5amh@... (Spanish). Details on the project can be found at http://www.radioarcala.com
[TNX OH2BN]

APPEAL FOR HELP ---> Abubaker, DL1AL (5A1A) sumitted "a very large number" of 5A1A QSL cards for ARRL awards, but they got lost between Germany and the US. "In an effort to rebuild my cards to apply for various awards, as well as to create a QSL album of contacts from Libya, I need your help", he says. "Please check your logs and if you worked 5A1A from 1995 onward, would you please send me a card to confirm the contact? You may send the card via the German bureau to DL1AL (my German callsign) or to my address in Germany".

ARRL INTERNATIONAL DX CONTEST (CW) ---> Object of the contest is for W/VE amateurs to work as many stations in as many DXCC countries as possible on 160, 80, 40, 20, 15, and 10 metre bands, while foreign amateurs (also including KH6, KL7, CY9 and CY0) work as many W/VE stations in as many of the 48 contiguous states and provinces as possible (full rules can be found at http://www.arrl.org/contests/rules/2009/intldx.html. This year's event will run from from 00.00 UTC on 21 February through 24.00 UTC on the 22nd. Do not forget to give a look at the Announced Operations listing maintained by Bill, NG3K at http://www.ng3k.com/Misc/adxc2009.html - good contest to you all!

K5D ---> The logsearch is now up and running on DXpedition's website (http://www.kp5.us/). It currently covers the period from 16 UTC on 13 February until 01.10 UTC on the 20th (67277 QSOs). The team now has "a more robust internet connection and the gap between uploaded logs should begin to shrink". The online lookup "cannot correct any problems we discover in the logs. Those will be dealt with when we're off island. In short, if you cannot find a Q in the online log, work us again just to be certain!"

LOGS ---> A logsearch for J20SE's recent operation is now up and running at http://www.ik3ges.it/iv3fsg.htm, and the QSL cards are being printed. [TNX IK3GES]

QSL 3V8SS ---> Antonio, IZ8CCW is the new QSL manager for 3V8SS, effectibe 1 January 2009. He is trying to get a hold of old logs. [TNX IZ8CCW]

WINQSLPOLICY ---> Manfred Meier, DF6EX (author of WINQSL and WIN-QSL-Collector) has just started a new project called WINQSLPOLICY. This application shows "where you can expect a return of QSL-cards via Buro, via Direct of if you just worked a Dollar-IRC-Collector". The database currently contains more than 10,000 entries, and club-licences are free of charge. Detail can be found on www.winqsl.de/qslpolicy. [TNX DF6EX]

QSLs received direct or through managers: 3A2MD, 3B8CF, 3B8GT, 3D2AG/p, 3V8BB, 4A3A, 4K9W, 4S7NE, 4W6R, 4Z5J, 5H1C (AF-032), 5N/LZ1QK, 5R8FU, 5R8IC (AF-090), 5U5U, 5W0UK, 5Z4/9A3A, 6V7D, 7P8DA, 7W0AD, 7Z1SJ, 8P5A, 9L1X, 9M6/N2BB, 9M6XRO/p, A25/DL7DF, A45WD, A5100A, A71AN/p, AT3ANT, BD7MVZ, BG1DRJ/2 (AS-158), BG7MVZ, C21XF, C31CT, C57R, C6AQQ, C6AXD, C94KF, CE0Y/N6NO, CP4BT, CP6AA, CW2C, CX7TT, D2QMN, D60VB, DL4JS/6W, DS1REE, DU1ZV, DV5PO, E51CUK, E51KAJ, E51QQQ, E76AQ, E77DX, E79D, EA6VQ, EK3SA, EK6TA, EL2DX, EP3HF, EP3SMH, ER/RW3AH, ER4DX, ER4ER, EY8/K4ZW, FJ/G3TXF, FK8CP, FK8DD, FM1HN, FO/DJ7RJ, FO/KM9D, FY1FL, H44MY (OC-192), H44TO (OC-192), HH4/AF4Z, HI0C, HI3T, HI3TEJ, HI8ROX, HK1AT, HK1X, HK3CQ, HP1/LA5IIA, HQ8R, J3/DL5AXX, J3/DL7VOG, J3/DM2AYO, J39BS, JD1BMM, JT1Y, JX9JKA, KG4SS, KH6LC, KL1V, KL7J, KP2/NY6X, KP2/W3AVO, KP2HC, LX1NO, OA4BHY/2 (SA-075), OH3OJ/p (EU-101), OK1CZ, OK1DQT, OL0A, OM7CW, P40L, P40W, PJ2T, PJ7/W6JKV, PY0FF, R1FJT, RW0CN, S53MM, S79NS/p, SU1KM, SV3RF, SV8/HA6PS (EU-174), SV9/DL5AXX, T04X, T30XX, T47C (NA-086),T88CJ, TF3CW, TF3SG, TR50R, TT8JT, UA2FW, V31XX, V4/AH6HY, V5/HB9PHJ, VK9DWX, VP9GE, VQ5FOC, VU2BGS, VU2UR, VU4MY, VU4RG, VU7SJ, XU7ABN, YT5Z, YU1AB, YU8SM, YW1TI, Z29KM, Z360M, ZB2FK, ZC4LI, ZK3AH, ZK3MW, ZP0R, ZP6/IZ1GLO, ZY0K.

ARLP008 Propagation de K7RA

ZCZC AP08
QST de W1AW
Propagation Forecast Bulletin 8 ARLP008
>From Tad Cook, K7RA
Seattle, WA February 20, 2009
To all radio amateurs

SB PROP ARL ARLP008
ARLP008 Propagation de K7RA

On February 11-13 we saw a sunspot, then it was gone. Typical of sunspots recently, it was only seen briefly, and this one was a relic of Cycle 23 according to its magnetic signature. For at least a couple of years now we've been expecting Cycle 23 to bottom out and new Cycle 24 spots to emerge, but the sunspot minimum drags on. Most projections are based on past cycle activity, so according to the timing of past solar minimums, we keep thinking surely soon there will be an explosion of new solar activity, but the Sun seems to tease us.

Our recent experiment with a 3-month moving average of sunspot numbers (see Propagation Forecast Bulletin ARLP006 at, http://www.arrl.org/w1aw/prop/2009-arlp006.html for the latest update) points to August 2008 as the possible solar minimum. If it turns out to be the end of Cycle 23, that would make 23 nearly 12 years long, only a little longer than the less-than-eleven-year average cycle length.

Tomas Hood, NW7US has a nice image showing the transition from Cycle 23 to Cycle 24 sunspots at, http://hfradio.org/progress/spotcompare.jpg. I believe the vertical axis represents number of actual sunspots per month, rather than sunspot number, which is entirely different.

Tomas Hood's website at http://hfradio.org/ has information on radio propagation, and you can also hear his twangy guitar when you go to that page.

Geomagnetic conditions were quiet this week, although February 14-15 saw moderate activity. The middle-latitude Fredericksburg A index was just 9 and 6 on those days, and the Planetary A index was 14 and 10. The high-latitude College A index measured near Fairbanks, Alaska was 25 and 22, indicating possibly disturbed conditions over polar paths. February 16-19 and possibly into today show very

stable and quiet indicators, similar to the January 7-8, 11-12, 21-25, and February 1-3, and 6-13 periods. All those ones and zeroes for K and A index tell the story at, http://www.swpc.noaa.gov/ftpdir/indices/quar_DGD.txt.

Geomagnetic conditions should continue to be quiet. NOAA and the U.S. Air Force predict a flat solar flux around 70 for the next month. The predicted Planetary A index for February 20-23 is 8, 12, 8 and 5, continuing at 5 until March 3, when it may rise to 10. Geophysical Institute Prague predicts quiet conditions for February 20-26, except for unsettled conditions February 21-22.

There were a couple of bugs with some links in last week's Propagation Forecast bulletin ARLP007.

The bulletin as displayed on the ARRL web site showed one of the links, mms://max-server.net/2008_vr2bg with the beginning unhighlighted, so when users clicked to try to watch the VR2BG video on OTH radar, they were instead taken to a similar address beginning with http, which does not work. Instead you can highlight the whole URL including the mms beginning, hit Ctrl-C to copy, then open another browser and paste the URL into the web address field by clicking in the field and then hitting Ctrl-V, then the Enter key. At least, this is how it works with Windows machines.

Similarly, the http://www.techblog.tomksoft.com/data/duga-3/antennas.jpg link, although correct, caused the server to display an anti-hotlinking error message as it detected the redirect from the ARRL web site. This can be solved like the earlier problem with the mms URL. Just highlight the URL, then copy and paste it into another browser. Works every time. Thanks to George Mackus, AB0RX of Maryland Heights, Missouri for alerting us to the problem.

Find more information on the Chain Home Radar system -- Jim Muiter, N6TP, of San Mateo, California, recommended http://www.radarpages.co.uk/mob/ch/chainhome.htm.

Greg Andracke, W2BEE of Pine Plains, New York is off to Middle Caicos Island (IOTA NA-002) from March 2-12 as VP5/W2BEE. Greg will be operating CW with just a doublet antenna, and if not on vacation, perhaps he is there to film another documentary. He is a cinematographer (see http://www.imdb.com/name/nm0027996/ and http://www.andracke.com/) and recently I watched his excellent 2007 Academy Award winning documentary via a DVD from my local library. Not sure which HF bands he will be on, but he said he will be operating casually.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for February 12 through 18 were 11, 11, 0, 0, 0, 0, and 0 with a mean of 3.1. 10.7 cm flux was 69.7, 70.1, 70.1, 69.6, 69.5, 70.6, and 69.8 with a mean of 69.9. Estimated planetary A indices were 4, 3, 14, 10, 3, 1 and 2 with a mean of 5.3. Estimated mid-latitude A indices were 1, 2, 9, 6, 2, 1 and 1 with a mean of 3.1.

9102. Pure dumb luck

Yahoo group: DX-IS (2009)
Date: 2009-02-21 14:16:19 UTC
From: Alan Leith
Topic: 9102 Message: 9102

I suppose you could call this a brag post but I prefer to think it is a story of one man's luck.

Just a few minutes ago, K5D came back on 18147 and apologized for having quickly gone QRT a few minutes earlier because a supply shipment had come in. I had been looking for K5D when I heard this and had not been there when he left. And to top it all off, he was working simplex!

The pileup was immediate and I knew that my little 100W and non-17M antenna would not cut the proverbial mustard. So I sat and listened in utter dismay to the massive and typically unruly European pileup. A French station had perfect timing at the end of the calling stations and dropped his call in twice. I was absolutely amazed that K5D came right back to him. And so I tried it myself but I only called once.

Damned if it didn't work. Less than three minutes had elapsed since the return of K5D and I was in the log.

So, if you play your cards right, it is possible to "break the pileup." It is a combination of pure dumb luck and pure dumb luck :-).

Now, I wonder if I can hear them on 12M. I'm guessing NOT!

I took the day off so I could try to work K5D on 17. What am I going to do for the rest of the day?????

Congrats Al!

I've now worked them on all bands I was really interested in. I didn't work them on 17, 12 or 10. I may give it a try but I'm not spending another 20 hours calling.

Listen on 10 CW this weekend to determine how open the band is. Nothing like a major contest to indicate where the band is open to! :-)

Luck certainly has a lot to do with it. So does patience, and knowing (or guessing) when to be in the right place at the right time.

Thursday evening is a good example. They were on 17 SSB around 2245 Z, 18.160 listening .150 to .155, working JA's. I was just listening as I was getting things ready for a club meeting. Suddenly, around 2250, the op announces that he's having a hard time hearing the JA's due to poor propagation at the moment, and that he's going to take a break - and work anyone! Got him 10 minutes later, right before he went back to JA only.

Now, if 12 will just open up for a little bit late this morning or early this afternoon, while I'm putzing around getting everything ready for tommorrow morning's hamfest, I will be a VERY happy camper, as opposed to just a happy camper!

I finally got them on 40 last night. I think the pileups are getting thinner.

All my QSO's have been with the barefoot TS-850. No amp at all, including on 80m. If you're a little pistol, I think it's often a matter of luck if you end up on a frequency that is free of QRM and if they happen to tune to that frequency.
I don't know what their plans are but I'll bet they concentrate on SSB and 6 meters during the ARRL DX contest.

Being at the right place at the right time has everything to do with getting in the log, and being there when the DX calls CQ or getting there at or shortly after a spot enhances your probability of success. However, sometimes you luck into one of those serendipitous experiences that you wouldn't have predicted. Such was the case not once, but twice yesterday. About 1510 UTC I noticed a 17 meter RTTY spot for K5D, and worked him at 1512 UTC after a few calls. Then, noting that they were also running RTTY on 30 meters, I tuned the frequency and worked them at 1516 UTC. What are the chances of them being on 17 and 30 meter RTTY and working them both bands within four minutes of each other? The same thing happened later that evening. K5D was spotted on 160 SSB and I worked them at 0057 UTC on the second call. Shortly afterwards, an 80 meter SSB spot appeared, and I work them on 80 SSB at 0114 UTC after a few calls. By then, the hoards were gathering, and it got much more difficult for the latecomers to break the pileup. So by a twist of fate, I worked K5D on two modes and four bands in a total operating time of less than 25 minutes. Serendipitous indeed!

I had something similar happen last Sunday. There was a pipeline from them to this area of the country on 20 meters (not sure of the exact area but I heard W5's and W9's, W0's work them) after the band would've normally been closed. They called CQ a lot with no takers. I worked them first call on both SSB and CW on 20 then. Those QSO's were about an hour apart.

I think a lot of us sat with our receivers set at 7023 for several nights last week. They seemed to show up any time between 0530 and 0630Z. IF you were lucky and called when they first showed up, AND on the frequency they were receiving on, you could beat out the masses. Didn't happen for me but I did work them the other night on 40 CW. The pileups are thinning.

It's all about location, Fred. I see you spotting Asian stuff
that we'll love to be even able to hear, let alone work. For us on
the east coast of NS, you'd be hard pressed to find a easier location
to work than the Caribbean. On the other hand, 3Y0/b and ZS8 are a
clean over water path for you. Yes, this one favours us (As did St Barts.)

However, you wait. Someone will find a new one on a map that is
some island in the South China Sea, and then we in east coast NA will
be the ones who will be lucky to get a single 20M QSO. It's all
about location. You win some and you lose some.

Earlier today some European (identified on the cluster as...) posted that K5D was shutting down due to problems with documentation. It was, I am certain, absolutely wrong and malicious. After that post, I listened to them on 17 for hours, then went to 20 and then to 30. They are still there.

9119. New Hams

Yahoo group: DX-IS (2009)
Date: 2009-02-22 01:14:12 UTC
From: AD5VJ Bob
Topic: 9119 Message: 9119

I have written and uploaded to my website in pdf form a short introductory to Ham Radio for new Hams that includes many links to
sites that we all use to help them get a jump start. There is no cost since I just wanted to do something for the community.

How do I or who do I ask for permission to upload it into the files section?
Someone probably needs to approve it first, but I dont know who.

Bob,

I just checked and as far as I can tell, members can upload files.
You have to do it from the web interface. Just log on to the web at:

http://groups.yahoo.com/group/DX-IS/

Click on the Files section on the left side of the page and you
should be able to upload it with the "Add File" link at the lower
left. If this doesn't work, let me or N1DG know.

Hi Paul

I just realized that wont work because in order to make sure it was only Hams that got a hold of it I included a password in order
to open the pdf that I have to email them since I wanted it to be their own personal copy.

I looked in the links section but it looks like that section is closed for some reason, or I cant figure out how to create a link in
there.

Does anyone know how?

Bob,

The link section was read only for list members. I opened it up so that list members can add/modify/delete links. This was previously limited to moderators/list owners. This should allow you to create a link to the document you have created.

I'm not sure of the wisdom in doing this, but I'm trusting that none of the ~300 members will create links to inappropriate material. It's probably no more risky than allowing members to upload files, and this has been allowed since the list was created.

Hi Paul

Thanks, if you would like to review the material I can send you a copy of it along with a passcode. I have made the link.

I agree with you on the concern abt inappropriate material.

My recommendation, if I may be so bold, would be to have all of us ask permission even for file uploads. This way you or your
designated representative could review the material first.

If you would like I can volunteer to help you on this.

9124. A good week (brag)

Yahoo group: DX-IS (2009)
Date: 2009-02-22 06:51:38 UTC
From: Mark Lunday, WD4ELG
Topic: 9124 Message: 9124

Three all-new before the contest: ET3, K5D, T2. Just missed HV0A.

Five new on 80 in the contest: OH0, GD, EU, 5B, HC. (Nice when they are looking for NA only!)

Now all I need for 9BDXCC is some sunspots for 12 and 10, and some room for an inverted L on 160.

DX IS.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th/February, through Sunday, 22nd/February there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FS, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4L0, GEORGIA. Members of the Mamuka Contest Club will activate 4L0G in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Multi-Single entry. Operators mentioned are: 4L5DJ/Shota, 4L2M/Mamuka and 4L4CC/Levan. They will use a TS-950SDX w/1KW PA into a full size Delta loop and Vertical; RX Antenna 2 beverages. QSL via EA7FTR (UA9LP for Russia; UT7QF for Ukraine).

4M, VENEZUELA. Operators Jose/YV5TX, Werther/YV5MSG and Alexis/YV5SSB will be active as 4M5DX during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single/High-Power entry. QSL via IT9DAA.

7Q, MALAWI. QSL Manager Allan, G0IAS, will be active as 7Q7AH with Harry, 7Q7HB (G0JMU), on the southern shore of Lake Malawi for one month starting February 23rd. Allan informs OPDX that he will be taking an amplifier and a wire antenna for Top-Band with him which should be a little better and stronger for this band. However, he mentions that this is the rainy season, with lots of lightning storms around the Lakeshore so please don't expect miracles. Harry is already fairly active on RTTY and PSK31, but 7Q7AH hopes to fill some gaps when Harry is busy. There is also a chance that John, 7Q7JL, will also visit the shack to transmit if the roads are okay to drive on between the Lakeshore and Blantyre. QSL route is to G0IAS, DIRECT ONLY, with sufficient funds for card return. NO return postage... NO return card. Allan states, "Sorry people but postage is expensive in the UK...and the managers pockets are only so deep.!"

8Q, MALDIVES (AS-013). Tom, PF4T, will be active as 8Q7TB from Embudu between June 8-25th. Activity will be on 40 and 20 meters using SSB. QSL via PF4T, direct to: Tom Braam, Hondsrug 210, 8251 VB Dronten, The Netherland. PLEASE NOTE: Include a self addressed envelope with or 1 Green Stamp if you are in Europe. If outside Europe, please include 2 Green Stamps, as one is not enough to cover postage.

B1, CHINA. Ed, N1UR, will be operating as B1Z from the Beijing DX Club Contesting station during the CQ-M Contest (May 9-10th) as a CW/SSB entry. QSL info TBD. More details later.

C6, BAHAMAS. Harry, W6DXO, will once again be active as W6DXO/C6A from South Andros Island (NA-001) between March 1-7th. Activity will be holiday style operation with focus on 30/17/12 meter bands as propagation allows. QSL Manager is KF6JOQ (direct).

CT7, PORTUGAL (Special Event). Members of the Algarve STAR DX Team will activate the special callsign CT7FFC from Sapal Castro Marim Natural Reserve (DPRN FF-22, valid for DPRN - Portuguese Natural Parks, Natural Reserves and Protected Landscapes Award <http://www.algarvedx.com/dprn>), March 1st between 0700-1300z. They will be on the air with 2 stations running 40m and 20m SSB and CW. Team consists of: Rui/CT1ERY, Toze/CT1GFK, Al/CT1GPQ, Mike/CT1IUA and Rui/CT2IHP. QSL via CT1GFK, direct or by the bureau, request via E-mail to: cu8at@...

D4, CAPE VERDE. Operators Fabio/I4UFH, Cortes/IZ4DPV, Vittorio/I4YSS and Antonio/CT1DVV will be active as D4C during the CQ World Wide WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via IZ4DPV. For the latest information, check the D4C Web page at: http://www.d4c.cc

ED5, SPAIN. Members of the Torrent Contest Club will activate ED5T during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single entry. QSL via EA5ELT. Operators mentioned are: Juan/EA5GIE, Jose/EA5GS, Duncan/EA5ON, Antonio/EA5DF, David/EC5KXA and Vic/EA5KV.

FG, GUADELOUPE. Nicolas, F5TGR, will be active as FG/F5TGR from March 14-28th. Activity will be active on 40-10 meters using CW and SSB. QSL via his home callsign.

FH, MAYOTTE. Remember to look for Phil/G3SWH and Richard (Dick on CW)/G3RWL to be active from Mayotte this week between February 26th and March 5th. Mayotte counts as AF-027 for IOTA purposes. Both operators will use the single callsign of FH/G3SWH. Their activity will be mainly on CW on all bands 80-10 meters. There may be some 160 meters CW activity, but this will be entirely subject to QRN, antenna space and local site conditions, so there are no promises. Richard may also operate some RTTY towards the end of the trip. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many bands as possible. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's Web site for a bureau reply or via the bureau. There is more information at:
http://www.g3swh.org.uk/mayotte.html

FM, MARTINIQUE. Dim, UT5UGR, will continue to be active as FM/KL7WA until February 24th. He was active in last weekend's ARRL DX CW Contest as FM5KC. QSL via UT5UGR.

FR, REUNION ISLAND. Stephane, F5UOW, will be active as FR/F5UOW from Boucan Canot (near St. Gilles les Bains) between March 8-22nd. Activity will be holiday style, mostly CW on 20 meters. QSL via his home callsign.

IOTA NEWS.....
EU-006. Members of the Galway Radio Experimenters Club will activate EJ4GRC from the Island of Inishmore (WAB Square L71) between 1200z, March 17th and 1200z, March 18th. Activity will be on all bands and modes. Visit their Web site at:
http://www.galwayradio.com

EU-008/
EU-010. Paul, M3KBU, plans to be active as MM3KBU/p from the Inner (EU-008) and Outer (EU-010) Hebrides between August 1-16th. Activity will mainly be SSB on 14260 kHz (+/-). Check QRZ.com under MM3KBU for updates and times. QSL via M3KBU, direct or by the bureau. Islands currently mentioned are as follows:
Inner Hebrides (EU-008)
Skye (IOSA NH07, SCOTIA CN14)
Raasay (IOSA NH10, SCOTIA CN24)
Outer Hebrides (EU-010)
Baleshare (IOSA OH26, SCOTIA HI11)
Benbecula (IOSA OH04, SCOTIA HI08)
Berneray (IOSA OH05, SCOTIA HI15, WLOTA LH-0756)
Eriskay (IOSA OH09, SCOTIA HI05)
Grimsay (IOSA OH27, SCOTIA HI10)
North Uist (IOSA OH02, SCOTIA HI13)
South Uist (IOSA OH03, SCOTIA HI06)

EU-090. A team of 7 members of IOCA Group (Sven/DF9MV, Daki/9A2WJ, Franjo/9A2MF, Boki/9A3KB, Matt/DL5MFL and Dado/9A3TA), with Emir/9A6AA as team-leader, will be active as 9A0CI from "Vela Palagruza Island/Lighthouse" (CI-084, LH-0057, CRO-012) between May 8-16th. Activity will be on 80-10 meters using CW, SSB and the Digi-modes. QSL via DE0MST, by the DARC Bureau or direct to: Manfred Stippschild, Sylvensteinstr. 9, D-83661, Lenggries, Germany. They also expect to operate SSB as 9A/homecall and homecall/p from "Mala Palagruza Island" (EU-090, CI-461) and, for the first time, from "Rock of Kamik Od Tramuntane" (CI-960). QSL via their home callsigns. More details are available at: http://www.inet.hr/9a6aa/iocaplan.htm

NA-186. Cezar, VE3LYC, is planning a DXpedition to one of the most wanted IOTAs in the world called Fox Island. Cezar states, "This group sits on the #1 position on the NA-IOTA Most Wanted list with only 3% of the IOTA members having it confirmed. The only activation was back in 1993, for only a few hours. Several years ago Fox Islands had been designated polar bear resting site in the Churchill Wildlife Management Area and became off limits for the public. This past Thursday (Feb. 19th), I had finally been informed that a permit had been issued for my DXpedition, and I will be able to travel to the islands between March 31st and April 3rd. Note that I have also requested a special callsign from Industry Canada, but their evaluation is likely to take a little longer. I will travel with two professional guides who will provide transportation to the island by snowmobiles, bear watch and safety, as well as all logistical support required for such an operation. Outside temperature at that time of the year is expected to be around -10 C. If I'll be able to obtain the special callsign, I will set up a page at QRZ.com where I will update everyone on what follows." Costs of this operation are very high and Cezar is seeking any possible support from both group and individual donors. Cezar states, "Any donation will be truly, very much be appreciated. There are two things that I will include later on the QRZ.com page. First, about the QSLing. Those who choose to mail direct requests should check the cost of mail from Canada to their QTH. QSL requests received with insufficient return postage will be automatically sent via the bureau. Secondly, I will be camping in total wilderness without internet access on the island. As such, DX Cluster posts addressed to me as criticism or requests are useless. I am determined to give all parts of the world a chance, and I ask DXers to respect my direct calls."

J8, ST. VINCENT. Dave, G3TBK, is once again active from here as J88DR. He was in last weekend's ARRL DX CW Contest but is also expected to be in ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/Low-Power entry. Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, but mostly on CW. QSL via G3TBK, direct or by the RSGB Bureau.

JD1, OGASAWARA. Operators Hide/JM1LJS and Hiroyuki/JG7PSJ will be active as JD1BLK and JD1BMH, respectively, from Chichijima Island (AS-031) between April 29th and May 12th. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via their home callsigns.

KG4, GUANTANAMO BAY. Dan, W0CN, will be on a short work assignment and active as KG4CN from Guantanamo Bay, Cuba (GITMO, IOTA NA-015, Grid FK29), from February 26th until March 9th. Activity will be on 160-10 meters, mostly SSB and some CW. Also, look for Dan to be operating in the ARRL DX SSB Contest (March 7-8th). QSL to W0CN (LoTW/direct/Zero-Bureau).

KP5, DESECHEO ISLAND DXPEDITION (News/Update).....
* The K5D DXpedition to Desecho Island continues to be on the air until February 26th. On February 20th, "Group #2" left the island and was replaced by "Group #3". "Group #1" will be staying during the whole K5D operation. Pictures of the groups as follows:
#1 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group1.htm
#2 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group2.htm
#3 http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/group3.htm
The team has fought hot weather, high winds and seas which cause them to lose several antennas on the beach due to guy-points being washed away, but the DXpedition continues to operate effectively. Plenty of new pictures are being added daily to the DXpeditions Web site and the K5D QSO count keeps climbing high. As this was being written (Sunday at 1823z), the K5D QSO count was just under 86k contacts (+41k/CW, +38k/SSB and +5k/RTTY). This count does not include QSOs being made on the satellites. Remember, online logs at available at:
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/lookup.htm
Activity will continue on 160-6 meters using 6-8 stations on CW, SSB and RTTY. QSL via N2OO. Remember for updates/logs/pictures, visit the KP5 Web page at: http://www.kp5.us

MJ, JERSEY. Operators David/G3NKC, Dave/G4BUO, Martin/G4XUM and Phil/GJ4CBQ will be active as MH4K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via G3NKC.

P4, ARUBA (Change of Plans). Andy, AE6Y, will be active as P49Y during the ARRL DX SSB Contest (instead of the CW Contest -- March 7-8th) as a Single-Op/All-Band entry. QSL via AE6Y.

PJ7, ST. MAARTEN. Bil/W8EB and his wife Dorothy/W8DVC will be here between February 22nd and March 19th. Activity will be on 160-10 meters, CW, SSB, RTTY and PSK31 as PJ7/W8EB and possibly PJ7/W8DVC. Operations will be limited because he is on holiday. Bil will operate in the ARRL DX SSB Contest (March 7-8th) as PJ7B, and as a Single-Op/All-Band/Low-Power entry. This will be Bil's 14th consecutive ARRL DX SSB Contest participation from St. Maarten. Also look for him to be in any RTTY contests. All QSL requests go to W8EB. Visit their PJ7B Web site at: http://www.qsl.net/pj7b/

QSL INFO AND NEWS.....

P40LE via LoTW or direct to K2LE
P40R via N4RR
RW2F via DK4VW
VP2VES via AK0M

HK1AT QSL STATUS. The HK1AT Team reports that there was a mistake in the printing of the QSL card and the name of the island (Mucura Island, IOTA SA-078) was omitted on all the QSLs confirmed so far. The team has proceeded to solve this problem and all those QSLs already confirmed, will be resent and with a new QSL with all the necessary data.

NEW QSL MANAGER. Nenad, VE3EXY, announced that he is now managing VE1OTA QSLs for "NEW" activations (all QSOs after January 2009). VE1VOX will still handle his own cards as well as OLD VE1OTA activations (all QSOs before January 2009). For more details, see QRZ.com.

NEW QSL MANAGER. Joe, W3HNK, is now the QSL Manager for SV0XBM/9.

TO3R QSL STATUS. Alex, RW3RN, states that he has received the TO3R QSLs from the print. Look for them to go out soon.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3B8CF, 5N/LZ1QK, 9M6/N2BB, BG1DRJ/2, C94KF, E51KAJ, E51QQQ, EY8/K4ZW, FO/KH0PR, H40MY, HI3T, JX9JKA, T77C, TR50R, TT8JT, VP6PR, VP9GE, VU4RG and ZB2FK

QSLS RECEIVED VIA THE BUREAU: 3DA0ZO, 5B/LZ2HM, 8R1K, 8S5LH, 9A7W, 9A9Z/P, A25HQ, BL7IN, C50C, C91KDJ, DF0CHE/LH, DF1KSP, DF1RA, DF1VB, DF2CH, DF0CG, DJ1HA, DJ4GJ, DJ5KK, DJ6OL, DK0MA, DK1ZH, DK2YCT, DK4QT, DK5KN, DL0RS, DL0SHW, DL1DBR, DL1EST, DL1PR, DL3HH, DL4DBM, DL6ABN, DM4NF, DO6RO, DO7DP, DP4P, DR1A, E51WWA, EU5ROPE, EV9P, F8KTH/P, HB2008FS, HB2008ND, JW8BCA, OZ/DL1TM, PA5DD/P, RA3RGQ/1, RA6CY, S58AL, SD3A, SG5X, SK7L, SL1HF, SU8DLH, T6EE, TK/HA4XG, UA6AF/P and VP2EFB

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQ 160-Meter SSB Contest (February 27th-March 1st) as a Multi-Op entry. QSL via DK4VW.

S9, SAO TOME (AF-023). Georg, DK7LX, will once again be active as S92LX from June 13-27th. Activity will be on 80-10 meters CW only. He plans to have a Web site available which will include an online log search. QSL via his home callsign, direct or by the bureau.

SPECIAL EVENT. Look for special event stations to be active with the "1658" within their callsigns on February 26th. Activity is to celebrate the "Treaty of Roskilde" when the three most southern provinces of Sweden [Skane (Scania), Blekinge and Halland] became under Swedish rule after more than 800 years of Danish rule. Working these stations is good for the "Roskilde 1658 Award". To qualify for the award you must work two Swedish award callsigns with 1658 in the call, or OZ1658ROS and one Swedish award

callsign. During the rest of the year four Swedish award callsigns or three Swedish award callsigns and OZ1658ROS are needed. The award is also available for SWLs. All callsigns, maybe with the exception of SH1658DK, will be active sometime during the day on February 26th. Most activity will take place after work hours, that is around 1600z or later, on 80m and 40m. Some stations will be active on 20m and other DX bands around 0800-1500z, if conditions permit. Also, SB1658OZ will be active on PSK31 near 14070 kHz on February 26th, if conditions permit. This station is situated in the province of Blekinge, and is also valid for the very rare "Lan K" for the national WASA/HASA awards issued by their IARU organization, SSA. Only a handful of hams are active on the HF bands from the county of Blekinge. "Roskilde 1658 Award" was presented in the February 2009 issue of CQ Amateur Radio. Check out their activities calendar on the Roskilde award's Web site for complete information at:
http://www.sk7bq.com/roskilde
The calendar will list all callsigns that will be active with their approximate dates/times and frequencies. The calendar is updated continuously when new activities are announced. An online log is available as well. It is updated at least every month if there has been activity with the callsigns. It will also tell you if you have qualified for the award.

SV9, CRETE (EU-015). Willi, DJ7RJ, will be active as SV9/DJ7RJ between February 25th and March 15th. Activity will be on 160-10 meters, using CW and SSB. QSL via his home callsign, direct or by the bureau.

T2, TUVALU. Operators Bob/W7YAQ and Bill/N7OU are now active on Tuvalu as T27A and T27OU, respectively, until March 2nd. Both operators were active this past weekend as T27A in the ARRL DX CW Contest as a Multi-Single entry. Look for activity this week on 160-10 meters, mostly CW, some RTTY. QSL via their home callsign.

TA, TURKEY. Members of the Telsiz ve Radyo Amatorleri Cemiyeti Mustafakemalpasa Subesi (TA3KZ) and the Balkan Contest Club (LZ1KZA) will activate TA3KZ from small village Tirnova near Mustafakemalpasa (QTH Loc:KM49FV) during the CQWW WPX CW Contest (May 30-31st) as a Multi-Single entry. QSL via TA3KZ, by the Bureau or direct.

V3, BELIZE. Gerd/DJ4KW and Gisela/DK9GG will once again be active as V31YN/p and V31GW/p, respectively, from Blue Marlin Lodge on Southwater Caye (NA-180), between February 26th and March 3rd. Activity will be on all bands and modes. QSL via their home callsigns, direct or by the bureau or LoTW.

VP2M, MONTSERRAT (NA-103). Operators Mike/W1USN, Scott/W1SSR and Bob/AA1M will be active between February 25th and March 7th. Their callsigns have not yet been assigned, but they have requested VP2MPR (W1USN) and VP2MPL (AA1M), if not, VP2M/homecall. Activity is planned for CW, SSB and PSK-31. QSL via their CBA.

VK9M, MELLISH REEF. Operators George/AA7JV and Tomi/HA7RY will be active as VK9GMW in what they call "another low-key, simple DXpedition", from

Mellish Reef between March 22nd and April 6th. Please note that the dates are approximate and may change due to weather. The operation will have a strong low-band focus, although VK9WMW will operate on all HF bands. QSL will be via HA7RY, by the Bureau or LoTW or direct to: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY. After VK9GMW has gone QRT, they will launch an "Online QSL Request Service" (OQRS) on their Web site. If you want to receive your QSL via the Bureau, please use that form to request the card. They will check your QSOs against the log and send your card to you via the Bureau. This method will allow them faster processing, helps them protect the environment, and you will receive your VK9GMW card faster. For more information, please visit the VK9GMW Web page at:
http://www.vk9gmw.com
For donations, please access: http://vk9gmw.com/support.html

ZF, CAYMAN ISLANDS (NA-016). Bob, K3UL, will once again be active as ZF2UL between February 27th and March 7th. Activity will be mainly CW, "holiday style" on 160/80/30 meters. QSL via his home callsign.

ZP0, PARAGUAY. Tom, ZP5AZL, plans to be active as ZP0R during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band entry. QSL via ZP5AZL. Visit Tom's Web page at: http://www.qsl.net/cx6vm/ZP5AZL

ZY0, FERNANDO DE NORONHA. Operators Anderson/PY2TNT, Fabio/PY2AAZ/AC2AC, Alex/PY2WAS and Bob/N6OX will be active as ZY0F from Fernando de Noronha Island (SA-003), from June 10-15th. Activity will be on 160-10 meters including 60/30/17/12 meters (60m under temporary licensed granted by the Brazilian Government) using CW and SSB. QSL via PY2WAS, by the bureau or direct. This DXpedition is sponsored by Spiderbeam Antennas. Also, see ZY0F on QRZ.com.

I'm trying to get a qsl for a 3d2qb qso in 1993.
qsl mgr info shows sm3cer (1997 on).
So I'm trying to write to 3d2qb directly.
But the hamcall address for him is:

Allan Osterman,
P.O. Box 736,
Lautoka, 666065,
FIJI, CONWAY REEF, ROTUMA

What I'm trying to figure out is which of the 3 countries to use in the
mailing address to reach him.

Has anyone successfully corresponded with Allan?

Topic: 9130 Message: 9130

I have used mainly wire antennas in my ham life, I know that doesn't match most peoples operating stations, but it has mine for
various reasons. So I am not really confident in what to look for in a beam.

I have been looking around at beams from various manufacturers (Hygain, M2, Cushcraft, KLM, ect., and the number of choices out
there are unreal. The gain in the sheets seems to be fairly close from one brand and model to the other. The weight and sizes are
almost the same for the same antenna, except for M2.

I am having a hard time making up my mind.

Not trying to make anyone make a decision for me, but I would like to see a consensus on what you guys look for when you are wanting
a beam antenna and therefore give me some food for thought. Do you look mainly for: Strength, Portability, Gain, Flexibility, one
that will last for 30 years, ease of construction, ect.

One guy told me that he buys a beam from the standpoint of leaving it up for a long time, another one said he doesn't like keeping
the same beam more than three years no matter what. (not sure why)

Or is it true that one brand is superior to others. I know it used to be that one (if they had the money) would buy KLM because it
was considered to be superior in workmanship.

Do anyone ignore the fact sheets since they all seem to be so close to one another and buy only one brand, simply because of brand
loyalty.

I have read that the gain figures they advertise are not real, but are somehow made to reflect more gain than is practically
accomplished, so I would also like to know if that is true or not.

So far I dont see that much difference in the gain or F/B ratios. It seems a yagi is a yagi in that respect.

Bob,

I look for strength and not having to take it down every few years to do maintenance. Although I have a TH-5 (Hy-Gain) for 20/15/10, were I to do it over again, I'd go with a Mosley TA-34. They make the toughest antennas of any NA manufacturer. I have a Mosley TW-33-XL for 30/17/12 and a Mosley AM-56 for 6M. I read somewhere the *average* amount of time a Mosley beam is in the air is 27 years!

As you've found, there are many choices. There is no sense in comparing the manufacturer's specs, because they often mix up dBd and dBi to make their numbers look better (that's why most ads in Ham magazines no longer publish gain figures)

Also, most of them are not tested on a proper range, but rather use theoretical figures derived from computer simulation programs and look-up tables. Any beam, installed at a different height over different terrain, will give vastly different performance that the same model at another location. There probably is no answer to the best gain and best F/B other than the longer the boom and the more elements, the better.

Both of my Mosley antennas work well. They are tougher than anything else made stateside (I hear the German made Opti-beam is stronger -- I have never seen one and they cost and weigh a lot more.) I can't verify Mosley's claimed figures other than to say they work what they hear and have excellent forward gain and F/B. If, at my installation, they are off by a dB or two, I can't tell. I'm told Mosley, being a supplier of Military antennas, has to test them on proper ranges ten miles apart because they are bidding on government contracts and have to back up their figures. Apparently they do the same with their Amateur line of gear, but again, there is no way to prove or disprove the numbers given.

Based on this, I don't feel you will find a lot of difference between any of the mainstream manufacturers from an electrical standpoint. A trap is a trap, and a 50-ohm matching system, be it a gamma match, a beta match, or whatever, is just that; a matching system. They all will work the DX for you. In my experience, you will make a lot less trips up and down the tower if you install a Mosley. That is why I like Mosley.

73, Paul VE1DX

Bob,
It depends on what bands you want to work. If just 20/15/10 then a beam would be ok.
But if you would like to have 17 and 12 also I would go with a Tennadyne T8 LogP.

I have had one up for a long time and it works great. Went through the storms here in Houstonlast year with no problems.
Have 2 that we use in South Africa whrn we are there playing radio. One nice thing is no traps no moving parts.

Bob:

I have a Tennadyne T10 log periodic at my home QTH and love it. I replaced a Mosley Classic 33 WARC beam with it. The Tennadyne has no traps and has been totally flat SWR-wise across all 5 bands from the day I put it up at 50 ft.. There are no settings, etc. just just assemble it per the directions. Same way with the T6 and the T8 Tennadyne log periodics.

Only thing I miss is I had the 40m kit on the Mosley which also gave me a rotatable dipole on 40m, but I just use my inverted vee more now hi hi.

Good morning Bob:

I am using a Cushcraft A3 that I bought in 1986 or 1987, and it still hangs in there. It works 10-15-20. It isn't a top of the line antenna, but it has served me well. Running 500 watts I worked BS7H among others, and so far it has survived two hurricanes here in East Texas with top wind speeds up around 93-95 MPH. One more data point for you.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and the KP5 Web page for the following DX information.

The following press release was taken from the KP5 Web page. The release announces that the K5D team has now hit 100k QSOs and there is an amazing video available to watch online.....

February 23, 2009

0414z: K5D completes QSO 100,1000! the 100,000th Q was with E77U on 40M CW.

First Video uploaded and available at:
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/feb18video.htm

1530z: Yesterday was a fairly easy day for the K5D team. No resupply boats, no water, gas or food to carry on our backs from the landing cove, no antenna work to do....just work the pileups. We have begun to modify the radio schedule to try to pick up those areas of the world that have been obscured by the huge pileups from the population centers of NA, JA and EU.

Also, as we approach the end of the operation, plans are being set for an orderly departure. By the terms of our SUP (Special Use Permit) we must vacate the island no later than the 26th. Our current plan is to begin removing equipment and infrastructure on Wednesday afternoon the 25th. The last night (Wednesday) we will have three stations QRV, emphasing 80m, 40m and 30m. Departure will resume at sunrise on the 26th.

The team is in good spirits and feels very good about what has been accomplished from this #6 "most needed" entity. We are now confident of over 100,000 QSOs.

-=-
** IMPORTANT NOTICE/REMINDER ** The Ohio/Penn DX Bulletin now has a new

FAX number. Contributors can now send/fax their DX information to the
following number: 1-419-828-7791 (F A X only!)

9137. 2009 Visalia International DX Convention

Yahoo group: DX-IS (2009)
Date: 2009-02-24 17:26:00 UTC
From: WB6PSY
Topic: 9137 Message: 9137

Attention All DXers

The 2009 International DX Convention
in Visalia, California
Will be held April 17th to 19th, 2009

This is the 60th Anniversary of this event, which promises to be even more special this year than it has been in previous years.

Special Attractions this year Include:
a.. Contest Academy by the Northern California Contest Club
b.. Radio Arcala Project with OH2BH & OH8NC
c.. Special Guest and Banquet Speaker: The Hon. J. Scott Redd (K0DQ), Vice Admiral, U.S. Navy (ret)
d.. Breakfast Program: Desecheo, KP5 DX-Pedition
For Complete Program Information, see www.dxconvention.org

Hurry!! Special Pre-registration Price Ends March 20, 2009!!

9139. K5D and the laws of Physics

Yahoo group: DX-IS (2009)
Date: 2009-02-24 22:32:35 UTC
From: Derek Wills
Topic: 9139 Message: 9139

For various reasons, I'm restricted to using a 20m wire dipole right now. Not surprisingly, I worked K5D on 20m but I had no problem working them on 15, 17 and 30m as well. It must be the 20 ft of coax that's radiating a fraction of the nominal 100 watts.

Hmmm, I wonder if it works on 160m....

Derek

9140. Re: [DX-IS] Re: HF Yagis

Yahoo group: DX-IS (2009)
Date: 2009-02-24 23:07:14 UTC
From: CSM(r) Gary Huber
Topic: 9130 Message: 9140

I've had a Hygain TH7 in the air for almost thirty years. Down one time to relocate ten miles to current location. Assembled and reassembled with Blackburn brand aluminum joint compound. Replaced the transformer balun with the high power choke balun. Its survived numerous high winds, a close pass of a tornado, and ice storms (see <http://www.csm-gh.com/AB9M-TH-7.htm> and <http://www.csm-gh.com/ac9s-skyhawk-1.htm>) when others in the area with different manufacturer's antennas were not as fortunate. Your results may differ.

Best regards,

Dale,

There is a lot of info on the web - depends on the radio, mode, internet connection, and how much you want to control.
Suggest you join this reflector, has many of the more experienced remote ops:

YI9DXX or W7DXX had a successful operation out of Iraq via remote.

You can get his details from QRZ.com.

GL, 73, Lance - VK6DU (who still needs Desecheo on RTTY).

No 930
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5N - Bodo, DL3OCH (KT3Q) will be working in Nigeria from 5 March until 24 July. He plans to operate EME and on the HF bands (160 metres included) probably as 5N/KT3Q. Hopefully he will also go and operate from IOTA group AF-076. QSL via DL3OCH. [TNX The Daily DX]
C6 - Harry, W6DXO will be active as W6DXO/C6A from South Andros Island (NA-001), Bahamas on 1-7 March. It will be a part time holiday style operation with a focus on 12, 17 and 30 metres. QSL via KF6JOQ. [TNX NG3K]
DU - Ed/4F1OZ, Roland/DU1KGJ, Jairus/DV1ERS and Frank/VE7DP plan to be active from Cujo Island (OC-120) from 4 UTC on 6 March to 2 UTC on the 9th. They will operate CW and SSB on 40, 30, 20 and 17 metres. Callsign and QSL route TBA. [TNX VE7DP]
FP - Eric, KV1J will be active again as FP/KV1J from Miquelon Island (NA-032) on 4-9 March. He plans to operate SSB, CW, RTTY and PSK31 on 80-6 metres, and to participate in the ARRL SSB DX Contest (SOAB). QSL via KV1J, direct or bureau. He will upload his log to LoTW. The webpage for the activity is at www.kv1j.com/fp/March09.html
FR - Stephane, F5UOW will be active holiday style as FR/F5UOW from Boucan Canot, Reunion Island (AF-016) on 8-22 March. He will operate mainly CW on 20 metres. [TNX F6AJA]
JA - Ken, JS3OMH has been active as JS3OMH/6 from the Tokara Islands (AS-049) since 25 February. He first operated from Takara Island and has now moved to Kodakara island until 28 February. He is QRV during his spare time on 40 metres CW and SSB and on AO-51 FM Satellite. QSL via bureau. [TNX JR3TVH]
J7 - John, G3LZQ will be active holiday style as J79WR from Dominica (NA-101) between 5 and 25 March. He plans to concentrate on 160 and 80 metres, and to participate in the Commonwealth (BERU) Contest on 14-15 March. QSL via G3LZQ. [TNX The Daily DX]
KG4 - Dan, W0CN (KG4CN)has had to postpone his trip to Guantanamo Bay [425DXN 929]. The new dates are 10-20 April (to be confirmed).
PY0F - Bill, W9VA and Jim, K9PPY will be active as PS0F from Fernando de

Noronha (SA-003) on 3-19 March, including a M/S entry in the ARRL
DX SSB Contest. A special e-mail address (ps0f@...) has been
set up; they will monitor it before/during their stay and will
consider email input in planning their operating schedule. QSL via
W9VA. [TNX QRZ-DX]
TT - Frank, F4BQO will be active again as TT8CF from Chad from 27
February to 1 July. He plans to operate CW and SSB on the HF
bands. QSL direct to F4BQO. [TNX F8REF]
V6 - Mike, KM9D (V63MY) and Jan, KF4TUG (V63TO) have left Nukuoro
(OC-259) and are now lying to anchor at Touhou Island,
Kapingamarangi Atoll (OC-163).
V8 - Special event station V85NBD25 is active until 12 UTC on 10 March
to celebrate the 25th anniversary of Brunei as an independent and
sovereign nation. Information on the relevant award can be found
on the Brunei Darussalam Amateur Radio Association's website
(http://www.bdara.net/). QSL via qrz.com [TNX The Daily DX]
V8 - Kanzi Takemasa, JA4ENL will be active as V85NL from Brunei on 6-9
March. He expects to operate mostly CW on all bands. [TNX K1XN]
VK - John, VK6HZ (VK6ARI) will be active holiday style from Rottnest
Island (OC-164) between 3 and 9 March. QSL via VK6NE. A logsearch
will ve available at http://www.vk6hz.com [TNX OPDX Bulletin]
VP8 - John, G3VPW will be QRV as VP8KF from the Falkland Islands
(SA-002) on 5-31 March. He will be staying with the McLeods
(VP8LP/VP8AIB); the first two weeks he will be working at the
Stanley Ionospheric Observatory, the further ten days are for
"some DXing". He plans to operate CW and SSB on 10, 20, 15, 40 and
80 metres, with a focus on the contests (ARRL DX SSB, RSGB
Commonwealth, CQ WW WPX SSB). QSL via home call. [TNX G3VPW]
XE - Bernardo, XE2HWB will be active as XE2HWB/XF1 from Isla Magdalena
(NA-078) on 28 February and 1 March. He will operate QRP on +/-
14260 and 50120 kHz. QSL via home call. [TNX The Daily DX]
YN - Jeff, N1SNB will be active from Nicaragua on 5-9 March. He hopes
to sign YN2NB during the ARRL DX SSB Contest (SOAB) and H7/N1SNB
outside the contest. QSL via home call. [TNX NG3K]
YV0 - The YW0A DXpedition to Aves Island (NA-020) [425DXN 925] is still
scheduled to take place in March. The team is waiting for the
Venezuelan Navy to give the actual dates. Bookmark
http://yw0a.4m5dx.info for updates. [TNX IT9DAA]
ZF - Bob, K3UL will be active holiday style as ZF2UL from the Cayman
Islands (NA-016) between 27 February and 7 March. He will operate
mainly CW, with a focus on 160, 80 and 30 metres. QSL via home
call. [TNX OPDX Bulletin]

CQ WW 160-METER DX CONTEST (SSB) ---> Object of the contest is for amateurs
around the world to work as many US States, Canadian provinces and countries
as possible on 160 metres SSB (rules at http://cq160.com/rules.htm). The
following stations have announced their partecipation in this year's event
(from 22.00 UTC on 27 February through 22.00 UTC on 1 March):
Call DXCC QSL via

4L0G Georgia qrz.com
C6ANM Bahamas WA2IYO
KP2M US Virgin Islands AI4U
P40A Aruba WD9DZV
RW2F Kaliningrad DK4VW
UU7J Ukraine UU0JM
XE1RCS Mexico qrz.com
ZF2AM Cayman Isls K6AM
Do not forget to give a look at the Announced Operations listing maintained by Bill, NG3K at http://www.ng3k.com/Misc/cq160s2009.html - good contest to you all!

Direttore Responsabile I2VGW

BEAM HEADINGS ---> The North Jersey DX Association is provides personalized beam headings centered on your location to every entity on the DXCC list. The Beam Headings page can be found on the redesigned NJDXA website at http://njdxa.org/dx-tools/beam-headings.php [TNX W2DEC]

K5D ---> On 25 February the team began to scale down the operation and prepare for leaving the island, with three stations remaining QRV until local dawn on departure day. K5D went QRT at around 09.40 UTC on 26 February, after 115,728 QSOs (contact number 100,000 was made at 04.14 UTC on the 24th.) The Online QSL Request System (OQRS) has been activated, and now you are able to request your QSLs one of four ways: OQRS Direct, OQRS Bureau, direct mail to N2OO, or via bureau to N2OO.
A fourth interview with Glenn Johnson, W0GJ, expedition co-leader,can be found on the Documentary Archive's Desecheo special web page (www.dokufunk.org/desecheo). The interview was given via satphone to Wolf Harranth, OE1WHC on 23 February.

QSL 4L5O ---> Beginning with 2009, the new QSL route for Omari, 4L5O is via N3SL. Omari was very active into 2000, when he took leave of radio for family obligations. N3SL does not have access to any logs prior to 1 January 2009, but current logs are in hand (log search at http://www.qsl.net/n3sl/manager.htm) and cards are on the way from the printer. [TNX N3SL]

QSL EA8BWW ---> Buzz, NI5DX is the new QSL manager for Damian, EA8BWW. Once logs are transferred, Buzz will be able to confirm all contacts made with EA8BWW. QSL cards will be ordered, so expect a delay of 6 weeks or more to receive your EA8BWW card. [TNX K1XN]

QSL NA-059 ---> Tim Tillman, NL8F (previous callsign NO7F/KL7) is the only full time resident amateur radio operator active from Dutch Harbor, Unalaska Island in the rare NA-059 IOTA group. QSL via K8NA (Theodore Pauck Jr, 2820 Lenox Drive, Troy, MI 48098, USA). [TNX K8NA]

QSL TG9/IV3IYH ---> All direct and e-mail QSL requests for TG9/IV3IYH received as of 27 February have been answered and logs are uploaded on LoTW. Bureau QSL cards can be requested via email to IK2ILH (ik2ilh@...), including the QSO details. Please do not send your card when requesting a QSL via email. [TNX IV3IYH]

QSL VE1OTA ---> This callsign is used by Dana, VE1VOX when operating from an IOTA qualifier. The new QSL route for contacts made after January 2009 is via VE3EXY (direct or bureau). Cards for contacts made before January 2009 still go to VE1VOX. [TNX OPDX Bulletin]

>From Tad Cook, K7RA
Seattle, WA February 27, 2009
To all radio amateurs

SB PROP ARL ARLP009
ARLP009 Propagation de K7RA

Excitement mounted a few days ago when new Cycle-24 sunspot 1013 emerged, but two days later it was fading away, similar to other recent sunspot appearances. The sunspot number for February 24-26 was 12, 14 and 12. Today's number will likely be 0.

In a few weeks is the Vernal Equinox -- the first day of Spring in the Northern Hemisphere -- on March 20, 2009 at 1144z. Areas north and south of the equator will be bathed in an equal amount of Sun, and this is always a good time for HF propagation.

Using one of the popular propagation programs to predict a path from California to Australia using an average sunspot number of 12, on 15 meters on January 20, there was a good chance of an opening from 2130-0100z, with an excellent chance within that period, at 2330-0030z. On March 20 using the same numbers, the chances of propagation look excellent from 2200-0230z, with the band perhaps opening at 2130z and shutting down at 0330z. This gives us an illustration of propagation changing with the season.

Another example would be Dallas to Brazil. On January 20 on 20 meters the band would probably be open from 1800-2300z, with signals gradually increasing about 12 dB over that period. On March 20 a likely 20 meter opening would be from 1830-0230z, with signals increasing 16 dB over that period, and rising faster as well.

Geomagnetic activity has been very quiet for a long time now, and this is expected to continue. NOAA and the U.S. Air Force predict a planetary A index of 5 over the next two weeks, with minor exceptions. On March 3 the A index may rise to 8. Geophysical Institute Prague predicts quiet conditions February 28 through March 2, quiet to unsettled March 3-4, then back to quiet on March 5.

The predicted quiet conditions should be good for the CQ 160-Meter SSB DX Contest this weekend.

Mike Schaffer, KA4JAW lives in West Central Florida, and enjoys observing sporadic-E propagation on broadcast television. His local Channel 2 station, WEDU, ceased analog transmissions recently, eliminating co-channel interference with Channel 3. On Sunday, February 22 just after 2300z Mike noticed a wrestling match on Channel 3, and shortly after a logo appeared for TGV, a broadcaster in Guatemala City (see http://www.canal3.com.gt/). The station is over 1,000 miles away.

Joaquin Montoya, EA2CCG in Spain reported good conditions over the past few days during the brief sunspot appearance. On February 25, 2100-2130z he worked a number of states in the Western United States including one in Montana while he was mobile on 20 meters. He could hear K5D, and earlier that day he worked K5D on 17 meters and 6V7P in Senegal as well.

An Alaskan newspaper this week ran a story about subdued aurora due to low solar activity. See it at, http://www.adn.com/news/alaska/interior/story/700194.html and note their confusing comment about the Sun having an 11 year positive cycle following an 11 year negative cycle. Perhaps they refer to the switch in magnetic polarity in individual sunspots.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for February 19 through 25 were 0, 0, 0, 0, 0, 12, and 14 with a mean of 3.7. 10.7 cm flux was 68.9, 69.2, 70.6, 70.3, 70.8, 71, and 70.7 with a mean of 70.2. Estimated planetary A indices were 1, 3, 3, 3, 5, 6 and 3 with a mean of 3.4. Estimated mid-latitude A indices were 0, 3, 2, 3, 3, 6 and 2 with a mean of 2.7.

9147. Strange behaviour ??

Yahoo group: DX-IS (2009)
Date: 2009-02-28 14:47:05 UTC
From: Paul M Dunphy
Topic: 9147 Message: 9147

Wonder what is up with YL3FT? Supposedly in the UBA contest can
calls CQ TEST incessantly, but won't answer anyone. Gonna be hard to
get points that way! :-)

14017.8 YL3FT 28-Feb-2009 1426Z NO RX?? <9A5X>
14018.0 YL3FT 28-Feb-2009 1438Z Recording? No OP? <VE1DX>
14017.8 YL3FT 28-Feb-2009 1439Z NO RX?? <UA6GM>
14018.0 YL3FT 28-Feb-2009 1440Z coffee break? <K3VA>

Perhaps he has a high noise level or the like.

73, Paul VE1DX

>Perhaps he has a high noise level or the like.

Could be a two-radio operator who keeps one frequency warm with
CQs while working the other band? Or while he visits the bathroom.
I hear this quite a lot when I suspect people are SO2R. I have
enough trouble with one band, thanks.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and Bill Moore/NC1L for the following DX information.

PRESS RELEASE: From the "Century Club Awards Weblog"

Concept of Deleted Entities Reinstated
Feb 27, 2009 11:28 ET

Bill Moore, NC1L, ARRL Awards Manager, reports the following:

In 2000, DXCC program rules were modified substantially in an effort to create simplified and stronger rules that would help make DXCC work well in the 21st century while tightening the DXCC List Criteria. At the same time the DXCC Challenge Award/competition was created as part of the modernization effort. The Challenge is intended to allow for an energetic new pursuit in DXing that focuses on statistics based upon only current entities on the List. The Challenge has been highly successful.

Another change resulting from this rules modernization was a subtle change from "deleting entities" to "removing entities." The intent of this change was to no longer allow the addition of deleted entities to the Deleted Entity List. In the subsequent years since DXCC 2000 there have been few issues with this concept and resultant little attention given to the realities of the ideological change. Recently, however, since the rollout of Logbook of the World (LoTW) and various political changes internationally, it has become evident that the program should return the concept of deleting entities for mostly administrative reasons. "Removing" an entity from the DXCC system is non-trivial if not impossible. Also, the success of the DXCC Challenge and the DXCC Honor Roll have made a great game better by providing a playing field that isn't heavily biased by age.

It seems that the concept of a "deleted" entity -- one that is marked as deleted and not applicable to Honor Roll or Challenge but that still exists in the records -- is an elegant solution to the problem of changes in entity status. Distinguishing entities that are no longer extant makes

sense as a means of leveling the playing field for younger participants in DXCC, but to wipe out someone's past accomplishments altogether just seems too drastic.

At its last meeting the ARRL Programs and Services Committee decided that administratively the concept of deleted entities should be returned to the DXCC program. Necessary changes to Section II, DXCC List Criteria have been made to the rules and part 5 is renamed Deletion Criteria. The concepts for deleting an entity do not change. If an entity is deleted it will be added to the Deleted Entities List and the statistical records for DXCC participants will be adjusted accordingly, just as they had been in the years prior to 2000. The numbers shown in the individual DXCC records lists have always included the Deleted Entities. No DXCC participant needs to take any action at all.

From: WB6PSY
Topic: 9150 Message: 9151

Ahhhhhhh - the virtues of DXKeeper. Enter call - one listing comes up. Worked P42J in a contest in March of 1982. Perhaps he still had the same QSL manager in 1985 (or was the same person). Qsl'd to W1BIH Which could've been his home call - dunno. W1BIH is listed in Buck and QRZed.

9153. DXCC Rules Question

Yahoo group: DX-IS (2009)
Date: 2009-03-01 13:00:52 UTC
From: Art Burke
Topic: 9153 Message: 9153

Just read the blurb from Bill Moore about the "re-instatement" of deleted entities.

AC4 - Tibet - only contacts made May 30, 1974 and before count for this entity. All contacts after that count as China.

In 1999, the lease on Hong Kong expired and the Chinese took possession from Great Britain.

Why is Hong Kong still an entity and Tibet is not?

If Gibraltar were "returned" to Spain, would ZB2 remain on the list?

Not trying to be contentious - just curious.

Art - N4PJ

Hi Art,

I also read that release and couldn't make a lot of sense out of it. I *think* what it is trying to say is that deleted countries from 2000 onward (have there been any?), under the 2000 rule change, would be deleted immediately and forever. Prior to that, if you had then worked you got credit (sort of.) You could have 338/360 which meant you had 22 deleted countries worked.

My understanding of the intent of that rule change in 2000 was, through attrition, to eventually make the highest possible total the same for everyone. This would level the playing field. It had merit, because you or I never could work Tibet, but those active before 1974 probably had it. This argument for and against rewarding longevity and working everything that moved had been an issue forever.

What I took away from NC1L's announcement was that they were putting it back the way it was before 2000, and I really can't understand why. It appears it may be too hard to administer DXCC totals and awards if they are permanently deleted. That is what I took away from it, but I'm not really sure if I interpreted the message correctly. Maybe someone else got more out of it.

73, Paul VE1DX

9155. RE: [DX-IS] DXCC Rules Question

I think, Art, you'll find that China, which took Tibet over, now views Tibet as a province of China. That's just like Florida being a state of the USA.

Hong Kong is a different story due to administrative nuance -- VR2 is seen, politically around the world, as something different from a Chinese province. I don't pretend to have any idea of the political implications. So Hong Kong stays on the DXCC list and Tibet does not.

If ZB2 ceased to be a British protectorate, it would become a "deleted country/entity" if it were incorporated by Spain.

I'm not sure if there's anything I have worked since 2000 that would be considered "deleted" because I have never paid much attention to it. But if a list of "deleted countries/entities" appears, I will get the missing QSLs together for submission.

This is my view of the announcement, but like Paul, I could be wrong.

I read and re-read that blurb and I came up with the thought that
too many of us old Buzzards complained about losing "counters".
Some bright MBA did an analysis and concluded that the problem will
go away in a few years as most of us kick off.

But on the bright side, thanks to the Vanity Call Program, my call will
live on forever. Probably snatched up by some snot-nosed kid who
will sit in the pile-ups, banging away at his CW Computer Keyboard
wondering why the DX never answers. Seems his Wheaties Boxtop
Ticket never explained the term "split".

That's enough bile for a Sunday morning, time to go listen to that
fancy white noise receiver I have.

Hopefully some DXer/contester or one to be ends up with my call some day.

I was told by one of my Elmers that this call was originally held by someone who died at Pearl Harbor. Then a ham in Lansing, IL held it for a number of years. I got it in 1976.

Maybe I was just slightly more than a "snot-nosed kid" of 24 when I got this call, but I was a decent CW op with 9 years of experience at that time.

73, Zack W9SZ

P.S. Dick, we must be distant cousins, both ending in SZ.
:-)

I think you're right about Tibet, Hong Kong and Gibraltar, Al.

I've worked a few deleted countries - back in the old days, Czechoslovakia, East Germany, Okinawa; more recently, Walvis Bay, Penguin Islands, South Sudan. Never got to work Baja Nuevo or Serrana Bank in the old days but worked the recent DXpedition, which only counts as sentimental value since I heard but didn't work them way back when.

I worked Andy G3AB the other night as ZC4VJ on 40 CW. I think that's a semi-rare one. If the UK ever closes its base there, it will probably become another deleted one.

I forgot about KZ5. I worked that one too.

One of the local hams here, Flip W9FIU, was on a KS4 Swan Island DXpedition.
He had some great stories about it.

Is anyone active from San Andres now? I used to work HK0VGJ all the time
and haven't heard him on the air in ages.

20 (EA9) Only contacts made May 13, 1969, and before, count for this entity

Is not EA9 a current enity in one shape or another?

If not, guess I can put it into the file with KZ5

Yes and yes! The EA9 you see above is Ifni. Ifni was a
Spanish province on the Atlantic coast of Morocco, south of Agadir
and across from the Canary Islands. It was given back to Morocco in
1969. (And thus ceased to exist as a DXCC country.)

The current EA9 is Ceuta & Melilla, which are two Spanish
autonomous cities across the straight of Gibraltar and meet (or met
when they were added) the DXCC criteria.

I was wondering if any of the locals on San Andres were there. Francisco (Pancho) HK0BKX passed away a number of years ago and I think HK0AI did also.

Swan Island was home of Radio Swan, later Radio Americas, a CIA-run station broadcasting anti-Communist programming to Cuba on 1160 and 6000 kHz until around 1968. I imagine that they kept the drug/pirate operation (I mean REAL pirates, not radio pirates) down until the station was abandoned.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N3SL, NG3K, N4AA & QRZ DX, W5CW, K6YP, WB6PSY, K8NA, K8YSE, N8OFS, W9VA, W0CN, DX-IS News Site, Pete's-DX-Newsdesk, 2E1EUB, 4L2M, DK8JB, DL7MAE & The DX News Letter, F5NQL & UFT, G3NKC, GI7OMY, I1JQJ/IK1ADH & 425 DX News, JR3TVH, M0URX, OM0A Contest Group, OE1WHC, RSGB IOTA Web Site, VA3RJ & ICPO and the VHF-DX-Portal for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/February, through Sunday, 1st/March there were 224 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, KP5, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 INTERNATIONAL DX CONVENTION. The 2009 International DX Convention in Visalia, California, will be held April 17-19th. This is the 60th anniversary of this event which promises to be even more special this year than it has been in previous years. Special attractions this year include:
* Contest Academy by the Northern California Contest Club

* Radio Arcala Project with OH2BH & OH8NC
* Special Guest and Banquet Speaker: The Hon. J. Scott Redd (K0DQ),
Vice Admiral, U.S. Navy (ret)
* Breakfast Program: Desecheo, KP5 DX-Pedition
For complete program information, see: http://www.dxconvention.org
Hurry!! Special Pre-registration Price Ends March 20, 2009!!

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB from March 21st for one week. He will sign 2M1EUB and be active on all the satellites from northeast Scotland. Also, look for him on 160 and 80 meters. Checkout QRZ.com under 2M1EUB for more info.

5N, NIGERIA (EME and Possible IOTA Op). Bodo, DL3OCH, who was recently active as KT3Q/4 from Key Biscayne Island [NA-141] in December, will be working from here between March 5th and July 24th. Activity will be on all HF bands (160-10 meters) plus some operations on EME. His expected callsign will probably be 5N/KT3Q. There is mention that he may also activate the Bayelsa/Rivers/Akwa Ibom etc States IOTA Group (AF-076). QSL via DL3OCH.

9M8, EAST MALAYIA. Steve, 9M6DXX, will operate as 9M8Z from Sarawak (OC-088), March 26-29th. Activity will include the CQ WPX SSB Contest (March 28-29th) as a Single-Operator/Unassisted/All-Band/High-Power entry. Outside the contest look for him to be on 40 meters SSB using a 3 element Yagi. QSL via M0URX, direct, by the Bureau or LoTW. PLEASE NOTE: QSL Manager Tim, M0URX, states, "This week 180 QSL cards have been posted by air mail from recent activities. Logs have also been uploaded to LoTW."

AH0, MARIANA ISLANDS. Operators Kuniyoshi/7L1FPU (W1FPU), Yoshiki/KH0UA and Satoshi/N2QP will be active as AH0BT during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via 7L1FPU.

BACK TO AFRICA. Tim, M0URX, reports that John, 9M6XRO, is planning once again to be in Southern Africa this year. An E-mail by John explains (edited): "I can now confirm my Africa trip dates. I arrive in Johannesburg via Kuala Lumpur and Doha on July 25th, 3 days earlier than planned. I can then help Daniel, ZS6JR, load up and move all the gear to Lesotho (7P) and get the antennas and equipment set-up before the others arrive in Lesotho on the 29th. I hope to put ZS6/GM3OOK on the air for a bit en route possibly from the 25th evening. Daniel has not yet confirmed the date we will drive to Lesotho. Looks like I will also have the option of operating from Swaziland again as 3DA0OK, but the duration and dates will depend on the logistics of the whole operation as everyone is due back in Johannesburg on August 13th. I will keep you updated on that part of the itinerary. My flight back to Borneo leaves on August 14th, once again via Doha. QSL via M0URX."

C5, THE GAMBIA. Stewart, GW0ETF, is on holiday here for 2 weeks as of February 23rd. He is expected to be active (possibly as C56/GW0ETF). No QSNs reported as this was being typed. He planned on taking his K3 for some casual operating, probably CW only, but possibly some RTTY and

mainly 20 meters. QSL via GW0ETF direct only. NO BUREAU cards, but he will accept E-mail requests for Bureau QSL. His E-mail address is: gw0etf@...

CN, MOROCCO. Hartwig, DL7BC, will be active as CN2BC during the CQ WW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via DL7BC.

EI, NORTHERN IRELAND (30m Digital). Daithi, GI7OMY, informs that EI stations will be permitted to commence operating on Digital modes on 30 meters starting March 29th. He plans to activate the club callsign MI0EPC for European Phase Shift Keying Club (EPC) on that day on 10140 kHz. QSL via GI7OMY.

FP, ST. PIERRE AND MIQUELON. Remember, Eric, KV1J, will once again be active as FP/KV1J from Miquelon (NA-032) between March 4-9th. Activity will be on 80-6 meters using CW, SSB, RTTY and PSK31. He will also be in the ARRL DX SSB Contest (March 7-8th, 2009) as a Single-Op/All-Band/Low-Power entry. Antennas will be a N1IW off-centered fed dipole (80-10m), SteppIR vertical (40-10m) and a PAR-6 Moxon for 6m. QSL via his home callsign, direct or by the Bureau. Also, LoTW or eQSL. Visit his Web page at: http://www.kv1j.com/fp/March09.html

GJ, JERSEY (EU-013). Dez, G0DEZ, will be active as GJ3WW during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Low-Power entry. This will be a holiday style operation. QSL via LoTW or direct to G0DEZ.

IOTA NEWS.....
EU-048. Operators Christophe/F5UBH, Juan/F5IRC and Karim/F4CTJ will be active as TM2HC from Hoedic Island (DIFM AT 017, DIM O25, WLOTA 0851 and DFCF 56-033), March 13-15th. Activity will be on the HF bands using CW, SSB, PSK31 and RTTY. QSL via F5IRC, direct (w/SAE and postage) or via the French REF-Union Bureau.

EU-059. (UPDATE) Col, MM0NDX, will be active as GM5A and MM0NDX/P from St. Kilda, Scotland, between July 24-27th. This will be a family holiday-style operation from the campsite in Village Bay. St. Kilda is one of only two-dozen global locations to be awarded "World Heritage Status" for both natural and cultural significance. Col will participate in the 2009 RSGB IOTA Contest (July 25-26th) as GM5A. Outside of the contest he will sign MM0NDX/P and possibly be active on 80 and 40 meters. QSL GM5A via GM4FDM and MM0NDX/P via M0URX. A Web site is now active for this activity at: http://eu059.wordpress.com/

NA-046. Members of the Fall River Amateur Radio Club and Team HAMCOW will be active during the New England QSO Party (May 2-3rd) as W1ACT/p from Martha's Vineyard (USI MA-005S, WLOTA LH-2804). Suggested frequencies are: 3540, 7040, 14040 and 14280 kHz. QSL via N1JOY: Roland Daignault, 19 Davis Rd, Westport, MA 02790-3433. For more information, please visit: http://hamcow.net

NA-141. (Special Event) Members of the Jupiter Tequesta Repeater Group, West Palm Beach Amateur Radio Club and Palms West Amateur Radio Society are planning to activate W4K to celebrate John F. Kennedy's birthday from Peanut Island (USI FL-479, Palm Beach County, FL), May 29-30th, in 2010. Reports indicate it is from "JFK's old Cuban missile crisis bunker". Activity will be focused on HF (mainly 40/20m), 6 and 2 meters using CW and SSB. Cards are presently being designed for the event. This will be the first time Peanut Island will be activated. More information should be forthcoming.

NA-186. (UPDATE to OPDX.897) Cezar, VE3LYC, is planning a DXpedition to one of the most wanted IOTAs in the world called Fox Island. Cezar states, "This IOTA group has only been activated very briefly 16 years ago and being in demand by 97% of the IOTA members sits at #1 on the Most Wanted NA-IOTA List. He announced this past week that the callsign to be used for the DXpedition will be VY0A and has been approved by Industry Canada. He will be traveling to the island between March 31st and April 3rd. Cezar will use an IC-7000 (100w) and a multi-band vertical antenna, focusing on 20/30/40 meters, CW and SSB. Look for updates to appear on QRZ.com at: http://www.qrz.com/db/VY0A Cezar is looking for support. Costs associated with this operation are considerable, and both group and individual support are sought. To support this operation, please contact Cezar at: ve3lyc@...

J6, ST. LUCIA (NA-108). Just a reminder that John, W5JON, will be active as J6/W5JON from Marigot Bay between March 1-11th (2009). Activity will be on 160-6 meters SSB using dipoles and 6m yagi. Also, look for activity in the ARRL DX SSB Contest (March 7-8th, 2009). QSL via W5JON.

J7, DOMINICA (NA-101). John, G3LZQ, will be active as J79WR between March 5-25th. Activity will be holiday style, but he plans to concentrate on 160 and 80 meters, and participate in the upcoming Commonwealth (BERU) Contest (March 14-15th). QSL via G3LZQ.

KG4, GUANTANAMO BAY (Change Of Plans). Dan, W0CN, informs OPDX that there is a delay in his work assignment at Gitmo -- now tentatively he is planning for April 10-20th for his KG4CN from Guantanamo Bay, Cuba (GITMO, IOTA NA-015, Grid FK29). Activity will be on 160-10 meters, mostly SSB and some CW. PLEASE NOTE: There will be no RTTY. QSL to W0CN (LoTW/direct/ Zero-Bureau).

K5D DESECHEO ISLAND DXPEDITION NOW QRT (Update). The K5D Desecheo Island DXpedition is now QRT and in the history books. Their Web states, "Every one of our goals was exceeded; most significantly, the number of QSOs." The total QSO count was 115,728! On their Web page the status of K5D log states that the last QSO was "26-Feb-2009 at 09:39:00" and the following statistics are (without Satellite QSOs):

Band	SSB	CW	RTTY	Total

6M 17 79 * 96
10M 163 64 2 230
12M 641 265 1 907
15M 6132 4176 443 10751
17M 12969 7191 1343 21503
20M 15702 9592 1728 27022
30M * 13452 2204 15656
40M 6791 8467 868 16126
80M 7419 8800 * 16219
160M 1984 5231 * 7215

Mode Total 51819 57317 6589 115725

In addition to the normal methods of QSLing K5D, they now are offering an Online QSL Request System (OQRS). You can request your K5D QSL one of four ways: * OQRS DIRECT <http://df3cb.com/k5d/oqrs.php> (5 USDs minimum) * OQRS BUREAU <http://df3cb.com/k5d/oqrs.php> (No Charge) * DIRECT MAIL WITH .44 cent w/SASE/$$$/IRC(S) -- PLEASE remember U.S. postage is going up in May. * VIA NORMAL INCOMING BUREAU The K5D log will be uploaded to LoTW in early 2010. For complete details about the OQRS, please click on the links above. Direct QSLs are via N2OO: K5D QSL Manager, Bob Schenck, P.O. Box 345, Tuckerton NJ 08087 USA. Remember for complete details/updates/logs/pictures, visit the KP5 Web page at: http://www.kp5.us

LT9, ARGENTINA (Special Callsign). Members of the Corrientes Radio Club (LU4LG), Villa Angela Radio Club (LU4GO) and Chaco Radio Club (LU4GF) will activate the special callsign LT9L from "Esteros del Ibera", March 21-23rd. The place of operation is the Ibera Interpretation Center, located on the shores of Lake Luna, Colonia Pellegrini, Corrientes Province. Access to this location is from the City of Mercedes, from which it is separated on about 120 km of unpaved road. The Center has a showroom with illustrative material about the history, geography and biology of the park. Activity will be on 80/40/20/15 meters using CW, SSB, PSK, RTTY and SSTV. Operators mentioned are: Ricardo/LU4GL (CW), Raul/LU1JB/L (CW), Luis/LU4LC (SSB), Juan Carlos/LU9GDN (SSB), Ramon/LU7LC (Digital) and Nestor/LU4LE (Digital). QSL via EA5FL: JOSE MIGUEL ALCARAZ Moncho, PO Box 252, 03700 - Denia, Alicante, Spain.

MJ, JERSEY (Correction). Operators David/G3NKC, Dave/G4BUO, Martin/G4XUM and Phil/GJ4CBQ will be active as MJ4K (not MH4K) during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via G3NKC.

NL8, ALASKA (Rare IOTA and USI). Tim Tillman is the only full time resident of Dutch Harbor, Alaska, Unalaska Island, (NA-059, USI AK005S, 3rd S. Central County) in the Fox Island Group and active on Amateur Radio. Tim's original callsign at NA-059 was NO7F/KL7, but he now has the callsign NL8F. NA-059 is a rare Island for IOTA, with only 26% of those participating in the IOTA award program having it confirmed. He can sometimes be heard on 40 meters (7095 kHz after 0745z). QSL via K8NA (QRZ.com address).

OE100, AUSTRIA (Special Event). Press release by Wolf, OE1WHC, from the Documentary Archive Radio Communication, states (edited): "The 'Radio Club of America' was established in January, 1909, and issued the first ham licences in April of that year. To celebrate 100 Years of Amateur Radio, the Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communication /QSL Collection, will activate, April 1-30th, a special event station with the callsign OE100M. OE100M is an official 'International Marconi Day' station. Contacts made on Saturday, April 25th, are valid for the IMD Award. QSL via the OE Bureau or direct to OE1WHC. Cards without SASE and IRC or green stamps to cover postage will be processed via Bureau." To see the QSL, download the file at: http://www.qsl.at/down/oe100m.tif

OM0, SLOVAK REPUBLIC. The rare "OM0" prefix will be activated during the CQWW WPX SSB Contest (March, 28-29th) on 160-10 meters by the OM0A Contest Group. Five operators and one YL will enter the contest as a Multi-2 entry. Operators mentioned are: Villiam/OM0AAO, Martin/OM4AAS, Mimi/OM4AQW (YL), Igor/OM6ACI, Peter/OM6PR and Stevo/OM7KW. QSL via OM0AAO.

PA750, THE NETHERLANDS. A group of radio amateurs in the Assen region will be on the air as PA750ASN during the following periods: March 1st and April 15th, and the month of June and September. Operations will be on all bands and modes. Activity is to celebrate the 750th anniversary of Assen city located in the northeastern part of the Netherlands. Also being celebrated is the 200th anniversary (March 13, 1809) of the city's rights granted by Louis Napoleon. A special QSL card will be available on request. QSL via PI4ASN, by the Dutch QSL Bureau or direct by QRZ.com address. NO E-QSL.

PJ2, NETHERLANDS ANTILLES. It seems Bob, K4UEE, (and others) have not had enough DXing after their operation on Desecheo Island and are now heading toward Signal Point Station on Curacao (SA-006, WLOTA LH-0942) to organize a Multi-Multi contest effort as PJ2T in the ARRL DX SSB Contest (March 7-8th). Operators mentioned are (*Desecheo Team): *Bob/K4UEE, *Gregg/W6IZT, *George/N4GRN, Everett/WZ8P, David/K4SSU, Elmer/N4LR, Norman/WA4ZXV, Wayne/KU4V, Jim/W4TE, Don/N4HH, Mary/K1MMH, Harry/W4KJ, George/KI4DSO, Jim/ND4V, *Bill/N4NX, *Chaz/W4GKF and Geoff/W0CG. QSL PJ2T via N9AG or LoTW. Visit the CCC Web site at: http://www.pj2t.org

PS0, FERNANDO DE NORONHA. Operators Bill/W9VA and Jim/K9PPY will be visiting Andre/PY0FF between March 3-10th. They are going there to be active as PS0F during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single entry. QSL via LoTW, or direct to W9VA. Activity outside of the contest will be on 160-6 meters using CW, SSB and possibly some Digital modes. Bill tells OPDX that this is his 12th trip to PY0F -- his first trip was in 1988. ADDED NOTE: An E-mail address will be available with regards to suggestions to operating schedule and both ops will monitor messages at: ps0f@...

QSL INFO AND NEWS.....
JS3OMH BIRD ACTIVITY. Were you lucky to work Ken/JS3OMH as JS3OMH/6 on AO-51 from a few of the Japanese islands (IOTA AS-049)? The islands

were TAKARA Island (February 24-26th) and KODAKARA Island (February 26-28th). QSL via the Bureau.

NEW QSL MANAGER. Buzz, NI5DX, has assumed the duties as QSL Manager for Damian, EA8BWW. Once logs are transferred, Buzz will be able to confirm all contacts made with EA8BWW. QSL cards will be ordered, so expect a delay of 6 weeks or more to receive your EA8BWW card.

NEW QSL MANAGER. Steve, N3SL, informs that he is now the QSL Manager for Omari, 4L5O, beginning as of 2009. Omari was very active up to 2000, until he took leave of radio for family obligations. Steve does not have access to any logs prior to Janury 1, 2009. Current logs are in hand, with a log search on QSL.NET or the N3SL Web page. Cards are on the way from UX5UO.

NOT THE QSL MANAGER. Mamuka, 4L2M, reports that as of August 2008, UA9LP is no longer his QSL Manager for Russian stations. All Russian stations should use EA7FTR's QSL service.

QSLS VIA LOTW: 9L1AB, C6APG, EF8T, F5IN, FW8DX, HB9LCW, HQ9R, HV0A, NP2KW, R1FJT, RW0A, S21VJ, SK3GM, VK9DWX, VP2ETL, XU7AAV, YN2S and ZL7/SP9PT

QSLS RECEIVED VIA MAIL: 4L8A, 7Q7HB, 7Q7JL, CE1/K7CA, CE9/K2ARB, DS1REE, ER4DX, EY8MM, HB0/DK9FEC, HK3CQ, KP2/AE6XY, LY2ZZ, OA4BHY/2, S79NS, S79NS/p, TF3SG, UK9AA, V85TT, VK9DWX, VQ9LA and YB0AZ

QSLS RECEIVED VIA THE BUREAU: 4X6HP/M, A52AM, C52C, CN2BC, CN4MC, CT3/DJ6QT, CT9L, EA5KB, EF5K, EG5Y, ER3R, EV7DP, EZ8CW, FJ/DJ2VO, HB2008EM, HB2008FS, HB2008LU, HB2008MH, HB2008OK, HB2008VC, JR7WAB, LZ08KM, MM/OQ9E/P, OE1KIDS, OE1MBB, OE2008A, OE2008C, OE2008M, OE2008MOU, OE2008PGQ, OE2008R, OE2008U, OE2008V, OE3WOB, OH0V, OX3XR, OY/DD5FZ, ST2R, SV5/DJ7RJ, TF4M, TM7RWC, TR8CA, UA2FW, UA2FX, UT4EK, VE3FJ, VP5/N1WON, VP8DLG, VU4AN and YK9SV

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the ARRL DX SSB Contest (March 7-8th) as a Multi-Multi entry. QSL via DK4VW.

S2, BANGLADESH (Update/Reminder). Some members of the Korea DX Club will be active as S21KD from Dhaka in the People's Republic of Bangladesh between March 7-14th. Operators mentioned are: Kim/6K5YPW, Choi/HL5FUA, Kim/6K5YPW and Yoon/6K2AVL. They plan to operate on 160-10 meters, CW, SSB and the digital modes, using three amplifiers, verticals and beams. Suggested frequencies are:
CW - 1822/1824, 3515, 7015, 10115, 14015, 18075, 21015, 24895 and 28015
SSB - 3795, 7095, 14195, 18130, 21295, 24950 and 28460
Digi - 14082, 21082 and 28100 kHz
Their main purpose for the Bangladesh DXpediton is to provide enough chances to have a QSO with Bangladesh for all DXers who need it. They hope it will be a good chance for Asia and Europe stations to work them on all bands. Also, they will do their best to work both North and South

American stations within workable band conditions. QSLs are via HL5FUA. For more details, updates and their logs, please visit the following Web page at: http://dxpedition.co.kr

TF, ICELAND. Siggi, TF3CW, will be active in the ARRL DX SSB Contest (March 7-8th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TT8, CHAD. Franck, F4BQO, will once again be active as TT8CF between February 27th and July 1st. Activity will be on the HF bands using CW and SSB. QSL direct via F4BQO.

V2, ANTIGUA (NA-100). Just a reminder that Peter, G3TKK, will be active as V25TK between February 27th and March 12th. Activity will be holiday style on 40-17 meters using CW. QSL via G3TKK, direct or by the Bureau.

V2, ANTINGUA. Operators Norman/K1DG, John/K1QX and Martin/W1MD (V26F) will be active as V26F during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single entry. QSL V26F via W1MD.

V85, BRUNEI. Kanzi, JA4ENL, will once again be visiting Brunei from March 6-9th. He will be active as V85NL and operate on all bands (including 30/17/12m), especially on 80/40/20m and the top bands mostly on CW. QSL via JA4ENL, by the JARL Bureau or direct.

V88, BRUNEI (Special Event). Look for special event station V88NBD25 to be active until March 10th. Activity is to celebrate 25 years as an independent and sovereign nation. To mark this auspicious and historic occasion, the Brunei Darussalam Amateur Radio Association, the organizer of this special event station, launched a temporary Silver Jubilee Award which is available to all amateur radio stations worldwide and SWLs. For details, visit the Web page at: http://www.bdara.net/calendar_special.html Also, see details at: http://www.qrz.com/db/V88NBD25

VK7, AUSTRALIA. Chris, G0WFH, will be active as VK7ACG from Tasmania between October 19th and November 17th. He will operate from the QTH of his friend Roy, VK7ROY. Activity will be on all bands, but he plans to concentrate on the lower frequencies. Chris states that a new 60 foot mast will be erected at the QTH of VK7ROY supporting antennas for 160/80/40 meters. QSL via G0WFH, by the bureau or direct. eQSLs are accepted.

VP59, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW between March 24th and April 8th. Activity will be on 160-6 meters (this will include 30/17/12m) CW/SSB. He will also be in the CQ WW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry using the special callsign VP59V. QSL direct ONLY via W5CW or via PO Box 88, Morris, OK 74445-0088.

VP8, FALKALAND ISLANDS (SA-002). John, G3VPW, will once again be active as VP8KF between March 5-31st. This is about John's seventh trip to the Falkland Islands. Activity may be limited at first because he will be working at the "Stanley Ionospheric Observatory" for two weeks. However, the last 10 days are set for some DXing. He is expected to stay with

Bob/VP8LP and Janet/VP8AIB McLeod (the ones that organized the YL only VP8 operation). When active, John will be on 80/40/20/15/10 meters using CW and SSB. He will also focus on the ARRL DX SSB, RSGB Commonwealth and CQWW WPX SSB Contests. QSL via his home callsign.

VP9, BERMUDA. First time DXpeditioners John/W3MF and Bob/K3PH plan to activate VP9I for the ARRL DX SSB Contest (March 7-8th). QSL via N1HRA. They may operate outside the contest as VP9/homecalls.

YV5, VENEZUELA. Operators Suer/YY5EBV, Jose/YV5BM and Jhony/YV5KG will be active as YV5KG during the ARRL DX SSB Contest (March 7-8th) as a Multi-Single/High-Power entry. QSL via YV5KG.

ZL7, CHATHAM ISLANDS (Update/Reminder). Just a reminder that a team of 9 operators will be activating Chatham Island as ZL7T, March 5-10th, from the fabulous Chatham Fishing Lodge in the fishing village of Kaiangaroa on the far northeastern tip of the island. The operators are: Lee/ZL2AL, Morrie/ZL2AAA, Lee/ZL2LE, John/ZL1BYZ, Mike/ZL2CC, Phil/ZL2RVW, Mark/ZL3AB, Wayne/ZL2WG and John/ZL1ALZ. The pilot station will be Duncan/ZL3JT. The four station setup will operate 160-10 meters, using CW, SSB, RTTY and the PSK modes. Donations would be appreciated. The ZL7T Web site is available at: http://www.zl7t.com
A logsearch will be available on the team's return. Logs will be uploaded to LoTW within 6 months. QSL via ZL2AL, by the Bureau or direct (CBA or QRZ.com).

Ahhhhhhh - the virtues of DXKeeper. Enter call - one listing comes up. Worked P42J in a contest in March of 1982. Perhaps he still had the same QSL manager in 1985 (or was the same person). Qsl'd to W1BIH Which could've been his home call - dunno. W1BIH is listed in Buck and QRZed.

Colombian Government Says RA3CO Not Licensed For Contest Operations; HK Hams Again Ask CQ WW For '07 & '08 DQ

By <mailto:ns3t(at)arrl(dot)net> Jamie Dupree NS3T radio-sport.net
Posted March 2, 2009

The Colombian government has <http://www.scribd.com/doc/12844046/Repuesta-de-Derecho-de-Peticion> formally stated that no license was ever issued to Russian contester Dimitri Kryukov RA3CO, raising fresh questions about the legality of his CQ WW contest operations in that country in 2007 and 2008, and prompting renewed calls for his disqualification.

"We think you have the sufficient evidence to take the appropriate actions," wrote Juan Camilo Rodriguez HK3CQ to CQ WW Contest Committee Director K3EST, on behalf of a group of Colombian contesters and DX'ers .

"Rest assured that we will continue to safeguard our country's regulations from illegal and fraudulent operations," he wrote.

In 2007, RA3CO used the station of Tony Rogozinski HK1AR/W4OI in Colombia, signing as HK1AR, and finishing second in the world in Single Op Low Power category of CQ WW CW.

According to Colombian amateur radio rules, that operation was illegal, as Colombia calls cannot be "lent" to another ham for use.

"No permitir el uso de sus indicativos de llamada cualquier otra persona," says the rule.

In 2008, Kryukov was back in Colombia, using the call HK3RA, as he claimed the fourth highest score in the world in Single Op High Power in the CQ WW SSB test.

Kryukov says he was given permission to use that call by Wolfgang Torres HK3RA.

But in a <http://www.radio-sport.net/hk3ra.pdf> notarized letter sent to the Colombian Ministry of Communications on January 16, Torres flatly denied that he gave Kryukov the okay to use his call during the 2008 CQ WW SSB.

The dustup has already created an ongoing international spat between some high profile contesters, who claim it is more of a power play by a group of HK hams to control foreign operators contesting from Colombia.

"I think in this situation asking to DQ RA3CO is crazy," says Al Telmurazov 4L5A, who accused the HK hams of trying to "blackmail" the CQ WW CC, by threatening not to compete in CQ WW contests unless RA3CO's results are tossed out.

In emails to radio-sport.net, Kryukov said he enlisted the help of Julio Barriga HK3JE to get him a license in 2008, and paid him $200 for that assistance.

"I think there was a genuine screw up at the PTT where he had been told that my license is ready and then they found out they double issued it. Unless of course HK3JE just lied to me outright," Kryukov said.

In other words, Kryukov said he tried to get the proper paperwork in order, but he might have been double crossed.

"Bottom line is - I was operating under the assumption that my license had been approved and only found out about the error after the test. I don't particularly care what the Colombians think, I just want my name out of this mess."

Also caught up in this is Girts Budis YL2KL, who operated from the QTH of HK1AR in the 2006 CQ WPX RTTY and ARRL CW DX contests.

The HK hams have also asked that Budis be disqualified from those past contests as well, as the Colombian PTT said it never issued any license to Budis.

The matter is now in the hands of the CQ WW Contest Committee and K3EST.

"The question you raise is a serious one and the CQWW contest committee is interested in more information as it is developed," Cox wrote HK3CQ on November 22.

"The policy of the CQ WW is to strictly enforce legal operations and to make sure a country's regulations are complied with completely," Cox added.

See Some of the Official Case Documents

The Colombian hams who have called for the disqualification of RA3CO have posted a number of documents online. Some are their own, others are from the Colombian government ministry that deals with HK amateur radio licensing.

http://www.radio-sport.net/hk.gifYou can find the documents about this at: <http://www.scribd.com/mincomco14544398>
http://www.scribd.com/mincomco14544398.

Next Move On 2008 CQ WW SSB RA3CO Operation Up To CQ WW Committee

Now that the Colombian government has stated that RA3CO did not have the proper license or authorization to operate in contests from that nation, the question of whether that impacts the 2008 CQ WW SSB Contest will be up to the CQ WW Contest Committee.

Rule XII of the 2008 CQ WW Contest rules clearly states that "Violation of amateur radio regulations in the country of the contestant...will be deemed sufficient cause for disqualification."

Late last year, CQ WW CC Chair Bob Cox K3EST said he would need to see concrete action by the Colombian government before taking any action to disqualify RA3CO.

"In order for us to act, the CQ WW committee needs an official PTT/regulatory body letter declaring the operation(s) as illegal," said CQ WW Director Bob Cox K3EST in an email to HK3CQ.

A review of the documents from the Colombian PTT shows that may now exist.

"Por lo que no es legal que el senor DIMITRI KRYUKOV - RA3CO, quien no posee ni permison ni licencia de radioaficionado por parte de este Ministerio, opere desde Colombia con indicativos otorgados a otras personas," states the response of the Ministry of Communications.

A rough English translation would be, "it is not legal that DIMITRI KRYUKOV - RA3CO, who does not possess neither permission nor a ham radio license on the part of this Department, operate from Colombia."

Kryukov's operation as HK3RA in the 2008 CQ WW SSB test netted him a claimed score of 7.1 million, a strong placing in the Single Operator High Power category.

In 2007, RA3CO claimed 7.4 million points in his CQ WW CW effort from HK1AR. He finished second in the world in the SOAB Low Power category.

"Mr. Kryukov did not file for a Colombian ham license when he was in Colombia or beforehand; therefore his operation in Colombia was illegal," Rodriguez told the CQ WW Contest Director.

I roughly calculated that I spent ~ 24 hours in the pileups for K5D. I'm sure there are people who spent more time calling them, but I'll bet there were a lot of people who spent far less.

I wonder how many people do have that kind of patience? I heard them working exclusively EU several times and just went and did other things till they started working NA again.

TA3D had an incredible signal here on 40 CW last night. Peaking 40 over S9. Never heard anyone from Turkey so loud here. Must've been reciprocal propagation - I didn't hear him work any EU at all. Also, EU1UN had a good signal. And my antenna does NOT favor north and south on that band. ZC4VJ (G3AB op) was booming in here too but I worked him the night before so didn't call him again last night. BTW Andy said to QSL to his address in Cyprus per QRZ.COM. He's putting logs on LoTW.

I probably put an hour into K5P because they are in my backyard,
all over water path. Not because I am overly good, but because of location.

On the other hand, Willis took literally days and days of
looking at propagation programs, charts, and following their
operating habits. It's all about location, and it *is* frustrating
when you do get your 15 minute opening and they are asking for somewhere else.

ZC4VJ is very quick with LoTW . . . usually within a few days or less.

Anybody care to speculate what "UP" translates to?
Inductively it seems to translate to :
1) Tune on the frequency
2) Be a cop
3) "Who is the DX"
4) Call on my frequency
.
.
.
.
N)

Brian, I have an opinion about what the translation is, but if I
expressed it here Paul would be forced to bounce me off of the reflector.

It's odd, I spent the bulk of that time calling on 40 CW. The other bands were relatively easy, even 80. The problems with 40 were:

1) Too many people wouldn't shut up once K5D sent a callsign to work. That made it ridiculously difficult to find the station they were working. I wonder how these people ever work any DX at all by calling and calling without listening? I'll bet many of them are the ones complaining of not getting a QSO now. This HAD to slow K5D down a bit too. I often heard them send the other station's call 4 or 5 times before finally sending "TU."

2) The band would eventually go out and I could still hear K5D fine but wouldn't hear ANYONE they were calling. So I'd just park on one frequency a few kHz up and hope they found me. This eventually paid off but it took a long time. I suspect different K5D ops had different techniques. I think some tuned around and some sat listening to one receive frequency. Time to rejuvenate the "Rotten Radio" series. :-)

From: Alan Leith
Topic: 9173 Message: 9181

Is there a page showing the breakdown of the K5D QSOs? I can't find it. However, in the time I listened, I think Europe was treated fairly.

What was not fair was the constant calling by stations who did not respect the request by the K5D operators for partial calls. I heard, may times, what appeared to be a great number of stations continuing to call when a partial call was identified. If a DJ5 was being called there were Fs, Gs, PAs, E7s, UTs, etc calling continuously. No country's operators were worse then others, although countries that have a greater number of operators clearly outnumbered those that didn't.

The exact same thing happened with North Americans. A W6 was identified and W4s, KA5s, KB8s and so on continued to call incessantly.

The problem is worsening. Today's operators are generally terrible. They don't know how to listen, they don't understand directions (or choose to ignore them) and they're all about ME.

The other day I heard a VE3 in QSO with an I station and the first thing he did was to announce his personal. Someone broke in and told the VE3 that in ham radio we are operators and we have names and "handles" but we don't have personals. And last night, in a pileup on ZC4VJ, who indicated "UP" on virtually every exchange, a W3 called on his frequency for more than five minutes, ignoring the "cops" who kept telling him to "split."

I'm afraid the genie is out of the bottle.

While we should be examining new operators on operating practices, we aren't. When we should be teaching them that the abbreviation on CW for "thanks" is "tnx" or "tks" I hear "thks." Another I see on the cluster is "sign" when the poster means "sig." And I can go on and on. It is the problem of saying the same thing so everyone can understand. That's why Q-codes were invented and damned if we haven't lost our ability to use them. Hell, I heard EU1UN last night and thought he was on EU129. Cut numbers be cursed.

Rant over. Back to you.

I think the problem is two-fold ... first: those bleedin' computer code programs that allege to read CW. Which in a pile-up they cannot. So the guy with the breakfast food coupon ticket just keeps banging away at his keyboard. The other group is just plain ignorant and could care less about protocol.

Now on SSB, it's the same, just delete the computer code program.

I am afraid that we must just put up with it, no one is going to come to our aid. So, polish your skills, get the DX early and often and leave the great unwashed masses to beat each other silly while you go get the next one.

Date: 2009-03-03 01:47:29 UTC
From: WB6PSY
Topic: 3618 Message: 9184

Last year I enquired on this list if there were any field checkers and what they all could check as when I stopped DX'ing they were limited. I received one response who told me all band 'except' 160m could be field checked but now I understand 'all' bands can be checked.

> relatively easily.

Yep. I had 15m & 17m CW in the bag, and 160m CW (which was the one I really wanted) in the first few days.

So I kind of halfheartedly called in a few pileups here and there and gave up.

On one of the last nights though, I figured I'd try pick up 80m and 40m because not much else was going on... they were in the log on both bands within 10 minutes, max.

Got 'em on 17 phone, simplex, the next morning too...

I don't recommend waiting if you really, really need a new one (see the last KP5 for example) it does get a bit easier to knock down band slots when demand has slackened a bit.

Dick this would be comical if it weren't so true and such a massive problem.

A couple of weekends or so ago, played a bit in the DX contest, and it
was interesting to hear the DX call an individual, and there would be a
noticeable delay to that response. Then it finally dawned on me; That
idiot was waiting for his code machine to spit out the info. One of my
favorite words is /dufus./

Main Entry: dufus

/variant of/ doofus <http://www.merriam-webster.com/dictionary/doofus>

doofus

One entry found.

doo?fus Listen to the pronunciation of doofus
<javascript:popWin('/cgi-bin/audio.pl?doofus01.wav=doofus')>
Pronunciation:
\?d?-f?s, -fis\

I'll be the first to admit I'm no CW wizard -- there are those who can copy 40 WPM while eating a sandwich and talking to you about the ball game last night -- all this while they are half drunk. I've seen them do it.

However, a DXer MUST learn to recognise the TU 5NN pattern and their call or part thereof in a pileup, even at 40 WPM. My call and any type of acknowledgement sequence by someone else jumps out at me like someone screamed it in my ear. I hear this clearer in a CW pileup than in a SSB pileup.

I thus can't see where any of those CW decoders can pick it up 1/1000th as good. They will work in the clear if they have time to sync on the code speed and if it well sent and loud. There is no program or firmware available today that will pick out the "last guy" in a 30-40 dB over roaring pileup spread from 7.025 to 7.035 when you are spinning the dial in the 3-4 seconds you have to trying to find the guy the DX on 7.023 is working.

It can't be done, and it takes your ear, your whole ear and nothing but your ear. I can't imagine the fault lies with the computer code reading programs.

The fault lies in your second point; the "ignorant and could care less about protocol" guys. There is no way to stop them. As far as I can tell they just park their second VFO somewhere in the middle of the pileup and keep pushing the memory keyer until the DX comes back to their call. Put 10 of these in a 1000 Ham pileup and they will turn it into a din that is impossible for even the best CW man to figure out. I suspect the same happens in SSB pileups, with

the only difference being that they bray out their call every 5-seconds (or push a recorded voice button.)

I don't think this can be fixed because it's gone to far. There is usually no pattern on either mode that can be determined by listening. It might be there, but it is nearly impossible to find. All it takes is the 10 guys with kilowatts and push buttons to fill up the listening split. Assume the DX is following a basic pattern - working two on 7.025, two on 7.027, two on 7.029, two on 7.031 and two on 7.033; then cycling back to 7.025 and doing it again. 20 years ago you'd figure this out on no time.

How would you ever figure this out today? Even if our 30-40 years of experienced listening can get it in a given pileup, good luck trying to demonstrate this to a fairly new guy. "Look Tom, all you have to do is listen for a minute or two and you'll be able to predict where he'll be listening next!" Those days are gone.

I think that's what I said, albeit in an abbreviated form.

I think the next time I hear these carryings-on in a big pileup, I am going to write down the callsign of every station I hear repeatedly calling out of turn and query them as to what they were doing (by e-mail or by letter). If some of them get upset, too bad; I'm already upset with them anyway.

Once I could copy over 60 wpm. With the onset of tinnitus and maybe other factors, I seem to be limited to about 55 wpm these days. And if I hear the DX calling someone else or giving a partial call that has no bearing on mine, I shut up. If the DX says "W9?" then it's fair game to call again. Usually he wasn't calling me anyway.
:-)

9189. RE: [DX-IS] Re: Language barrier

Yahoo group: DX-IS (2009)
Date: 2009-03-03 03:46:52 UTC
From: Dave AA6YQ
Topic: 9173 Message: 9189

While in Barbados for a couple of weeks, I did some holiday-style operating as 8P9DX using a ic-706 and multi-band doublet. The pileups were unexpectedly fierce, especially on 80m, and there was a lot of out-of-turn calling from everywhere. I quickly re-learned the new prime directive: never never never acknowledge a callsign significantly different than the one you called, for to do so ignites a frenzy of out-of-turn calling that takes a long time to tamp down. The only way to maintain a modicum of control is to doggedly stick with the station you called; you're far better off going back to CQ or QRZ? than responding to a different call. It's time consuming, but sending "7 0 1 D X O N L Y" and doubling the time between
the letters each time you are forced to repeat usually gets the message across (reducing CW speed would also work, but that's a menu setting in the 706 with no CI-V access). Obviously this strategy makes no sense for a DXpedition intent on logging 100K+ QSOs, but if you're not in a rush, the result is more enjoyable.

73,

Dave, AA6YQ

On 3/2/09, Alan Leith <aleith@...> wrote:
Is there a page showing the breakdown of the K5D QSOs? I can't find it. However, in the time I listened, I think Europe was treated fairly.

What was not fair was the constant calling by stations who did not respect the request by the K5D operators for partial calls. I heard, may times, what appeared to be a great number of stations continuing to call when a partial call was identified. If a DJ5 was being called there were Fs, Gs, PAs, E7s, UTs, etc calling continuously. No country's operators were worse then others, although countries that have a greater number of operators clearly outnumbered those that didn't.

The exact same thing happened with North Americans. A W6 was identified and W4s, KA5s, KB8s and so on continued to call incessantly.

The problem is worsening. Today's operators are generally terrible. They don't know how to listen, they don't understand directions (or choose to ignore them) and they're all about ME.

The other day I heard a VE3 in QSO with an I station and the first thing he
did was to announce his personal. Someone broke in and told the VE3 that in ham radio we are operators and we have names and "handles" but we don't have personals. And last night, in a pileup on ZC4VJ, who indicated "UP" on virtually every exchange, a W3 called on his frequency for more than five minutes, ignoring the "cops" who kept telling him to "split."

I'm afraid the genie is out of the bottle.

While we should be examining new operators on operating practices, we aren't. When we should be teaching them that the abbreviation on CW for "thanks" is "tnx" or "tks" I hear "thks." Another I see on the cluster is "sign" when the poster means "sig." And I can go on and on. It is the problem of saying the same thing so everyone can understand. That's why Q-codes were invented and damned if we haven't lost our ability to use them. Hell, I heard EU1UN last night and thought he was on EU129. Cut numbers be cursed.

Rant over. Back to you.

From: Lance Martin
Topic: 9193 Message: 9193

Hi Guys,

I am glad that people are activating the deleted DXCC's these days, I say bring them back!

I took great delight in recently working Swan Island, Serrana Bank and Bajo Nuevo. Got Zanzibar the other year too.

ARRL might not count them anymore but they will go down as valuable possession in my DXCC annuls.

9194. Antenna advice/opinions

Yahoo group: DX-IS (2009)
Date: 2009-03-03 18:51:50 UTC
From: John Geiger
Topic: 9194 Message: 9194

I am turning to the fine DX list here for some opinions on which antenna would be better for overall DX work. First, some background: Last May my Mini Products MQ-1 miniquad was killed in a storm. I had been using it for 6 years and worked about 250 countries on it, so I liked it. It also was a good 6 meter antenna. I have just been running a G5RV since that time,and it does OK but is noisier than the mini quad was, plus the performance isn't quite as good. One interesting thing about the G5RV was that it had a sharp null on 20m in the direction of KP5. I couldn't hear K5D on 20 at all, even when everone else in my area was spotting them. I worked them with no problem on 17m, though.

I have narrowed down my search for a replacement antenna to either a Mosley TA32JR 2 element tribander on a 6 foot boom or a TGM MQ-1 Mini Quad 2 element hibred quagi on a 4 1/2 foot boom. I don't use an amp and have no plans to, so the power rating of the TA32 isn't a factor. The Mosley would require an additional coax run, since I had to put up a 3 element 6m yagi to replace that portion of the miniquad. So, the 2 options would come down to:

1. Mosley TA32JR at about 25 feet. Would require and extra coax run, but I would have a separate 6m antenna to use.

2. TGM MQ-1 Miniquad at about 30 feet. I can get it up a little higher due to its smaller size. It wouldn't require an additional coax run, but also would make it more difficult to listen to 6m on a separate radio.

So, in your opinion, which would be the better performing HF setup? The Mosley TA32 2 element tribander, or the TGM MQ-1 2 element miniquad?

FOR IMMEDIATE RELEASE

K5D Desecheo Postlogue Press Release 3/3/09

All team members have safely returned home. The K5D DXpedition, 12-26th, February 2009, netted 115,783 QSO's, including one QSO with the International Space Station. The DXpedition ranks #7th for all-time number of QSO's, and the #1 DXpedition with the most 30M contacts. More importantly, we are confident that thousands of radio amateurs worldwide now have a QSO with Desecheo for an all-time new one--our overall #1 goal !

Desecheo was #2 Most Wanted in Asia and #3 Most Wanted in Europe. We are happy to report that 40% of our contacts were with Asia and Europe!!! Another important goal achieved !

The QSL card is in the final stages of design and will be available in the next few weeks. You may QSL directly to N2OO, but online QSL requests are available and highly recommended. For details see our website:
http://www.kp5.us/qsls.htm
Logs will be uploaded to LoTW and posted early next year.

The Desecheo 2009 team wants to thank everyone for working us and helping to make this DXpedition such a success!

73 and good DX!

Bob Allphin, K4UEE, co-leader
Glenn Johnson, W0GJ, co-leader

Anybody care to speculate what "UP" translates to?
Inductively it seems to translate to :
1) Tune on the frequency
2) Be a cop
3) "Who is the DX"
4) Call on my frequency
.

Much to my surprise, K5D turned out to be pretty easy. The first Saturday, I heard them coming in on 17 SSB but with a decent pileup. Got them a few evenings later on 30, only took about 5 minutes of calling.

Then I heard them again on 17 SSB the night of my club meeting, calling JA's. Left the rig on as I was gathering some stuff, when the op took a break due to poor propagation, and I had them again within another 10 minutes.

Both of these with a TS-480SAT running barefoot to an HF6V.

Biggest surprise was not only hearing but working them on 160 CW, on only 2 calls. (Thought I had them a few minutes later on 80 CW, but apparently not as I'm not in the online log on that band.) So big a surprise it was, that my HF6V fell over in total shock shortly thereafter. (Of course, the wind working on a weld may have had something to do with that as well)

I'm sure luck had a lot to do with it, but let's face it... you have to have a feel for being in the right place at the right time. Too many of the newer hams who have book-knowledge but not on-air-knowledge don't have that horse-sense yet, and without elmering, may never have it. The result is the chaos I heard on K5D on 40 meters (phone & CW) whenever I tuned them in... frequency cops, jammers, people calling without listening, the usual litany.

But I'm happy. Got them on 3 out of the 4 bands I needed (if 12 ever opened, it was when I was at work, so it goes). Now, on too Navassa?

73, ron w3wn

To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] Language barrier

I roughly calculated that I spent ~ 24 hours in the pileups for K5D. I'm sure there are people who spent more time calling them, but I'll bet there were a lot of people who spent far less.

I wonder how many people do have that kind of patience? I heard them working exclusively EU several times and just went and did other things till they started working NA again.

TA3D had an incredible signal here on 40 CW last night. Peaking 40 over S9. Never heard anyone from Turkey so loud here. Must've been reciprocal propagation - I didn't hear him work any EU at all. Also, EU1UN had a good signal. And my antenna does NOT favor north and south on that band.

ZC4VJ (G3AB op) was booming in here too but I worked him the night before so didn't call him again last night.

BTW Andy said to QSL to his address in Cyprus per QRZ.COM. He's putting logs on LoTW.

9198. ZL7T DXpedition Departure Press Release.

Yahoo group: DX-IS (2009)
Date: 2009-03-04 04:36:16 UTC
From: Lee Jennings
Topic: 9198 Message: 9198

The ZL7T DXpedition Team will leave for Chatham Island Tomorrow around 0130 UTC and expect to be on the ground in ZL7 around 0400 UTC. The schedule is as variable as Air Chatham is. Work will begin on assembling the antennas Thursday night in the dark. We will do as much preliminary work and preparation as we can before Friday morning.

We are hoping to have the two Yagis and 30M vertical up by lunch on Friday and will work through the afternoon to get the 80M, 40M wire antennas up in the trees. The 160M inverted "L" will be the last antenna to go up. We should be on the air with two stations on the higher frequencies sometime after 1200 UTC Friday and will probably activate all four stations by the early evening.

Keep a watch on packet cluster or go to http://www.dxsummit.fi/DxSpots.aspx <http://www.dxsummit.fi/DxSpots.aspx> and you will see us spotted for information on our active frequencies. If you are new to DXing, go to the ZL7T website www.zl7t.com <http://www.zl7t.com/> and have a read of tips on how to work us. Don't be afraid to call. Our aim is to help all of you who want ZL7 to get it in your log over the next 5 days of operation.

On behalf of the ZL7T DXpedition team please accept our heartfelt thanks for your support, kind words of encouragement and donations which will help defray some of the cost of this operation. It makes all the effort required in mounting a DXpedition worthwhile when we receive your good wishes.

73, Lee ZL2AL

See you in the pileups! DX IS!!

9199. S.E.S ACTIVITY RESUME

Yahoo group: DX-IS (2009)
Date: 2009-03-04 05:58:36 UTC
From: ARMIC EA3RKR ONCE
Topic: 9199 Message: 9199

From these lines we want to inform you of the success of EG3LB and EG7LB, dedicated stations put into the air during the 200th anniversary of the birth of the illustrious Louis Braille.

To thank the friends of the Union of Radio Sevilla EA7URS, for their collaboration to conduct the event from his district, as well as various friends from other districts their collaboration, which for reasons of timing has not been possible to draw air, especially a greeting and thanks to Radio henares club with Oscar EA4TD its front, where ARIES International noteworthy especially EA1AYG and Rabanal Rosario Asuncion EA2BLF also Aries in zone 5 and in this case Taberner Salvador EA5CHA to different friends around that EA have not been able to be active because of problems with the wind, and various friends who had offered to work from their respective districts, to all who have contributed in different ways and this activity, all designed with affection for all.

We could not fail to mention one of the most famous portable, but when we talk about CC.DD. but with these few tracks will not guess who it is, we will say that in this case we speak of his friend Jorge EA8TL, who has undoubtedly been a fundamental part in this modality, who appreciate the unconditional support to the activities of this modest Radio Club, TNX Jorge.De equally we can not ignore, much less collaboration and strong interest in andalusia activity Toni EA3GYE.

We also thank the many newsletters and other radioclubs DX, the DX programs of various international broadcasters who have spread the activity and the various websites.

Finally everything and have suffered a setback in the log especially in some basically CW QSO of CCDD and EG3LB, the result of both stations is as follows:

EG7LB may only be three days and a very limited time in the air, has been closed, even with no spread in friendly, with a total of more than 270 QSO's.

Somewhat larger EG3LB to stay beyond the 1000 QSO, unable to be in the air all the time.

At this time is running out to complete the design of the QSL for their printing, so we ask you patience, the same shall be forwarded as soon as they are in our possession, and also inform you that as usual the QSL's have been increases to E-QSL for all those who have asked us the same way for this award EANET EA Digital Federation FEDIEA everything and of course receive their QSL paper as the rest.

We ask them to send their station's QSL confirming the contact, as well as added to the memory of the activity, is the only way to recover the QSO's that are not in the log for failure information.

Likewise for listeners interested and as previously announced, and it is usual activities ARMIC, those who want just as many who have already done so, they can send their reports to EA3RKR (Data QRZ.com) which will be matched with corresponding QSL.Thanks a lot
to everybody, see you on next activity, 73's.

9200. DX frequency allocations

Yahoo group: DX-IS (2009)
Date: 2009-03-04 18:01:50 UTC
From: witstock7
Topic: 9200 Message: 9200

I believe I saw a while back that amateurs outside the US were given more phone frequencies in the 40 meter band. Where can I find out about this? I plan to operate 40 next weekend and will not be using the cluster. It would be good to know where to listen for more activity.

Nelson, K8DJC

SB DX ARL ARLD009
ARLD009 DX news

This week's bulletin was made possible with information provided by CO8TW, NC1L, OH2BN, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

NIGERIA, 5N. Bodo, DL3OCH is QRV as 5N/KT3Q until July 24 while on business. Activity is on 160 to 10 meters, including EME. QSL to home call.

TAIWAN, BV. Look for BX5AA to be a Single Op/Single Band/High Power entry in the ARRL SSB DX contest. QSL via operator's instructions.

CUBA, CO. Eduardo, CO8LY will be a Single Op/Single Band QRP entry on 80 meters in the ARRL SSB DX contest. QSL via EA7ADH. In addition, Juan, CO8TW will be a Single Op/Single Band/Low Power entry on 20 meters in the ARRL SSB DX contest. QSL via HB9SVT.

AZORES, CU. Look for CU2A and CU2X to be QRV in the ARRL SSB DX contest. QSL both calls via OH2BH.

ST. PIERRE AND MIQUELON, FP. Eric, KV1J is QRV as FP/KV1J from Miquelon Island, IOTA NA-032, until March 9. Activity is on 80 to 6 meters using CW, SSB, RTTY and PSK31. He will also be a Single Op/All Band/Low Power entry in the ARRL SSB DX contest. QSL to home call.

NETHERLANDS, PA. Special event call PA750ASN is active until April 15 to commemorate the 750 years of the town of Assen. Activity is on all bands and modes. QSL via PI4ASN.

BONAIRE, CURACAO, PJ2. A group of operators will be QRV as PJ2T from Signal Point Station on Curacao, IOTA SA-006, as a Multi/Multi entry in the ARRL SSB DX contest. QSL via N9AG.

FERNANDO de NORONHA, PY0. Operators W9VA, K9PPY and PY0FF are QRV as PS0F until March 10. This includes being a Multi/Single entry in the ARRL SSB DX contest. Outside the contest, they are active on 160 to 6 meters using CW, SSB and digital modes. QSL direct to W9VA.

BANGLADESH, S2. Some members of the Korea DX Club will be active as S21KD from Dhaka from March 7 to 14. Activity will be on 160 to 10 meters using CW, SSB and various digital modes. QSL via HL5FUA.

ICELAND, TF. Look for TF3CW to be a Single Op/Single Band entry on 40 meters in the ARRL SSB DX contest. QSL via LX1NO.

COSTA RICA, TI. A group of operators will be QRV as TI8M in the ARRL SSB DX contest as a Multi/2 entry. QSL via TI2KAC.

CHAD, TT. Franck, F4BQO is QRV as TT8CF until July 1. Activity is on all bands using CW and SSB. QSL direct to home call.

KALININGRAD, UA2. Members of the UA2 Contest Club will be QRV as RW2F in the ARRL SSB DX contest as a Multi/Multi entry. QSL via DK4VW.

ANTIGUA, V2. Operators K1DG, K1QX and W1MD will be QRV as V26F as a Multi/Single entry in the ARRL SSB DX contest. QSL via W1MD.

MICRONESIA, V6. Mike, KM9D and Jan, KF4TUG are QRV as V63MY using CW and V63TO using SSB, respectively, from Turuaimu Island, IOTA OC-167, for about one week. Activity is on 40 to 10 meters. QSL via OM2SA.

BRUNEI, V8. Kanzi, JA4ENL is QRV as V85NL until March 9. Activity is on 80 to 12 meters using mostly CW. QSL to home call. In addition, special call V88NBD25 is active until March 10 in celebration of 25 years of Brunei independence. QSL via operators' instructions.

BERMUDA, VP9. Operators W3MF and K3PH will be QRV as VP9I in the ARRL SSB DX contest. Outside the contest, they are active as VP9/homecalls. QSL via N1HRA.

VENEZUELA, YV. Operators YY5EBV, YV5BM and YV5KG will be QRV as YV5KG as a Multi Single/High Power entry in the ARRL SSB DX contest. QSL via YV5KG.

CHATHAM ISLANDS, ZL7. A group of operators are QRV as ZL7T from the fishing village of Kaiangaroa until March 10. Activity is on 160 to 10 meters using CW, SSB, RTTY and PSK with four stations active simultaneously. QSL via ZL2AL.

THIS WEEKEND ON THE RADIO. The ARRL International SSB DX Contest, NCCC Sprint, Wake-Up! QRP Sprint, Open Ukraine RTTY Championship, SKCC Weekend Sprint, UBA Spring CW Contest, DARC 10-Meter Digital Contest and Nova Scotia ARA CW Contest will certainly keep

contesters busy this weekend. The RSGB 80-Meter Club CW Championship is scheduled for March 11. The CLARA HF Contest is scheduled for March 10 to 11 and March 14 to 15. Please see March QST, page 78 and the ARRL and WA7BNM contest web sites for details.

07 March 2009 A.R.I. DX Bulletin
No 931
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5N - Bodo's ,DL3OCH (KT3Q) trip to Nigeria [425DXN 930] has been delayed and now expects to travel to Nigeria around 21 March. The callsign for his EME activities will be 5N0EME, while on the HF bands he should be using 5N/KT3Q.
5X - Nick, G3RWF will be active again as 5X1NH from Fort Portal, Uganda starting on 11 March until 5 May. This time he may also give digital modes a try, and will try to improve his antennas for the low bands. QSL via home call. [TNX G3RWF]
6W - Alessandro, IK4ALM will be active as 6W/IK4ALM from Saly, Senegal between 29 March and 9 April. He will operate SSB and QRS CW on 40-10 metres with 100 watts and a ground plane. QSL via home call. [TNX IK4ALM]
9A - Look for Wolfgang, 9A/OE3WGC and Gert, 9A/OE3ZK to be active from Palagruza Island (EU-090) and lighthouse from 30 May to 6 June. They plan to operate CW, SSB and RTTY. QSL via bureau to home calls. [TNX OE3ZK]
9M2 - Richard, PA0RRS will be moving permanently to Malaysia on 1 May. He will be active as 9M2MRS from Penang Island (AS-015), initially only on 20 metres with a dipole. He prefers CW, with SSB on request. QSL via 9M2MRS, either direct (Richard Smeets, Reef Apartment Building, 54-7-12 Jalan Low Yat, 11100 Batu Ferringhi, Penang Island, Malaysia) or through the bureau. "Via PA0RRS" is still possibile, but you should be patient, as Richard will be back to the The Netherlands only for a limited time each year. [TNX PA0RRS/9M2MRS]
9M6 - Steve, 9M6DXX will operate as 9M8Z from Sarawak, East Malaysia (OC-088) on 26-29 March, including a SOAB HP entry in the CQ WW WPX SSB Contest. Outside the contest, look for Steve on 40 metres SSB, on which band he will be using a 3-element Yagi. QSL via M0URX, direct, bureau or LoTW. [TNX 9M6DXX]
BV - BV2DD and other six operators from Taiwan will be active as BP0A from the P'enghu Islands (AS-103) on 27-30 March. QSL via BV2KI, direct or bureau. [TNX www.rsgbiota.org]

CN - Alfredo, IK7JWX and other eight operators will be active on all bands and modes from Mogador Island (AF-065) between 18 and 26 April. They have been issued individual callsigns as follows: 5C2A (QSL via IK2AQZ), 5C2C (QSL via IK6CAC), 5C2F (QSL via I2FUG), 5C2G (QSL via IZ7GWZ), 5C2J (QSL via IK7JWX), 5C2L (QSL via I8LWL), 5C2SG (QSL via IZ7ATN), 5C2Y (QSL via I0SNY) and 5C2Z (QSL via I8YGZ). Their main QTH will be Essaouira on mainland Morocco; when on the island they will operate /p. They also plan to operate /m from three lighthouses (ARLHS MOR-019, MOR-036 and MOR-O40). Contributions will be gratefully accepted. Please e-mail mogadorisland2009@... for further information, or visit http://www.mogador2009.altervista.org/ (under construction). [TNX IK7JWX]
CT - CT1GFK, CT1GPQ, CT1IUA and CT2IHP will be active as CS6A from the lighthouse Murtinas Posterior (ARLHS POR-126) on 15 March, from 7 to 13 UTC. They plan to operate CW and SSB on 40, 30, 20 and 17 metres with two stations. QSL via CT1GFK, direct or bureau. [TNX CT1END]
CU - Martti, OH2BH (CU2KG) and Juha, OH8NC (CU2KH) are in the Azores and will participate in the ARRL DX SSB Contest as CU2A (20m) and CU2X (80m). They may occasionally come on other bands to hand out multipliers. QSL both via OH2BH. [TNX OH2BN]
DU - DY1C is the callsign Jairus/DV1ERS, Roland/DU1KGJ and Frank/VE7DP will be using during their operation from Cujo Island (OC-120) [425DXN 930]. Their operating schedule will be dictated by the boat schedule to the island and they anticipate to be QRV around 4 UTC on 6 March until around 2 UTC on the 8th. Look for DY1C on 40, 30, 20 and 17 metres CW and SSB. QSL via VE7DP, direct or bureau. [TNX VE7DP]
F - Christophe/F5UBH, Juan/F5IRC and Karim/F4CTJ will be active as TM2HC from Hoedic Island (EU-048) on 13-15 March. They plan to operate CW, SSB, RTTY and PSK31 on the HF bands. QSL via F5IRC, direct or bureau. [TNX F5NQL]
F - Amateur radio club CBK (http://www.cbk67.org) will operate special event station TM0TAN from 27 March to 10 April to celebrate the 60th anniversary of the Organisation du Traite de l'Atlantique Nord (OTAN), i.e. the North Atlantic Treaty Organization (NATO). The activity also includes participation in the CQ WW WPX SSB Contest. QSL via F8KHH, direct or bureau. [TNX F5AEG]
FT5X - Gildas, TU5KG (FT5WP/mm) expects to stop at Port-aux-Francais (Kerguelen) between 8 and 10 March. If he is able to land, he will might be QRV as FT5XS (QSL via F4EFI). [TNX F4EFI]
H40 - The Daily DX reports that the Temotu team - namely H40MS (SSB), H40FN (CW) and H40HP (2m EME) - is operating from Pigeon Island in the Reef Islands (OC-065), not from Nendo (OC-100) as previously announced. QSL H40MS via DL2GAC; QSL H40FN via HA8FW; QSL H40HP via DL2NUD.
HH - Jan, K4QD and and Don, AF4Z will be active again as HH4/homecall from the Northwest Haiti Christian Mission from 23 March to 3 April. They will operate CW, SSB and RTTY on 160-10 metres as time

and availability of AC power permit. They will also participate in the CQ WW WPX SSB Contest, and are working with HH2JR and the Radio Club Haiti in an attempt to obtain a special 4V4 prefix for the contest. QSL via home calls. [TNX K4QD]
I - Special stations II0IDP (QSL via IS0SDX), II0IDR (QSL via IZ0FVD), II0IGU (QSL via IK0JFS), II1ICS (QSL via I1SAF), II1IGG (QSL via I2AZ), II8ICN (QSL via IZ8JPV) and II9ICF (QSL via IT9MRM) - all representing former coast radio stations of the Italian Navy - will be active on 7-22 March for the 3rd Italian Navy Coastal Radio Stations Award (http://www.assoradiomarinai.tk). [TNX IT9MRM]
I - Celebrating the 100th anniversary of the Nobel Prize in physiscs awarded to Guglielmo Marconi, special event station IY1GMN will be QRV on 13-28 June from Sanremo (www.arisanremo.it). The activity will coincide with a vintage-radio exhibition ("From Marconi to Nowadays") to be hosted at Villa Nobel, where Alfred Nobel lived and died in 1896. QSL via operator's instructions [TNX I1UWF]
J3 - Colin, G3VCQ will be active as J38CW from Grenada on 12-26 March. He will operate holiday style on 80-10 metres SSB, CW and possibly RTTY/PSK. He will also participate in the Commonwealth (BERU) Contest (14-15 March, rules at www.rsgbhfcc.org). QSL via home call, direct or bureau. [TNX G3VCQ]
JA - Look for JS6RRR and JI3DST/JS6 to operate on all bands and modes from the Miyako Islands (AS-079) on 14-24 March. QSL via bureau. [TNX JS6RRR]
KH0 - Look for KH0/KI3DNN (QSL via JI3DNN), KH0/N3MU (QSl via JA3CEK) and KH0/K2JA (QSL via JL3SIK) to be active from Saipan (OC-086) on 19-22 March. They plan to operate SSB, CW and some digital modes on 160-6 metres. [TNX JL3SIK]
LU - LU4GL, LU1JB/L, LU4LC, LU9GDN, LU7LC, LU4LE and possibly others will be active as LT9L (http://www.qsl.net/lt9l)from the nature reserve Esteros del Ibera on 21-23 March. They will operate CW, SSB, PSK, RTTY and SSTV on 80, 40, 20 and 15 metres. QSL via EA5FL. The operation is organized by Radio Club Corrientes (LU4LG), Radio Club Villa Angela (LU4GO) and Chaco Radio Club (LU4GF). [TNX LU5FZ]
OE - The "Radio Club of America" was established in January 1909, and issued the first amateur radio licences in April of that year. To celebrate 100 Years of Amateur Radio, the Amateur Radio Section of ORF (Austrian Broadcasting Corporation) and the Documentary Archives Radio Communication/QSL Collection will be active as OE100M on 1-30 April (contacts made on the International Marconi Day, 25 April, will be valid for the IMD Award). QSL via the bureau or direct to OE1WHC. [TNX OE1WHC]
PA - Amateur radio operators from Ireland (EI) will be permitted to operate digital modes on 30 metres starting on 29 March, and a number of European Phase Shift Keying Club's (EPC) stations will be active on or around that date to celebrate that event. Announced stations include PA30EPC (from 28 March to 24 April, operated by Richard/PA3GWH on 10-80 metres PSK) as well as CS2EPC, DK0EPC, K1EPC, M0EPC, MI0EPC, N4EPC, and possibly others. QSL via

operator's instructions. [TNX PA3GWH]
S2 - S21KD is the callsign for the Korea DX Club's DXpedition to Dhaka, Bangladesh [425DXN 921]. Four operators (namely 6K2AVL, 6K2GCW, 6K5YPW and HL5FUA) will be active from 7 to 14 March on 160-10 metres the following suggested frequencies:
CW 1822, 3515, 7015, 10115, 14015, 18075, 21015, 24895, 28015
SSB 3793, 7095, 14195, 18130, 21295, 24950, 28460
Digital 7035, 10140, 14082, 18100, 21082
QSL via HL5FUA, direct or bureau. The webpages for the expedition can be found at http://dxpedition.co.kr/
SV - Andreas/SV2JAO, Archelaos/SV2KBB, Kostas/SV2LLB and Litsa/SW2MIN will be active as SX2MT from the Royal Tombs Museum at Vergina, the capital of the ancient Macedonian kingdom, on 20-21 and 27-28 June for the International Museums Weekend. QSL via SV2KBB, direct only. [TNX SV2KBB]
TA - The TC Special Wireless Activity Team (http://www.tcswat.org/) will be active as TC18M on 17-19 March to commemorate the 94th anniversary of the naval battle of 18 March 1915 during the Dardanelles Campaign. They will operate SSB and CW on the HF bands from Canakkale on the Asiatic side of the Dardanelles. QSL via TA3FB. [TNX TA1HZ]
UA - Special event station R150ASP will be active from Gogland Island (EU-133) on 14-17 March to celebrate the 150th anniversary of the birth of Russian physicist and radio pioneer Aleksandr S. Popov. Look for activity on the HF bands SSB, CW and digital modes. QSL via RF3C, direct or bureau. [TNX RA3DOX]
V2 - Bob, W4OWY (V25WY) and Mark, W9OP (V25OP) will be active on 160-6 metres from Antigua (NA-100) on 10-19 March. QSL via home calls, direct or bureau. They will also upload their logs to LoTW and eQSL. [TNX NG3K]
VE - John/VE8EV, Wally/VE8DW and Gerry/VE8GER will be active as VX8X from Ellice Island (NA-192) on 20-23 March. They plan to operate around the clock, with an expected focus on 20m SSB and some activity on CW as well. They will also have a vertical for 40 metres. The QSL route will be announced at www.qrz.com and updates will be posted on http://ve8ev.blogspot.com/search/label/IOTA [TNX www.rsgbiota.org]
VE - VY0A is the callsign Cezar, VE3LYC will be using during his 31 March-3 April activity from Fox Island (NA-186) [425DXN 929]. He will operate SSB and CW with 100 watts and a multi-band vertical antenna, with a focus on 20, 30 and 40 metres. This IOTA group was activated only once and very briefly sixteen years ago. The costs associated with this operation are considerable and both group and individual donors are being sought. QSL via VE3LYC.
VP5 - Dave, W5CW will be active on 160-6 metres CW and SSB as VP5/W5CW from Providenciales (NA-002), Caicos Islands from 24 March to 8 April. He will participate in the CQ WW WPX SSB Contest as VP59V; before and after the WPX event he will concentrate on 160, 30, 12 and 17 metres. QSL via home call (direct only). [TNX W5CW]
W - Pete, VE3IKV (VA3RA) will operate from St. Simons Island (NA-058)

on 7 March. On 9-13 March he will be active from Key West (NA-062), with a possibility of a side trip to the Dry Tortugas (NA-079) during that time frame. Expect him to be active as W4/VA3RA on 40 metres CW, between 21 UTC and 2 UTC, from all locations. [TNX VE3IKV]

Direttore Responsabile I2VGW

ARRL INTERNATIONAL DX CONTEST (SSB) ---> Object of the contest is for W/VE amateurs to work as many stations in as many DXCC countries as possible on 160, 80, 40, 20, 15, and 10 metre bands, while foreign amateurs (also including KH6, KL7, CY9 and CY0) work as many W/VE stations in as many of the 48 contiguous states and provinces as possible (full rules can be found at http://www.arrl.org/contests/rules/2009/intldx.html. This year's event will run from from 00.00 UTC on 7 March through 24.00 UTC on the 8th. Do not forget to give a look at the Announced Operations listing maintained by Bill, NG3K at http://www.ng3k.com/Misc/adxs2009.html - good contest to you all!

DXCC NEWS ---> At its last meeting the ARRL Programs and Services Committee decided that administratively the concept of "deleted entities" should be returned to the DXCC programme. The concepts for deleting an entity do not change. If an entity is deleted it will be added to the Deleted Entities List and the statistical records for DXCC participants will be adjusted accordingly, just as they had been in the years prior to 2000 (when the change from "deleting entities" to "removing entities" was introduced). Read Bill Moore's, NC1L full release on the Century Club Awards Weblog at http://www.arrl.org/blog/Century%20Club%20Awards

FH/G3SWH ---> Phil (G3SWH) and Dick (G3RWL) arrived back from their trip to Mayotte with over 10,000 QSOs in the log. "Looking at the DX Summit spot database", Phil says, "we appear to have been the victim of some piracy". Please note that there was neither activity by FH/G3RWL (both operators used FH/G3SWH) nor SSB activity whatsoever.

K5D POSTLOGUE ---> "The K5D DXpedition (12-26 February 2009) netted 115,783 QSOs, including one QSO with the International Space Station. The DXpedition ranks #7th for all-time number of QSOs, and the #1 DXpedition with the most 30m contacts. More importantly, we are confident that thousands of radio amateurs worldwide now have a QSO with Desecheo for an all-time new one - our overall #1 goal!
Desecheo was #2 Most Wanted in Asia and #3 Most Wanted in Europe. We are happy to report that 40% of our contacts were with Asia and Europe - another important goal achieved!
The QSL card is in the final stages of design and will be available in the next few weeks. You may QSL directly to N2OO, but online QSL requests are

available and highly recommended (details at http://www.kp5.us/qsls.htm). Logs will be uploaded to LoTW early next year. The Desecheo 2009 team wants to thank everyone for working us and helping to make this DXpedition such a success!" [TNX K4UEE and W0GJ]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Twelve different galleries include cards for the ten Most Wanted DXCC Entities (301 QSLs), the 58 deleted DXCC entities (939 QSLs), obsolete prefixes (2547 QSLs), stations from Magrebh from 1947 to 1962 (304 QSLs), Antarctic bases (723 QSLs) & TAAF (Terres Australes and Antarctiques Francaises, 246 QSLs), the various French DXCC island Entities in the Pacific Ocean (245 QSLs) & the Indian Ocean (95 QSLs), pre-1945 countries (533 QSLs), French Departments (522 QSLs) and USA (50 QSLs) plus a gallery for cards not accepted by DXCC (105 QSLs). Several cards are still needed and your participation is encouraged - please visit http://LesNouvellesdx.fr and send your comments to lesnouvellesdx@... [TNX F6AJA]

QSL VIA NI5DX ---> Buzz, NI5DX is the new QSL manager for ZC4TS (logs transferred, cards being ordered) and FM1II (logs transferred, cards expected "in the not too distant future"). [TNX K1XN and The Golist]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

VK9NS ---> Bruce Smith, G3HSR, son of the late Jim Smith, recalls his father's life on the Documentary Archive Radio Communication's website (http://www.dokufunk.org/vk9ns). The interview was given to Wolf Harranth, OE1WHC on 5 March,

+ SILENT KEYS + Recently reported Silent Keys include Karl-Heinz Moeding (DJ9CZ), John S. Kanzius (K3TUP), Harry K. Nishiyama (KH6FKG), Victor A. Babenko (RV6AB), John D. Peebles (W0LBA), Leonid I. Zverev (UA8TAB), Vasilij A. Spirin (UA9TE), George Smith (VE3CAO) and John Metcalfe (VE3HWW).

QSLs received direct or through managers: 3B8CF, 3DA0EI, 4L/UU4JMG, 4L0A, 4L4WW,4L8A, 4X/K2LS, 5B4AGL,5N/LZ1QK, 5T5DC, 6W1SJ, 7Q7HB, 7Q7JL, 8R1AK, 9A2X, 9A5W, 9J2BO, 9M2MRS, 9M6/N2BB, A71BX, BD4JUU, BG1DRJ/2, C31CT, C91LW, C94KF, CE0Y/N6NO, CE1/K7CA,CE9/K2ARB, CM6RCR, CO2WL, CP4BT, DS1REE, DU9RG, E51KAJ, E51QQQ, E73TW,E74KC, E76AQ, ER4DX, ER4ER, ES1WN, ES5QX,EY8/K4ZW, EY8MM, FK8CP, FO/KH0PR, FW8DX, H40MY, H44MY, HB0/DK9FEC, HC2SL, HC5WW, HC8A, HI3T, HI9/EA3BT (NA-122), HI9/EA3WL (NA-122), HK3CQ, HQ8R, J3/DL5AXX,J79WE, JD1BIE, JD1BMM,JX9JKA, KH8/KK6H, KP2/AE6XY, LY2ZZ, N1LI (NA-137),NP2/AK2P, OA4BHY/2 (SA-075), OY9JD, P29NI (OC-041 and OC-181), PJ4E, PV8AZ, RU6DX/p (EU-185), S79AB, S79NS, S79NS/p, ST2A, T70A, T77C, T93Y, T96Q, TA3D, TF3SG, TI2CCC, TN5SN, TO1YR, TO5DX, TR50R, TR8CA, TT8JT, TX7LX (AF-027), UK9AA, V73NS, V85TT, VI9NI, VK9DWX, VP5/N0VD, VP5W, VP6PR,

The Ohio/Penn DX PacketCluster
DX Bulletin No. 899
BID: $OPDX.899
March 9, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, KP2HC, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, W5ACM, W5JON, K8YSE, DX-IS News Site, Pete's-DX-Newsdesk, CO8TW, DK8JB, DL7MAE & The DX News Letter, DL8OBF, F5NQL & UFT, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, IZ8EDJ, JI5RPT, LA5HE, OE1WHC, OH2BN, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW and ZL1BBO/ZS5BBO for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 28th/February, through Friday, 6th/March there were 223 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/g, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND (Ops Needed). Operators David/GI4FUM (EI4DJ, 3DA0DJ) and Tony/G4LDL will activate the station 3DA0SS during the month of August. The object of this activity is to provide a ham radio station at an international scout camp near Manzini. Station 3DA0SS was the first ham radio station to operate in the "Jamboree on the Air" for the scouts of Swaziland in October 2008. The station was run at the Hawane Resort in western Swaziland 15km from the Swazi capital Mbabane. The resort is 4530 ft. ASL in the mountains - QRA KG53MS. David states (edited), "We will operate from Hawane in the evenings and early mornings and drive over to the scout campsite during the day (about an hour away). There is a DXpedition to Lesotho at the same time as our visit to Swaziland. John, 9M6XRO, is a member of the Lesotho DXpedition team (also serviced by African DX Safaris) but he will be joining us at Hawane between 6th and 13th August.... Our visit to Swaziland will include a trip to the Kruger National Park which is a 2 hour drive from Hawane Resort. We also hope to visit the Trans World Radio transmitter site near to Manzini. We are looking for more members for the team." Anyone interested should E-mail David at: gi4fum@...

3V, TUNISIA. SWL Ashraf, 3V4-002, will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/Low-Power entry. QSL via IZ8CCW. Also, read about Ashraf on his Web page at: http://ashraf3v4002.wordpress.com

4M, VENEZUELA. Operators Jose/YV5TX, Werther/YV5MSG and Alexis/YV5SSB will be active as 4M5DX during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single/High-Power entry. QSL via IT9DAA.

5N, NIGERIA (Update to OPDX.898). Bodo, DL3OCH, has reported that his trip will be slightly delayed, so look for him to be in Nigeria around March 21st and to start his activity later than March 5th as first announced. He has also reported that he has received his license and will use the callsign 5N0EME. In the meantime, all his equipment is on the way. Remember, activity will be on all HF bands (160-10 meters) plus some operations on EME. QSL via DL3OCH.

6TH IDXC ANNOUNCEMENT. The 6th International DX Convention organized by the Strange Radio Team (SRT) will be held April 18-19th, 2009. The City will be Paestum near Salerno (fantastic Archeological Area) and the airport is Napoli Capodichino. Some of the guest speakers are:
* Giancarlo Sanna, IS0ISJ, ARI President
* Antonio Esposito, IW2OAZ: "D-STAR" Panoramic analysis
* Mauro Pregliasco, I1JQJ: "The IOTA of the future"
* Mario Ambrosi, I2MQP: ARI Awards
* Norman Fusaro, W3IZ: DXCC & ARRL Awards
* Simone Bizzarri/IZ0BTV & Giorgio Minguzzi/IZ4AKS: 2009
E44M PALESTINE DXpedition
* William Josh Fisher, W4WJF: 2008 VK9DWX Willis Island DXpedition
* Mike Mraz, N6MZ: 2009 KP5 Desecheo Island DXpedition
* Nuccio Meoli, I0YKN: International Polar Year
More details about the event and dinner bandquet are available at:

http://www.strangeradioteam.com/idxc/6th-idxc-2009.asp

6W, SENEGAL. Alessandro, IK4ALM, will be active as 6W/IK4ALM from Saly between March 29th and April 9th. Activity will be on 40-10 meters using CW and SSB with 100 watts into a ground plane. QSL via his home callsign.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (?)/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA.

C9, MOZAMBIQUE. Philip, ON4AEO, will lead a team of operators on a DXpedition to Mozambique and sign C91FC from April 9-13th. You may remember that Philip lead a team of operators last year to Lesotho for the 7P8FC DXpedition. The "Fox Charlie DXpedition" team is made up of the following operators: Philip/ON4AEO, Kath/ON7BK, Sid/ZS6AYC, Adele/ ZR6APT, Gert/ZS6GC, Lucas/ZS6ACT, Jan/ZS5JC, Deon/ZS6ABR, Jose/ON4CJK, Herman/ZS5LH and Steffi/ON3AEO. They hope to activate the following bands, 80/40/20/17/15/12/10 meters using CW, SSB, RTTY and PSK. The QSL Manager is ON4CJK. Send QSLs either by the Bureau or direct. It is requested that direct cards be accompanied with 1 IRC or 2 green stamps with a self addressed envelope (QSLs without this, QSLs will be returned via the Bureau). The QSL address is: JOSE DUYCK, MOLENAKKER 56, 8740 EGEN, BELGIUM. More information regarding the DXpedition can be obtained from their Web site at: http://www.c91fc.be

CO8, CUBA. Eduardo, CO8LY, will be in the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (80m)/QRP entry. QSL via EA7ADH. Also, look for Juan Carlos, CO8TW, to be active in the contest as a Single-OP/ Single-Band (20m)/Low-Power entry. QSL via HB9SVT. His log will be on-line at: http://www.qsl.net/co8tw

CT3, MADEIRA ISLAND (AF-014). Operators Hardy/DL3KWF and Rosel/DL3KWR (XYL) will once again be active as CT3/homecall from the Hotel Royal Orchid between now and March 19th. Activity will be mainly CW on 30/17/12 meters. Hardy is expected to try some RTTY and PSK-31. QSL via their home callsigns. E-mail requests for Bureau QSL cards can be sent to: dl3kwr@... --or-- dl3kwf@...
Visit their Web site at: http://www.mydarc.de/dl3kwr

CU2, AZORES ISLANDS. Operators Martti/OH2BH (CU2KG) and Juha/OH8NC (CU2KH) are in the Azores and will activate both CU2A and CU2X in the ARRL DX SSB Contest (March 27-28th) as two Single-Band categories, CU2A on 20m and CU2X on 80m. They may occasionally come on other bands to hand out multipliers. They arrived in the Azores early this week and have been active using their personal callsigns. QSL both via OH2BH.

EA8, CANARY ISLANDS. Jon, LA3JJ, will once again be active as EA8/homecall from Isla de Fuerteventura (AF-004, DIE S-006, WLOTA 0883) between now and March 26th. Activity will be on 30/17 meters and possibly 12 meter CW. QSL via his home callsign, direct or by the Bureau.

EA9/EG9, CEUTA AND MELILLA. Jorge, EA9LZ, will be active as EA9LZ or possibly EG9Z during the CQ WW WPX SSB Contest (March 28-29th) as Single-Op/Single-Band (40m or 20m) entry. QSL via EA9LZ (QRZ.com).

FR, REUNION ISLAND (Correction). Stephane, F5UOW, will be active as FR/F5UOW from Boucan Canot (near St. Gilles les Bains) between March 8-28th (not the 22nd). Activity will be holiday style, mostly CW on 20 meters. QSL via his home callsign.

FT5X, KERGUELEN ISLANDS (Update). Gildas, TU5KG/FT5XS is enroute to the Kerguelen Area. He hopes to stop at Port aux Francais on possibly on March 9th. Look for him between March 8-10th. QSL via F4EFI, by the REF Bureau 29 or direct.

GW, Wales. Steve, GW4BLE, will be active as GW7X during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/Single-Band (40m) entry. QSL via GW3SQX, direct or by the Bureau.

HH, HAITI (Update to OPDX.849). Operators Jan/K4QD and Don/AF4Z will be active as HH4/homecall from the Northwest Haiti Christian Mission (www.nwhcm.org) between March 24th and April 4th. They will operate 80-10 meters on CW, SSB and RTTY as time permits. Nighttime low band operations will be limited to the availability of AC power. They will also participate in the CQWW WPX SSB Contest (March 29-30th). They are working with HH2JR and the Radio Club of Haiti in an attempt to obtain a special 4V4 prefix for the contest. QSL via their home callsigns. Operators prefer direct or LoTW, but the Bureau is "OK".

HQ2, HONDURAS. Operator Dan, HR2DMR, will be active as HQ2W during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/All-Band/High-Power/Assisted entry. He will use monobander antennas on 20/15/10m and sloper antennas on 160/80/40m. QSL via HR2DMR. QSL via address on QRZ.com.

IOTA NEWS.....
AS-103. Operators Tang/BM2AAV, Wu/BM2APH, James/BU2AT, Eddie/BV2DD, Bruce/BV2KI, Lee/BV2NT and Chung/BX4AF will be active as BP0A from Penghu Island between March 27-30th. Activity will be on all bands. QSL via BV2KI.

EU-008. Members of the Kilmarnock and Loudoun ARC will be active as GM7A from Kerrera Island (IOSA FL02, SCOTIA CN02), Scotland, during the upcoming RSGB IOTA Contest (July 25-26th). Operators mentioned are Graham/MM0GHM and Arthur/MM0DHQ. QSL via GM7AAJ, direct or by the bureau.

EU-017. Operators Andy/IZ0EHO and Vincenzo/IZ0FKE will be active as ID9N from Vulcano Island (IIA ME-018, MIA MI-122, WLOTA 1001), April 24-30th. Activity will be on all HF bands and modes. QSL via the information on QRZ.com.

EU-171. Operators Tor/DJ4MG and Ela/DL1TM will be active as 5P4MG and OZ7TM, respectively, from Vendsyssel-Thy/Nordjylland (DIA NJ-001), April 5-16th. Look for SSB activity to be on

160/80/40/20/17/15 meters and PSK31 on 40/20 meters. QSL 5P4MG via DJ4MG, direct or by the bureau. QSL OZ7TM via DL1TM, direct or by the bureau.

EU-171. Operators Rene/DL2JRM and Netti/DO6XX will be active as OZ/homecall/p from Vendsyssel-Thy/Nordjylland (DIA NJ-001) between July 18th and August 1st. Activity will include the RSGB IOTA Contest (July 25-26th). Look for them on 80-10 meters using CW with 100 watts into a dipole/GP. QSL via their home callsigns, direct or by the Bureau.

NA-192. Operators John/VE8EV, Wally/VE8DW and Gerry/VE8GER will be active as VX8X from Ellice Island, March 20-23rd. Activity will be on 40/20/15 meter CW/SSB during a 24 hours per day non-stop operation. Expect to see them on CW, but most of the focus will be on 20 meter SSB on 14260 kHz. QSL via the information on QRZ.com under VX8X.

OC-120. Operators Ed/4F1OZ, Roland/DU1KGJ, Jairus/DV1ERS and Frank/ VE7DP plan to activate Cuyo Island (WLOTA 3028) between 0400z, March 6th and 0200z, March 9th. Activity will be on 40/30/20/17 meters using CW and SSB. Both the callsign and QSL route are TBA.

SA-098p. Operators Jorge/OA4BHY, Marco/CE6TBN, Zoli/HA1AG, Daniel/DL5YWM and Rene/DL2JRM will be active as OA4BHY/6 from La Leona Island, April 10-13th. There is a possibility that a special callsign may be used. Activity will be on all HF bands using 2 stations with operations on CW and SSB. QSL via DL2JRM, direct or by the Bureau.

IOTA STATESIDE TOUR. Pete, VE3IKV, will be active as W4/VA3RA from the following stateside islands:
March 7-8th - St. Simons; NA-058, USI GA-003S, Glynn county, Georgia
March 9-13th - Key West; NA-062, USI FL-040S, Monroe county, Florida
March 11-12th - Garden Key, Dry Tortugas; NA-079, USI FL-013S, Monroe county, Florida.
Activity will be on 40 meters CW using 100 watts into a sloper antenna. Also, look for him on 6 meters using CW and SSB. QSL via VE3IKV, direct or by the Bureau.

J5, GUINEA-BISSAU. Peter, HA3AUI, has announced that he will be acctive as J5UAP during the ARRL DX SSB Contest (March 7-8th) as a Single-Op/ Single-Band (20m) entry from the QTH of Varela, IK12QH. Remember, he is supposed to be here until March 31st. His activity will be mostly Digital with some SSB and CW upon request. Operations will be on 160-6 meters using a spiderbeam, verticals, dipoles, and 500w or 100w. QSL via HA3AUI, direct or by the HA Bureau.

J6, ST. LUCIA (Change in Plans). John, W5JON, informs that the dates have been changed and now he will be active as J6/W5JON from Marigot Bay between March 24th and April 2nd. Activity will be on 160-6 meters SSB

using 400 watts, dipoles and 6m yagi. Also, look for activity in the CQ WW WPX SSB Contest (March 28-29th). QSL via W5JON.

JD1/O, OGASAWARA (Update). Operators Hide/JM1LJS (JD1BLK), Hiroyuki/JG7PSJ (JD1BMH), Masaru/JE4SMQ (JD1BMT) and Makoto/JI5RPT (JD1BLY) will be active from Chichijima Island (AS-031) between April 29th and May 5th. The group will be active on 160-6 meters using the CW, SSB, Digital and Satellite modes. QSL via their home callsigns. Their detailed schedule is as follows: Callsigns, Dates of Operation and Web log searches will be available at:

JD1BLK - April 29th- May 5th; http://radio-dream.com/jd1blk/e/
JD1BLY - April 29th- May 5th; http://www.ji5rpt.com/jd1/
JD1BMH - May 2-12th; http://sapphire.ganko.tohoku.ac.jp/jd1bmh/
JD1BMT - May 2-5th; No Web site available at this time

JW, SVALBARD. Rag, LA5HE, will once again be active as JW5HE between now and March 10th. Activity will probably have an emphasis on the low bands and CW. QSL via his home callsign.

KH0, MARIANA ISLANDS. Operators Masaharu/JA3CEK and Shimatake/JI3DNN will be active as KH0/N3MU and KH0/KI3DNN, respectively, from Saipan (OC-086), March 19-22nd. Activity will be on 160-6 meters using CW, SSB and some Digital modes. QSL KH0/KI3DNN via JI3DNN and KH0/N3MU via JA3CEK.

KP2, U.S. VIRGIN ISLANDS. Operators Ann/KP2YL and Brian/KP2HC will be heading back to visit St. Croix, March 28th through April 7th. They are in the initial stages of planning their move back to the island, so they may be on the air less than usual on this trip. Look for them on 160-6 meters using CW and SSB. QSL direct only. Current QSL info is available on QRZ.com. PLEASE NOTE: Brian reminds everyone that U.S. postal rates are going up in May of this year and that all QSL requests sent from this time forward should include sufficient postage to cover the rate increase.

QSL INFO AND NEWS.....
Andy, W5ACM, reports that QSLs for his W5ACM/C6A/MM Western Caribbean Cruise 2009 started going out March 2nd. He also mentiones, "Operators/ participants for this event included W5ACM, WB5RMA, WA5TWT and WA5WOD. Observers included ex-WB5QCC and ex-WA5VJT. Hopefully QCC and VJT will renew their tickets! We operated from various grids (EL54, EK69, EK66, EL60, EL46 and EL37) in the Gulf of Mexico from Galveston to Roatan (just off the coast of Honduras). We had a great time and hope to see more ports of call and operate from more grids in November."

HI9/EA3BT AND HI9/EA3WL QSL STATUS. Josep, EA3BT, has started to confirm the contacts from his last IOTA DXpedition to Cayo Levantado, NA-122. The QSL looks very nice, full color on both sides. You can see the QSL card at: http://dxinfo.ea3bhk.com

NEW QSL MANAGER. Buzz, NI5DX, has assumed the duties of QSL Manager for Tom Smith, ZC4TS. Logs have been transferred and cards are in the process of being ordered. Buzz will be able to answer any requests for

a ZC4TS card once the new cards arrive in about 5 weeks. Buzz is also now the QSL manager for FM1II, Chris, in Martinique. Buzz has the logs and will have cards in the not too distant future.

PIRATE ALERT. Phil, G3SWH, informs OPDX that he and Richard/G3RWL have just arrived back from their trip from Mayotte where they made over 10,000 QSOs as FH/G3SWH. However, Phil states, "Looking at the DX Summit spot database, we appear to have been the victim of some piracy. Please make the maximum publicity of the following: There was *NO* activity by FH/G3RWL. Both operators used the same call. There was *NO* SSB activity whatsoever."

NOT THE QSL MANAGER. Phil, G3SWH, reports that he is NOT the QSL Manager for VP2M.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 8R1AK, C4N, CE1/K7CA, D2NX, EA9EU, FW8DX, HB9ANM, T30XX, T31DX, T32YY, T33ZZ, TT8JT and ZD8UW

QSLS RECEIVED VIA THE BUREAU: None reported this week!

RECALLING JIM B. SMITH, VK9NS (by Bruce Smith, G3HSR). Now available on the "Documentary Archive Radio Communication" Web page, an interview by Wolf, OE1WHC, with Bruce Smith, G3HSR, son of Jim B. Smith, VK9NS, recalling his father's life (recorded March 5th, 2009) at: http://dokufunk.org/vk9ns

S2, BANGLADESH (Update). By the time you read this, some members of the Korea DX Club will be active as S21KD from Dhaka until March 14th. As this was being typed, they were assembling antennas. Activity will be on 160-10 meters, CW, SSB and the digital modes using three amplifiers, verticals and beams. QSLs are via HL5FUA. For more details, updates and their logs, please visit the following Web page at: http://dxpedition.co.kr

SOUTH ATLANTIC BIRD ACTIVITY. As of March 7th, Graham, G3VZV, will be onboard the "MV Minerva" which will be visiting the islands off the edges of the Antarctica. His schedule includes visits to South Georgia (VP8) on March 12-13th, and Tristan da Cunha (ZD9) on March 18-19th, before arriving in Cape Town on March 24th. Activity is planned via SO50, AO51 and the ISS (if available) from the ship, and if licences can be obtained, from the islands themselves. Graham will sign G3VZV/MM and intends to use FM handhelds and an Arrow antenna. He hopes to have at least some limited internet access which can be used to arrange skeds at: g.shirville@...

TC18, TURKEY (Special Event). Members of the Turkish group called SWAT (Special Wireless Activity Team) will be active as TC18M between March 17-19th. Activity is to commemorate the 94rd anniversary of the Naval Victory (March 18, 1915) in th Gelibolu Wars (World War I). Operations will take place from the University of Canakkale grounds and on the Asiatic side of Dardanelles, overlooking the Straits where the Naval War took

place. Activity will be on the HF bands using SSB and CW. Operators will be TA3FB and TA3AX. QSL Manager for this year is TA3FB. For more detailed information, visit: http://tcswat.tripod.com/
Also see TC18M on QRZ.com.

TI8, COSTA RICA. Operators Carlos/TI2KAC, Juan/TI2JCY, Mauricio/TI4ZM, Eddie/K4UN, Ellis/N4JO, Bob/W4BW, Keith/W4KTR and Alexis/W4XO will be active as TI8M from Volcan Poas during the ARRL DX SSB Contest (March 7-8th) as a Multi-2 entry. QSL via TI2KAC, direct or by the Bureau. Look for activity before the contest on 160-10 meters.

TM0, FRANCE (Special Event). Members of the CBK 67 (F8KHH) will activate the special callsign TM0TAN between March 27th to April 10th, to celebrate the anniversary of the signing on April 4th, 1949, of the agreements creating the NATO treaty. Also to celebrate this event, the French and German cities of Strasbourg, Kehl and Baden-Baden, will receive government Heads of States, Presidents and Prime Ministers. A special QSL card will be issued. The QSL Manager is the F8KHH ARC. Send QSLs via direct (w/SAE and postage) or via the French REF Union Bureau.

V2, ANTIGUA AND BARBUDA. Jimmy, W6JKV, will be active as V2A/W6JKV from Antigua (NA-100, WLOTA 1118) between June 23rd and July 3rd. Activity will be on the HF bands, but his focus will be on 6 meters (Grid FK97). He has a very good location and will use a large antenna with power. QSL via his home callsign in Austin, Texas.

V4, ST. KITTS (NA-104). Nick, G4FAL, will once again be active as V4/G4FAL between March 12-17th. Activity will be on 80/40/20/15/10 meters mainly on CW. Also, look for him to be an entry in the RSGB Commonwealth Contest (March 14-15th) as V47CD. QSL via his home callsign or the LoTW.

V6, MICRONESIA (IOTA Op). Mike/KM9D and Jan/KF4TUG are reportedly now active from Turuaimu Island, Kapingamarangi Atoll (OC-167) as V63MY and V63TO, respectively. Length of stay is unknown, but probably for one week. As usual, Mike will work mainly CW and Jan will be on SSB. However, as this was being typed, V63TO was heard on 40/20m CW. Activity is expected on 40-10 meters. QSL via OM2SA. This also includes LoTW.

VK9L, LORD HOWE ISLAND (Update). Bill Horner, VK4FW, member of Oceania Amateur Radio DX Group Inc. (ODXG), reports that the VK9LA March departure date is fast approaching. All equipment sent via the ship has safely arrived on Lord Howe Island. Bill states, "When we finished packing all the gear, we ended up with more space taken up than we had booked, so we quickly managed to get more freight space on the ship." This DXpedition will take place between March 23rd and April 3rd, with 16 operators. Suggested frequencies are:

Band	SSB	CW	RTTY
160	--	1.813u/d	--
80	3.797u/d	3.513u	--
40	7.084u	7.013u	--
30	--	10.106u	10.135u/d

20 14.250u/d 14.023u/d 14.088u
17 18.165d 18.072u 18.100u/d
15 21.290u/d 21.023u/d 21.088u/d
12 24.987d 24.892u 24.925u/d
10 28.470u/d 28.023u/d 28.088u/d
6 50.100u/d 50.100u/d --

Special Notes:
1. u/d... Up or down
2. 6m... Call us when the beacon goes into RX mode.
3. 40m... RX for the Americas will be above 7.150
4. 80m... A special time on April 1st has been set up to work the VK and greater Pacific. (see the web site www.odxg.org/vk9la.htm for details). We would request that these areas do not call us in the pile ups on 80m before this event.
5. Pilot Station.... Don, N1DG, will be our only pilot station.
6. VK4FW will arrive on Sunday, March 22nd. He will begin unpacking and sorting equipment and might manage to get a station on air for Sunday evening local time. On Monday, March 23rd, 4 more of the crew will arrive and will begin further assembly. They will try to get 2 stations on air ASAP. On Tuesday, March 24th, the rest of the crew will arrive and they will finish assembly and get all station on air ASAP.

QSLING PROCEDURES:
1. Direct via VK4FW:Bill Horner, PO Box 612, Childers, 4660, Australia
2. via the Bureau via VK4FW
3. OQRS (http://www.odxg.org/qsl.htm) direct
4. OQRS (http://www.odxg.org/qsl.htm) Bureau

For more updates, details on the DXpedition and how to donate to this operation, please visit the ODXG and VK9LA Web pages at:
http://www.odxg.org
http://www.odxg.org/vk9la.htm

WE'RE MOVING! Uwe, DL8OBF, reports that the AMTOR-mailbox "DA5TOR" will move its 40m access frequency in order to comply with the new bandplan per March 29th. The new frequencies are 7047 kHz, 7049 kHz and 7051 kHz. The access frequencies on the other bands remain unchanged and still allow worldwide access. All frequencies and technical details of the mailbox can be found at: http://www.amtor.de
The new activity-center of AMTOR is 7042 khz for direct connections.

ZL7, CHATHAM ISLANDS (Update). The ZL7T team is now active through March 10th. Four stations will be on the air operating on 160-10 meters, using CW, SSB, RTTY and the PSK modes. For updates, visit the ZL7T Web site at:
http://www.zl7t.com
A logsearch will be available on the team's return. Logs will be uploaded to LoTW within 6 months. QSL via ZL2AL, by the Bureau or direct (CBA or QRZ.com). Donations would be appreciated.

9209. RE: [DX-IS] QSL from 5N8NDP

Yahoo group: DX-IS (2009)
Date: 2009-03-06 21:15:00 UTC
From: Alan Leith
Topic: 9207 Message: 9209

I have worked 5N8NDP on many occasions, including when he has used special Nigerian prefixes. I have NEVER been able to get a QSL for any band. If there's a secret, I'd sure like to have someone let it out of the bag.

73

SB PROP ARL ARLP010
ARLP010 Propagation de K7RA

No new sunspots since the recent brief three-day appearance of quickly fading sunspot 1013 on February 24-26. It was another Cycle 24 sunspot, but not too encouraging, considering how brief and weak it appeared. There are no predictions for new sunspots, but these events tend to occur suddenly.

In this bulletin we have been tracking our own flavor of smoothed sunspot number, one based on a shorter period of data (three months instead of one year that the official smoothed sunspot graphs are based upon), perhaps revealing trends earlier. But the trend goes down again. Now that February has passed, we can take sunspot data from December 1 through February 28 to calculate a three month average, centered on January. The total daily sunspot numbers for that period was 208, divide that by 90 days, and the result is 2.3.

Here are the numbers for the recent past, updated through last month:

Jan 07 22.7
Feb 07 18.5
Mar 07 11.2
Apr 07 12.2
May 07 15.8
Jun 07 18.7
Jul 07 15.4
Aug 07 10.2
Sep 07 5.4
Oct 07 3.0
Nov 07 6.9
Dec 07 8.1
Jan 08 8.5
Feb 08 8.4
Mar 08 8.4

Apr 08 8.9
May 08 5.0
Jun 08 3.7
Jul 08 2.0
Aug 08 1.1
Sep 08 2.5
Oct 08 4.5
Nov 08 4.4
Dec 08 3.7
Jan 09 2.3

Just as Cycle 23 had a double-peak, we are perhaps observing a double bottom, centered on August 2008 and early 2009, or with the second minimum perhaps some time in the near future. We won't know it until it has passed, but it sure feels like a minimum at the moment.

The lack of sunspots has been gaining attention outside of the usual scientific, amateur astronomer and amateur radio circles, and with so many people commenting on it who have no familiarity whatsoever with solar cycles and sunspots, we are bound to see poor judgment passed on as settled fact.

For years, non-scientists (I am one too) have occasionally attempted to correlate sunspot trends with everything from social unrest, cardboard box production, and stock market averages, to climate and hem lengths, with no success. Or, at least the conclusions were not reproducible.

A year ago, some of us witnessed up close the resulting flap when a daily financial news organ grossly misquoted an astrophysicist, claiming he had predicted decades of few if any sunspots, accompanied by endless winter. Even though the scientist denied ever saying those things, the story seemed to develop a life of its own, a sort of social virus that spread widely very quickly, nearly impossible to correct.

As a long time fan of contemporary folklore, I thought it might be interesting to track this particular meme, so I used a popular search engine feature in which I registered a particular string (the word sunspot, in this case), and every day it sent me a summary of every new use of this word found on web sites, in blogs, Usenet newsgroups, and newspapers, along with links to these articles.

One of the common mistakes I found involved the difference between number of sunspots and sunspot numbers. For instance, the sunspot number is 11 if there is a single sunspot, and 23 if there are three sunspots in two groups. So someone looks at old sunspot records, sees a sunspot number of 150 for a certain day, and assumes that the appearance of 150 simultaneous sunspots in a single day is a common occurrence.

Or they might take a look at a graph of smoothed sunspot numbers, such as the one at http://www.swpc.noaa.gov/SolarCycle/, and complain because the graph had recently changed without notice, or that the graph at the current date was incorrect, because it showed the cycle turning up, when that has not happened.

What they don't know is that every point on the graph is based on the average of a year of sunspot data, and is placed in the middle of that year. So for any points within the past six months, up to half are based on predicted data. So if NOAA predicts sunspot numbers to rise in the future, it is normal to see the graph rising when in fact the sunspot numbers have not yet increased. Some of the erroneous accounts have pushed some sort of conspiracy theory, claiming that "the government" doesn't want us to know how rare recent sunspots have become.

Sometimes a letter to the editor of a newspaper, or a blog remark, will state without attribution to any source, that the sunspot number for a certain month was only 3. They probably heard somewhere that there were only three sunspots making an appearance one month, when the actual average daily sunspot number for the month was several times that.

On April 20, 2007 in Propagation Forecast Bulletin ARLP017 we told you about Jeff Lackey, K8CQ of St. Simon's Island, Georgia (see http://www.arrl.org/w1aw/prop/2007-arlp017.html) and his HF rain gutter stealth antenna. At the time Jeff said that after less than four months he had worked 121 countries in 33 zones with this arrangement.

The antenna used his rain gutters and downspouts, and you can see a diagram of the antenna in the March 2009 issue of CQ Magazine, on page 52. Included are a nice photo of Jeff, and another of the tuning arrangement, which uses an automatic antenna tuner at the base of the antenna.

The article says that Jeff has now worked 220 "DX entities" in 37 zones, less than two years later, and Jeff told us on Thursday that the total is now 243/38, with 87 countries on 80 meters. Jeff says the gutter antenna is a tricky tune on 160 meters, but there he has worked 34 states, 3 provinces and 7 countries.

Asram Chou, BV2WM of Taiwan is translating this weekly bulletin into Chinese and posting it on the web at,
http://tw.myblog.yahoo.com/bv2wm-tw/ and
http://bv2wmtpe.blogspot.com/. I used Google Language Services at http://www.google.com/language_tools?hl=en to translate it back to English, and was interested to see that even with the automatic translation it was pretty close to the original.

Bob King, K7OFT of Seattle, Washington sent in an interesting link to a December 2008 conference where multiple papers on the start of Cycle 24 are stored. See it at,

http://sprg.ssl.berkeley.edu/RHESSI/napa2008/pts.php.

For anyone in Seattle this Thursday afternoon, March 12 at 3:30 PM
is a presentation at University of Washington's Johnson Hall in room
102 about probing the Earth's ionosphere with lightning. See the
program schedule on the web at,
http://www.geophys.washington.edu/web/ess/program/seminars/WIN09Seminars.htm
l
link. With a map from, http://www.washington.edu/home/maps/, you
can locate Johnson Hall.

This weekend is the ARRL International SSB DX Contest. We can
assume conditions will include no sunspots and very stable
geomagnetic conditions. NOAA and USAF predict a planetary A index at
5 for March 6-12, and Geophysical Institute Prague predicts quiet
conditions, March 6-12.

If you would like to make a comment or have a tip for our readers,
email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL
Technical Information Service web page at,
http://www.arrl.org/tis/info/propagation.html. For a detailed
explanation of the numbers used in this bulletin, see
http://www.arrl.org/tis/info/k9la-prop.html. An archive of past
propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve
overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this
bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for February 26 through March 4 were 12, 0, 0, 0, 0,
0, and 0 with a mean of 1.7. 10.7 cm flux was 69.9, 68.9, 70.6,
69.4, 69.2, 69.1, and 69.7 with a mean of 69.5. Estimated planetary
A indices were 2, 8, 5, 3, 2, 5 and 7 with a mean of 4.6. Estimated
mid-latitude A indices were 2, 7, 4, 2, 0, 5 and 5 with a mean of
3.6.

9212. Operating RTTY split

Yahoo group: DX-IS (2009)
Date: 2009-03-08 13:32:59 UTC
From: Phil & Anne Irons
Topic: 9212 Message: 9212

This might sound a bit basic for some of you 'Old Dogs', but I've been having a problem when working [should read: TRYING TO WORK!] dx stations who are operating split.

When I click on the spot in Spot Collector, the DX-spotting component of DX Labs Suite, everything went as it was supposed to: My 746Pro changed frequency, the split was selected and entered on VFOB, and showed on the screen. The only problem was that when I tried to call, the rig would not transmit! A clue is that this did not happen when working simplex, or when working PSK31.

Turns out that you have to be in the LSB-D mode on the IC 746Pro to transmit in RTTY [USB-D for PSK31]. HOWEVER, you also have to have VFOB in LSB-D mode TOO!

As I said, pretty basic, but I've been noticing some newbies posting to the list lately, so I thought I'd share my EUREKA moment.

I'm cross-posting this to a couple of other groups, so apologies if you get it more than once...

73,

Phil/VE1BVD

Phil

Don't know about the Pro but I use a ProIII and a IC7000. Neither are used in RTTY-D mode and both transmit fine on splits triggered by double clicking on a packet spot in Spotcollector.

You may want to check the DXklabs reflector.

SB DX @ WW < KB8NW $OPDX.899.1
Ohio/Penn DX Special Bulletin No. 899.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 899.1
BID: $OPDX.899.1
March 8, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Texas DX Society (K5DX), Toze/CT1GFK and Gary/ZL2IFB for the following DX information.

FOR IMMEDIATE RELEASE

ZL7, CHATHAM ISLANDS (Update). Gary, ZL2IFB, Webmaster for ZL7T.com, informs OPDX (edited): "ZL7T is QRV from 160 to 15m inclusive to date. They have a slow and unreliable Internet connection but successfully uploaded their log yesterday and anticipate another two log updates before they close down on March 10th. There is a log search function on the Web site along with a blog page with the latest news from the team. They have reported big pileups but gratifyingly courteous ones. I am collating ZL7T spots to give a 'near real time' indication of the actual propagation on the site, supplementing the predictions made before they departed to the ZL mainland, and some spectrum displays and captured audio so visitors can experience what it's like to be on the receiving end of a pileup at least 37 callers deep!" The ZL7T Web page is at: http://www.zl7t.com

---

5C, MOROCCO (Update/IOTA Op). Alfredo, IK7JWX, informs that he is preparing for a DXpedition (with 9 operators) to activate Mogador Island (AF-065), April 19-25th. With almost 75% of IOTA participants needing this island, the group is still looking for sponsors and donations. If you can help, please contact Alfredo, IK7JWX, via E-mail at: ik7jwx2003@...
Activity will be on all HF-VHF bands and all modes (CW, SSB, RTTY PSK31). Operators mentioned (with callsigns) to be active are: Oscar/IK2AQZ (5C2A), Carlo/IK6CAC (5C2C), Ernesto/I2FUG (5C2F), Del/IZ7GWZ (5C2G), Alfredo/IK7JWX (5C2J), Leo/I8LWL (5C2L), Simon/IZ7ATN (5C2SG), Pino/I8YGZ (5C2Z) and Nicola/I0SNY (5C2Y). QSL via their home callsign. ADDED NOTE: Some of the reference numbers to be activated during this operation are:
Mogador Island - AF-065; WW.Loc. IM51CM; ITU 37; CQ 33
Essaouira Island - WW.Loc. IM51CL

ARLHS Lighthouses (callsign/m):
MOR-019 Cape Sim-Essaouira; WW.Loc. IM51CL
MOR-036 Sidi Magdul-Essaouira; WW.Loc. IM51BJ
MOR-040 Grand Jetee-Agadir; WW.Loc. IM50EJ
For details on how to help and updates, visit their Web page at:
http://www.mogador2009.altervista.org

C9, MOZAMBIQUE. Member of the Texas DX Society will be active as C91TX from Bilene, Maputo Province, between March 25th and April 5th. Bilene is 180km from the capital city of Maputo. Activity will be on all bands 160-10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. They will participate in the CQWW WPX SSB Contest (March 28-29th). Operators mentioned are: Cal/WF5W, Paul/W5PF, Madison/ W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL. QSL Manager for C91TX is W5PF. Depending on internet access, they hope to have an online log search page once operations start, but don't expect daily updates. For updates, visit the Texas DX Society C91TX Web page at: http://www.tdxs.net/c91.html

LAST MINUTE LIGHTHOUSE ANNOUNCEMENT. Members of the Algarve S.T.A.R. DX team will be active as CS6A on March 15th, from Murtinas Posterior Lighthouse (POR-126). This will be the FIRST ever activation from this lighthouse. Activity will be on 40/30/20/17 meters using CW and SSB. Operators mentioned are: Toze/CT1GFK, Al/CT1GPQ, Mike/CT1IUA and Rui/ CT2IHP. QSOs are valid for the new award DFFA - Algarve Lights and Lighthouses Award. The Algarve DX Team will update their Web site during the activity with pictures and an online log at: http:algarvedx.com
QSL via CT1GFK, by the Bureau, direct or for E-mail Bureau QSL requests send to: cu8at@...
Also, for more details on their two new recently added awards (D.I.A. - Algarve Islands Award and D.F.F.A. - Algarve Lighthouses Award), visit the above Web page.

One of the things I noticed during the time I was around this weekend was the lack of SSB below 7030. I didn't make a single contest QSO but in the time I was around there were only a very few SSB signals I noted in the lower part of 40. I'll be interested to see what others thought of conditions.

I think the re-allocation of most of the EU countries up to somewhere as high as 7.125-7.150 combined with giving US Extras and Advanced SSB privileges down to 7.125 is finally getting the contesters to work in the "overlap" region.

I didn't spend a lot of time on 40M, but I too observed a lot of DX activity higher than usual, and I can't recall hearing any below 7.050. That is odd because as recently as 3-4 months ago they were as low as 7.015 calling CQ Contest on phone.

For whatever reason, it has shifted up, and this is a good thing.

9220. CQ Zone for Antarctica

Yahoo group: DX-IS (2009)
Date: 2009-03-09 02:55:53 UTC
From: Paul M Dunphy
Topic: 9220 Message: 9220

According to CQ Magazine's list, Antarctica (CE9/KC4) is listed zone 12,13,29,30,38,or 39. Way back 20-25 years ago I recall being told by someone who I thought would know that it was a "wild card" and you could count it as any of those 6 Zones that "touched" it.

I see VP8DLM and CE9/K2ARB are logged in DXKeeper as zone 13. 8J1RL is zone 39 and R1AND is zone 38. Does anyone know if there is a rule or the like that ties them back to the parent country? Even if it does, VK8 is British and 8J1RL is Japan. Is the Antarctica zone determined by which adjacent zone they are physically closest to in Antarctica, or is it really a wild card (for CQ WAZ Awards in particular?)

73, Paul VE1DX

9221. Antarctica Zones - found the answer!

Yahoo group: DX-IS (2009)
Date: 2009-03-09 02:59:47 UTC
From: Paul M Dunphy
Topic: 9221 Message: 9221

Antarctic notes:

The boundaries of CQ zones 12, 13, 29, 30, 32, 38 and 39 converge at the South Pole.

Stations KC4AAA and KC4USN are at the South Pole, and will count for any one of the listed zones.

Most Antarctic stations indicate their zone on the QSL card.

VK0GM 29, VP8ME 38; YB8ANT 38, and ZL5AA 30. The list changes frequently. Questions regarding the zone of a particular Antarctic station should be directed to the WAZ Manager.

Hi Dale,

Joe, W4TV, posted the link below on the DX Labs support list:

http://documents.ref-union.org/B/joe_20090211_0035_0047.pdf

Look at Annex IV (pg 4). Although the entire document is French,
this page is a table and you can mostly figure it out. Also Mike,
K1MK, (who incidentally has a great article in QST this month on the
history of MIT's radio club on the occasion of its 100th anniversary)
says the following:

"TM is used for continental France

TO is used for Guadeloupe, French Guyana, Martinique, Mayotte, St.
Barthelmey, St. Martin, St Pierre and Miquelon, Reunion & dependences

TX is used for Clipperton, New Caledonia, French Polynesia, French
Southern and Antarctic Lands, Wallis & Futuna"

Hopefully this is enough to sort it all out. Remember, the USA
isn't 100% squeaky clean in this regard as K5D doesn't follow the
standard prefix for Desecheo.

Hi Dale,

Joe, W4TV, posted the link below on the DX Labs support list:

http://documents.ref-union.org/B/joe_20090211_0035_0047.pdf

Look at Annex IV (pg 4). Although the entire document is French,
this page is a table and you can mostly figure it out. Also Mike,
K1MK, (who incidentally has a great article in QST this month on the
history of MIT's radio club on the occasion of its 100th anniversary)
says the following:

"TM is used for continental France

TO is used for Guadeloupe, French Guyana, Martinique, Mayotte, St.
Barthelmey, St. Martin, St Pierre and Miquelon, Reunion & dependences

TX is used for Clipperton, New Caledonia, French Polynesia, French
Southern and Antarctic Lands, Wallis & Futuna"

Hopefully this is enough to sort it all out. Remember, the USA
isn't 100% squeaky clean in this regard as K5D doesn't follow the
standard prefix for Desecheo.

9228. ZA5X

Yahoo group: DX-IS (2009)
Date: 2009-03-09 19:33:32 UTC
From: Paul M Dunphy
Topic: 9228 Message: 9228

Anyone know if this station is for real? I can't find any reference in any of the call books or the usual places on the Internet. Worked him on 20 this AM and I see a spot for him on 40 just now. ZA5 seems to be a bit unusual for Albania. Not that it is super rare, but I would have thought there'd be a QRZ.COM entry, or mention of it in some of the DX bulletins.

9229. Pending Postal Rate Increase

Yahoo group: DX-IS (2009)
Date: 2009-03-09 20:35:45 UTC
From: RICHARD SOLOMON
Topic: 9229 Message: 9229

Anytime we have an increase in Postal Rates it causes problems

when QSL'ing stateside.

One can always use the "Forever" stamp or the Breast Cancer

Semi-Postal issue, but I have found in the past that a lot of QSL

managers are unaware that additional postage is not required on

SASE's using these stamps.

One answer may be, they have Junior affixing the additional postage

and he wouldn't know the difference in the stamps.

I submit the TenTec Corsair II, Corsair, and Omni-D XCVRs as great low band DXing radios. They may not be competitive in contesting as some of the used Japanese rigs (less than $600) with computer interfaces for rig control but you may have to choose between a rig that can hear and one that can talk.

FOR IMMEDIATE RELEASE

S2, BANGLADESH (Op Cancelled). Members of the Korea DX Club had to cancel their operation from Dhaka due to a civil war that broke out in the city. The KDXC team mentions that the "Situation is chaotic", and the team was going back to Korea. Unfortunately, the team's callsign S21KD was cancelled when they first arrived, and they tried to get a new license. However, Friday and Saturday were holidays in Bangladesh. They did get a new license on Sunday, S21ZCY, and moved to another location 2 1/2 hours away. The team hoped to be on the air that day but could not retrieve the radio gear from the airport. Safety was the team's first priority, so they cancelled and headed back home. They hope to get another chance to operate from S2-land soon. FOR IMMEDIATE RELEASE

VK9LA NEWS RELEASE MARCH 12TH

LOW BAND OPERATIONS.......

Extensive work has taken place to make sure all operators are familiar with various sunrise sunset times throughout the world.

Lord Howe island Sunset is at approx 07.36utc with Sunrise being 19.36utc (taken at 27th March 2009). We have all been familiarizing ourselves with possible propagation openings for all points of the globe.

A complete list in an ascending pecking order will be at every HF station for operators to continually check. It is our plan to have an operator on deck on 160m from 07.40utc daily to work all the Pacific areas followed by various parts of Asia somewhere around 08.50utc. From then we will look towards South Americas at around 09.35utc thru to approx 10.15utc when we will begin looking for W1 in USA at approx 10.30utc then head to again some parts of Asia and then VE3 and W4 around 11.30utc as well as TI and XE areas. UA9 around 13.30utc followed by W6 etc.

At approx 15.00utc we will begin searching for the likes of EK, 4L, UA1 followed by 4X at 15.45 and then the likes of 5B.

Hopefully we will get a shot at South Africa around 16.15utc then head up again into EU territory to LZ around 16.35utc, HA and so on leading up to I, LA, OZ, HB and G lands at 18.20utc.This procedure will be done every day we are there. This will also be adopted on 80m as well as 75m as we have 2 stations on air simultaneously on the same band, as well as 40m. We expect big long openings on all bands below 20m. We would however request that you be patient. It will take us a couple of days to install all low band antennas.

We would also request that once you are in the log to please do not call the next night, let someone else have a go my pet hate is to see the same station in the log on the same band over and over.

Cu in the pile ups..... Bill VK4FW.... Dxpedition Leader

Art,

Before doing going to the US Postal "service," check with some of your local DX'ers.

Considering that IRC's are retailing for over $2 each right now (when you can find them!) but can only be redeemed for a $.94 stamp... surely there are other DX'ers in your vicinity who'd be willing to split the difference with you...

(And if I needed any, which I don't at the moment, I'd be talking to you myself...)

9237. Midway Island coming to a radio near you

Yahoo group: DX-IS (2009)
Date: 2009-03-12 02:17:45 UTC
From: Don Greenbaum
Topic: 9198 Message: 9237

PRESS RELEASE

Midway Island 2009

A multi national team of 19 operators will activate Midway Island in October 2009. The US Fish & Wildlife Service has authorized amateur operation from this rare US entity for only a 10 day period, its first radio activity in almost 10 years.

Midway Island ranks number 24 worldwide and number 13 in Europe on the DX Magazine?s ?Most Wanted List?. Activity will be on 6 meters to 160 meters with 5 to 6 stations. At least one station will be active on 20 meters around the clock for those who need it for a new country. Major efforts will be made to meet the demand to the most needed geographical areas, the low bands and RTTY.

Team members are AA4NN, EA1IR, DJ9ZB, KH7U, KI6TVS, KL2A, N1DG, N4PN, N4XP, N6GQ, N7CQQ, WB4JTT, W6KK, W6OSP, WA7NB, W8CAA, W8GEX, WA8NJR, and OK1KT. Off site support is being provided by AA1V, W5DNT and W6XA.

Travel to Midway is only allowed by chartered aircraft. Because of the size of the aircraft, the team is presented with unique challenges. As such, the aircraft will only be able to carry the team requiring the equipment to be shipped by boat some months ahead. Adding to the high cost of transportation, daily fees and other charges established by the USF&WLS makes this operation very expensive.

A web site has been established and can be found at www.midway2009.com.

Please support this endeavor by sending a donation. To make it easy to donate you can contribute electronically using the web site or if you choose regular means you may do so. Instructions are given on the web site for either method.

Updates will be published on the web site as they become available.

From: AD5VJ Bob
Topic: 9238 Message: 9238

To one and all:

I have received many personal emails on the subject of the K5D expedition in reference to my superfluous, redundant contacts on the
same band and same mode with K5D.

All of the emails have pointed to the fact that the redundancy was not appreciated, nor should it be an acceptable form of operation
on my part.

The more mature approaches of correction, I have appreciated and thank all of those who took the time to write me. The others I have
no comment for. However, I agree with all on the fact that the redundancy should not have taken place.

So here - I offer my public apology to the DX community and announce that my lesson has been learned that that type of operation
will not be conducted from this station again.

Now that KP5 has been activated thanks to the KP1-KP5 project, is there any word of KP1 being close behind? Sorry if this has been covered recently, I have been off the list for awhile. I have NF6S/KP1 confirmed on 20 cw and 6Y5NR/KP1 confirmed on 15 CW, but would like KP1 on the lower bands, 6 meters and RTTY.

My guess is that the group that went to KP5 is going to take a while to recuperate. They had to spend extra $ out of their own pockets to get onto and off the island by helicopter, which wasn't in the original plans.

I haven't heard anything about anyone else with plans to get to KP1. I remember Vance, W5IJU/N5VL once told me he was ready to go to Navassa again at a moment's notice. He was part of the NF6S/W5IJU group that went there. But Vance is a Silent Key now.

Haven't heard anything, John, but that's no real surprise. I'm not privy to much that isn't in the public domain. Don's (N1DG) Midway announcement came out of the blue, and I expect a KP1 will occur in the same manner. I have no doubt some team is working on it as we type, and it will happen soon (just my opinion.)

Next week Lord Howe is coming on. Not in the ultra-rare category of KP1 or KH4, but it should generate interest. I was talking to SV2KBS (a YL named Victoria who was part of the recent Falklands Island group) on 20M today and she said she will be one of the Lord Howe group. Seems to do a lot of globe trotting. That would be the life . . . off to VP8 for 10-12 days to be on the receiving end of huge pileups, home for a few weeks and off to the Pacific to do it all again!

Thanks for the information Paul. A couple of questions./comments about your post:

1. Has Midway gotten rare again? I remember working them in 2000 or 2001 but could still use them on a few bands and RTTY. Hope we get better propagation than we got for the Kure DXpedition a few years ago. I never heard them real well.

2. Looking forward to Lord Howe. I can still use a VK9L QSL for CW although I have worked them on that mode. 80m would be nice also.

3. Wish one of the VP8 stops she makes would be to South Sandwich.

See you in the pileups!

SB DX ARL ARLD010
ARLD010 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

UGANDA, 5X. Nick, G3RWF is QRV as 5X1NH for two months. He is active generally on 80 and 40 meters during his early mornings and evenings using mostly CW. If propagation permits, he may be active using SSB, RTTY and PSK31 as well. QSL to home call.

ZAMBIA, 9J. Gabriel, YO4HEK is QRV as 9J2YO and is here for one year. He is active on all bands using CW, SSB and PSK31. QSL via YO4ATW.

CAPE VERDE, D4. Operators DL3KBQ, DL1COP, DJ2VO, DG3KAF, DL2RSI, DH2KI and DL3PS are QRV as D44TXQ, D44TXP, D44TXO, D44TXF, D44TXR, D44TXI and D44TXS, respectively, from Sal Island, IOTA AF-086, until March 25. Activity is on 160 to 10 meters using CW, SSB, RTTY, SSTV, PSK31, Feld Hell and AMTOR with seven stations active. QSL to home calls.

CANARY ISLANDS, EA8. Jon, LA3JJ is QRV as EA8/homecall from Fuerteventura Island, IOTA AF-004, until March 26. Activity is on 30 and 17 meters, and possibly 12 meters, using CW. QSL to home call.

REUNION ISLAND, FR. Stephane, F5UOW is QRV as FR/homecall from Boucan Canot until March 28. Activity is on 20 meters using mostly CW, holiday style. QSL to home call.

NORTHERN IRELAND, GI. Special event station GB5SPD will be QRV from March 14 to 17 in celebration of St. Patrick's Day. QSL via operators' instructions.

ITALY, I. Special event stations II0IDP, II0IDR, II0IGU, II1ICS, II1IGG, II8ICN and II9ICF are QRV until March 22 while representing former coast radio stations of the Italian Navy. QSL via bureau.

GRENADA, J3. Colin, G3VCQ and Sharon, M3VCQ are QRV as J38CW and J38/M3VCQ, respectively, until March 26. Activity is on 80 to 10 meters using CW, SSB and possibly RTTY and PSK. Look for J38CW to be an entry in the RSGB Commonwealth contest. QSL both calls via G3VCQ.

GUINEA-BISSAU, J5. Peter, HA3AUI is QRV as J5UAP and is here until March 31. He is active on 160 to 6 meters using mostly digital modes with some CW and SSB. QSL to home call.

MINAMI TORISHIMA, JD1. Masa, JD1BMM is QRV from Marcus Island, IOTA OC-073, until March 22 while on business. Activity is on 160 to 10 meters using CW, SSB and digital modes in his spare time. QSL direct.

FAROE ISLANDS, OY. Lars, OZ1FJB will be QRV as OY/homecall from March 16 to April 1. Activity will be on the HF bands using mostly CW with some SSB. He will also be active on 60 Meters on 5403.5 kHz between 2100 and 2359z and then from 0600 to 0700z. QSL to home call.

TURKEY, TA. Members of the TC Special Wireless Activity Team will be QRV as TC18M from March 17 to 19 from Canakkale on the Asiatic side of the Dardanelles to commemorate the 94th anniversary of the naval battle of Gallipoli. Activity will be on all HF bands using CW and SSB. QSL via TA3FB.

EUROPEAN RUSSIA, UA. Special event station R150ASP will be QRV from Gogland Island, IOTA EU-133, from March 14 to 17 to celebrate the 150th anniversary of radio pioneer Alexander Stepanovich Popov. Activity will be on all HF bands using CW, SSB and digital modes. QSL via RF3C.

ST. KITTS AND NEVIS, V4. Nick, G4FAL is QRV as V4/G4FAL from St. Kitts, IOTA NA-104, until March 17. Activity is on 80 to 10 meters using mostly CW. This includes being an entry in the RSGB Commonwealth contest as V47CD. QSL to home call.

COCOS (KEELING) ISLAND, VK9C. Bernd, VK2IA will be QRV as VK9AA from March 14 to 27. Activity will be on 160 to 10 meters using CW and SSB. QSL via DL8YR.

CAMBODIA, XU. Yuki, JH1NBN should be QRV as XU7ADJ from Phnom Penh and Preah Vihear from March 14 to 20. He will be here on business and active as time allows. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Desecheo Island, K5D, 2009 operation.

THIS WEEKEND ON THE RADIO. The North American RTTY Sprint, CLARA HF Contest, NCCC Sprint, HA3NS Sprint Memorial Contest, RSGB Commonwealth CW Contest, AGCW QRP CW Contest, ARCI HF Grid Square CW Sprint, EA PSK31 Contest, SOC Marathon CW Sprint, Elecraft QSO Party, Idaho QSO Party, UBA Spring 6-Meter Contest and Wisconsin QSO Party will certainly keep contesters busy this upcoming weekend. The Run for the Bacon QRP CW Contest and Bucharest Contest are both scheduled for March 16. Please see March QST, page 78 and the ARRL and WA7BNM contest web sites for details.

I think it's been about 10 years since Midway was on and 2000 or 2001 sounds right -- I honestly don't remember the last operation. Those of us who were around for 15-20 years likely have it salted away, but probably there are a lot of new DXers who will need it. I just looked and I only have it on 20 and 15 CW. Didn't realise that until you asked about its rarity. Looks like there are holes to fill with that one.

I don't know where Lord Howe ranks in the most needed list. I don't think it too rare, but on the other hand, you don't hear them on that often. It will generate interest.

South Sandwich is a huge undertaking. If you ever get a chance, have a look at the VP8THU video of the 2002 operation. That is one horrible place to get to, and even worse to operate from. I was talking to Bob, VP8LP, yesterday and he said a few people are always asking him to activate South Sandwich and South Georgia. He said South Georgia is possible (although he has never been there), but that South Sandwich is major DXpedition material and requires a huge effort. I don't know if that one has been on since 2002.

Hi Paul,

I quick look at the QSL file shows that I have W1VX/KH4 confirmed on 20 and 10 CW from April 2001. I think there was some activity after that, but I could be wrong. I also have KH4 confirmed on 20 SSB from 1982, I think that was the last QSO I made with my KA0IFG call before getting a N 1 x 3 call (N0EEN).

Yes, South Sandwich is supposed to be very difficult to get to and operate from, which is sure to add to its rareness. Still, that is the last country I need to close out South America and I missed the VP8THU DXpedition-by the time the propagation got really good here on the last day they were there I had to go teach a night class. I don't think cancelling class for a DXPedition would have cut it with the administration. I missed a huge aurora opening back in 2000 for the same reason.

From: Brian Alsop
Topic: 9247 Message: 9247

CQ has published the top 5 results from last year's Marathon. All top 5 guys worked 284 countries (+40 zones) or more in 2008.

Is this a case of better world wide equipment? Could it have happened say 40 years ago-- even during a sunspot max?

Now for some trivia.

Sunspots have not reoccurred because:
1) We are being punished for reckless excesses (e.g. 160M yagi's)
2) ET's corrected the sun's acne problem
3) There never were sunspots. All previous references to sunspots have been deleted. Similar to what Galileo went through because the church claimed the sun is perfect. Claims of the existence of sunspots is heresy.
4) Al Gore

Brian, those 160M Yagis actually work better with low sunspots numbers. If the owners were being punished, sunspots would actually increase quickly.

We just have a top-loaded vertical for 160 and so are not responsible for the slow return.

Could it have happened years ago? I think so. 20 or so years ago I used to look forward to the CQWWSSB contest weekend. During that weekend I had worked over 200 countries and 39 zones all on 10 metres with my FT101E and using no spotting aids.
Rene

I can attest to the truth of this! I was at a friend's house
(now a SK) around the peak of cycle 21 and he had a 5-element
monobander at ~70 feet. He regularly used to rag-chew with A5s!! I
was not a Ham at the time, but those who were and were using the
standard tribander at 50 feet told me they could hardly tell the A5
was there and the guy with the 5-el beam was hearing them S7-S8. (A5
and anything in that part of the world is the tough path from VE1
land on any band.)

Even with a modest tribander at the cycle peak, it usually is
wall to wall DX from 28.001 to 28.800 from daybreak to dusk, and
often the band is wide open to most of the world well after
dark. 10M, crammed with contesters looking for multipliers, could
easily produce 200+ countries on a weekend. You don't need spotting
aids because they are jammed so close together you just tune the band
slowly and knock them off one after another. When you get to the
top, you jut start over again because by then you have 3-4 log pages
full and propagation has shifted enough that you'll be working new
stuff on your next pass through.

This is not an exaggeration, and the sunspots *will*
return. Maybe it takes this prolonged trough for us to appreciate
when the flux is up in the 120-170 range.

On a negative note, we seem to have gotten a bit of a bump in
the GMF in the past 24 hours and a guy is lucky to hear EU from the
east coast today. Flux is 69 and there were a string of K=4
overnight. I worked a F and a DL who were actually S8-S9 and thought
it was healing, and then they said they were running a KW to a 4 and
5 element monobander at around 100 feet. I likely was hearing them
on ground wave with that kind of setup . . . however, in a day or
two, at least 20 will return to normal.

It's possible, Brian, but you have to spend every available minute in front of the rig (at the solar minima like we are now experiencing.) You couldn't do it without spotting aids with conditions as they are now. As I said in my other post, it's a different ball game at the top of the cycle. Openings now are short lived and unpredictable. You need (in my view, and I stand to be corrected), the DX Cluster to tell you that the ones you need popped out of the noise on 15 or 17 for 10 minutes when you are concentrating on 20. So yes, I fully believe 284 countries and all 40 zones are possible in a year, even with the dismal conditions we now have. Not without a DX Cluster, though.

As to why we are stuck with no sunspots . . . we have observations for about 250 years. Only those from the last 100 years or so are reliable. In the geological time scale of ~4 billion years, this isn't even a blip on the screen. Who knows if the 11 year mean of the solar cycle is something that is reliably repeatable? Who knows if 11 years is the true frequency?

I don't think even the best solar physicists understand why the sunspots come and go, and why the solar magnetic poles flip at this frequency. All we can go on is our very short time series of past observations and hope it continues a couple more times. After that, I personally don't care! :-)

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9A - Special event station 9A09P will be active through the end of the year to celebrate the city of Djurdjevac. A special QSL will be issued and all of the QSOs will be confirmed automatically via the bureau. [TNX 9A2JK]
9H - Valentin, DL5GA will be active as 9H3GA from Malta (EU-023) on 17-24 March. He will operate holiday style on the HF bands. QSL via home call. [TNX DL5GA]
C9 - Cal/WF5W, Paul/W5PF, Madison/W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL will be active on 160-10 metres as C91TX from Bilene, Mozambique from 25 March to 5 April. They plan to have three stations (one for CW, one for SSB and one for digital modes) with amplifiers, log periodics, a 4-square for 40m and possibly a 4-square for 80m, and a vertical for 160, 80 and 30m. They will also participate in the CQ WW WPX SSB Contest. QSL via W5PF, direct or bureau. The page for the operation can be found on the Texas DX Society's site (http://www.tdxs.net/c91.html). [TNX K5DX]
E5 - Tim, NL8F will be active as E51COF from Rarotonga (OC-013), South Cook Islands from 21 March to 4 April. He plans to operate SSB on 10, 15, 20, 40, 80 and maybe 17 metres. QSl via K8NA. [TNX www.islandchaser.com]
GI - The Foyle & District ARC will be active as GB5SPD on 14-17 March to celebrate St. Patrick's Day. QSL via MN0AKU, direct or bureau. [TNX F5NQL]
KH4 - After a seven-year hiatus, in late January 2009 the U.S. Fish & Wildlife Service announced that they would once again allow amateur radio operations from Midway Atoll (OC-030) "on a trial basis" [425DXN 926]. A multi national team of 19 operators will be active as K4M from Midway for ten days between 5 and 19 October. They will have 5-6 stations active on 160-6 metres, with at least one station on 20m around the clock. Further information, including details on how contribute to this expensive expedition, can be found at www.midway2009.com.
OY - Lars, OZ1FJB will be active as OY/OZ1FJB from the Faroe Islands

(EU-018) from 16 March to 1 April. He will be QRV during his spare time, indicatively on 21-24 UTC and 6-7 UTC, and will operate mainly CW with some SSB. He has also been permitted to operate on 60 metres, look for him on 5403.5 khz USB. QSL via home call. [TNX NG3K]
S2 - Upon arrival in Dhaka, just in the middle of a civil unrest, the Korea DX Club's team found out that the previously issued licence (S21KD) had been revoked. They were able to get a new licence (S21ZCY) on 8 March, but they could not retrieve the radio gear that had been confiscated at the airport. On 10 March, while the local situation was deteriorating, they surrendered and cancelled the operation, as "safety is the first priority". Their website is at http://dxpedition.co.kr/
TK - Dragan/9A2SX, Igor/9A3AXX, Hrle/9A6XX and Marko/9A8MM will be active as TK/homecall from Corsica (EU-014) on 18-22 March. They will operate on 160-10 metres and will participate in the Russian DX Contest (21-22 March, http://www.rdxc.org/)as TK7P. QSLs via 9A8MM (all of the QSOs will be confirmed automatically via the bureau). [TNX 9A6XX]
V6 - Yoshi, JJ8DEN is currently active as V63PR from Pohnpei (OC-010), Micronesia until 19 March. On 20-24 March he will be active from the Chuuk Islands (OC-011). He expects to operate CW, RTTY and PSK31 on 160-10 metres. QSL via home call.
VE - VC3Y is a special callsign for the 50th anniversary of the York Region Amateur Radio Club (http://yrarc.com/yrarc/). The club hopes to have it on the air as much as possible until 31 March. On 21-22 March it will be used by Doug/VE3CWO, Neil/VE3SST, Igor/VE3ZF, Valdas/VE3VO and Brent/VE3IRT to activate Bluffers Park Island (CISA new) and lighthouse. QSL via VE3CWO, direct or bureau. [TNX VA3JI and VE3ZF]
VP5 - Art, N4PJ and Marsha, K4IRI will be active as VP5/N4PJ (CW and RTTY) and VP5/K4IRI (SSB) from Providenciales, Caicos Islands (NA-002) on 17-24 March. They will participate in the Russian DX Contest as VQ5B. QSL via home calls. [TNX The Daily DX]
XE - Bernardo, XE2HWB will be active as XE2HWB/XF1 from Isla Santa Margarita (NA-078) on 21-23 March, possibly starting around 22 UTC on the 21st. He will operate SSB only, using a battery and a small generator to run 100 watts to a vertical antenna on the beach. He expects to concentrate on 20 metres (+/- 14260 kHz); other frequencies to look for him on are 28560, 28460, 24950, 21260, 18128, 7055 and 7155 kHz. QSL via N6AWD (direct only). [TNX XE2K]

425 DX NEWS MAGAZINE ---> The latest issue (February 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

ALGARVE AWARDS ---> The Algarve S.T.A.R. DX Team sponsors two awards for working stations operating from islands and lighthouses of the Portuguese Algarve region. Detailed information on the Diploma das Ilhas do Algarve (Algarve Islands Award) and the Diploma dos Farois e Farolins do Algarve (Algarve Light and Lighthouses Award) can be found at http://algarvedx.com (click on the Awards tab). A collection of on-line logs is available at http://algarvedx.com/logonline [TNX CT1GFK]

DXCC NEWS ---> The recent K5D operation from Desecheo Island has been approved for DXCC credit. [TNX NC1L]

RSGB COMMONWEALTH CONTEST ---> The 71st edition of the Commonwealth (BERU) Contest (http://www.beru.org.uk/) will be held on 14-15 March, from 10 UTC to 10 UTC, on 80, 40, 20, 15 and 10 metres CW. Please note that only operators located within the Commonwealth or British Mandated Territories are eligible to enter: "callers outside the Commonwealth call areas can be a serious problem in this contest", Alan Jubb (5B4AHJ/P3J) says, so please check the list at http://www.vhfcc.org/hfcc/information/codes.shtml before calling.

+ SILENT KEYS + Gianni Vincis, IS0VSG passed away on 9 March. A keen DX enthusiast, in recent years he was the pilot station for 6O0N (2006), J20MM/J20RR (2007) and 9L1X (2008). Other recently reported Silent Keys include Cuban veteran Mario Chacon (CO8CH), Marcel Trobrillant (FM5CH), Giuseppe Matinelli (I7JFQ), Charles H. Watters (W4RHE), John M. Ziegler (W6ZZZ) and Tony Loftus (VE3FRK).

SB PROP @ ARL $ARLP011
ARLP011 Propagation de K7RA

ZCZC AP11
QST de W1AW
Propagation Forecast Bulletin 11 ARLP011
>From Tad Cook, K7RA
Seattle, WA March 13, 2009
To all radio amateurs

SB PROP ARL ARLP011
ARLP011 Propagation de K7RA

Last week's Propagation Forecast Bulletin again mentioned briefly appearing sunspots, and it happened again this week.

For just two days, another Cycle 23 spot appeared, numbered 1014. The latitude of the spot was consistent with an old and fading solar cycle. As this period of quiet Sun drags on, statistic based projections of a return to solar activity continue to be pushed out.

Early Friday morning the planetary K index is rising to 5, then 5. This is from a stream of solar wind bearing down upon us. NOAA and the US Air Force predict a planetary A index of 15 for today (March 13), 10 for Saturday, then back to 5. Tough to forecast this far out, but they show that active region returning on April 9.

On March 10 at 2333z the Australian Space Forecast Center released a bulletin predicting "increased geomagnetic activity expected due to coronal hole high speed wind stream from 13-14 March 2009."

The Center has 26 email alert services that anyone can subscribe to. Check http://www.ips.gov.au/Products_and_Services/4/1 and click on any subject title to subscribe to that list.

Geophysical Institute Prague projects unsettled conditions for March 13-14, and quiet conditions March 15-19.

Chuck Zabreskie, KE5HPY of Houston, Texas wrote with an anecdote about last weekend's propagation.

Chuck wrote, "Thought I'd mention a pleasant surprise last Saturday afternoon (2100-2200Z) during the recent International DX contest. My rig is 100W into a 35' OCF (off-center fed) dipole, nothing fancy. I need to look where the others aren't piled up. 20m was busy as you'd expect so I took a look at 15m after looking at W6EL Prop. Great signals from Peru, Argentina and Brazil among others,

but little heard to the north of my QTH in Houston, Texas (30 deg N). Feeling lucky, I looked at 10m and also had great copy from Argentina and Brazil until 2230. Nothing in W6EL suggested that should be where it appeared. Again, nothing heard to the north of them or here and relatively few US operators coming back to their CQs. Seemed like a pipeline between TX/AZ into that zone."

Chuck continues, "Nothing like a contest to demonstrate what the bands permit. I'll be calling CQ on 10m this Saturday."

He ends with, "Is this a seasonal effect due to the equinox? Is it common to see a small zone on either end of the pipe?"

I thought I would check into Chuck's results using W6ELprop, which should factor in the equinox. Although the program is meant to be used with the predicted smoothed sunspot number for the month, I used a sunspot number of 12 -- the actual daily sunspot number for March 6-7.

Chuck is near Rice University in Houston, and actually sits to the south of the 30th parallel, at 29.725 degrees North latitude.

Using March 7 with a path to Brazil at 15 degrees south, 54 degrees west, I show that as a good time for propagation on 15, and even 10, and especially 20 meters, using the exact coordinates for Chuck's QTH. But I wonder why other North American stations weren't working the South America stations? But it is interesting that W6ELprop shows much less favorable conditions for other stateside areas into Brazil, even from Dallas, which is around the 33rd parallel. Chuck and I will have to compare our results using W6ELprop.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#e mail.

Sunspot numbers for March 5 through 11 were 0, 12, 12, 0, 0, 0, and 0 with a mean of 3.4. 10.7 cm flux was 69.2, 69.1, 69.1, 68.9, 69.1, 68.8, and 68.9 with a mean of 69. Estimated planetary A indices were 3, 2, 1, 8, 2, 3 and 3 with a mean of 3.1. Estimated mid-latitude A indices were 3, 0, 0, 7, 1, 3 and 2 with a mean of 2.3.

>Openings now are short
>lived and unpredictable.

No kidding ... I tuned into a spot for H40FN on 20m last night on a lark (it was about midnight) and didn't hear anything but tuned back in one more time about a half hour later and there he was, peaking S5.

All time new one in the log on 20m CW around 0430Z at the bottom of the cycle.

Go figure :-)

Does anyone know if he is still active or if he has/had a Manager ?

I saw ES4RO listed as Manager, but e-mail to his QRZ address bounces.

I am trying to confirm an old 80 Meter QSO.

Tnx es 73, Dick, W1KSZ

You can't hear EU but XW on RTTY must be easy, eh Paul?

I can't hear much of anything that you've spotted. NS must be like Kansas for propagation. HI!

By the by, has anyone else found 30 meters tough, when you have to go against KW stations out of the USA?

73,

Tom W8JWN in the UP Black Hole

Hi Tom,

I sent a recording to you by direct email of XW1B on 30M. He was extremely loud on 11 March, but hasn't been as good since. March is the month for us on the east coast to work into the Far East. It is our black hole the rest of the year (except during the fall equinox, and the enhancement is to a lesser degree.)

I agree you guys are at a disadvantage regarding 30M and the power restriction. We used to be limited to 100 watts in the 1990s, but that all changed about 10 years ago and it's full power now (as it is in most other countries.) I don't know why the FCC didn't lift the ban on it in the US, but they didn't. Some of the US made amps (QRO and Command Technologies) will not work on 30M and are not easily modified to do so for that very reason. (i.e. it's not as simple as moving a tap on the tank circuit -- they purposely use a blocking LC circuit to disable 10.1 MHz operation.) Others, like Ameritron and TenTec, seem to work fine.

I worked H40FN this AM and was repeatedly beaten out by a lot of "200 watt" Ws, so who knows? It took me 20 minutes and these guys came along and did it with one call. Probably location. :-)

I fully believe DXing should be a level playing field, and the same goes for the Phone allocation on 40M. You guys are at a disadvantage because you can't go below 7.125 MHz. Seems to me we ought to have a world wide agreement on sub-band allocations and power limits. However, it is up to each country, and we have to play the cards we are dealt.

73, Paul VE1DX

> I agree you guys are at a disadvantage regarding 30M and the power >restriction.

I think a lot of people are extra-disadvantaged by thinking their tribander and indoor tuner are a sufficient 30m antenna :-)

You get a guy who takes 30m seriously and puts up even a modest beam, and you compare his 200W signals side by side with a bunch of guys with ad-hoc 30m practices, and you're easily going to think he's running a kW...

That extra 7-9dB you get with 1 or 1.5kW is nothing to sneeze at but it's a small enough amount that it's plausible that something like the SteppIR with add-on kit on the 70 foot tower and 200W easily equals a kW station with a lesser antenna.

A quick check in EZNEC suggests that a 70 foot high dipole beats a ground mounted vertical over average ground by about 7.5dB at 20 degrees elevation, 6.5dB at 5 degrees, and 4.9dB at 1 degree.

Add an extra 3dB if you've got a modest beam on 30m (like a Moxon Rectangle which is pretty reasonable at 10.1MHz) and you're talking 8dB to 10.5dB advantage to the 200W guy.

Granted, not everyone has a big high rotatable antenna on 30m but something like a rotatable dipole at 70 feet is probably within reach for many serious DXers who recognize the utility of a good 30m antenna. 30m has historically been one of the first bands I work some DXpedition on, especially if they're in the Pacific.

I run 100W into relatively simple antennas, a dipole at about 30 feet was the first one, replaced with a 100 foot doublet at 25 feet when I lived in an apartment. Now I use a 60 foot tall vertical. I don't work a lot of Asia (can't hear them often) but I hold my own in the pileups that I come across.

I always feel like 30m has a bit *less* competition than the other bands. I got 3Y0X on 30m CW in the first couple days, and never managed to get them on 40m CW (this was from the apartment).

You want to talk about regulations putting the US at a disadvantage, look at 60 meters. Not only are we limited to 50 watts ERP, but even worse, we are forced to run SSB there.

> I agree you guys are at a disadvantage regarding 30M and the power >restriction.

I think a lot of people are extra-disadvantaged by thinking their tribander and indoor tuner are a sufficient 30m antenna :-)

You get a guy who takes 30m seriously and puts up even a modest beam, and you compare his 200W signals side by side with a bunch of guys with ad-hoc 30m practices, and you're easily going to think he's running a kW...

That extra 7-9dB you get with 1 or 1.5kW is nothing to sneeze at but it's a small enough amount that it's plausible that something like the SteppIR with add-on kit on the 70 foot tower and 200W easily equals a kW station with a lesser antenna.

A quick check in EZNEC suggests that a 70 foot high dipole beats a ground mounted vertical over average ground by about 7.5dB at 20 degrees elevation, 6.5dB at 5 degrees, and 4.9dB at 1 degree.

Well, this is true, but in Canada we can't operate any mode there, so we are really at a disadvantage! I got a 60M QSL from a VP8 station (really worked him on 40M) and had to send it back and get one for 7 MHz. Wish they'd give us the band, even in it's channelized state.

Do 60m QSOs/QSLs count for DXCC? I heard one mainland station tell a KH6 they didn't but I can't say that I have seen anything written on the ARRL webpage saying that they don't. So far my DXCC total on 60 is 2-US and KH6!

Not feel slighted, Rich. I didn't read the fine print and apparently you can't work your own call area. I got the boot from a VE1 last night! Right in my back yard. Pretty "stringent" rules. I'm not a serious contester, so I usually just read the rules to get the bands, exchange and times. Didn't read all the details.

I don't think there are many other contests that don't have a provision where everyone can work everyone, are there? Maybe the EU DX now that I think of it. Seems to me there was something in the Middle East (AS) that I needed a few years ago, and he wouldn't give me a 59. Told me to go away!

The FOC guys have a Contest of some type where they just work each other and give their FOC number and a 161, but I have answered them in the past and they always work me. I don't think it counts for anything (for them), but I always got a 599 and a TU 73.

You have a point. I don' know what the criteria is for being mart of the "Commonwealth", but it seems that a lot of the groups that are considered are independent, autonomous countries today. Like Canada, for example. Anyhow, you didn't miss much. A lot of 5NN and serial number exchanges. Some W5 put me on the cluster with the comment "Official BERU Spotter" . . . guess he was getting sick of it, or me, or both!

Cheesh, guys! It seems to me that these same questions come up every year at BERU time. Maybe it is worse this year because conditions are so awful and DX is DX.

I didn't know that stations could not work within their own call area and that being the case, several VE1s I have logged will not be able to claim me for points. But the number of stations who are not in what is known today as the British Commonwealth who were heard calling stations in the contest was much greater than I remember from past BERU contests. I do know that W0ECS did work a ZL on 15M who probably worked Frank because he knew him and it was likely easier to give him a report than to explain that Ws don't count in BERU -- even if, long before radio, the US was a part of the British Empire :-).

BERU, in a nutshell, is for stations who live in countries that are part of the British Commonwealth -- either as full members (countries ruled by Britain -- of which there are very few) or are independent nations that maintain political ties with Britain within a Commonwealth context. BERU is the British Empire Radio Union and goes back to the "beginning of time."

So US stations operated by guys/gals who have had ties to Britain (relatives in Canada or Britain or South Africa or Jamaica) unfortunately can't participate in this contest. Sorry! And certainly stations in France, Germany or the Czech Republic were being ignored by ZC4LI on 40M last night for the same reason :-).

Have a good day and 73,

Al, VE1AL

No, we haven't been able to participate in BERU since 1776! :-)

Some years ago I needed Hong Kong for an all-time new one. There was a very strong signal from a VS6 (prefix at the time) in BERU. I tried to get his attention and tell him I just wanted a QSO. He just wouldn't work me.

Oh well ... got some VS6/VR6 QSO's later on.

Oh, only WAE, the All Asian contests, ARRL-DX and about 100 others!

I have a "Worked the British Empire" certificate from my days
as a G - you had to work something "Brit" in each continent.
Probably much harder to do these days.

Not True but here is the latest warning from the ARRL

SB QST @ ARL $ARLB011
ARLB011 DXing on 60 meters has a downside, ARRL advises

ZCZC AG11
QST de W1AW
ARRL Bulletin 11 ARLB011
From ARRL Headquarters
Newington CT April 5, 2007
To all radio amateurs

SB QST ARL ARLB011
ARLB011 DXing on 60 meters has a downside, ARRL advises

The ARRL is expressing concern that negative consequences could result from chasing DX on 60 meters. Some DXpeditions have announced plans to operate on Amateur Radio's only channelized band, where amateur operations hold secondary status to fixed service operations, including some US government stations. ARRL CEO David Sumner, K1ZZ, says that while it's legal for DXpeditions to operate on the 5-MHz band provided the licensing administration extends privileges there, DX pileups on 60 meters pose the potential for real and unique problems.

''US amateurs are limited to five channels on 60 meters, USB only, maximum effective radiated power (ERP) of 50 W, audio bandwidth not exceeding 2.8 kHz, and not all of the channels are useable because of ongoing fixed service operation,'' Sumner points out. Upon request of a primary service user, Sumner says, it's ''absolutely imperative'' that hams be prepared to relinquish any 60-meter channel immediately. This means constantly monitoring the transmitting channel. Hams also must not exceed the radiated power limit, he stressed.

Not all countries authorize amateur operation on 60 meters. Transmitting on a 5 MHz frequency without authorization not only breaks the law but jeopardizes the operator's continued participation in the ARRL DXCC program. Five MHz cards submitted for DXCC may not be accepted for credit without evidence the operation was authorized.

Sumner emphasized that causing harmful interference to fixed and mobile service stations could jeopardize even the existing, limited privileges as well as the chances of increasing those privileges on a domestic basis, plus any possibility of obtaining an international

allocation on 60 meters.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/March, through Sunday, 15th/March there were 225 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). Just a reminder that Paul, 2E1EUB, will once again be active as 2M1EUB from March 21st for one week. He will sign 2M1EUB and be active on all the satellites from northeast Scotland. Also, look for him on 160 and 80 meters. Checkout QRZ.com under 2M1EUB for more info.

4M5, VENEZUELA. Operators Suer/YY5EBV (YL), Jose/YV5BM and Jhony/YV5KG will be active as 4M5IR during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via YV5KG.

5Z, KENYA (HF and EME Op). Operators Eltje/PA3CEE, Rene/PE1L and Ronald/PA3EWP will be here and active between April 1-12th. Eltje and Rene are expected to be active as 5Z4EME on 2 meters and 70 cm EME. For 2 meters they will be using two 10 element yagis, a 400 watt amp and a preamp (there will be a smaller setup for 70cm). Suggested frequencies for transmitting and receiving will be on 144.124 MHz, and on 144.084 MHz for Japan. Ronald will be active on HF with the call 5Z4/PA3EWP using a Elecraft K2 with a homemade amplifier and vertical antennas for 40-10 meters. QSL 5Z4EME via Eltje, PA3CEE. QSL 5Z4/PA3EWP via Dennis, PA7FM. For complete details, please visit: http://www.emelogger.com/kenya

9A09, CROATIA (Special Event). Members of the Djurdjevac Radio Club will activate special event station 9A09P (Nine Alpha ZERO NINE Papa) between now and December 31st. Activity is to celebrate the city of Djurdjevac, and operations will be on all bands and modes. A special QSL card will be issued with the city's story on it. Under the new administrative division of Croatia, Djurdjevac gained the status of a city only in 1997. All QSOs will be confirmed automatically via the Bureau.

9H, MALTA (EU-023). Valentin, DL5GA, will be active as 9H3GA between March 17-24th. Activity will be holiday style on the HF bands. QSL via his home callsign.

9J, ZAMBIA. Gabriel, YO4HEK, will be here for one year and will be active as 9J2YO. Activity will be on all bands using CW, SSB, and PSK31. Over the past week Gabriel has been very active on 40/30 meters between 1700-2030z. QSL via YO4ATW.

A6, UNITED ARAB EMIRATES. Khalid, A61BK, in Dubai, is expected to be active during the CQWW WPX SSB Contest (March 28-29th) probably as a Single-Op entry. QSL via A61BK.

AO1, SPAIN. Operators Ismael/EA1GDX and Ubaldo/EA1GVG will be active as AO1K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via EA1GVG.

CQGC-2009 CONTEST RULE CHANGES. Please note that some rules for the "2009 Yuri Gagarin International DX Contest", which will be held between 2100z, April 11th and 2100z, April 12th, have been changed. Rules can be viewed at: http://gc.qst.ru/en/section/32
This contest is dedicated to the memory of Yuri Gagarin, who realized the first human flight to space, on April 12, 1961.

DV1, PHILIPPINES. Alex, DV1UBY, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. QSL via DV1UBY direct.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC Credit:
K5D - Desecheo Island; 2009 Operation

E5, SOUTH COOK ISLANDS (Update). Tim, NL8F/VK4COF, will be active as E51COF for 14 days from Rarotonga Island (OC-013) sometime between March 21st and April 4th. Activity will be on 80/40/20/15/10 meters SSB and possibly 17 meters. QSL Manager for this operation is K8NA.

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via EB2BXL.

EI, IRELAND. Olivier, ON4EI, will be active as EI/ON4EI during the CQ WPX SSB Contest (March 28th-29th) as a Single-Op/All-Band/Low-Power/ Non-Assisted. His operations will be from the area of Clonmel (Fethard) Tipperary County (IO62EK). He will be in Ireland between March 25th and April 1st. Activity will be on 160-10 meters using a K3 Elecraft w/100w into various antennas:
160/80/40m : vertical monopole 18M and inverted V.
20m : 10 elements inverted V wire beam East-West design ON4EI.
<http://www.on7wr.be/Gigazette/ON4EI/ON4EI_Wirebeam.pdf>
15/10m : 2 elements horizontal wire beam East-West design VE7CA.

GB5, NORTHERN IRELAND (Special Event). Members of the Foyle and District ARC (MN0AKU) will activate the special event callsign GB5SPD to celebrate Saint Patrick's Day 2009. Activity will take place between Saturday, March 14th, and Tuesday, March 17th. QSL via MN0AKU, direct (QRZ.Com) or by the Bureau.

HOLYLAND CONTEST 2008 RESULTS. Mark, 4Z4KX, informs OPDX that the results for the 2008 Holyland Contest are now available on the IARC Web site at:
http://www.iarc.org/?page_id=3D353/
The 2009 Holyland Contest will take place on Saturday, April 18th, starting at 0000z.

IOTA NEWS.....
AF-065. (Update/IOTA Op). Alfredo, IK7JWX, informs that one more operator has been added to the Mogador Island Dxpedition, April 19-26th. Ampelio, IS0AGY, will join the group and sign 5C2B. QSL via his home callsign. He also announced the following suggested frequencies:
CW - 1825, 3525, 7025, 10115, 14025, 18075, 21025, 24895 and 28025
SSB - 1845, 3775, 7055, 14255, 18145, 21255, 24955 and 28455
RTTY - 3585, 7040, 10145, 14085, 18100, 21085, 24920 and 28085
BPSK31 - 3595, 7040, 10145, 18100, 21075, 24915 and 28075 kHz
Activity will be on 2m (SSB and M.S.) and 6m: Stand-by on E sporadic.
The group is still looking for sponsors and donations. For details on how to help and updates, visit their Web page at:
http://www.mogador2009.altervista.org

AS-079. Take, JI3DST, is now active as JS6RRR from Miyako-Jima Islands (AS-079, JIIA AS-079-005) until March 24th. Activity will be on 160/80/40/17/15/12/10/6 meters, CW, SSB, RTTY, FM and SSTV. Take may possibly make side trips to Ikema-jima (JIIA AS-079-001) and Kurima-jima (JIIA AS-079-003). He may possibly use the callsign JI3DST/JS6. QSL via his home callsign through

the JARL Bureau only.

AS-192. Suli, 7Z1SJ, and others will be activating the Red Sea Coast South (Jizan Province) Group this week. The main bands will be 40 and 20 meters, possibly 160 meters. No other details were provided.

EU-006. Members of the Galway Radio Experimenters Club will be active as EJ4GRC from Inishmore Island (WAB Square L71) between 1200z, March 17th and 1200z, March 18th. Activity will be on all bands and modes. Visit the club's Web site at: http://www.galwayradio.com

EU-020. Rolf, DK2ZF, is planning to be active as SM1/DK2ZF from Gotland Island (JO96CV) during the month of July. Activity will be mainly 6 and 2 meters as well as 432, 1296 and 2320 MHz. Preferred times will be during Sporadic E and Meteor-scatter. More details are forthcoming.

EU-037. Bernd, DL8AAV, will be active as SD1B/7 from Oland Island (WLOTA 0588) between May 31st and June 12th. Activity will be on the HF bands, SSB only. QSL via DL8AAV, direct or by the Bureau.

NA-014. Heinz, VA7AQ, will be active as VE9/VA7AQ from Grand Manan Island (CISA NB-003, WLOTA LH-0082) between March 20-25th. QSL via his home callsign, direct or by the Bureau.

NA-078. Bernardo, XE2HWB, will be active as XE2HWB/XF1 from Santa Margarita Island, March 21-23rd. Activity will be on or around the usual IOTA and island frequencies. QSL via N6AWD, direct or by the Bureau.

NA-141. (Update/Special Event) Members of the Jupiter Tequesta Repeater Group now have a Web page available for next year's activity to activate W4K to celebrate John F. Kennedy's birthday from Peanut Island (USI FL-479, Palm Beach County, FL), May 29-30th, in 2010. Operations will be from "JFK's old Cuban missile crisis bunker". Activity will be focused on HF (mainly 40/20m), 6 and 2 meters using CW and SSB. This will be the first time Peanut Island will be activated. The QSL cards have been designed for the event and can be viewed on the new Web page at: http://jtrg.org/DXpedition.shtml

JD1, OGASAWARA. Shige, JA1HMM, is once again active as JD1BIE possibly until March 25th. He is on a short holiday on Iwo-Jima (AS-030), but plans to be active on 40-10 meters using CW and SSB. Over the past week he was heard on 40/30/17 meters CW and 20/15 meters SSB. Reports indicate that he may activate a different island but details are not yet known. QSL via JA1HMM at: Shigeaki Miyamae, 4-20-22-302, Aoto Katsushika, Tokyo 125-0062 JAPAN.

KH4, MIDWAY ISLAND. It was announced this past week by Tom/N4XP and Dave/WB4JTT (edited): "A multi-national team of 19 operators will activate Midway Island in October 2009. The U.S. Fish & Wildlife Service (USF&WLS) has authorized amateur operation from this rare U.S. entity for only a 10 day period, its first radio activity in almost 10 years. Midway Island ranks number 24 worldwide and number 13 in Europe on the DX Magazine's "Most Wanted List". Activity will be on 6 meters to 160 meters with 5 to 6 stations. At least one station will be active on 20 meters around the clock for those who need it for a new country. Major efforts will be made to meet the demand to the most needed geographical areas, the low bands and RTTY. Team members are Joe/AA4NN, Carlos/EA1IR, Franz/DJ9ZB, Kimo/KH7U, Antoinette/KI6TVS, Jon/KL2A, Don/N1DG, Paul/N4PN, Tom/N4XP, Jeff/N6GQ, John/N7CQQ, Dave/WB4JTT, Charlie/W6KK, Bruce/W6OSP, Art/WA7NB, Janet/W8CAA, Joe/W8GEX, Byron/WA8NJR and Vrata/OK1KT. Off site support is being provided by Don/AA1V, Dan/W5DNT and Paul/W6XA. Travel to Midway is only allowed by chartered aircraft. Because of the size of the aircraft, the team is presented with unique challenges. As such, the aircraft will only be able to carry the team requiring the equipment to be shipped by boat some months ahead. Adding to the high cost of transportation, daily fees and other charges established by the USF&WLS makes this operation very expensive. A Web site has been established and can be found at:
http://www.midway2009.com
Please support this endeavor by sending a donation. To make it easy to donate you can contribute electronically using the Web site or if you choose regular means you may do so. Instructions are given on the Web site for either method. Updates will be published on the Web site as they become available..... Tom/N4XP & Dave/WB4JTT (Co Leaders for Midway Island 2009)"

MC0/MW9, WALES. Members of the Strumblehead DX and Contest Group will be on the air from their headquarters at the Farm in Wales for a period before, during and after the CQ WPX SSB Contest (March 28-29th). They will be using the club callsigns MC0SHL before the contest with some activity on 30 meters RTTY around 10148 kHz. During the contest they will be using both MW9W and MC0SHL - depending on the number of operators, there may be more callsigns on air. Please QSL via the club's manager M0URX. A live Web cam will be active during the contest, as well as more details and photographs on the club's Web site at: http://www.mc0shl.com

OP4, BELGIUM. Operators Jochen/DH5HV, Jean/ON4JW, Joe/ON4JZ, Karel/ON5TN and Jim/ON5UM will be active as OP4K from Antwerpen, during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via ON4JZ, direct or by the bureau.

OY, FAROE ISLANDS (First 60m Op!). Lars, OZ1FJB, will once again be active as OY/OZ1FJB from here between March 16th and April 1st. His activity will be limited to his spare time (suggested times 0600-0700z and 2100-2400z), mainly on CW but also SSB. He will be the first active station to be permitted to operate on 60 meters (CH. 5 - 5403.5 kHz USB). QSL via his home callsign.

OZ, DENMARK (IOTA/Lighthouse Op). Paul, I2AE, will be active from some Danish islands between May 1-15th. Some of the Danish island groups mentioned will be EU-029, EU-125, EU-171 and EU-172. It was indicated that there are a lot of lighthouses on these islands, and they will be activated also. No callsign was mentioned. It is suggested to monitor mainly 7050-7060 and 14250-14260 kHz.

QSL INFO AND NEWS.....
LOGS AND PICTURES ONLINE. Members of the Algarve S.T.A.R. DX team, who activated the Murtinas Posterior Lighthouse (POR-126, DFFA Fa-29) as CS6A on March 15th, state that the log and pictures are now online on their Web page at: http://algarvedx.com

E44M QSL STATUS. It was announced that the E44M QSLs are ready. The press release states, "In few days the first supply of cards will arrive to our managers Simone/IZ0BTV and Les/SP3DOI. We will start to answer the first direct QSLs as soon as possible."

KL7DX QSL STATUS. Ron, AC7DX, informs that all KL7DX Chuginadak Island (NA-234) received as of March 15th have been answered. Those who did not receive their NA-234 QSL, please resubmit.

NO QSL MANAGER. Larry, VQ9LA, wants everyone to know that he "DOES NOT" have a QSL Manager, and all QSL cards should be sent to the address listed under VQ9LA on QRZ.com.

QSLS VIA LOTW: 5R8GZ, TI5N, TN5SN, TR8CA, VK9WWI, YI1RAZ and YS4M

QSLS RECEIVED VIA MAIL: 1A0KM, 4O0A, 4O0HQ, 4W6MM, 4X4WN, 4Z1UF, 5B4/RW9UP, 7O1YGF, 7P8BA, 9J2BO, A45WD, A5100A, B1HQ, B7HQ, BA0AA, BD5WW, BD0AJ, BT1OB, BT1OH, BT1OJ, BT1ON, BT1OY, CT1ILT, E41/OK1DTP, E51QQQ, EA9IB, EL2DX, ES1QD, FK8CP, FM5CD, FO/DJ7RJ, FR/F6KDF/T, H40AA, N8S, OH0R, PZ5TX, RW1AI/MM, SV2ASP/A, T33ZZ, T77C, TA2RC, TO4E, VP2ETN, VP6DI, VK9NS, VK9RS, XW1B, XX9C, Z29KM and ZK3AH

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SILENT KEY. Silvano, I2YSB, reports that the team members of the 6O0N, J20MM and 9L1X DXpeditions regret to inform the DX community that Gianni, IS0VSG, became a "Silent Key" (SK) on March 9th, 2009. He was their pilot station during their DXpedition activity and had great dedication and passion. Silvano states, "We think we lost him, but we did not lose him as a model in our HAM life." OPDX and its readers would like to send out our deepest sympathy to the family and friends of IS0VSG.

T4, CUBA. Members of the Cuban Amateur Radio Federation in Las Tunas will be active as T48K during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via DK1WI.

TL0, CENTRAL AFRICA. Christian, TL0A (ex-TZ9A and 5U5U), is now active from here. He has been very active on 17 meters, usually around 18150 kHz at various times. There has been some activity also on 20 and 80 meters SSB. QSL via his home callsign, direct to: Christian Saint-Arroman, Chemin de Mousteguy, F-64990 Urcuit, France.

V6, MICRONESIA. Yoshi, JJ8DEN, will be active as V63PR until March 24th. Activity will be from two islands. Look for him to be active on Pohnpei (OC-010) until March 19th and from Chuuk Island (OC-011) between March 20-24th. Look for him on 160-10 meters using CW, RTTY, PSK31 and JT65A if possible. Operations over the past week were mainly on RTTY. QSL via JJ8DEN (w/SASE: Please send European type envelope with 2 USDs or 1IRC).

VC3, CANADA (New CISA Island/Lighthouse). Operators Doug/VE3CWO, Brent/VE3IRT, Neil/VE3SST, Valdas/VE3VO and Igor/VE3ZF will be active as VC3Y from the lighthouse on Bluffers Park Island (new CISA island and lighthouse), March 21st-22nd. Activity is to celebrate the 50th anniversary of the York Region Amateur Radio Club <http://yrarc.com/yrarc>. QSL via VE3CWO.

VC6, CANADA. Gord, VE6SV will be active as VC6T from Alberta during the CQWW WPX SSB Contest (March 28-29th) and CQWW WPX CW Contest (May 30-31st). QSL via VE6SV (QRZ.com).

VISALIA CONTEST DINNER. You can now purchase tickets for the Contest Dinner at the International DX Convention in Visalia, CA. The dinner is on Friday night, April 17th, in the Oak room at the Holiday Inn, Visalia. For tickets you have two options (in addition to the convention registration fee). PAID IN ADVANCE!: 38 USDs per person with random seating; or, 360 USDs for a full table for 10 people (All 10 tickets must be purchased by ONE person. One table will then be reserved for that person. Location of the reserved table will be random). The program will be Tim Duffy/K3LR, and he will speak on "The Never-Ending Challenge of Improving Your Contest Station." Also: The 2008 CQP Awards will be presented! For complete details on the dinner banquet, please visit: http://www.elbloggotorcido.com/contest-dinner-2009.html

VK6, AUSTRALIA. Bernd, VK2IA, will be active as VK6AA during the CQWW WPX CW Contest (May 30-31st) as a Single-Op/Single-Band (40m) entry. QSL via DL8YR. Activity will be from the Northern Corridor Radio Group's (VK6ANC) club station situated about 20 kms north from the city center in Perth, Western Australia. See the station at: http://www.ncrg.org.au

VK9C, COCOS-KEELING ISLANDS (OC-003). Just a reminder that Bernd, VK2IA, will once again be active as VK9AA from the Cocos Beach Motel, West Island, between March 14-27th. Activity will be on 160-10 meters CW/SSB using a Spiderbeam for 10/15/20m, a 2 element wire beam for 40m, verticals for 80/160m and receiving antennas for the lowbands. QSL via DL8YR, direct (QRZ.com) or via DARC-Bureau.

VK9L, LORD HOWE ISLAND (Update). The VK9LA DXpedition will take place between March 23rd and April 3rd, with 16 operators. Bill Horner, VK4FW, member of Oceania Amateur Radio DX Group Inc. (ODXG), reports on Sunday, March 15th: "We have now established that we will have live internet on the island which should be 24/7. We intend to have photos, online log check and QSO totals updated on the web site www.odxg.org/vk9la.htm
All team members are finalizing last minute packing and weighing of luggage. All equipment sent via ship has safely arrived and is in storage awaiting our arrival.

There have been many queries since we devised a list of sunrise/sunset times for grey line propagation. We will have an operator on every low band every day whilst we are in darkness.
We also expect huge openings on 30m the same as K5D did. With our station separation we should be able to run 2 stations simultaneously to maximize openings......Cu in the pile ups."

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY are expected to be active as VK9GMW next week (possibly between March 22nd and April 6th) in what they call "another low-key, simple DXpedition". PLEASE NOTE that the dates are approximate and may change due to weather. The operation will have a strong low-band focus, although VK9WMW will operate on all HF bands. From their Web page, George reports from Airlie Beach, Queensland, Australia, (Sunday, March 15th): "Preparations are under way for the boat trip to Mellish. We are currently provisioning and loading fuel. Lots of fuel. We intend to depart from Airlie Beach Tuesday morning. The weather forecast is fair (15 to 20 kts)." QSL will be via HA7RY, by the Bureau or LoTW or direct to: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY. After VK9GMW has gone QRT, they will launch an "Online QSL Request Service" (OQRS) on their Web site. If you want to receive your QSL via the Bureau, please use that form to request the card. They will check your QSOs against the log and send your card to you via the Bureau. This method will allow them faster processing, helps them protect the environment, and you will receive your VK9GMW card faster. For more information, please visit the VK9GMW Web page at: http://www.vk9gmw.com
For donations, please access: http://vk9gmw.com/support.html

VK9N, NORFOLK ISLAND (OC-005). Willy/ON5AX and his XYL Magda/ON3AX will be active as VK9N/ON5AX between now and March 22nd. QSL via ON5AX direct only.

VP5, TURKS AND CAICOS ISLANDS. Florida Contest Group members Art/N4PJ (CW/RTTY) and XYL Marsha/K4IRI (SSB) will be active as VP5/homecall from Providenciales (NA-002), March 17-24th. Their activity will include the Russian DX Contest (March 21-22nd) as VQ5B. QSL via their home callsigns.

WH6, HAWAII (Very Rare County). Attention county hunters! It was announced at the Maui Amateur Radio Club (MARC) this past week that the extremely rare Kalawao County will be activaed on 40 and 20 meters, March 30-31st. MARC member, Jayson Kohama, WH6BXK, is expected to work there on those particular days. After he gets off work each day, he plans to be on HF making as many contacts as possible. His station, WH6BXK, will be on the air each day after 1800 local (6:00 pm or 0400z). He will be on 7188 kHz and 14335 kHz. Kalwao County is one of the rarest USA counties. It is the 2nd smallest county and the poorest in the USA. It is located on the Kalaupapa peninsula, on the island of Molokai. It is the old Hawaiian leper colony. Because it was a leper colony, it was totally isolated from the rest of the islands and had its own separate county government, which was administered by the state. Hams must have special permission to go there and operate. Thus it is extremely rare for any ham signals to ever radiate from Kalawao.

XR1, CHILE. Members of the Radio Club La Portada will be active as XR1A during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via XQ1IDM.

XU, CAMBODIA. Retu, OH4MDY, will once again be active as XU7MDY from Sihanoukville between April 9-21st. Activity will be on the HF bands 80-10 meters using CW, SSB, RTTY and PSK31. QSL only direct to XU7MDY address on QRZ.com.

ZF2, CAYMAN ISLAND (Satellites, Grids, HF and Contesting). Adrian, AA5UK, will be operating as ZF2AE from Grand Cayman and ZF2AE/ZF8 from Little Cayman between March 25th and April 8th. Current plans are to operate holiday style on AO-51, SO-50, VO-52 and FO-29 satellites. He plans to activate EK99hi from March 25-28th, EK99xp and EK99wp from March 28th through April 3rd (he plans to operate HF only during part of CQ WPX SSB Contest and the rest of his stay on Little Cayman, 40-10m) and EK99kh from April 3-8th. Most activity will be in the afternoons and evenings. QSL direct with SAE/SASE, Bureau, LoTW or eQSL.

ZF2, CAYMAN ISLAND. Garry/K9WZB and XYL Sharon/K7WZB will be operating from Cayman Island as ZF2ZB between April 21st and May 6th. Activity will be on all bands 160-6 meters, using CW, SSB, RTTY and PSK31. They will be monitoring 6 meters most of the time for openings to U.S. and Europe. QSL direct only via K9WZB.

ZL7T QRT. Lee, ZL2AL, reports that the multi-national team that activated Chatham Island in the South Pacific as ZL7T between March 5-10th, averaged about 2,200 QSOs a day with three radios for 5 days with over 11,000 QSOs in the log. The final logs have been uploaded to the Web site. Please QSL direct via Lee, ZL2AL: 87 Auckland Road, Greenmeadows, Napier 4112, NEW ZEALAND. For a direct response, you must enclose a self-addressed envelope (SAE) and at least 2 USDs or 1 IRC to cover the return postage, otherwise they will respond via the Bureau system. They will also reply to QSLs sent to them via the ZL Bureau, and they will upload their logs to the "Logbook of The World" (LoTW) by September this year.

9273. VK9AA

Yahoo group: DX-IS (2009)
Date: 2009-03-16 12:16:15 UTC
From: Winston Rogers
Topic: 9273 Message: 9273

It was very interesting to hear VK9AA work simplex 30 meters to NA yesterday afternoon, with a good signal for more than two hours, without a spot being posted. He was a very good operator. It was orderly. No one was calling over him, or out of turn. Calls were short. And it was just a joy to listen to. After about 30 minutes I decided to give him a try. It took three calls in this invironment. I continued to listen for another hour.

Memories of times gone by....

Win W0LZ

9274. 60M DXCC

From: Zack Widup
Topic: 9274 Message: 9275

Since too frenetic of an attempt at working DX on 60m could jeopardize ham radio in the USA, I'd prefer to extend my frontiers to higher frequencies. Start working EME and go for DXCC on 144, 222, 432, 903, 1296, 2304 MHz, etc. THOSE are challenges! But people are working on them.

9278. D44 question

Yahoo group: DX-IS (2009)
Date: 2009-03-17 01:27:02 UTC
From: Alan Leith
Topic: 9278 Message: 9278

Am I correct in assuming the operators at D44TX* are using different calls on each band? I worked D44TXS a few evenings ago on 40M CW and last night worked D44TXO (I think) on 80M CW.

I have to admit that I wasn't paying a whole lot of attention to the call on 80M because it was late and I was pretty tired. In fact, I logged the QSO and went to bed. I didn't think about it until I looked at several spots tonight that show TXO on 80M CW. The same for earlier spots today on 80M and TXS was only showing on 40 and 17. I logged last night's 80M QSO as "TXS" and that might have been because I was beat. My contact was between 0230 & 0300.

I know I'm in someone's D44TX* log on 80M but I would like to know whose :-).

I appear to have been wrong regarding 60 Meter DXCC credit

Art (N4PJ) contacted Bill NC1L and here is his response to me:

----Original Message-----
From: Art Burke
Sent: Monday, March 16, 2009 1:34 PM
To: Robert Montemerlo
Subject: Re: Sans sunspots

Bob, received an e-mail back from Bill Moore - no DXCC on 60M. He didn't elaborate, but I asked specifically if perhaps it could count for Mixed and/or SSB - he said no DXCC on that band.

Art - N4PJ

There appear to be issues with the DX IS! list that I cannot get a handle on. Art reported that message to me after posting it on the list via the Web interface. Some, but not all, of Art's messages are not reflecting to the membership. He's mentioned this to me a couple of times during the past 6-8 weeks.

I also note that a lot of questions like the one above, and Dick's (W1KSZ) request for a DX map, are not being sent to the group members. Both are examples of things that are quite relevant to DXing. (We changed the default when you hit reply from all members to just the sender in early January, and this is when the "funny behaviour" with the messages seemed to begin.) It seems to me that both of these were valid questions and either the answers were sent just to the original list member, or to the group but didn't "reflect" properly.

I also get a lot of email that is innocent in terms of the sender, the title and the content being flagged by Yahoo as SPAM. I then have to approve these. I can find no pattern.

I can't explain this because I belong to a number of other Yahoo groups that seem to work just fine. As a first step, I have temporarily changed the default reply so that it goes to all members. Don (N1DG) is the co-owner of the list, and he is quite busy at the moment so this is a unilateral decision on my part. He does monitor this list closely, so if he in not in agreement with my

decision, I'm sure I'll hear about it. :-)

Note -- this change means you should just send a "Reply" and NOT a "Reply to all" when answering messages.

Let's give this a go and see if the messages and replies flow a little better. I'm getting tired of approving innocent things like the OPDX bulletin and random emails from long time members that is incorrectly flagged as SPAM, for one thing.

So then I guess it isn't a real ham band. Too bad, it was kind of fun to operate there.

Someone said (here?) that there was a W who almost had DXCC on 60M. Based on Art's information, he or she might be approaching 100 countries, but they are not approaching DXCC.

I read in our national organisation's magazine (The Canadian Amateur) within the last year that Industry Canada had not closed the door on giving us 60M privileges. That doesn't mean it will happen soon; just that they haven't said no.

In my view, 60M should be a small un-channelized piece of spectrum (like 30M) to be useful. Having 5 or 6 3-KHz slots where only USB is allowed with a maximum ERP of 50 watts doesn't bode well for DXing! But then again, if the reports of someone nearing 100 kills are true, then it is indeed a challenge that can be met. Also, not all Hams are DXers and experimenting with 5 MHz would be interesting.

I wonder how many countries are allowed 60M?

After a couple of comments yesterday about DXCC on 60M, I dropped a note to Bill Moore - Bill says there ain't no DXCC on that band!

I thought that perhaps it could count for mixed, but he says it doesn't count for anything. He wrote simply "...there is no DXCC on that band."

Certainly seems ironic that the FCC created the 60M ham "band" with 5 slots for USB instead of 5 "slots" for CW where maybe there could have 15 or 20 stations instead of just 5 at one time.

I wonder what the plans are for that real low band that's currently an experiment. A KW down there could probably produce a ground wave all the way across North America. After all, when the FCC opened 1600 - 1700 for broadcast stations back in the 90s, there were a number of suddenly "clear channel" 1,000 watters that could be heard nationwide.

Paul,

I had to dive back into my 'Trash' folder to check, but I seem to be
receiving all the messages sent to the group. for instance, dick's
message regarding the request for a DX map came thru just fine, as did
his rejection of DX Atlas.

I do agree, however, that some messages are somehow labelled as 'Spam',
but my spam filter catches them and I can always check 'em out to see if
they are the real thing or not.

I have also experienced similar things on other lists of which I am a
member, which are 'supported' by Yahoo.

It's hard to predict what's going to happen to the future of shortwave as more of the world's commercial interests go to satellite communication. Certainly not all shortwave activity will disappear in our lifetimes, but I suspect some of the UTE stuff will. Maybe some time soon we will get a slot of actual bandwidth instead of 5 channels in the 60-meter range.

Meanwhile, I don't think there re TOO many people who have worked everything on all modes on all the bands we have available for DXCC.

There appear to be issues with the DX IS! list that I cannot
get a handle on. Art reported that message to me after posting it on
the list via the Web interface. Some, but not all, of Art's messages
are not reflecting to the membership. He's mentioned this to me a
couple of times during the past 6-8 weeks.

I also note that a lot of questions like the one above, and Dick's (W1KSZ) request for a DX map, are not being sent to the group members. Both are examples of things that are quite relevant to DXing. (We changed the default when you hit reply from all members to just the sender in early January, and this is when the "funny behaviour" with the messages seemed to begin.) It seems to me that both of these were valid questions and either the answers were sent just to the original list member, or to the group but didn't "reflect" properly.

I also get a lot of email that is innocent in terms of the sender, the title and the content being flagged by Yahoo as SPAM. I then have to approve these. I can find no pattern.

I can't explain this because I belong to a number of other Yahoo groups that seem to work just fine. As a first step, I have temporarily changed the default reply so that it goes to all members. Many Canadian amateurs can be reached by sending e-mails to
callsign@.... This isan alias service provided by Radio amateurs
of Canada, and the message is forwarded to the address registered with
them. Of course, if the guy doesn't have e-mail at all, he won't be
registered. :-)

I just checked the RAC website, but there's no indication that he has an
e-mail address.

Hope this helps!

From: Art Burke
Topic: 9296 Message: 9299

Personally, I don't need either good or bad press - it's noisier than I remembered on 30 when you're trying to work a lot of the EU stations. But I love the publicity everyone has been giving Marsha. She's getting sort of a baptism by fire and just eating it up. She sounds like she's in a contest, but she's having a ball!

Nice to hear a lot of familiar calls on 30 CW too.

Art - N4PJ (/VP5 until next week). It is still utterly amazing to hear people send "..tnx for the new one on this band" !!

Art you had a good signal into Missouri City this afternoon but I dont have a 30 meter antenna.
So I had to work Marsha on 20 She was very loud and doing a great JOB.

Thanks Frosty. She didn't recognize her call at first. It was one of those semi-rare moments when I had my own headset off and I heard her give your call. I yelled out "That's Frosty!" That was probably when she threatened to divorce me! Not really. She was still somewhat nervous at that point. She ended up working about 100 in that 20 meter pileup. I think she's finally convinced a woman can easily draw a crowd on SSB!

Trying to solve some minor RTTY problems for those who might want to hear some "deedle-dees" from VP5.

>>> AS-192, IOTA NEW ONE <<<

Mohamad, HZ1MD has announced that he, along with Firas/HZ1FS and Sulaiman/7Z1SJ, will be active as HZ1FS/p from the Red Sea Coast South/ Jizan Province group, IOTA AS-192 (new one) on 19-23 March (depending on the living conditions on the island, they might extend their stay). They plan to have three stations "with many antennas", including a Spiderbeam for 20, 15 and 10 metres, and to operate mainly SSB, with some digital modes. [TNZ IZ1CRR]

9305. Conditions

Yahoo group: DX-IS (2009)
Date: 2009-03-18 13:14:45 UTC
From: Alan Leith
Topic: 9305 Message: 9305

Last night VE1DX spotted BX5AA on 14276 so I went there expecting to at least hear him. NADA. I could hear a few watery weak JAs but absolutely nothing else out of Asia. And that "opening" lasted here for less than 10 minutes. Perhaps if I had gotten there a little earlier <sigh>.

This morning I'm home with yet another bout of something and came into the shack to look for VK9AA (which I don't need on 20M) and found him under a birdie on 14030. It was everything I could do to haul him through and I made it into his log as 1300 approached. It is now 1310 and the birdie is still there and he's up to S-5. Where's the justice. He was specifically calling for NA but I heard Gs, Fs, OKs and a DL or two calling.

Also last night, I ran across N4PJ who's vacationing on VP5 with his lovely XYL, and started a QSO only to have my keyer go flooie. When I got it running I found him again and got a report and an apology through.

Point of this? Conditions sure can vary over a 100 mile distance. And, oh yes, I won't be on SSB today -- I can't talk :-).

Heard the keyer flub, but didn't know for sure what was going wrong. Glad you came back. At our age when someone suddenly disappears from the air.....

Arose faithfully very early this morning, hoping maybe 30M would be open into Asia. Started CQing around 0800Z. EU stns were answering like gangbusters! Amazing. Way, way past their sunrise, even in Western Europe. Never did get anything remotely near Asia.

Several hours later, about half an hour past my own sunrise, was working a reasonable number of midwesterners on 30 and an F6 called in!

Marsha has claimed several times that she just can't hear the calls, but she continues to put them in the log at a very nice clip! She'll be a ham by the time we get home!

Nice to hear calls from forum members both on CW and SSB. Marsha didn't recognize some of the calls until after the fact, but she has recognized a number of familiar calls.

Now if I could just figure out what's wrong with my RTTY!

Art,

Good to work you this AM. If you're using MMTTY, I've enclosed a
screen shot of what works here. The various filter options can trip one
up. Notch does not work with some. Make sure AFC, ATC and NET are
off. They can really screw things up sometimes.

73 and enjoy. Wish I were there.

From: Art Burke
Topic: 9305 Message: 9311

Brian, I recognized your call, but couldn't remember your name. I don't think the forum permits attachments as I can't access them. Yes, I'm running N1MM with MMTTY for the RTTY engine. I'll double check that what you mentioned is all turned off. I can also run RTTY with WinWarbler, but I prefer running my RTTY in more of a contest mode and I like N1MM for contesting vs. DXKeeper for my regular logging. I *can* work it, but it's a pain in the @$$!

We were able to hook up the other beam (up on the hill at the other house) and not only are we not QRMing each other, but we are both on 20 at the same time - I'm on CW and Marsha is on SSB higher up.
Thanks for the contact Brian, and for the advice.

Brian, your advice was priceless - AFC was turned on. Turned it off and all seems normal at the moment. Made five or six contacts without anything going haywire - much appreciated.

Art - VP5/N4PJ (geez, it's hotter down here than it was back home! fortunately there are some sea breezes and we actually got cold last night!)

VK9AA was really great sigs on 20CW this morning in W3.

Worked for #302, second all time new one this week after H40FN.

Bottom of the cycle, sure, but hey, there's something to do.

I think Mellish Reef VK9GMW is in my sights now...

> easily draw a crowd on SSB!

Quite a few years ago, there was a licensed XYL I knew at work who didn't have an HF station at home. I invited her over one Sunday afternoon during one of the major SSB DX contests to show her what DXing was all about.

We took turns at the microphone for an hour or so until she got the hang of things. Then we came across a relatively rare African station on 10M who had a huge pileup on his frequency. I had her call him using her call, and she got him on the first call. Then I called him without success for ten minutes. I told her she had just witnessed the power of the female voice in a pileup!

73,

John, K9MM

Hi Art,

I need VP5 on SSB (and RTTY), would be great to try if you have time.

Haven't heard any VP5s lately, with current condx it may not be possible...

W6EL says, 2330 - 0000z LP 20m. So that would be 0830am to 0900am perhaps we could try this tomorrow?

Anyway let me know how you are placed for time and skeds, would be great to make a QSO.

Subject: [DX-IS] Re: Conditions

Heard the keyer flub, but didn't know for sure what was going wrong. Glad you came back. At our age when someone suddenly disappears from the air.....

Arose faithfully very early this morning, hoping maybe 30M would be open into Asia. Started CQing around 0800Z. EU stns were answering like gangbusters! Amazing. Way, way past their sunrise, even in Western Europe. Never did get anything remotely near Asia.

Several hours later, about half an hour past my own sunrise, was working a reasonable number of midwesterners on 30 and an F6 called in!

Marsha has claimed several times that she just can't hear the calls, but she continues to put them in the log at a very nice clip! She'll be a ham by the time we get home!

Nice to hear calls from forum members both on CW and SSB. Marsha didn't recognize some of the calls until after the fact, but she has recognized a number of familiar calls.

Now if I could just figure out what's wrong with my RTTY!

From: Lance Martin
Topic: 9321 Message: 9321

Hi Guys,

Just did a Google Earth view on the Midway Atoll (Sand Island) and the image from Aug 20, 2007 shows a pretty clean island.

I know there were emails about this last year. I see some building there, so accommodation should be possible.

The runway is looking great, so a flight from Hawaii should be the ticket...

I don't know what form of transport is available to the island though...

Good luck to the K4M team!

Lance, condx have been quite strange. Bad QSB on several bands last night. Had a tough time even working EU.

We have internet here - I think it's a DSL, so we're doing fine keeping up with the forums, e-mail, who's robbing who on Wall street hi hi.

Drop me a note on my email aburkefl at comcast dot net and we can talk skeds. We have no amps here, but some nice antennas. Marsha is running a couple of Force 12s on SSB. That tower is here by the bungalow. It's only about 40 or 50 feet up, but we're on the edge of a big hill overlooking the beach so the antenna is maybe 150 to 200 feet up over the water. It works quite well.

I'm using mostly an A4S with 40 meters added and it's sitting further up the hill at the other house (the home of Jody, the owner). The controller for that beam is at her house, so we have it fixed on EU. Amazingly, I was able to work quite a few US stns last night, even many I thought would be "out of line" of the beam.

With what we have, if we set a sked convenient to you, I'm willing to try.

I'm ashamed of my RTTY. Several years ago, I had the experience of my first CW pileups from the other side. I think basically, that was a lesson easily learned. I worked quite a few RTTY QSOs yesterday and it was a bear! You can work guys on CW low/high in the passband, but the software/hardware requirements make it virtually impossible to "hear" three different RTTY signals at the same time!

I plan to keep trying!

Art - VP5/N4PJ (until next Tuesday)

There appear to be issues with the DX IS! list that I cannot get a handle on. Art reported that message to me after posting it on the list via the Web interface. Some, but not all, of Art's messages are not reflecting to the membership. He's mentioned this to me a couple of times during the past 6-8 weeks.

I also note that a lot of questions like the one above, and Dick's (W1KSZ) request for a DX map, are not being sent to the group members. Both are examples of things that are quite relevant to DXing. (We changed the default when you hit reply from all members to just the sender in early January, and this is when the "funny behaviour" with the messages seemed to begin.) It seems to me that both of these were valid questions and either the answers were sent

just to the original list member, or to the group but didn't "reflect" properly.

I also get a lot of email that is innocent in terms of the sender, the title and the content being flagged by Yahoo as SPAM. I then have to approve these. I can find no pattern.

I can't explain this because I belong to a number of other Yahoo groups that seem to work just fine. As a first step, I have temporarily changed the default reply so that it goes to all members. Don (N1DG) is the co-owner of the list, and he is quite busy at the moment so this is a unilateral decision on my part. He does monitor this list closely, so if he in not in agreement with my decision, I'm sure I'll hear about it. :-)

Note -- this change means you should just send a "Reply" and NOT a "Reply to all" when answering messages.

Let's give this a go and see if the messages and replies flow a little better. I'm getting tired of approving innocent things like the OPDX bulletin and random emails from long time members that is incorrectly flagged as SPAM, for one thing.

73, Paul VE1DX

SB DX ARL ARLD011
ARLD011 DX news

This week's bulletin was made possible with information provided by 9A2JK, NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AZERBAIJAN, 4K. Axel, DL6KVA will be QRV as 4K0CW in the Russian DX contest as a Single Op/Low Power CW entry. QSL via bureau.

NIGERIA, 5N. Bodo, DL3OCH is QRV as 5N0OCH from Abuja. Activity is mostly during his evenings and weekends on all HF bands. He will try to be active on 160 meters as well. He is using CW, SSB, RTTY and EME. QSL to home call.

CROATIA, 9A. Special event station 9A09P is active until December 31 in celebration of the city of Djurdjevac. Activity is on all bands and modes. QSL via bureau.

CHINA, BY. Luca, IK2NCJ plans to be QRV as B4TG in the Russian DX contest. He will be active as a Single Band entry on either 80 or 20 meters. QSL via operator's instructions.

SOUTH COOK ISLANDS, E5. Tim, NL8F will be QRV as E51COF from Rarotonga Island, IOTA OC-013, from March 21 to April 4. Activity will be on 80 through 10 meters, and possibly 17 meters, using SSB. QSL via K8NA.

HAITI, HH. Jan, K4QD and Don, AF4Z will be QRV as HH4/home calls from March 23 to April 3 while working from here. Activity will be on 160 to 10 meters using CW, SSB and RTTY. They plan to be an entry in the upcoming CQ WW WPX SSB contest. QSL to home calls.

SAUDI ARABIA, HZ. Firas, HZ1FS, Mohamad, HZ1MD and Sulaiman, 7Z1SJ are QRV as HZ1FS/p from IOTA AS-192 until March 23. Activity is on 20, 15 and 10 meters using mostly SSB and some digital modes with

three stations active. QSL via EA7FTR.

OGASAWARA, JD1. Shige, JA1HMM is QRV as JD1BIE from Iwo-Jima, IOTA AS-030, until March 25 while on a short holiday. Activity is on 40 to 10 meters using CW and SSB. QSL to home call.

MONGOLIA, JT. Alexei, UA4HOX, Victor, UA4HBW, Alex, RK4HM, and Eugene, RK3AD are QRV as JT1R until March 22. They will be active in the Russian DX contest as well. QSL via RW4HB.

MARIANA ISLANDS, KH0. KI3DDN, N3MU and K2JA are QRV as KH0/home calls from Saipan, IOTA OC-086, until March 22. Activity is on 160 to 6 meters using CW, SSB and digital modes. QSL via JI3DNN, JA3CEK and JL3SIK, respectively.

ALAND ISLANDS, OH0. Operator OH6EI is QRV as OG0Z until March 23. This includes being active in the Russian DX contest as a Single Op/All Band entry. QSL via W0MM.

SWEDEN, SM. Operators SM5AJV, SM5PHU and SM6LBR will be QRV as SK3W in the Russian DX contest as a Multi/2 entry. QSL via operators' instructions.

GREECE, SV. Operators George, SV1QN/8, Nikos, SW1GYN/8, Fotis, SV1AIN/8 and Giannis, SV1GYG/8 will be QRV from Zakynthos Island, IOTA EU-052, from March 23 to 29. QSL to home calls.

CORSICA, TK. Operators 9A2SX, 9A3AXX, 9A6XX and 9A8MM are QRV as TK/home calls until March 22. Activity is on 160 to 10 meters. They will be active as TK7P in the Russian DX contest. QSL all calls via 9A8MM.

ST. KITTS AND NEVIS ISLANDS, V4. Andy, N2NT is QRV as V47NT until March 23. He will also be an entry in the Russian DX contest. QSL via W2RQ.

MICRONESIA, V6. Yoshi, JJ8DEN is QRV as V63PR from Chuuk Island, IOTA OC-011, until March 24. Activity is on 160 to 10 meters using CW, RTTY, PSK31 and possibly JT65A. QSL to home call.

LORD HOWE ISLAND, VK9L. Members from the Oceania Amateur Radio DX Group will be QRV as VK9LA from March 23 to April 3. Activity is on 160 to 6 meters using CW, SSB and RTTY with seven stations. QSL via VK4FW.

NORFOLK ISLAND, VK9N. Willy, ON5AX and Magda, ON3AX are QRV as VK9N/ON5AX until March 22. QSL direct via ON5AX.

MELLISH REEF, VK9M. George, AA7JV and Tomi, HA7RY will be QRV as VK9GMW from March 22 to April 6. Activity is on all HF bands. QSL via HA7RY.

TURKS AND CAICOS ISLANDS, VP5. Art, N4PJ and Marsha, K4IRI are QRV as VP5/home calls from Providenciales, IOTA NA-002, until March 24. They will also be active as VQ5B in the Russian DX contest. QSL to home calls.

NEW ZEALAND, ZL. Jacky, ZL3CW will be QRV as ZM1A as a Single Op/Single Band 40 meter entry in the Russian DX contest. Ken, ZL1AIH will be a Single Op/All Band CW entry in the contest as well. QSL ZM1A via ZL1AMO.

THIS WEEKEND ON THE RADIO. The 10-10 International Mobile Contest, NCCC Sprint, Feld Hell Sprint, BARTG HF RTTY Contest, SARL VHF/UHF Contest, Russian DX Contest, Oklahoma QSO Party, AGCW VHF/UHF Contest, North Dakota QSO Party, DARC HF SSTV Contest, Virginia QSO Party, UBA 2-Meter Spring Contest, 9K 15-Meter Contest are all will certainly keep contesters busy this weekend. The QRP Homebrewer CW and PSK31 Sprint is scheduled for March 23. The SKCC CW Sprint is scheduled for March 25. Please see March QST, page 78 and the ARRL and WA7BNM contest web sites for details.

I wonder......percentages compared.....the percentile of women against men who have 300 in the books is? I am willing to bet it is higher just because of their voice qualities (and if they have had childern, they are probly better suited for the pileups :)

> She ended up working about 100 in that 20 meter pileup.
> I think she's finally convinced a woman can
> easily draw a crowd on SSB!

Quite a few years ago, there was a licensed XYL I knew at work who didn't have an HF station at home. I invited her over one Sunday afternoon during one of the major SSB DX contests to show her what DXing was all about.

We took turns at the microphone for an hour or so until she got the hang of things. Then we came across a relatively rare African station on 10M who had a huge pileup on his frequency. I had her call him using her call, and she got him on the first call. Then I called him without success for ten minutes. I told her she had just witnessed the power of the female voice in a pileup!

73,

John, K9MM

9329. 6 Meter Amplifier Question

Yahoo group: DX-IS (2009)
Date: 2009-03-20 06:09:01 UTC
From: RICHARD SOLOMON
Topic: 9329 Message: 9329

With the upswing in the Solar Cycle coming (hopefully in my lifetime),

I was thinking of getting a 6 Meter Amplifier. Does anyone on the list

have one that uses the Svetlana GU-74B (4CX800A) ? They look like

a good fit for a MLA-2500 conversion.

But, I need to see if anyone actually did this, not being a pioneer at

heart. You know what happens to pioneers ... they get shot with

arrows and get to sleep on rocks.

73, Dick, W1KSZ

I don't think it's voice quality at all - it's what's behind the voice! I think most hams (which, by default, are mostly males) think every YL on the air is blonde, built and gorgeous! Who cares what they're really like in real life!

When Marsha fires up the rig, she generates an almost immediate pileup. You think those guys will get in line to work me? Even when we're at home, all I can hear from her rig is "who's the YL?" She's already griping that on CW they won't know she's a YL and they won't be so anxious to work her!

It's a real quandary Fred - I'm sure you know as well. If I turn the beam to a favorable position in SA, I might be able to work a couple dozen stations in SA, then I can't hear the U.S. stations. If I turn the beam toward the U.S. then you guys can't hear me very well, but it seems like a "law of signals" situation, hi hi.

My wife asked about turning the beam to SA. I showed her the beam heading, but cautioned her that she wasn't going to work three hours of QSOs, but that they would probably appreciate a chance. At home, we have a SteppIR and can switch the beam very quickly, but here, although rotatable, they are still the old fashioned variety! I've been using Jody's A4S up at her house, which is fixed on EU. Marsha hs been using the Force 12s down here at the cabin. One of them is a 5-band beam, and there's a 40-meter 2-el beam above that one. It's a nice site. The tower is only about 40 feet, but it's about 150 to 200 feet above the beach with a takeoff over water everywhere except due south.

Not exactly an answer to home brewing, Dick, but I have an
ACOM-1000 with that tube in it and it works as well on 6M as the
other bands. 1000 watts out. So it can be done, but I don't know
about retrofitting a MLA-2500 to use one. I *actually* had a
MLA-2500 years ago. Pair of 8875 ugly tubes . . . but it did honk!

It's the same on CW! YO3FRI (Tina) is a YL OP and a good
one. As soon as the first spot says "YL Tina" or equivalent on the
cluster comments, the pileups start! She's in Bucharest, an Air
Traffic controller and happily married with several kids. What do
the OMs think? :-) Anyhow, she does generate pileups.

Propagation Forecast Bulletin 12 ARLP012
>From Tad Cook, K7RA
Seattle, WA March 20, 2009
To all radio amateurs

SB PROP ARL ARLP012
ARLP012 Propagation de K7RA

This reporting week (March 12-18) there were no sunspots, but we saw
a couple of promising magnetic anomalies which faded away before
ever emerging as sunspots.

On Saturday, March 14, Spaceweather.com reported (see
http://spaceweather.com/archive.php?view=1&day=14&month=03&year=2009)
a sunspot which might have been emerging south of the solar equator.

In addition to displaying an image from the SOHO/MDI (Michelson
Doppler Imager) project, Spaceweather.com provided a link to images
from Matthias Juergens in Germany at,
(http://spaceweather.com/submissions/large_image_popup.php?image_name=Matthi
as-Juergens-SU_20090314_cont_1237032723.jpg).
Matthias identified the images as evidence of "small flare activity"
in the southeast.

Also see an image from Pete Lawrence, in West Sussex UK, at
http://spaceweather.com/submissions/large_image_popup.php?image_name=Pete-La
wrence-2009-03-14_15-19-07_SVF70ss_1237053510.jpg.

Note the Spaceweather.com image in the first link shows the possible
sunspot in the lower left quadrant of the visible solar disk, which
according to terrestrial mapping conventions would be the southwest
quadrant. Why is the solar convention opposite? I believe it is
based on a mirror image of the earthly convention.

Instead of imagining yourself in space, looking down at the Earth
with west on your left and east on your right, and then applying the
same convention if facing the Sun, instead look at the Sun from an
earthbound perspective.

Imagine a sunny day, and you are lying flat on a lawn, facing the
Sun, with your body oriented so that your head is toward the north
and feet toward south. Without actually looking at the Sun, your

right side would be pointing west, and if you raise your right arm to point to the right side of the Sun, according to convention that is also the west.

So sunspots travel across the Sun (relative to Earth) from left to right, from east to west.

On Sunday, March 15, Spaceweather.com reported a blank Sun at, http://spaceweather.com/archive.php?view=1&day=15&month=03&year=2009, but that "two proto-sunspots" were visible near the Sun's equator. But the next day, and all week the Sun remained blank. Solar flux has been quite low also.

If you check http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html for daily forecasts, you will see that every day the solar flux prediction has been a solid and unchanging 70 for the following 45 days. But solar flux values have actually declined slightly over the past few weeks. As reported in this bulletin, the weekly average solar flux ending on Wednesdays for the period beginning February 19 and ending March 18 was 70.2, 69.5, 69 and 68.6.

If you check the latest 45-day forecast, which at the time of the writing of this bulletin was March 19, you will see that the predicted planetary A index for March 20-21 is 8, followed by a slightly quieter level of 5. The next moderate geomagnetic disturbance is expected April 9-10, with planetary A index of 15 and 10.

By the time you read this, the Vernal Equinox has passed and it is Spring in the Northern Hemisphere. The equinox is early on March 20 for much of the Western Hemisphere, at 1144z, which is 04:44 PDT and 07:44 EDT. This is a popular time of year for fans of HF propagation, with the Southern Hemisphere moving into the fall season, and bathed in sunlight equal to the Northern Hemisphere.

Al Lorona, W6LX of Arcadia, California asked about transitions from one solar cycle to the next, and what the overlap was like. If we want to take a look at the last transition, from Cycle 22 to Cycle 23, you can inspect old copies of this bulletin in 1996, which was the last solar minimum. The archive is at http://www.arrl.org/w1aw/prop/ and just click on Show Older Bulletins, then Propagation for 1996. You can see the weekly averages, and in the Fall of that year there were weeks of no sunspots. But in 1997 you can see the weekly averages rose substantially. Such is not the case right now.

Looking back to the ARRL International DX Contest, SSB weekend, Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on March 7: "There were surprisingly good condx at least on 20M in the few hours I've operated in the ARRL DX test. On 20M, at the start, the band was open fairly well to JA and KL7RA was loud. J5UAG answered a CQ, and South America up to as far north as Cuba was loud, but by 2335Z

the PYs and LUs were fading out here in favor of areas farther west and by 2355Z almost all stations to the south were gone. But, KH6 was loud. 40 was open well only to southern and western EU at 01Z. At 1515Z, I started tuning across 15M which was only open to the south, but the opening kept improving as I tuned up the band with Caribbean stations becoming loud. I worked as far north as KP2M and FS5KA. V48M who was S5 and not workable thru his pile-up was S9 and easy 10 minutes later. P40A running 100W was the loudest station I heard about 20 db over S9."

John Coleman, K5JVC of Oklahoma City worked the same DX contest, using 5 watts and a 31 foot vertical on 15 meters, which I guess would be about 5/8 wavelength on that band. On Saturday, March 7 beginning at 1335z he worked HI3K, VP5H, 6Y1V, HI3TEJ, VP2E, LT0H, LU2QC, P40A, KP2M, WP4U, PJ4G, and VP8KF (The Falklands were LOUD!) with the last at 1938z. On Sunday he worked (starting at 1518z) PJ2T, WP4SK, YN2NB, TI8M, CE4CT, TI5N, PY1KN, KH7X, KH6RC, CS2C (Europe!), and ZF2AM. CS2C was at 1934z and ZF2AM at 2146z.

John wrote, "All stations were ebbing and flowing rapidly. I would wait a few minutes to see if where their signal was peaking over the course of 3-5 minutes and if they were peaking above S2 I would pounce during the peak. Most peaks only lasted 10-20 seconds and then they were back in the noise."

Harvey Moskowitz, W2YWC of Livingston, New Jersey wrote, "I am working on 5 Band DXCC with only one contact needed for 10 meters to complete the cycle. I check 10 meters periodically daily and the DX websites, as well. Sunday, March 8 openings to SA were apparent and I worked OA4SS, Lima, loud and strong for number 100! Also many signals from Brazil and Argentina. (3 element beam and running 100 watts!) U never know."

George Hall, W4BUW of Taylors, South Carolina also sent a report on 10 meter activity on March 8. He said he didn't spend much time on 10 meters, but did work OA4SS at 2106z with S9 signals, and LU7DAG at 2109, also S9. He heard many other stations on 10 meters, but didn't bother to work them. Like several people who wrote this week, he thinks that may people will tune into a quiet band, and because they don't call CQ, they never know that it was actually open, and think the band must be dead.

Brian Webb, KD6NRP who I believe is in Ventura County, California wrote, "It's a good thing I read last week's propagation bulletin. On Saturday, March 14, I recalled that your propagation bulletin mentioned recent 10-meter openings between the U.S. and South America. At about 2200 UTC I decided to give 10M a try. I tuned around and found a CW station calling CQ. I answered and subsequently had a QSO with KH6ZM on Hawaii's big island. What a pleasant surprise! Although I have worked several stations on 10-meters via E-skip, this was my first long-range contact on that

band."

Brian has a very interesting web site, http://www.spacearchive.info/ which has info on launches from Vandenberg Air Force Base.

I've noticed that sometimes I can see the antennas of readers who write in to the bulletin, via aerial photos at http://maps.live.com/. Just look up the street address online at http://www.qrz.com/ or http://www.arrl.org/ and enter it with the ZIP code on the maps.live page. On many locations, an option called "Bird's eye" will appear. Click on this option and instead of a satellite photo, you can see a high resolution aerial photo taken from a low flying plane. In the upper left you can use + to zoom in, and if you select another direction (it defaults to north), you don't just turn the image, but you actually see a different photo from a different perspective, often taken on a different day with different lighting conditions. For example, enter 225 Main St, 06111 for a view of W1AW.

Finally, Art Jackson, KA5DWI of North Richland Hills, Texas has an interesting and useful document on seasonal sporadic-E propagation, which will probably increase next month. Read it at, http://propnet.org/docs/art/ProbabilityEs.pdf. This looks like it perhaps could be an update to a similar document mentioned in Propagation Forecast Bulletin ARLP018 from last year, which is no longer available at the URL mentioned at that time.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for March 12 through 18 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 68.7, 68.2, 68.5, 68.4, 69.4, 68.8, and 68.4 with a mean of 68.6. Estimated planetary A indices were 6, 16, 9, 7, 5, 3 and 1 with a mean of 6.7. Estimated mid-latitude A indices were 6, 10, 7, 5, 4, 3 and 0 with a mean of 5.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

4U1UN - Bernie, W3UR and other four operators will be active from the United Nations Headquarters during the weekend. Activity is expected to begin around 21 UTC on 20 March and continue into midday on the 22nd. They will be QRV with two stations, with an emphasis on the low bands and special attention for Japan (20m at 21.30-23.00 UTC), VK/ZL & other Pacific (40m at 09.00-11.00 UTC), VK6 (20m at 00.00 UTC; 40m longpath at 22.30-23.30 UTC). QSL via HB9BOU. Updates will be posted on http://twitter.com/dailydx [TNX The Daily DX]
5N - 5N0OCH is the callsign issued to Bodo, DL3OCH (HB9EHJ) for HF activity during his stay in Abuja, Nigeria, from 21 March until July [425DXN 931]. He plans to operate during his spare time on160-10 metres CW, SSB and RTTY. Hopefully he will also go and operate from IOTA group AF-076. Further information can be found at http://www.dl3och.de/. QSL via home call, direct or bureau.
5Z - Eltje/PA3CEE, Rene/PE1L and Ronald/PA3EWP will be active from Kenya on 1-12 April. They will operate as 5Z4EME on 2m and 70cm EME (details can be found at www.emelogger.com/kenya); Ronald will also operate on the HF bands as 5Z4/PA3EWP, using verticals for 10-40 metres and a homemade amplifier. QSL 5Z4EME via PA3CEE, QSL 5Z4/PA3EWP via PA7FM. [TNX PA3EWP]
8P - Richard, G3RWL will be active as 8P6DR from Barbados (NA-021) on 2-24 April. He will operate holiday style on 160-10 metres CW and digital modes. Better not to expect him on the bands on 8 April, as it will be his wedding day! QSL via home call, sirect or bureau (e-mail requests for bureau cards can be sent to g3rwl@...). [TNX G3RWL]
9A - Celebrating the 800th anniversary of the charter that granted city rights to Varazdin, the local radio club (9A1HDE/9A7A) will operate as 9A800VZ until the end of the year. The first activity will be during the CQ WW WPX SSB Contest on 28-29 March. QSL via 9A7A. [TNX 9A2X]
9M8 - Steve, 9M6DXX has changed his plans [425DXN 931] and will now

operate as 9M8Z from Sarawak, East Malaysia (OC-088) on 21-29 March, CQ WW WPX SSB Contest included. Outside the contest, look for him especially on 40 metres SSB. QSL via M0URX, direct, bureau or LoTW. [TNX 9M6DXX]
CT3 - Helmut, DF7ZS will participate in the CQ WW WPX SSB Contest as CS9L from Madeira (AF-014). Expect some casual operating as CT3/DF7ZS between 24 and 31 March. QSL CS9L via DJ6QT, QSL CT3/DF7ZS via home call (bureau preferred). [TNX DF7ZS]
DU - Max, M0GHQ will be visiting the Philippines between late March and late April. He expects to operate from the islands of Cebu (OC-129), Samal (OC-235, 29-31 March) and Mindanao (OC-130), and to attend the Philippine Amateur Radio Association's 77th annual hamvention, to be held on 17-19 April on Leyte Island (OC-129). He plans to be active on 160-10 metres (plus possibly 6 metres) SSB, PSK31 and RTTY with 100 watts and wire antennas. [TNX The Daily DX]
E5_sc - Bob, ZL1RS as E51EME and Lance, W7GJ as E51SIX will activate the South Cook Islands on 2 and 6 metres EME between 26 March and 4 April. They will operate from Rarotonga (OC-013, grid BG08dr). Further information can be found at http://www.bigskyspaces.com/w7gj/E51SIX.htm [TNX OZ6OM]
GM - Theo, ON4ATW and others have a plan to be active as MM0RAI/p from Rockall (EU-189) for three days during the first week of May. A dedicated website is under construction and is expected to be launched by the end of March. [TNX MM0NDX]
GW - The Strumblehead DX and Contest Group (http://www.mc0shl.com) will participate in the CQ WW WPX SSB Contest as both MW9W and MC0SHL - depending on the number of operators there may be more calls on air. QSL via M0URX. Expect some activity on 30m RTTY before the contest. [TNX G1VDP]
HZ - Mohamad/HZ1MD, Firas/HZ1FS and Sulaiman/7Z1SJ are active as HZ1FS/p from Hibar Island, in the Red Sea Coast South/Jizan Province group, IOTA AS-192 (new one). They expect to operate mainly SSB, with some digital modes and maybe CW, and to remain on the island until the 23rd, or even longer depending on local conditions. QSL via EA7FTR.
I - A team from ARI San Severo and a few guest operators will be active as IL7G from the Tremiti Islands (EU-050) from 30 May to 2 June. They plan to operate CW, SSB and RTTY on 160m-70cm, and to participate in the 13th Gargano Contest (31 May, 6m CW and SSB). QSL via IW7EBE, direct or bureau. The logs will be uploaded to LoTW. Further information can be found at www.qrz.com under IL7G. [TNX I7CSB]
J6 - John, W5JON will be active as J6/W5JON from St. Lucia (NA-108) from 25 March to 2 April. He plans to operate on 160-6 metres and to participate in the CQ WPX SSB Contest. QSL via W5JON. [TNX The Daily DX]
JD1_oga- A fourth operator will be joining the three ones who will be active from Chichijima (AS-031), Ogasawara between 29 April and 12 May [425DXN 929]. Dates and callsigns are as follows:
JD1BLK 29 April-5 May QSL via JM1LJS

JD1BLY 29 April-5 May QSL via JI5RPT
JD1BMT 2-5 May QSL via JE4SMQ
JD1BMH 2-12 May QSL via JG7PSJ
They plan to operate CW, SSB and data modes on 160-6 metres, plus satellite. Logsearches and further information will be available on their individual websites: http://radio-dream.com/jd1blk/e/ (JD1BLK), http://sapphire.ganko.tohoku.ac.jp/jd1bmh/ (JD1BMH) and http://www.ji5rpt.com/jd1/ (JD1BLY) [TNX JI5RPT]
JT - Alexey/UA4HOX, Vic/UA4HBW, Eugeny/RK3AD and Alex/RK4HM have been active as JT1R from Mongolia since 17 March. They will participate in the Russian DX Contest and will remain there through 25 March. QSL via RW4HB. Log search and updates can be found at www.hamonline.ru [TNX RA4HT]
KH0 - Toshiyuki, JP1PZE will be active as K7XF/KH0 from Saipan (OC-086) on 3-7 April. He plans to operate CW, SSB and RTTY on 80-10 metres. QSL via JP1PZE, direct or bureau. [TNX JP1PZE]
KP2 - Ann, KP2YL and Brian, KP2HC will be active from St. Croix, US Virgin Islands (NA-106) from 28 March through 7 April. Look for them on 160-6 metres CW and SSB. As always, Brian will be monitoring 6m for any band openings. QSL direct only (see www.qrz.com), with sufficient postage to cover the upcoming US postal rate increase. [TNX KP2HC]
OH0 - Anne, OH2YL will be active as OH0/OH2YL from the Aland Islands (EU-002) on 9-14 April. She will operate CW and SSB on the HF bands. QSL via home call. [TNX OH2YL]
OY - Health problems have caused Lars, OZ1FJB to cancel his 16 March-1 April trip [425DXN 932] to the Faroe Islands. [TNX The Daily DX]
OZ - Paolo, I2AE will be touring Denmark indicatively between 1 and 15 May. He plans to visit and operate on 40 and 20 metres SSB as OZ/I2AE/p from a large number of islands (most of them qualifying for IOTA groups EU-125, EU-171, EU-172 or EU-029) and lighthouses. QSL via home call. His planned itinerary can be found at http://www.qrz.com/db/i2ae [TNX I2AE]
PA - Adriaan, PE2KP (previous callsign PE1KHP, www.pe2kp.nl) will be active on all bands and modes as PE25KP on 1-12 May to celebrate his Silver Jubilee with amateur radio. QSL via bureau to PE2KP. [TNX PE2KP]
VE - The VX8X expedition to Ellice Island (NA-192) [425DXN 931] has been postponed and is now scheduled to happen on 2-5 April. The plan has been revised to include more operating time on 40 and 17 metres in addition to the planned activity on 20 metres. Expect to hear simultaneous operations on two bands during peak hours. Special attention will be given to Europe and Japan. Bookmark http://ve8ev.blogspot.com/search/label/IOTA for updates. [TNX VE8EV]
VK9L - Announced frequencies for the 23 March-3 April VK9LA DXpedition to Lord Howe [425DXN 929] are:
SSB 3797, 7084, 14250, 18165, 21290, 24987, 28470, 50100
CW 1813, 3513,7013, 10106, 14023, 18072, 21023, 24892, 28023, 50100
RTTY 10135, 14088, 18100, 21088, 24925, 28088

A serious emphasis will be put on the low bands, and "extensive work has taken place to make sure all operators are familiar with various sunrise sunset times throughout the world". There will be an operator on every low band every day whend they are in darkness. Detailed information on the operating strategy on the low bands can be found at http://www.odxg.org/vk9la.htm. They also expect "huge openings" on 30 metres, and, with their station separation, they should be able to run two stations simultaneously to maximize openings. The DXpedition will have Internet capability 24 hours a day, and they intend to have photos, on-line log check and QSO totals updated on a regular basis. QSL via VK4FW, direct or bureau. Direct and bureau cards can also be requested through the On-line QSL Request Service (details on the website). Two team members (SQ8X and SQ9DIE) are also on Twitter (http://twitter.com/vk9la).

VK9M - The VK9GMW team (George, AA7JV and Tomi, HA7RY) [425DXN 929] has been enroute to Mellish Reef since 17 March. However, they are currently stuck at Marion Reef to wait for the "extreme weather conditions" to improve. They hope to be able to continue their voyage on Sunday or Monday, but the low pressure system "poses a serious danger" to them. QSL via HA7RY. An Online QSL Request Service (OQRS) for bureau cards will be available after the end of the operation. The log will be uploaded to LoTW. Further information and updates can be found at http://www.vk9gmw.com

YJ - Dennis, F5VHY (G3MXJ) and Nigel, G3TXF will be active as YJ0MXJ and YJ0TXF from the Aore Island Resort off Espiritu Santo (OC-035), Vanuatu from 10 UTC on 27 March to 15 UTC on 1 April. They will operate CW only, mainly on 40, 30, 20 and 17 metres. There will be no 160m, but if local conditions permit they will try 80 metres. QSL via home calls. On their way out to and back from Vanuatu they will operate from New Caledonia (FK/G3MXJ and FK/G3TXF, 25-26 March) and Norfolk Island (G3MXJ/VK9N and G3TXF/VK9N, 4 April). All logs will be uploaded to LoTW. The web page for the expedition can be found at www.g3txf.com/dxtrip/YJ/YJ.html

YU - Lui, HB9EDB will be active as YU/HB9EDB from the Resava Valley Amateur Radio Club (YU1ARC, http://www.yu1arc.com) from 25 March to 1 April, including an entry in the CQ WW WPX SSB Contest. [TNX HB9EDB]

ZF - Adrian, AA5UK will be active from the Cayman Islands (NA-016) from 25 March to 8 April. He will be using ZF2AE from Grand Cayman and ZF2AE/ZF8 from Little Cayman; he plans to operate holiday style on AO-51, SO-50, VO-52 and FO-29 satellites, and to be on the HF bands (40-10 metres) for part on the CQ WW WPX SSB Contest and the rest of his stay on Little Cayman. Look for him especially during his afternoon and evening hours. QSL via home call, direct, bureau, LoTW or eQSL. [TNX AA5UK]

ZF - Sharon, K7WZB and Garry, K9WZB will be operating from the Cayman Islands (NA-016) from 21 April to 6 May. Look for ZF2ZB on 160-6 metres SSB, RTTY, CW and PSK 31. They will be monitoring 6 metres

most of the time for opening to US and Europe. QSL direct to
K9WZB. [TNX K9WZB]

HOLYLAND CONTEST ---> The Holyland DX Contest 2008 results can be found on the IARC website (http://www.iarc.org/?page_id=353/), along with the rules for this years' event (18 April, 00.00-23.59 UTC). [TNX 4Z4KX]

QSL VP2MKK ---> Please note that the QSL route for the recent activity is via KK1KW (direct, LoTW or eQSL). The QSL route for contacts made with VP2MKK operated by W6KK on 2-13 December 2004 is via W8QID. [TNX The Daily DX]

QSL VIA 3A2LF ---> Claude, 3A2LF is closing down the logs for 3A100GM (1995), 3A7G (1997) and 3A50R (1999). If you still need a card, please go direct to Claude Passet, 3 allee Guillaume Apollinaire, MC 98000 Monaco. Claude also still has a few blank cards for other special callsigns, please e-mail him (cpasset@...) and check for availability. [TNX 3A2LF]

QSLs received direct or through managers: 1A0KM, 3B8CF, 3DA0VB, 3V8BB, 3V8SS, 4L0B, 4L4MM, 4L8A, 4O0A, 4O0HQ, 4S7AB, 4S7NE, 4W6MM, 4X4WN, 4Z1UF, 5B/AJ2O, 5B4/RW9UP, 5D0IPY, 5H3VMB, 5I3A, 5N/LZ1QK, 5R8VB, 5X1VB, 5Z4/UA4WHX, 5Z4/W0NB, 6W/DL2RMC, 6W7RV, 7P8BA, 7P8VB, 7Q7VB, 8P0P, 8P1A, 8P9MD, 8Q7AU, 8R1AK, 9J2BO, 9J2VB, 9M6XRO, 9M8Z, 9U0VB, 9X0R, 9X0VB, A45WD, A5100A, A71CV, A92GE, AP2DKH, BA0AA, BT1OB, BT1OH, BT1OJ, BT1ON, BT1OY, C4N, C6AKX, C91VB, CE0Y/N6NO, CE1/K7CA, CE9/K2ARB, CO6LC/7 (NA-086), CX/IK1PMR, CX9AU, CY0X, D20VB, D2NX, D4C, D60VB, DU3NXE, DU6BG, E51QQQ, EA9EU, EA9IB, EK6TA, EL2DX, ES1QD, ET3JA, EY7AF, FJ/G3TXF, FJ5KH, FK8CP, FM5CD, FO/DJ7RJ, FO/N6JA, FR5DN, FS5KA, FW5RE, FW8DX, H44MY, HF0POL, HI9/EA3BT (NA-122), HI9/EA3WL (NA-122), HP3TA, IE9N (EU-051), II5AM, J20VB, J88XF, JA7GAX/6 (AS-037), JA7GAX/6 (AS-049)JD1BMM, KP2/K3CT, KP2AD, N8S, OD5/UA4WHX, OH0R, OX5AA, OY/G3TXF, P29NI, PJ2/DJ8NK, PZ5TX, R1FJT, RZ0AF, SD7W/5 (EU-084), ST2VB, SV0XBM/9, SV2ASP/A, T30XX, T31DX, T32YY, T33ZZ, T77C, TA2RC, TF/DL3PS (EU-071), TF/DL3PS (EU-168), TF4M, TF60IRA, TJ3G, TN5SN, TO3R, TR50R, TT8JT, TX5C, UK9AA, UP0L, V26G, V31MR, V31PP, V51VV, V8PMB, VK9DNX, VK9NS, VP2ETN, VP6DI, VP6PR, VP8DKF, VQ9JC, VQ9LA, VR2PX, XU7AAJ, XW1A, XW1B, XX9C, YB1ALL, YJ0MM, YK9G, YN2Z, Z2/UA4WHX, Z29KM, ZD7X, ZD8UW, ZF2NN, ZK2AH, ZK3AH, ZP0R.

To all radio amateurs

SB PROP ARL ARLP012
ARLP012 Propagation de K7RA

This reporting week (March 12-18) there were no sunspots, but we saw a couple of promising magnetic anomalies which faded away before ever emerging as sunspots.

On Saturday, March 14, Spaceweather.com reported (see http://spaceweather.com/archive.php?view=1&day=14&month=03&year=2009) a sunspot which might have been emerging south of the solar equator.

In addition to displaying an image from the SOHO/MDI (Michelson Doppler Imager) project, Spaceweather.com provided a link to images from Matthias Juergens in Germany. (See http://www.arrl.org/news/stories/2009/03/20/10714/?nc=1 for the link.)

Matthias identified the images as evidence of "small flare activity" in the southeast.

Also see an image on Spaceweather.com from Pete Lawrence, in West Sussex UK. (See http://www.arrl.org/news/stories/2009/03/20/10714/?nc=1 for the link.)

Note the Spaceweather.com image in the first link shows the possible sunspot in the lower left quadrant of the visible solar disk, which according to terrestrial mapping conventions would be the southwest quadrant. Why is the solar convention opposite? I believe it is based on a mirror image of the earthly convention.

Instead of imagining yourself in space, looking down at the Earth with west on your left and east on your right, and then applying the same convention if facing the Sun, instead look at the Sun from an earthbound perspective.

Imagine a sunny day, and you are lying flat on a lawn, facing the Sun, with your body oriented so that your head is toward the north and feet toward south. Without actually looking at the Sun, your right side would be pointing west, and if you raise your right arm to point to the right side of the Sun, according to convention that is also the west.

So sunspots travel across the Sun (relative to Earth) from left to right, from east to west.

On Sunday, March 15, Spaceweather.com reported a blank Sun at, http://spaceweather.com/archive.php?view=1&day=15&month=03&year=2009, but that "two proto-sunspots" were visible near the Sun's equator. But the next day, and all week the Sun remained blank. Solar flux has been quite low also.

If you check http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html for daily forecasts, you will see that every day the solar flux prediction has been a solid and unchanging 70 for the following 45 days. But solar flux values have actually declined slightly over the past few weeks. As reported in this bulletin, the weekly average solar flux ending on Wednesdays for the period beginning February 19 and ending March 18 was 70.2, 69.5, 69 and 68.6.

If you check the latest 45-day forecast, which at the time of the writing of this bulletin was March 19, you will see that the predicted planetary A index for March 20-21 is 8, followed by a slightly quieter level of 5. The next moderate geomagnetic disturbance is expected April 9-10, with planetary A index of 15 and 10.

By the time you read this, the Vernal Equinox has passed and it is Spring in the Northern Hemisphere. The equinox is early on March 20 for much of the Western Hemisphere, at 1144z, which is 04:44 PDT and 07:44 EDT. This is a popular time of year for fans of HF propagation, with the Southern Hemisphere moving into the fall season, and bathed in sunlight equal to the Northern Hemisphere.

Al Lorona, W6LX of Arcadia, California asked about transitions from one solar cycle to the next, and what the overlap was like. If we want to take a look at the last transition, from Cycle 22 to Cycle 23, you can inspect old copies of this bulletin in 1996, which was the last solar minimum. The archive is at http://www.arrl.org/w1aw/prop/ and just click on Show Older Bulletins, then Propagation for 1996. You can see the weekly averages, and in the Fall of that year there were weeks of no sunspots. But in 1997 you can see the weekly averages rose substantially. Such is not the case right now.

Looking back to the ARRL International DX Contest, SSB weekend, Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on March 7: "There were surprisingly good condx at least on 20M in the few hours I've operated in the ARRL DX test. On 20M, at the start, the band

was open fairly well to JA and KL7RA was loud. J5UAG answered a CQ, and South America up to as far north as Cuba was loud, but by 2335Z the PYs and LUs were fading out here in favor of areas farther west and by 2355Z almost all stations to the south were gone. But, KH6 was loud. 40 was open well only to southern and western EU at 01Z. At 1515Z, I started tuning across 15M which was only open to the south, but the opening kept improving as I tuned up the band with Caribbean stations becoming loud. I worked as far north as KP2M and FS5KA. V48M who was S5 and not workable thru his pile-up was S9 and easy 10 minutes later. P40A running 100W was the loudest station I heard about 20 db over S9."

John Coleman, K5JVC of Oklahoma City worked the same DX contest, using 5 watts and a 31 foot vertical on 15 meters, which I guess would be about 5/8 wavelength on that band. On Saturday, March 7 beginning at 1335z he worked HI3K, VP5H, 6Y1V, HI3TEJ, VP2E, LT0H, LU2QC, P40A, KP2M, WP4U, PJ4G, and VP8KF (The Falklands were LOUD!) with the last at 1938z. On Sunday he worked (starting at 1518z) PJ2T, WP4SK, YN2NB, TI8M, CE4CT, TI5N, PY1KN, KH7X, KH6RC, CS2C (Europe!), and ZF2AM. CS2C was at 1934z and ZF2AM at 2146z.

John wrote, "All stations were ebbing and flowing rapidly. I would wait a few minutes to see if where their signal was peaking over the course of 3-5 minutes and if they were peaking above S2 I would pounce during the peak. Most peaks only lasted 10-20 seconds and then they were back in the noise."

Harvey Moskowitz, W2YWC of Livingston, New Jersey wrote, "I am working on 5 Band DXCC with only one contact needed for 10 meters to complete the cycle. I check 10 meters periodically daily and the DX websites, as well. Sunday, March 8 openings to SA were apparent and I worked OA4SS, Lima, loud and strong for number 100! Also many signals from Brazil and Argentina. (3 element beam and running 100 watts!) U never know."

George Hall, W4BUW of Taylors, South Carolina also sent a report on 10 meter activity on March 8. He said he didn't spend much time on 10 meters, but did work OA4SS at 2106z with S9 signals, and LU7DAG at 2109, also S9. He heard many other stations on 10 meters, but didn't bother to work them. Like several people who wrote this week, he thinks that may people will tune into a quiet band, and because they don't call CQ, they never know that it was actually open, and think the band must be dead.

Brian Webb, KD6NRP who I believe is in Ventura County, California wrote, "It's a good thing I read last week's propagation bulletin. On Saturday, March 14, I recalled that your propagation bulletin mentioned recent 10-meter openings between the U.S. and South America. At about 2200 UTC I decided to give 10M a try. I tuned around and found a CW station calling CQ. I answered and subsequently had a QSO with KH6ZM on Hawaii's big island. What a

pleasant surprise! Although I have worked several stations on 10-meters via E-skip, this was my first long-range contact on that band."

Brian has a very interesting web site, http://www.spacearchive.info/ which has info on launches from Vandenberg Air Force Base.

I've noticed that sometimes I can see the antennas of readers who write in to the bulletin, via aerial photos at http://maps.live.com/. Just look up the street address online at http://www.qrz.com/ or http://www.arrl.org/ and enter it with the ZIP code on the maps.live page. On many locations, an option called "Bird's eye" will appear. Click on this option and instead of a satellite photo, you can see a high resolution aerial photo taken from a low flying plane. In the upper left you can use + to zoom in, and if you select another direction (it defaults to north), you don't just turn the image, but you actually see a different photo from a different perspective, often taken on a different day with different lighting conditions. For example, enter 225 Main St, 06111 for a view of W1AW.

Finally, Art Jackson, KA5DWI of North Richland Hills, Texas has an interesting and useful document on seasonal sporadic-E propagation, which will probably increase next month. Read it at, http://propnet.org/docs/art/ProbabilityEs.pdf. This looks like it perhaps could be an update to a similar document mentioned in Propagation Forecast Bulletin ARLP018 from last year, which is no longer available at the URL mentioned at that time.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for March 12 through 18 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 68.7, 68.2, 68.5, 68.4, 69.4, 68.8, and 68.4 with a mean of 68.6. Estimated planetary A indices were 6, 16, 9, 7, 5, 3 and 1 with a mean of 6.7. Estimated mid-latitude A indices were 6, 10, 7, 5, 4, 3 and 0 with a mean of 5.

From: RICHARD SOLOMON
Topic: 9341 Message: 9341

I have a chance to pick up one of these, it has two 3-500Z's in it.

The Model Number is 9306UL. I would like to put it on 6 Meters.

Has anyone had any experience with one of these ? Does anyone

have any info on it ?

I am awaiting my membership approval on the Amp reflector, but

thought I would ask here while waiting.

Thanks, Dick, W1KSZ

The Ohio/Penn DX PacketCluster
DX Bulletin No. 901
BID: $OPDX.901
March 23, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, W3ML, W3UR & The Daily DX, K4ZLE, N4AA & QRZ DX, K8YSE, N0TG, 7Z1SJ, 9A2X, DF7ZS, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EC1AE, F5NQL & UFT, I1JQJ/ IK1ADH & 425 DX News, OK1DOT, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE8EV and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-March, through Sunday, 22nd-March there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FW, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4Z, ISRAEL. Ziv, 4Z4OQ, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via 4Z4OQ.

8P, BARBADOS. Tom, W2SC, will be active as 8P1A during the CQWW WPX DX SSB Contest (March 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via NN1N.

9A800, CROATIA. Members of the Radio Club "Varazdin" (9A1HDE/9A7A) will be active as 9A800VZ until the end of the year. First activity will be during the CQWW WPX SSB Contest (March 28-29th). Activity is to celebrate the 800th anniversary that King Andrija II gave to the people of Varazdin the status as a free and royal town. More details are available on QRZ.com. QSL via 9A7A.

9M8, EAST MALAYIA (Update/Change). Steve, 9M6DXX, will operate as 9M8Z from Sarawak (OC-088), March 21-29th. Activity will include the CQ WPX SSB Contest (March 28-29th) as a Single-Operator/Unassisted/All-Band/ High-Power entry. Outside the contest look for him to be on 20 meters SSB early afternoons, 40 meters SSB later on. He will use a 3 element Yagi. QSL via M0URX, direct, by the Bureau or LoTW. The reason Steve is going earlier than first announced, is that he has been asked to give a presentation on DXpeditioning at an "Amateur Radio Roadshow" being held by MCMC, the Malaysian licensing authority, on Saturday, March 21st.

ANOTHER ANTARCTIC OP & CRUISE IS BEING PLANNED. Mehdi, F5PFP, announced this past weekend that he is in touch with several French skippers for another planned expedition to the Antarctic area to take place in 2 years. He stresses that this is just in the "PROJECT stage", not an official announcement!! The itinerary would be more or less the following:
Machu Picchu + Republica del Ecuador refuge (King George Island)
Cerda traces station (Deception Island)
Maldonado (Greenwich Island)
Portal Point traces station (West Graham island)
Port Circoncision (Petermann Island)
Yelcho (Doumer Island)
Melchior (Observatorio Island)
And possibly a few more bases/refuges
Mehdi states this kind of expedition will take a long time to prepare because of the high cost (+/- 6000 Euros per person). If you wish to be part of Mehdi's team, send an E-mail to him at: f5pfp@...

ATTENTION TOPBANDERS! This web page may be of interest to the Topbanders. Site provides a "Whos Who on Topband" at: http://www.qsl.net/160/

C9, MOZAMBIQUE. Just a reminder that members of the Texas DX Society will be active as C91TX from Bilene, Maputo Province, between March 25th and April 5th. Bilene is 180km from the capital city of Maputo. Activity will be on all bands 160-10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. They will participate in the CQWW WPX SSB Contest (March 28-29th). Operators mentioned are: Cal/WF5W, Paul/W5PF, Madison/W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL. QSL Manager for C91TX is W5PF. Depending on internet access, they hope to have an online log search page once operations start, but don't expect daily updates. For updates, visit the Texas DX Society C91TX Web page at: http://www.tdxs.net/c91.html

CQ3, MADEIRA ISLANDS. Members of the CT3Team will be active as CQ3T during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via the LoTW or CT3KN.

CT3/CS9, MADEIRA ISLANDS (Update). Helmut, DF7ZS, will be active as CT3/homecall between March 24-31st. His activity will include the CQWW WPX SSB Contest (March 28-29th). He will sign CS9L for the contest. QSL via DJ6QT. Look for casual operation before the contest. QSL via the Bureau. Visit his Web page at: http://www.df7zs.de

CY0, SABLE ISLAND. Randy, N0TG, informs OPDX: "Everything is coming together nicely for the October 2009 DXpedition. Formal authorization to access the island has been received, and the team is actively preparing. Everyone is invited to visit the Web site periodically for continuing detailed information at: http://www.cy0dxpedition.com
Also, the team would invite you to sign the Guestbook." From their Web page, activity will take place between October 7-14th, and operators will sign homecall/CY0. Operators mentioned are: Murray/WA4DAN, Randy/N0TG and Ron/AA4VK. Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns.

DAYTON HAMVENTION DX ACTIVITIES. The SouthWest Ohio DX Association (SWODXA) is pleased to announce the speakers for this year's DX dinner to be held in conjunction with the 2009 HamVention. Their speakers will be John Stanley/K4ERO, and Ruth Stanley/WB4LUA. This husband and wife team travel the globe installing, maintaining and training personnel for religious international shortwave stations. They have been to over 60 DXCC entities and operated from more than 12 of them. John has written many technical articles in the ham journals (with one in the April 2009 issue of QST), is a recipient of the 2007 Doug DeMaw Technical Excellence Award and is an ARRL Technical Advisor, having contributed many pieces to the ARRL Handbook. When they accepted the invitation to be our speakers, Ruth commented that they have "....lots of interesting details about antennas and contest sites and DXing possibilities along with stories and more stories. I can hardly wait to hear what we'll say."
The dinner will be Friday evening, May 15th, at the Crowne Plaza Hotel, located in Dayton city center. Attendees will have their choice of either a steak dinner or a vegetarian dinner. They must be informed when the tickets are ordered if you want the vegetarian option. Tickets are 39.00 USDs per meal, payable in U.S. funds to SWODXA. (Sorry, they do not process PayPal or Credit Card payments.) Please advise if you want a vegetarian meal when you order. Order from Pete Meyer, N0FW, at his CBA. SASE is required or you may pick up your tickets at the door. They attempt to honor group seating requests when tickets are ordered together. There is not a bad seat in the house, but seating is definitely limited. Come join them for an evening of fun and fellowship.
As in the past, there will be some nice door prizes. Last year the main prize was an Icom IC-756 Pro III, but this year ICOM has promised them one of the first IC-7600's to be brought in to the United States! Up-to-date information may be found on the club's Web site at: http://www.swodxa.com
Pete's E-mail address is: n0fw <at> live <dot> com.
Last year Yaesu joined them in sponsoring the DX forum during HamVention. They have agreed to partner with them again for 2009. There will be a FT-2000 with PEP raffled off at the end of the DX forum. The winner does not have to be present. Tickets for a chance on the FT-2000 are 5.00 USDs each or 5 for 20.00 USDs. For your convenience, they may be ordered at

the same time you purchase your DX dinner tickets. All proceeds from this raffle are used by SWODXA to assist in providing DXpedition grants. Confirmed DXpeditions to present at the DX forum are: E44M by Simone, IZ0BTV; K5D by TBD; African DX Safaris by Frosty, K5LBU; VK9DWX by Josh, W4WJF. The DX forum is currently scheduled for Saturday, May 16th, to begin at 2:45 PM.

E7, BOSNIA-HERZEGOVINA. Operators Richard/9A1TT, Vlado/E70T, Zoka/E76C, Braco/E77DX and Rob/E77E will be active as E7DX during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via E77E.

EF8, CANARY ISLANDS (AF-004). Operator Valery, RD3AF, will be active as EF8M during the CQ WW WPX CW Contest (May 30-31st) as a Single-Op/All-Band/ High-Power entry. QSL via UA3DX (QRZ.com).

FJ, ST. BARTHELEMY (NA-146). Operators Oscar/EB1HF and Pablo/EC1DPM will be active as FJ/homecall between April 7-12th. Activity will be only on the digital modes, principally on RTTY, on the 20/15/10 meter bands. They will have two Icom 706s into dipoles and a 2 element yagi (by Super Antenna). Their QSL Manager is EC1AE. QSL only direct, (w/SAE + 2 USDs) or (w/SAE + 1 IRC) VALID CN01 IRC, to: Oscar Gancedo, P.O. Box 921, E-33080, Oviedo, SPAIN.

HH, HAITI (Update to OPDX.849/899). Operators Jan/K4QD and Don/AF4Z will be active as HH4/homecall from the Northwest Haiti Christian Mission (www.nwhcm.org) between March 24th and April 4th. They will operate 80-10 meters on CW, SSB and RTTY as time permits. Nighttime low band operations will be limited to the availability of AC power. They will also participate in the CQWW WPX SSB Contest (March 29-30th), along with Jean-Robert, HH2JR, using the special prefix and callsign 4V4JR for the contest. QSL via their home callsigns. Operators prefer direct or LoTW, but the Bureau is "OK".

HQ2, HONDURAS. Operator Dan, HR2DMR, will be active as HQ2W during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band/High-Power/ Assisted entry. He will use monobander antennas on 20/15/10m and sloper antennas on 160/80/40m. QSL via HR2DMR. QSL via address on QRZ.com.

IOTA NEWS.....
AS-192. (UPDATE/New IOTA) Operators Firas/HZ1FS, Mohamad/HZ1MD and Suli/7Z1SJ are now active as HZ1FS/P from Hibar Island in the Red Sea Coast South (Jizan Province) Group until March 23rd (but may stay longer). Activity will be mainly SSB with possibly some CW and Digital, on 160/40/20/17/15/10 meters. They will have three stations with many antennas (mainly using a spider beam on 20/15/10m). QSL via EA7FTR.

EU-052. Operators George/SV1QN, Fotis/SV1AIN, Giannis/SV1GYG and Nikos/SW1GYN will be active as homecall/8 from Zakynthos Island [aka Zante] (GIOTA INS-015, MIA MG-138, WLOTA 0209) between March 23-29th. Activity will be on 160-6 meters using all modes. QSL via their home callsigns.

EU-189. SPECIAL NOTICE by Theo, ON4ATW, about the Rockall operation (dated March 21st): "We are disappointed and surprised to read the news on some web pages and DX-bulletins about our planned operation from Rockall Island sometime this year. Apparently one of the organizations where we filled out an application form in order to receive sponsoring has abused this information and distributed this without notice to us. Sadly all information on those web pages and personal blogs is misleading and definitely not correct! Please be advised that any information will be forthcoming from me ON4ATW or at least will carry my signature in order to inform the DX community with real and up-to-date information. We are at a critical phase in preparing this expedition and releasing info at this stage could jeopardize the whole operation. Therefore, I ask you, our audience, to standby until accurate and inside information will be released once we have the feeling it is time to do so. Up until now nothing is official and we do not agree with individuals sending info to the DX-bulletins without prior notice to one of the actual Rockall 2009 team members."

NA-192. (Op Delayed) The date for the VX8X DXpedition has been moved back two weeks due to the requirements of the ongoing drilling operations on Ellice Island. Operators John/VE8EV, Wally/VE8DW and Gerry/VE8GER will now be active as VX8X from Ellice Island, April 2-5th. Activity will be on 40/20/15 meter CW/SSB during a 24 hour per day non-stop operation. Expect to see them on CW, but most of the focus will be on 20 meter SSB on 14260 kHz. QSL via the information on QRZ.com under VX8X. For additional info and possible updates, visit the following Web page at: http://ve8ev.blogspot.com/search/label/IOTA

JW, SVALBARD. Just a reminder that Francois, F8DVD, will once again be active as JW/F8DVD from the Longyearbyen ARC located on Spitsbergen Island, 78 degree North, and about a thousand kilometers far from the geographic North Pole (EU-026, WAZ 40 and Grid Square JQ78TF), April 19-25th. His activity will be on all HF bands both CW and SSB. This will be Francois's 6th time on the island. He will use the Longyearbyen Radio Club's equipment which consists of an ICOM 751 and a 500 watts PA, into a 5 elements yagi on a 30 meters high tower. QSL via his home callsign, through the French REF-Union Bureau or direct, w/SAE + 1 IRC (or 1 USD for EU, and 2 USDs for elsewhere) to: Francois Bergez, 6, Rue de la Liberte, F-71000 MACON, France.

K5D DXPEDITION DVD. The K5D Desecheo Island 2009 DVD is in the works. Bob/K4UEE and Ed/W4ZSB will produce yet another exciting DXpedition video. In the tradition of previous video productions, the K5D Dxpedition video, entitled, "Desecheo---so near, yet so far" will be full of exciting footage of the helicopter trips, the island from the air, camp set up and takedown, pileups you won't believe and of course an inside look into the logistics of a big DXpedition, interviews with key team members and of course, humor. The video should be ready by September 2009 and will

sell for 25.00 USDs. But by ordering now, you reserve an early copy of this collectors' item at a discounted price of 22.00 USDs. As always, this includes shipping and handling. To reserve your copy, go to: http://69.89.25.185/~trexsoft/t-rexsoftware.com/k4uee/prebuy.htm

LX, LUXEMBOURG. Lars, DF1LON, will be active as LX7I during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

OH0, ALAND ISLAND (EU-002). Anne, OH2YL, will be active as OH0/OH2YL between April 9-14th. Activity will be on the HF bands using CW and SSB. QSL via OH2YL.

OL, CZECH REPUBLIC. Members of the Jelinek Vladimir Radioklub (OK2KJU) of Prerov will be active as OL7T during the CQ World Wide WPX SSB Contest (March 28-29th) as Multi-Single entry. Operators mentioned are: OK2BXU, OK2BXE and OK2BZP. QSL via OK2BXU.

P2, PAPUA NEW GUINEA (IOTA Op). Once again the team of operators Luis/ CT1AGF, Derek/G3KHZ, Steve/G4EDG and Hans/SM6CVX, plus Gordon/G3USR, will activate three Papua New Guinea IOTA islands between October 22nd and November 9th. Islands mentioned are Tanga Island (OC-102), Green Island (OC-231) and Woodlark Island (OC-205) . Activity will be on 160-15 meters using CW, SSB and RTTY modes. Gordon/G3USR will be exclusively on SSB. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters.

PJ2, NETHERLANDS ANTILLES (Contest Station Available). Geoff, W0CG (PJ2DX), resident caretaker of PJ2T, announced that nobody in the PJ2T club (CCC - Caribbean Contesting Consortium) is interested or able to operate the Curacao station for the IARU HF World Championship in July. Thus, the place is available if you would be interested in coming there as a Single-Op, or to organize a group operation. With sufficient lead time, Geoff could arrange for you to get a callsign of the form PJ2* (except that PJ2A, PJ2R, and PJ2T are unavailable). If you wanted to do a group operation that would include Geoff for a little bit of the operating time, you would be able to sign PJ2T. Two by two callsigns are NOT allowed for visitors to Curacao, sorry. The QTH has two bedrooms, two baths, and four beds available. (Geoff will sleep in another room attached to the house.) There's tons of info about the place at: http://www.pj2t.org Geoff is happy to respond to your questions by E-mail at: ghoward@...

QSL INFO AND NEWS.....
QSL 4U1UN via HB9BOU. Activity took place this past weekend (Friday through Sunday. Operators mentioned were: Mohamed/ KA2RTD, Johnny/LA2IIA (NQ2G), George/N2GA, Tony/ N2UN and "The Daily DX" editor Bernie/W3UR.
QSL KH0/K2JA via his home callsign, JL3SIK.
QSL V47NT via W2RQ

Petr, OK1DOT, informs OPDX that he is now the QSL Manager for Kunle, 5N0OBA. Kunle is the General Secretary of NARS (Nigera Amateur Radio

Society) and the guardian of Amateur Radio in Nigeria.

CN8CG QSL ROUTE. If you recently used the QSL information on QRZ.com for CN8CG, the QSL route is not correct. The route did state QSL to Jules, W1GPY, but has since been removed. It was reported to OPDX that Jules ceased to be CN8CG in 1998 and was reissued. There is no QSL Manager list for CN8CG. According to HAMCALL, the callsign CN8CG was reissued in 2001 to Kamal Bella (Bloc, Kenitra, Kenitra 14000, Morocco).

OLD LOGS CHANGE HANDS. It was reported that Russ, WA3FRP, has received the following logs that were previously held by Ron, AC7DX, and are now in his possession for safekeeping and possible old QSLs:
XW8FA - Laos (13-Dec-1972 - 09-Apr-1974)
VK0HM - Heard Island (22-Nov-1969 - 03-Apr-1970)
V31UN - Belize (22-Oct-1991 - 31-Oct-1991)
T30W - Western Kiribati (07-Mar-1993 - 14-Aug-1994)

QSLS VIA LOTW: 4M5R, 5K0T, CW7T, CX7TT, EA1WX, EA6NB, HK6P, HQ9R, LQ0F, OA4SS, P40R, PS0F, PY2WC, S53F, T42T, TI5N, TO5A, V26G, WP4SK, YS4M and ZF2AM

QSLS RECEIVED VIA MAIL: 4L4MM, 6W/DL2RMC, 9Y4AA, CE0Z/DL2AH, CX9AU, E51QQQ, EL2DX, EY7AF, FK5RE, FK8CP, FO/DJ7RJ, II5AM, KP2AD, OZ1CTK, PA1RJ, T31DX, T33ZZ, TR50R, VK9DNX, VK9DWX, YB1ALL and ZK3AH

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SPECIAL EVENT. Look for special event station R150A to be active through the end of April. Activity is to celebrate the 150th anniversary of the birth of A.S.Popov. Operations will be from the Central Museum of Communications in St.Petersburg. Activity over the past week has been on 40/20 meters CW and SSB. QSL via RK1A.

SPECIAL EVENT (Dayton HamVention). Look for special event station W1AW/8 to be on the air during the Dayton HamVention (May 15-17th). They are currently looking for volunteers to operate the station for 4 hour shifts. Volunteers will receive an on-grounds parking pass, an admission ticket and a hat. Sign up in advance is STRONGLY recommended -- first come first served on requested shifts. This WILL fill up quickly. Contact via E-mail Jerry Bodey, N8OWV at: jerrybodey@...

VK9C, COCOS-KEELING ISLANDS (OC-003). Bernd, VK2IA, continues to be very active as VK9AA from the Cocos Beach Motel, West Island, until March 27th. Most of his activity this past weekend has been on 20/17/15 meters CW, with some 40/30/10 meters. QSL via DL8YR, direct(QRZ.com) or via DARC Bureau.

VK9L, LORD HOWE ISLAND (Update). As this was being typed, there was some VK9LA activity on the air. The last of the DXpedition team should arrive on the island by March 24th (total of 16 operators). The operation with 7 full HF stations from 2 separate sites, as well as one 6m station will be on the take air until April 3rd. Modes of operation are SSB, CW

and RTTY. For suggested frequencies, see OPDX.899. The QSLing chores will be handled by VK4FW. An online QSL Requesting Service is now available at: http://www.odxg.org/qsl.htm
Any QSL CARDS managed by ODXG inc., or Bill Horner, VK4FW, can be sent to you utilizing this system. This is a FREE service if you request your cards to be sent via the BUREAU. A minimum payment of 5 USDs via PAYPAL is required if you request your cards to be mailed DIRECT TO YOU. QSL cards will be printed by UX5UO. For more updates, details on the DXpedition and how to donate to this operation, please visit the ODXG and VK9LA Web pages at: http://www.odxg.org
http://www.odxg.org/vk9la.htm
ADDED NOTEL: Lord Howe operators Stan/SQ8X and Pete/SQ9DIE have added a daily blog daily on Twitter.com. Look for regular updates on how the DXpedition is progressing at: http://twitter.com/vk9la

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, who were expected to be active as VK9GMW early this week (possibly Monday), suffered a major delay due to weather. As of Saturday, March 21st, the operators are on Marion Reef and have been there March 17th. As this was being typed, their latest press release states): "It appears the Tropical Low has dissipated. If this is correct, a serious danger to us has been removed. Winds, however, are still near gale force and are forecast to remain strong at least until Tuesday. This means that we will not be able to leave for Mellish until Wednesday, the earliest. The soonest we are likely to be on the air from Mellish is Friday, March 27th. In any case, we will be able to extend the operation to make up for any lost time. While we continue waiting at Marion Reef for the weather to break, we are operating as HA7RY/MM and AA7JV/MM using a short vertical and 00W. Please follow updates at: http://www.vk9gmw.com
LAST MINUTE UPDATE: On March 22nd, the team reports: "We are still on Marion Reef. The weather has improved slightly -- winds are no longer 40 knots -- they have eased to 30 kts. The imminent threat of a hurricane has also been removed. Winds for tomorrow (Monday, March 23rd) are forecast to be 25 kts, seas 9 to 12 feet (3 to 4 meters). We will make an attempt tomorrow to cross the 440 km distance to Mellish Reef. Our plan is to turn back if the seas are too dangerous or untenable. If not successful tomorrow, the next weather window will probably be on Thursday."

YJ0, VANUATU (Pacific CW Tour). Operators Dennis/F5VHY (G3MXJ) and Nigel/G3TXF plan to operate as YJ0MXJ and YJ0TXF, respectively, from the Aore Island Resort off Espiritu Santo (OC-035) in Vanuatu for six days between Friday, March 27th and Wednesday, April 1st. This will be a CW only operation. Given the current paucity of sunspots, the main bands are expected to be 40/30/20/17 meters. They will try 80 meters, if local conditions permit. There will be no 160 meters. QSL YJ0MXJ via F5VHY, and YJ0TXF via G3TXF. The duo also plan to do short operations from New Caledonia (FK) on the way out to Vanuatu, and from Norfolk Island (VK9N) on the way back. Their approximate activity times are as follows:
* FK/G3MXJ & FK/G3TXF: 0006z, Wednesday March 25th to 1200z, Thursday, March 26th
* YJ0MXJ & YJ0TXF : 1000z, Friday, March 27th to

1500z, Wednesday April 1st
* G3MXJ/VK9N & G3TXF/VK9N: 1000z, Saturday, April 4th to
1900z, Saturday April 4th
PLEASE NOTE: All logs will be up-loaded to LoTW when they return home.
There will not be online logs during these operations, nor are they
expecting any Internet access.

ZD8, ASCENSION ISLAND. Karol, G0UNU, will be active as ZD8KR between
May 4-11th. Activity will be mainly on 20 meters CW and SSB. More details
will be forthcoming closer to these dates (on QRZ.com). QSL via G0UNU,
by the Bureau or direct.

ZP0, PARAGUAY. Tom, ZP5AZL, plans to be active as ZP0R during the CQWW
WPX SSB Contest (March 28-29th) as a Single-Op/All-Band entry. QSL via
ZP5AZL. Visit Tom's Web page at: http://www.qsl.net/cx6vm/ZP5AZL

From: Don Greenbaum
Topic: 9344 Message: 9344

I've just received this from the Island:

The first teammates have arrived on the Island and limited operations are
being conducted by N2OO, VK4FW, N2OZ and W5SL.

The rest of the crew arrives today at Blue Lagoon.

The team has so far has installed an 80 cw dipole, 40 quarter wave elevated
vertical, 30 elevated vertical and 3 ele triband yagi.

The Warc vertical goes up in first daylight as well as the 160 antenna.

They now have 4 stations on the air.

Operators Stan/SQ8X and Pete/SQ9DIE have added a daily blog daily on
Twitter.com. Look for regular updates on how the
DXpedition is progressing at:
<http://twitter.com/vk9la>http://twitter.com/vk9la.

Good signals on 40CW this morning even a couple hours after sunrise.

I need to get on earlier to have a good shot working them, but they were there.

1.) Where are the 7 stations for VK9 ?? I don't see any spots tonite Is operation over??

2.) What is all the ssb I am hearing on 30 mtrs? Is phone legal on 30 somewhere?? I heard it going for awhile around 10.106 this evening, and some this am but didn't take note of the freq.

'bout to turn in--no vk sigs to chase :(

ITU designates 10.1 - 10.15 as FIXED Amateur world wide.

Each country then authorizes individually.

I've heard those HF/maritime also.

I know this is not much for many of you, but as a newbie DXer (though not a newbie ham) I hit
the 250 country mark yesterday with a QSO with the G station in New Caledonia last night on 20.
For a modest station (KW to 40' high tribander) it's been a fun exercise. I know they come fewer and farther in between past this point, but that's the challenge. CW rocks.

Thanks for the tips and enthusiasm on this list.

Congrats John! 250 is a big milestone.

I found it got more difficult to find new ones when I got around the 250 range but there were still some to work fairly regularly. It really started getting difficult to come up with new ones around 300. Now I'm waiting for P5, FR/G and 7O to be activated again but some of the other ones I need are almost silly (YA, EP, A9). Seems I'm just never in the right place at the right time.

Zack,

I can use YA as well. That has sure gotten more active that in used to be but it is also a kind of tough path from here. I can use a few that aren't that tough either like YK, XX9, and XU, but I do have KP1 confirmed on 2 bands!

Yeah, for some reason the Middle East is a bit tough from here as well. I recall a few years ago there was an A9 in ARRL DX CW. He was calling CQ for a long time on 40. I was calling him but he didn't hear me. Apparently he wasn't hearing anyone from USA because in a half hour I never heard him work anyone - just call CQ contest. Must've been as frustrating for him as it was for me! I still haven't worked an A9.

I was lucky to get at least one QSO with YK (YK1AO on 40 CW) and one with XX9 and XU. I worked the NF6S-W5IJU/KP1 DXpedition on a bunch of bands. All CW though. Hopefully someone can reactivate KP1 soon. I understand the boat landing platform is gone now and they would have to fly in by helicopter as the KP5 DXpedition did.

SB DX ARL ARLD012
ARLD012 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TUNISIA, 3V. Ashraf, 3V4-002 plans to be QRV from club station 3V8SS in the CQ WPX SSB contest as a Single Op/All Band/Low Power entry. QSL via IZ8CCW.

SENEGAL, 6W. Alessandro, IK4ALM will be QRV as 6W/homecall from Saly from March 29 to April 9. Activity will be on 40 to 10 meters using CW and SSB. QSL to home call.

BARBADOS, 8P. Tom, W2SC will be QRV as 8P1A in the CQ WPX SSB contest as a Single Op/All Band/High Power entry. QSL via NN1N.

CROATIA, 9A. Members of the Radio Club Varazdin are QRV as 9A800VZ until the end of the year to celebrate the 800th anniversary of King Andrija II. This includes an entry in the CQ WPX SSB contest. QSL via 9A7A.

EAST MALAYSIA, 9M6. Steve, 9M6DXX is QRV as 9M8Z from Sarawak, IOTA OC-088, until March 29. This includes being a Single Op/All Band/High Power entry in the CQ WPX SSB contest. Outside the contest he is active mostly on 40 meters. QSL via M0URX.

SINGAPORE, 9V. Bob, 9V1QQ will be QRV using the callsign S65Q in the CQ WPX SSB contest. QSL via operator's instructions.

TAIWAN, BV. Jimmy Lou, BX5AA will be QRV from Changhua City during the CQ WPX SSB contest. QSL via operator's instructions. In addition, a group of operators are QRV as BP0A from the P'enghu Islands, IOTA AS-103, until March 30. QSL via BV2KI.

MOZAMBIQUE, C9. Members of the Texas DX Society are QRV as C91TX from Bilene, Maputo Province until April 5. Activity is on 160 to 10 meters using CW, SSB and digital modes with three stations. This includes an entry in the CQ WPX SSB contest. QSL via W5PF.

SOUTH COOK ISLANDS, E5. Stations E51EME and E51SIX are QRV from Rarotonga, IOTA OC-013, until April 4. They are active using EME on 6 and 2 meters. QSL via ZL1RS and W7GJ, respectively.

BOSNIA-HERZEGOVINA, E7. A group of operators will be QRV as E7DX in the CQ WPX SSB contest as a Multi/Single entry. QSL via E77E.

CANARY ISLANDS, EA8. Valery, RD3AF will be QRV as EF8M in the CQ WPX SSB contest as a Single Op/All Band/High Power entry. QSL via UA3DX.

ISLE OF MAN, GD. Members of the Barry Amateur Radio Society will be QRV as GT4BRS and GT6BRS from March 28 to April 4. Activity will be on 160 to 6 meters with one station using CW and SSB, and the other using RTTY and PSK, respectively. They will be active as GD8K in the CQ WPX SSB contest. QSL all calls via GW0ANA.

HONDURAS, HR. Dan, HR2DMR will be QRV as HQ2W from Progreso as a Single Op/All Band/High Power/Assisted entry in the CQ WPX SSB contest. QSL to home call.

MARIANA ISLANDS, KH0. Toshiyuki, JP1PZE will be QRV as K7XF/KH0 from Saipan from April 3 to 7. Activity will be on 80 to 10 meters using CW, SSB and RTTY. QSL to home call.

LUXEMBOURG, LX. Lars, DF1LON will be QRV as LX7I in the CQ WPX SSB contest as a Single Op/All Band entry. QSL via LX2A.

AUSTRIA, OE. In commemoration of the establishment of the Radio Club of America in 1909, members of the Amateur Radio Section of the Austrian Broadcasting Corporation will be QRV as OE100M from April 1 to 30. This is also the callsign of the official International Marconi Day station. QSL via OE1WHC.

DODECANESE, SV5. A group of operators will be QRV as SX5P in the CQ WPX SSB contest as a Multi/Multi entry. QSL via operators' instructions.

TUVALU, T2. Joe, LA5UF is QRV as T2UF until April 1. Activity is on the HF bands using mostly CW and PSK. QSL to home call.

CENTRAL AFRICAN REPUBLIC, TL. Christian, TL0A has been active on 80, 20 and 17 meters at various times. QSL direct.

EUROPEAN RUSSIA, UA. Special event station R150A is QRV from the Central Museum of Communications in St. Petersburg until the end of April in celebration of the 150th anniversary of the birth of A.S. Popov. Activity is on 40 and 20 meters using CW and SSB. QSL via RK1A.

VANUATU, YJ. Operators G3MXJ and G3TXF are QRV as YJ0MXJ and YJ0TXF, respectively, from the Aore Island Resort off Espiritu Santo Island, IOTA OC-035, until April 1. Activity is on 40 to 17 meters using only CW. They may try 80 meters if conditions permit. QSL YJ0MXJ via F5VHY and YJ0TXF via G3TXF.

THIS WEEKEND ON THE RADIO. The CQ World Wide WPX SSB Contest and NCCC Sprint are scheduled for this weekend. Please see March QST, page 78 and the ARRL and WA7BNM contest web sites for details.

I was on the air for almost 20 years before I ever heard my first 3A station. They didn't exactly "rain down" once I heard one, but I do have several different bands in the bag now. I also only worked Clipperton for the first time in that most recent dxpedition there.

9364. Re: 250 and counting

Yahoo group: DX-IS (2009)
Date: 2009-03-26 20:03:48 UTC
From: Art Burke
Topic: 9355 Message: 9364

My wife Marsha (K4IRI) is romping through the numbers. We have a couple of good rigs a 4-el SteppIR at 70 feet, an amp and a G5RV for 80 meters. Okay, 3 out of 4 isn't bad!

One day, I tuned into something with the beam pointed at the target station. I turned down the volume quickly and then tuned in the same station with the G5RV. I let her listen to the difference. I tried to impress upon her that there are many hams out there with very modest setups and that she should never take for granted that she can sort of point and shoot. The first few years I was on the air, I had a vertical (with maybe six radials!) in the back yard. The accumulation of numbers was somewhat slower than hers!

Congrats on reaching that number. Yes, the hauling in of newer ones may seem slower, but, personally speaking, the thrill of the new one never stops!

The last week or so I've heard what appears to be 3 separate, strong, digital stations each 3 KHz on 14013-17, 14019-22,14029-32.

They are loud and sound "pockety, pockety" with CW filters.

I seem to recall these same type of signals around 18080 to 18090.

Anybody know what they are?

I had something funny happen regarding 3A. Back in the late 70's I was fascinated by working DX but wasn't into DXCC so I wasn't chasing countries. I worked a station signing portable 3A and I had no idea where he was. About 15 years later, going through my old logs, I found the QSO. I tracked the station down and sent for a card. And I got one back! Same thing happened with a JX station I worked back then.

C3 must be another one that isn't too common. Although I've worked a few stations there, I don't hear them too often.

It is Peter the First. The Roman Numeral I is often used for the number in these cases, such as King George VI. But you could write it "1" or "6" too.

Zack,

Glad you brought up C3, you are right, I haven't heard them on too much recently. ZB2 doesn't seem that common any more either. Now if I could just get Mount Athos to close out Europe.

Hi Zack,

Back in 2001 David, A92GE was on 17m or 15m CW (usually 17) every evening at the same time. I needed A92 so would be camped out there every night, switching between the 2 bands, trying to find him calling CQ so I could get him before the pileups hit. He would usually operate for 30 minutes or so and go QRT. After a couple of weeks with no luck getting him, I finally found him operating later than usual for him and finally got him. He had a great signal also.

Oh for the days with sunspots.

Yeah, for some reason the Middle East is a bit tough from here as well. I recall a few years ago there was an A9 in ARRL DX CW. He was calling CQ for a long time on 40. I was calling him but he didn't hear me. Apparently he wasn't hearing anyone from USA because in a half hour I never heard him work anyone - just call CQ contest. Must've been as frustrating for him as it was for me! I still haven't worked an A9.

I was lucky to get at least one QSO with YK (YK1AO on 40 CW) and one with XX9 and XU. I worked the NF6S-W5IJU/KP1 DXpedition on a bunch of bands. All CW though. Hopefully someone can reactivate KP1 soon. I understand the boat landing platform is gone now and they would have to fly in by helicopter as the KP5 DXpedition did.

Congrats John! 250 is a big milestone.

I found it got more difficult to find new ones when I got around the 250 range but there were still some to work fairly regularly. It really started getting difficult to come up with new ones around 300. Now I'm waiting for P5, FR/G and 7O to be activated again but some of the other ones I need are almost silly (YA, EP, A9). Seems I'm just never in the right place at the right time.

I just worked ZB2FK two weeks ago on 40 CW. Also worked ZC4VB recently.

I got really lucky with Mount Athos. When the German guest op was operating Monk Apollo's station some years ago, I worked him on 30 CW fairly easily. Although the op was a guest, Monk Apollo did all the QSL'ing himself.

I didn't get to work VK9AA - didn't need it for a new one but it would've been nice to get a low band QSO. I'm not too hopeful about Mellish Reef but we'll see.

Hi Zack,

I am still chasing a C3 on CW. I did work C31PA recently but he turned out to be a pirate (with a big patch on one eye).

There are a couple quite active there, but condx have never been good enough to carry their signals to our shores L

I would have thought there would be regular EU teams going there with some decent antennae but alas....

For quite some time, I've had A9 in the bag, but needed them on SSB. Probably still need something like 80M as well.

Late one afternoon a couple of years ago, I was grumbling to my wife about when dinner was going to be ready. We were running out of time to have dinner and get to the club meeting. She stopped what she was doing and produced dinner. Following dinner, I went into the shack to shut things down and A92GR was on 20 SSB. Somehow, I knew if I stopped to work him (or try), I was gonna catch some flack about "...what a rush I was in...!"

So, I turned off the rig (noting the frequency) and headed for the club meeting. As luck would have it, the mobile installation had been completed only about a month earlier. The drive from home to the clubhouse was only about eight miles and about half way there, in an area usually harsh with intermods (out near our local general aviation airport) I got him while mobile.

Now that my wife is licensed (she wasn't then) and the DX bug hit her as well, she would more likely have understood (wouldn't she?) if I had stopped to work him on the way out the door!

Don't give up hope. Yesterday morning the SFI was either 69 or 70 (can those Palos Verdes guys "unstick" the SFI meter?) when I returned from breakfast with my regular Thursday "crew."

Marsha was just signing with someone. I asked her who she had cornered. I glanced at the display as she pointed to a YB0 and YC she had just worked. She said they were "clear as a bell."

Granted, it's a pain to have to sit in front of the rig for hours on end, hoping there *might* be a brief breakthrough somewhere, but sometimes, even with the doldrums like we've been suffering, something happens.

Out of curiosity, who is the supposed patron saint of the airwaves?

I agree with Zack. Looking at my own logs and collections of spots over the last three or four years, C3 is probably far more rare than 3A. HB0 seems to be on more often than C3.

Something I read recently (probably included with comments about pirates in C3) I think indicated that one can't go to Andorra and operation "/home call." Apparently that's done quite often with HB0 and, to some degree, with 3A. Dr. Laura and another guy (call escapes me at the moment) seem to be keeping the demand somewhat low for 3A. The mountains to the W and NW of Monaco, coupled with the 100W limit, make Monaco somewhat more challenging than it would be otherwise.

From: john.brewer@us.schneider-electric.com
Topic: 9367 Message: 9379

I've heard the same thing, and it's impulse-type noise was a challenge to deal with in working
VK9 and the FK/G stations on the low end of 20m. As I recall, the beam heading was roughly north of my location in NC. Quite loud and quite disruptive.

John K5MO

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3A - Gianni, I1UWF will be active as 3A/I1UWF from Monaco on 4 April, starting around 13 UTC. He plans to be QRV on 17 and 12 metres running 100 watts into a vertical antenna. QSL via home call. [TNX I1UWF]
E5 - Walter, HB9XBG will be active as E51XBG from Rarotonga (OC-013), South Cook Islands from 30 March to 16 April. Look for him on 20 metres SSB between 6 and 12 UTC. QSL via home call. [TNX The Daily DX]
FJ - Oscar, EB1HF and Pablo, EC1DPM will be active as FJ/homecall from Saint Barthelemy (NA-146) on 7-12 April. They will operate digital modes only, with main activity on RTTY, on 20, 15 and 10 metres. QSLs via EC1AE (direct only). [TNX EC1AE]
FR - Cedric, F4EGZ is active as FR/F4EGZ from Reunion Island (AF-016) until 13 April. He plans to be QRV during the CQ WW WPX SSB Contest on 10, 15 and 20 metres. Outside the contest he plans to operate on 17 and 6 metres. [TNX F4EGZ]
HH - 4V4JR is a special callsign obtained by Jean-Robert, HH2JR for the CQ WW WPX SSB Contest. He will be joining Don/AF4Z and Jan/K4QD, who have been at the Northwest Haiti Christian Mission since 24 March [425DXN 931]. QSL via K4QD, direct or bureau or LoTW. [TNX K4QD]
OZ - Tor, DJ4MG (5P4MG) and Ela, DL1TM (OZ7TM) will be active from Vendsyssel-Thy/Nordjylland (EU-171) on 5-16 April. They will operate SSB on 160, 80, 40, 20, 17 and 15 meteres, and PSK31 on 20 and 40 metres. QSl via home calls. [TNX www.rsgbiota.org]
P2 - Derek, G3KHZ (P29NI) has announced a new IOTA DXpedition to Papua New Guinea. Between 22 October and 9 November he and other four operators (namely Luis/CT1AGF, Gordon/G3USR, Steve/G4EDG and Hans/SM6CVX) will be active from the Tanga Islands (OC-102), the Green Islands (OC-231) and the Woodlark Group (OC-205). They will operate CW, SSB and RTTY on 160-15 metres, using new single band vertical dipoles for 30-15m and a ground plane for 40m. Further information is expected in due course. The web pages for the

expedition are at http://www.425dxn.org/dxped/p29_2009/index.html
[TNX I1-21171]
SV - Vassilis/SV8CYV, Alexandros/SV8CYR, Kostandinos/SV8IIR, Ilias/
SV8FMY and George/SV8IJZ will be active as SX8P from Samos Island
(EU-049) on 3-12 April. The special callsign's suffix stands
for Pythagoras, the great philosopher and mathematician who was
born on Samos. They plan to operate SSB, BPSK 31 and RTTY mainly
on 20, 17, 40 and 80 metres. QSL via the bureau, or direct to
SV8CYV. [TNX SV8CYV]
VE - Celebrating the 50th anniversary of the opening of the St.
Lawrence Seaway, Canadian amateurs are allowed to use the
following prefixes between 1 April and 31 May: XL (VA stations),
XN (VO stations), XM (VE stations), XO (VY stations). [TNX OPDX
Bulletin]
VK9M - Bad weather conditions prevented the VK9GMW team (AA7JV and HA7RY)
from leaving Marion Reef [425DXN 933] for several days. Eventually
they departed for Mellish on 25 March, and reached their
destination at 6 UTC on the 27th. They hope to be on the air by 8
UTC on 28 March. QSL via HA7RY. Please bookmark www.vk9gmw.com for
updates.
VK9X - Haru, JA1XGI will be active as JA1XGI/VK9 from Christmas Island
(OC-002) on 4-11 April. He plans to operate CW and digital modes
on all bands. QSL via JA1XGI, direct or bureau. [TNX OPDX Bulletin]
VU - Frank/DL4KQ, Sarath/VU3RSB and Jose/VU2JOS expect to be active as
AT9RS from Grandi Island in the Goa State group (IOTA AS-177, new
one) between 5 and 7 April (indicatively from the local midday on
5 April until the local morning on the 8th). They plan to operate
CW, SSB and digital modes on various bands, with two stations,
verticals, dipoles and 500 watts. QSL via W3HNK (North and South
America) and DL4KQ (rest of the world). Further information to be
found at http://www.mdxc.org/at9rs/ [TNX Mediterraneo DX Club]
W - Buzz, NI5DX and his brother Al, WD5IQR will be operating from
Galveston Island (NA-143) on 30 March and, if conditions permit,
on 1 April. Monday's operation is planned to be mainly SSB, with
the possibility of some CW and digital modes. [TNX K1XN]
W - The Palos Verdes Amateur Radio Club will operate as K6PV from
Santa Catalina Island (NA-066) on 1-5 April. They will have two
stations active on 80, 40, 20 and 17 metres SSB and CW. QSL via
K6PV. [TNX The Daily DX]
YK - Saad, N5FF will be active again as YK1BA from Damascus, Syria from
30 March to 10 April. He plans to operate CW, SSB and RTTY in his
spare time (between 20-23 UTC, 2-5 UTC and possibly some
occasional activities between 12-14 UTC). Saad thinks he will
spend most of his radio time on 30, 40 and 80 metres. QSL via
N5FF. [TNX K1XN]

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

IARU NEWS ---> The Union des Radioamateurs du Congo (URAC) has applied for
admission to the IARU. It represents the Republic of the Congo (capital
Brazzaville, ITU-allocated prefix TN), not to be confused with the
Democratic Republic of the Congo (capital Kinshasa), which is already
represented in the IARU by Association des Radio Amateurs du Congo (ARAC).
URAC was formed on 8 October 2008, and lists 15 members on its current
roster, including three licensed radio amateurs. The closing date for
receipt of votes by the International Secretariat is 11 August.

[http://www.iaru.org/cal188.html]

JAPAN (NEW PRIVILEGES) ---> Effective 29 March at 15 UTC Japanese amateur radio operators will gain new privileges, including the expansion of the 40m band (7000-7200 kHz) and the possibility of working RTTY and data on 10130-10150 kHz. [TNX JA1HGY]

NOT THE MANAGER ---> Sam, RN6BN is receiving many direct QSL cards confirming contacts made with V85SS. Sam is not the QSL manager for V85SS, who wants cards to be mailed to the address mentioned at www.qrz.com

PIRATE (EP2IA) ---> A station signing EP2IA has been QRV this week on 40 metres CW, asking for QSL via qrz.com. "This was my call in the 1970's", Roger (G3SXW) says, "but I know nothing about the current operation. If the call-sign had been re-issued I would expect him to give a valid QSL route. But qrz.com points at G3SXW so I must conclude that this is a pirate operation".

PIRATE (MU0X) ---> M0X is the contest callsign for Charles, M0OXO. Over the last few weeks is has been used several times along with the regional designator for Guernsey. If you have MU0X in your log, please refrain from requesting a QSL card, as Charles has never operated from Guernsey and you have worked a pirate. [TNX GU0SUP]

URE 60 ANNIVERSARY CONTEST ---> The IARU society for Spain (Union de Radioaficionados Espanoles) celebrates its 60th anniversary and sponsors the URE 60 Anniversary Contest. It will be held on from 00.00 UTC on 11 April until 23.59 UTC on the 12th, on 10, 15, 20, 40, 80 and 160 metres, Mixed mode. Detailed information can be found at http://www.ure.es/contest/1232-ure-60-anniversary-contest-.html

VK9LA ---> A logsearch for the current expedition to Lord Howe is now up and running at http://www.odxg.org/onlinelog/index.php (latest update at 1 UTC on 27 March). The first 400 QSOs on 20 metres were logged on paper logs, and will be added to the online log as soon as possibile.
VK9LA team members Stan, SQ8X and Peter, SQ9DIE maintain a blog (http://vk9la.info/) that is worth a visit and a bookmark.

+ SILENT KEYS + David Rankin, 9V1RH (VK3QV) passed away on 19 March. WIA Federal Vice President for a number of years, he moved to Singapore in 1972 and was a founding member of the Singapore Amateur Radio Transmitting Society (SARTS). Deeply involved with IARU, he was Region 3 Secretary (1973-82), Chairman (1982-94) and Director (1994-97).
Other recently reported Silent Keys include Rich Beebe (N0PV), Ivan I. Dzjuba (UT5UG), Catherine H. Hrischenko (VE3GJH) and Dave Hammond (WC4B).

Hmmmmm - I've worked 15 C3's (easy to find with DXK) starting in 1979 and
the last one in 2000. Rare is a FJ

Oh yeah ... Luc I1YRL frequently goes to 3A. He also operates 4U1ITU quite a bit.

73, Zack W9SZ

SB DX @ WW < KB8NW $OPDX.902
Ohio/Penn DX Bulletin No. 902

The Ohio/Penn DX PacketCluster
DX Bulletin No. 902
BID: $OPDX.902
March 30, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, N5FF, KL7JR, K8YSE, N8OFS, NK0S, 5B4MF, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F4EGZ, F5NQL & UFT, G3KHZ, GU0SUP, I1JQJ/IK1ADH & 425 DX News, JA1ELY, M0OXO, Pete's-DX-Newsdesk, OH1MN, PY2SEX, RSGB IOTA Web Site, SM5LWC, SK7QB, SV8CYV, TA1HZ, TA0U, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 20th-March, through Friday, 27th-March there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1U, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VP2E, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA0, SWAZILAND (Update). Operators David/GI4FUM (EI4DJ, 3DA0DJ), Tony/
G4LDL, Gerry/M0MVV, Michael/NC4MM and Yuri/UT5EL will be active from the
station at the Hawane Resort during the month of August. The object of
this activity is to provide a ham radio station at an international scout
camp near Manzini between July 31st and August 11th. David (the organizer
of the DXpedition) has operated from Hawane Resort (near Mbabane) as
3DA0DJ on two previous occasions (in March 2007 [CQWPX SSB] and in October
2008 [CQWW SSB]). The Hawane Resort is located in the mountains of Western
Swaziland at over 4,000ft ASL. It has been used for DXpeditions on quite
a few occasions and is serviced by Daniel Hubbard/ZS6JR of African DX
Safaris. There are permanent antennas on the site including a 60 ft.
lattice steel tower with HF beams for 20/15/10m and the WARC bands. There
is a "Four Square" array of 40m dipoles suspended from the tower. Daniel
usually erects a vertical for 80/160m in addition to these antennas.
David/GI4FUM states, "It would be our intention to stay at and operate
from Hawane Resort and in addition provide operators for the scout camp
on a daily basis. The camp site will use the callsign 3DA0SS but each
team member will have their own 3DA0 callsign. The camp site is about
an hour's drive away. Unfortunately the campsite is not as well situated
for takeoff to Europe and USA as Hawane Resort. The campsite is on a
southerly facing hillside. We would like to provide as many modes and
as many bands as possible on this DXpedition. The March 2007 operation
included an EME station which was very successful and made contacts in
100 different countries. During our stay at Hawane there is another
DXpedition to Lesotho also serviced by African DX Safaris and team
members from that DXpedition may join us during our time there. John,
9M6XRO, will be transferring to Hawane during the 2nd week of our stay."
David/GI4FUM provides the following reference Web sites that may be of
interest:
Hawane Web site: http://www.hawane.co.sz
African DX safaris: http://www.africandxsafari.com
Photographs of previous DXpeditions to Hawane:
http://good-times.webshots.com/album/568542228aUWwWP?vhost=good-times
http://travel.webshots.com/album/558408223diIYNe?vhost=travel

3V, TUNISIA. SWL Ashraf, 3V4-002, will be active as 3V8SS from the "Radio
Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX SSB
Contest, SSB (March 28-29th) as a Single-Op/All-Band/Low-Power entry.
QSL via IZ8CCW. Also, read about Ashraf on the following Web pages at:
http://ashraf3v4002.wordpress.com
http://www.qsl.net/3v4-002/

5B, CYPRUS. Jack, RW3QC, will be active as 5B4AII during the CQWW WPX
SSB Contest (March 28-29th) as a Single-Op/All-Band/2R entry. QSL via
RW3RN.

AH0, MARIANA ISLANDS (Update). Operators Kuny/7L1FPU (W1FPU), Yoshiki/KH0UA
(who may be the youngest non-native FCC General license holder) and
Tomo/N2QP will be active as AH0BT during the CQWW WPX SSB Contest (March
28-29th) as a Multi-2 entry. QSL via 7L1FPU. PLEASE NOTE: On 40 meters,
the team can only transmit between 7075-7100 kHz. Please listen for them.

C9, MOZAMBIQUE (Update). Members of the Texas DX Society are now active as C91TX from Bilene, Maputo Province, until April 5th. Activity will be on all bands 160-10 meters with 3 active stations, one station each for CW, SSB, and the Digital modes. Antennas being used are T-8 Log-Periodics by Tennedyne, and they will be up at about 50 feet plus. They will also use a 40 meter 4 square (and possible 80 meter 4 square) and a 72 foot vertical for 160/80/30 meters. The stations will be using a Tokyo Hy-Power amp, and two IC-2KL amps. The team will participate in the CQWW WPX SSB Contest (March 28-29th). Operators mentioned are: Cal/WF5W, Paul/W5PF, Madison/W5MJ, Bill/K5WAF, Dale/KG5U and Jim/N4AL. QSL Manager for C91TX is W5PF. Depending on internet access, they hope to have an online log search page once operations start, but don't expect daily updates. For updates, visit the Texas DX Society C91TX Web page at: http://www.tdxs.net/c91.html

CN, MOROCCO. M'hamed, CN8NK, in Rabat, will be active as CN4P during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. QSL via EA5XX.

E21, THAILAND. Champ, E21EIC, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Low-Power entry. JA stations QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at: http://www.e21eic.net

E2, THAILAND (Early Announcements). Dej, E21YDP, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via E21YDP. Also, look for Chai, E20WXA, to be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m)/ Low-Power entry. QSL via E20WXA.

ED8, CANARY ISLANDS. Members of the Radio Club Henares will be active as ED8R during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via EA4RCH. Operators mentioned are Jesus/EC1KR, Javier/EC4DX, David/EC4JD, Oscar/EA4TD, Miguel/EA4DEC, Jorge/EA8TL, Tomas/EA8TH, Domiciano/EA8UP and Edu/EA8AUW. Visit their Web page at: http://www.radioclubhenares.org

EF8, CANARY ISLANDS. Operators Pekka/EA8AH, Manuel/EA8ZS, Juan/EA8CAC, Jaakko/OH1MA and Toivo/ES2RR will be active as EF8R during the CQWW WPX SSB Contest (March 28-29th) as a Multi-? entry. QSL via LoTW.

FR, REUNION ISLAND (Update). Cedric, F4EGZ, will be active as FR/F4EGZ from St.Leu (AF-016) between now and April 13th. His activity will include the CQWW WPX SSB Contest (March 28-29th) as a Single-Op entry. Operations will only be on 20/15/10 meters. He informed OPDX a few weeks ago that he was on holiday and did not think he would be on the air after the contest. However, he is now planning to be active on 17m and 6m from the north-side of the island. For sked, send him an E-mail at: F4EGZ@...

H2, CYPRUS. Spyros, 5B4MF, will be using the special prefix callsign H22H during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (40m)/High-Power entry. Please note that H22 is a unique prefix for the contest as nobody else will be using the special prefix. QSL via 5B4MF,

direct (address on QRZ.com), by the Bureau or LoTW.

IOTA NEWS.....
AS-177. NEW IOTA! Frank, DL4KQ, is planning to be active as AT9RS from a new IOTA, Grandi Island, off the coast of Vasco da Gama, Goa, India, between April 3-8th. No other details were provided, but watch the IOTA frequencies.

EU-017. (Update) Members of the Noantri DX & Contest Team will be active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001), April 25-30th. Look for activity on the HF bands, CW, SSB and the Digital modes. Operators mentioned are: Andy/IZ0EHO, Vincenzo/IZ0FKE, GiorDano/IK0XFD and Alberto/IK0ZCW. QSL via IZ0GKN. Sked request at: id9n@...

EU-049. Members of the Aegean DX Group will be operate from Samos Island (GIOTA SAS006), as SX8P (Pythagoras) between April 3-12th. Activity is to celebrate the 2500th anniversary and honor the memory of Great Ancient Samian Philosopher and Mathematician "Pythagoras". For more information, see QRZ.com. Operations will mainly be on SSB and the Digital modes. On SSB, 14260, 18124, 7090, 3780 kHz (+/- 5 kHz), and if bands are open, check 21260, 24950, 28460, 50150 kHz (+/- 5 kHz). Look for them on BPSK31 and RTTY on 20/40/80 meters, and if the bands are open 15/10m. There will also be activity on the AO-51 Satellite. Operators mentioned are: Vassilis/SV8CYV, Alexandros/SV8CYR, Kostandinos/SV8IIR, Ilias/SV8FMY and George/SV8IJZ. QSL via SV8CYV, direct by the Bureau.

EU-094. French operators Alain/F1LLS, Thomas/F4BCG, Patrick/F4FCS, Antoine/F5RAB, Christian/F6AXN, Francis/F6DPD and Dominique/F6HEQ will be active as TM5EL from the Penfret Island (DIFM AT-059, WLOTA L-321, DPLF PB-038, Locator IN87AR), one of the Glenan Archipelago, between May 8-10th. Activity will be on the HF bands, as well as VHF, UHF and SHF, using CW, SSB, and the Digital modes. QSL via F6KHI.

NA-143. Operators Buzz/NI5DX and his brother Al/WD5IQR will be active from Galveston Island on Monday, March 30th. If conditions warrant, the pair will return to Galveston Island on Tuesday morning for another day of operation. As the Galveston Island State Park is still closed due to damage from Hurricane Ike this past September, the brothers will use generator power. They will run barefoot into a ZeroFive 43 foot vertical. Monday's operation is planned to be mainly SSB with the possibility of some CW and digital modes.

NA-223. (Update/Date Change) Members of the Russian Robinson Club will be active as KL7RRC from Ogliuga Island, Alaska, between July 23rd and August 5th. Activity will be on 160-6 meters including an entry in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: N3QQ, RA3NAN, RU4SU and UA9OBA. Watch for

updates on:
http://www.na-234.com/contact_chuginadak_expedition.html

IR9, ITALY. Members of the ARIPA DX Team will be active as IR9Y from Sicily during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via IT9ABY.

J8, ST. VINCENT. Dave, G3TBK, is once again active from here as J88DR and will be in the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/ All-Band/Low-Power entry. Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, but mostly on CW. QSL via G3TBK, direct or by the RSGB Bureau.

JT1, MONGOLIA. Operator Yohji/JH1AWN (JT1AWN) and three members of the Akita DX Association [Takao/JA7AGO (JT1AGO), Sei/JA7LU (JT1LU) and Akio/ JA7ZP (JT1ZP)] will be active between April 21-28th. Activity will be on 80-6 meters, possibly 160m (depending on their QTH), using CW, SSB, RTTY and PSK31. Look for the following callsigns on the following modes:
CW - JT1AWN, JT1AGO and JT1ZP
SSB - JT1AGO, JT1LU and JT1ZP
Digi - JT1LU and JT1ZP
Operations will be from two locations: JT1KAA's QTH and the other from Amure Hotel. QSL via their home callsigns, direct or by the JARL Bureau.

OFFICERS FOR 2009-2010. On Monday, March 2nd, the members of Northern Ohio DX Association (NODXA) re-elected the following to serve as officers between May 2009 and April 2010:
President: Tedd Mirgliotta, KB8NW
Vice President: Dwaine Modock, K8ME
Secretary: Al Moriarty, N8CX
Treasurer: Mary Michaelis, N8DMM
Newsletter Editor: David Autry, WD8IOU
For more information about NODXA, check out the club's Web site at:
http://www.papays.com/nodxa.html

OH1, FINLAND. Members of the "Turun Radioamatoorit ry" (OH1AA) will activate the callsign OH1T during the CQWW WPX SSB Contest (March 28-30th) using "beams, slopers, dipoles.. anything they can get on the air". Operators mentioned are Markus/OH1MN, Markus/OH1FKR, Janne/OH1SDR and maybe some other quest operators. QSL via OH1MN.

P2, PAPUA NEW GUINEA (Update/IOTA Op). Last week we mentioned that once again the team of operators Luis/CT1AGF, Derek/G3KHZ, Steve/G4EDG and Hans/SM6CVX, plus Gordon/G3USR will activate three Papua New Guinea IOTA islands between October 22nd and November 9th. Since then Derek has informed OPDX that a friend Hans (name Stig) will also join the group. He also stated, "We anticipate using a separate call for each island but have yet to decide which call will be used for which island. P29NI will be used for one of the islands." Islands mentioned are Tanga Island (OC-102), Green Island (OC-231) and Woodlark Island (OC-205). Activity will be on 160-15 meters using CW, SSB and RTTY modes. Gordon/G3USR will be exclusively on SSB. The team will be using new single band vertical

dipoles for 30-15 meters and a ground plane for 40 meters.

PY2, BRAZIL. Alex, PY2SEX, from Sao Paulo, will be active during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (40m)/ Low-Power entry. QSL via his home callsign, by the Bureau, direct (see QRZ.com) or LoTW.

QSL INFO AND NEWS.....
PIRATE ALERT. Roger,G3SXW, reports, "A station signing EP2IA has been QRV this week on 40 mtrs CW, asking for QSL via QRZ.com. This was my call in the 1970's, but I know nothing about the current operation. If the callsign had been re-issued, I would expect him to give a valid QSL route. But QRZ.com points at G3SXW, so I must conclude that this is a pirate operation. Please help me to spread the word: PIRATE! I will receive many QSLs that will be returned to sender (extra work for me) and very disappointing for many DXers who think that they have worked a new country. There are some very selfish people in this world."

PIRATE ALERT. Charles, M0OXO, reports, "Over the last few weeks, I have been made aware that my short contest callsign has been used several times by an unauthorized person and maybe during contests too. No-one has had permission to use this callsign and I have no knowledge who the offender may be. My short contest callsign is "M0X" and this has been used along with a regional designator of the Island of Guernsey. The callsign used (which I now assume is a Pirate) was "MU0X" and was certainly used on CW although I am not yet aware of any other modes. There are several 'spots' on the DX Cluster for the callsign, and there have also been several requests for QSL cards. If you have this callsign in your log then the contacts are obviously invalid as I have never operated from the Island of Guernsey. Please bear in mind the callsign of "MU0X", and if you hear it on air please report it to me on my E-mail address. There will be some Amateurs out there who think they have just worked Guernsey on a new band, mode or even an all time new one, but sadly, they will be very disappointed." Charlie's E-mail address is: charlie.debbie@...

VQ9HB LOGS. Hutch, NK0S, announced that he is currently converting the paper logs of Hugh, VQ9HB, to electronic format so they can be uploaded to LoTW. After the logs are uploaded to LoTW, Hutch will act as the QSL Manager for QSL card requests for Hugh's operation between 12/23/89 and 5/19/90.

QSLS VIA LOTW: 4W6R and V63MY

QSLS RECEIVED VIA MAIL: 5H3RK, 5N/LZ1QK, A43DLH, A71EM, C6APG, CE0Y/N6NO, CX9AU, CT9L, E27EK/P, ET3JA, FK8CP, FW5RE, HI3K, P40ZB, PJ4/K4BAI, T77NM, TO3R, TO4X, TT8JT, V51XG, V26G, VP8DLS, VP8YLH and XE1RCS

QSLS RECEIVED VIA THE BUREAU: 4O/K1ZZ, FR5MV, VP8/LZ1UQ and VU4AN

ROSKILDE 1658 AWARD STATIONS ACTIVITIES. The weekend of April 4-5th, look for stations that are involved "Roskilde 1658 Award". Details about this

award was featured in the February 2009 issue of CQ Magazine. Stations expected to be active are SB1658OZ, SH1658DK, SH1658OZ, SK1658DK and the Danish wild card station OZ1658ROS. That is a total of five qualifying callsigns active, but you only need four callsigns for the award. It was also mentioned that due to a called district meeting arranged by SK7BQ during the past weekend, the callsigns operated by SK7BQ, SC1658OZ and SK1658OZ will not be active during the upcoming weekend. The five special callsigns will mainly be active on 80, 40 and 20 meters, depending on conditions, using CW and SSB. Stations SB1658OZ and SH1658OZ will also be active on PSK31. The press release states, "We have noted in our logs that many award hunters work only CW or RTTY/PSK31. You will be more successful if you work as many modes as possible. Not all of our operators are able to work digital modes or CW." For complete information on all callsigns, times in UTC and frequencies, please visit the "Roskilde 1658 Award" Web page at: http://www.sk7bq.com/roskilde (under "Activity calendar")

SX5, DODECANESE (EU-001). Operators Bill/SV5AZP, Panos/SV5AZK, Filolaos/SV5CJK, Vagelis/SV5CJQ, Efstathios/SV5DKL, Stelios/SV5DZR, Denis/SV5FRD, Periklis/SV5FRK, Takis/SV5FRP and Mike/SV5KJC will be active as SX5P during the CQ WW WPX SSB Contest (March 28-29th) as a Multi-Multi entry. QSL via SV5FRD.

T2, TUVALU. Joe, LA5UF, is active as T2UF until April 1st. Activity is on the HF bands using mostly CW and PSK. QSNs show operations over the past week have been mainly on 30/20/17 meters. There has been some SSB activity on 17 meters. QSL to home call.

TA, TURKEY. Members of the AKUT Search and Rescue Association will be active as TA1KC during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Op/Single-Band entry. QSL via TA0U. Operators mentioned are Urcun/TA0U, Ilke/TA1CU, Can/TA1CN, Tevfik/TA1HZ, Onder/TA2CL, Serkan/TA2JN and Anil/TB2ED.

TC2, TURKEY (Lighthouse Activity). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will activate the last lighthouse in a series of historical lighthouses around Istanbul next weekend. On April 4-5th, look for TC2FLH to be active from Fenerbahce Lighthouse (TUR 021). Remember, you only need four or more contacts with lighthouses to receive the "Istanbul Lighthouses On The Air Award" (ILOTA). Details and rules can be found at: http://www.ta0u.com/detay.asp?id=4296

TC57, TURKEY (Special Event). Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will be active as TC57A once again from the Canakkale Gelibolu battegrounds to remember the 57th Regiment Martyrs between April 22-27th. Activity will be on the HF bands. For more info, visit the following Web pages:
http://www.qrz.com/db/TC57A
http://www.tcswat.org
Info about the regiment and the war:
In Turkish - http://tr.wikipedia.org/wiki/57._Alay
In English - http://en.wikipedia.org/wiki/Gallipoli_Campaign

TG0, GUATEMALA. Operators Mario/TG9ADQ, Edgar/TG9AXF and Francisco/TG9ANF will be active as TG0AA during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Op/All-Band entry. QSL via TG9ANF.

TK, CORSICA (EU-014). Brani, OM2FY, will be active as TK/OM2FY from the main island during the RSGB IOTA Contest (July 25-26th) as a Single-Op/ DXpedition/CW/Low-Power/24H entry. QSL via OM2FY.

VK9L, LORD HOWE ISLAND (Update). The VK9LA operation is on the air with all stations active. Operations will last until April 3rd. The team has had some equipment problems: an ACOM Amp is dead, AL811H blew a tube and one IC7000 has failed after 2 days. It was mentioned that the stations on 160 and 80 meters are running amps, but they are having extremely high static levels from the same weather system that has delayed the Mellish Reef operation. The team plans to stay on the lower bands always. PLEASE NOTE: The online log search is also active now at:
http://www.odxg.org/onlinelog/index.php
QSLs are via VK4FW. An online QSL Requesting Service is now available at:
http://www.odxg.org/qsl.htm
Any QSL CARDS managed by ODXG inc., or Bill Horner, VK4FW, can be sent to you utilizing this system. This is a FREE service if you request your cards to be sent via the BUREAU. A minimum payment of 5 USDs via PAYPAL is required if you request your cards to be mailed DIRECT TO YOU. QSL cards will be printed by UX5UO. For more updates, details on the DXpedition and how to donate to this operation, please visit the ODXG and VK9LA Web pages at: http://www.odxg.org
http://www.odxg.org/vk9la.htm
ADDED NOTE: Lord Howe operators Stan/SQ8X and Pete/SQ9DIE have added a daily blog on Twitter.com. Look for regular updates on how the DXpedition is progressing at: http://twitter.com/vk9la

VK9M, MELLISH REEF (Update). Operators George/AA7JV and Tomi/HA7RY, were stuck on Marion Reef most of the week but were able to reach Mellish Reef on March 27th and should be on the air as VK9GMW by 0800z, March 28th. Activity should last about April 10th (this can change). For updates, please visit the VK9GMW Web page at: http://www.vk9gmw.com

VY1, CANADA (Special Event/New CISA). Members of the North County DX Association (which includes the Alaska Chapter/KL7RST, Yukon Chapter/ KL7RST and Northwest Territories Chapter/VE8RST) that promotes Amateur Radio in the North, will activate the special event station VY1/K7Y from Kluane Lake in the Yukon between June 25th and July 4th. Emphasis will be for Field Day from Jacquot Island ("new one" for the CISA). Activity will be on 20, 40 and 80 meters. Primary 14260 and 7260 kHz (+/- QRM). QSL via KL7JR direct w/SASE for full-color QSL. [Kluane Lake area is a rugged and picturesque landscape steeped in Klondike Gold Rush history. KL7JR has spent a considerable amount of time on the lake over the past 20 years and is considered an expert on local history by the Burwash Landing Library and Yukon Archives for his book, "BROTHERS in the YUKON".]

YJ0, VANUATU (Pacific CW Tour Continues). By the time you read this, operators Dennis/F5VHY (G3MXJ) and Nigel/G3TXF will have left New Caledonia and should be active as YJ0MXJ and YJ0TXF, respectively, from the Aore Island Resort off Espiritu Santo (OC-035) in Vanuatu until Wednesday, April 1st. This will be a CW only operation. Their main activity will be on 40/30/20/17 meters. They will try 80 meters, if local conditions permit. There will be no 160 meters. QSL YJ0MXJ via F5VHY, and YJ0TXF via G3TXF. Remember, their next stop will be Norfolk Island (VK9N) on their way back (G3MXJ/VK9N & G3TXF/VK9N between 1000z, Saturday, April 4th to 1900z, Saturday April 4th). PLEASE NOTE: All logs will be up-loaded to LoTW when they return home. There will not be online logs during these operations, nor are they expecting any Internet access.

YK, SYRIA. Saad, N5FF, informs OPDX that he will be arriving in Damascus on the evening of March 29th and should be active again as YK1BA from March 30th and April 10th. He will return home to Texas on April 11th. As usual, the purpose of the trip is not a DXpedition, so his operating will be spotty, but he states that he will try to put in as much radio time as possible. He suggests that his operating hours will be between 2000-2300z or between 0200-0500z and possibly some occasional activities between 1200-1400z. Saad says, "I suspect that 30, 40, and 80 meters will be the bands of choice, and I will be active on SSB, CW, and RTTY." QSL via N5FF (QRZ.com for details).

YM2, TURKEY. Pavel, OK1MU, will be active as YM2W during the CQWW WPX SSB Contest (March 28-29th) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via OK1TN, by the Bureau or direct.

ZM4, NEW ZEALAND. Operators Ken/ZL4NR, Mike/ZL4OL, Alan/ZL4FM, Kevin/ZL4QD and Chris/ZL1CT will be active as ZM4A during the CQWW WPX SSB Contest (March 28-29th) as a Multi-Single entry. QSL via ZL4AA.

The following stations are expected to be active in the
CQWW WPX SSB Contest (March 28-29th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 CQWW WPX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/wpxs2009.html (By callsign)

9385. Mellish Reef (sp)

Yahoo group: DX-IS (2009)
Date: 2009-03-27 19:37:25 UTC
From: Dale Cole K8TS
Topic: 9385 Message: 9385

From their website:

March 27, 0800 UTC, Mellish Reef. At 0600 UTC we have dropped anchor in the lagoon at Mellish Reef (well, OK, we lowered it gently, given our make-shift gear). We have ferried some gear ashore this evening and will complete the station and camp set-up tomorrow. We hope to be on the air by 0800 UTC, Mar 28. Now we just need a three week break from cyclones and some good propagation.

http://vk9gmw.com/

Dale K8TS

9386. ARLP013 Propagation de K7RA

Propagation Forecast Bulletin 13 ARLP013
>From Tad Cook, K7RA
Seattle, WA March 27, 2009
To all radio amateurs

SB PROP ARL ARLP013
ARLP013 Propagation de K7RA

Every day I check the 45 day forecast of planetary A index and solar flux from NOAA and the U.S. Air Force. For quite some time now, the solar flux forecast has been the same. The projection shows 45 days of solar flux at 70, with no variation. I look at this because there is so little sunspot activity, and I hope that any increase in predicted solar flux values may coincide with renewed sunspot activity. But this method hasn't worked out very well in the past year or so.

When I looked at this on Wednesday night, March 25, the 10.7 cm flux forecast showed 70 for March 26-27, then bumping up to 72 for March 28-31, then back to 70 for all of April and beyond. This is not much increase in activity, but with such a quiet Sun for the past few years, we become sensitive to small changes, and even optimistic at times.

Last night, Thursday, March 26 the prediction was nearly the same, except with the solar flux of 72 lasting two more days, through April 2.

The forecasts are via http://www.swpc.noaa.gov/ftpmenu/index.html, click on "Alerts, Forecasts and Summaries," then "USAF 45-day Ap and 10.7 cm Flux Forecasts." The new daily forecast is posted around 2100z, but often doesn't appear in the list at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html until later.

If you suspect this is the case, just click on the latest available date, then edit the URL at the top of your web browser to reflect the current date. So if it is Friday, March 27, and the latest listing you see is for March 26, just click on that link, and at the end of the URL change /032645DF.txt to /032745DF.txt and hit the Enter key. If that day's forecast has been uploaded, it should pop up when you hack the web address using these instructions.

Early on March 26 Spaceweather.com reported a new "proto-sunspot" seen "struggling to emerge" at high latitude, making it a Cycle 24 spot. The same site reported the Solar and Heliospheric Observatory (SOHO) is monitoring "intense activity on the Sun's northeastern limb."

The following day Spaceweather.com repeated a common refrain heard lately after some activity begins to emerge: "Yesterday's proto-sunspot failed to emerge. The Sun is blank."

The NASA STEREO (Solar TErrestrial RElations Observatory) mission will eventually enable views of the entire Sun, so we will know in advance about emerging solar activity that is outside Earth's view.

The two spacecraft orbit the Sun similar to earth, but one leads the Earth and the other follows. The leading spacecraft A travels faster than the trailing spacecraft B, and because of this the angle of the two relative to each other gradually increases over time.

The craft were launched October 26, 2006 and they reached quadrature, or 90 degrees separation 62 days ago on January 24, 2009. Spacecraft A takes 347 days to complete an orbit of the Sun, and spacecraft B takes 387 days. They separate from each other at a rate of about 44 degrees per year.

View their current positions relative to Earth, the Sun, Venus and Mercury updated hourly at http://stereo.gsfc.nasa.gov/where.shtml. Click on the STEREO Orbit Tool link, and you can view a similar image for any date and time from the launch date through the end of 2015.

NASA has a dense, single page pdf document describing the mission at http://stereo.gsfc.nasa.gov/img/mpb.pdf, and while we can't recommend Wikipedia as an always-reliable resource (its immediately changeable nature drives teachers and reference librarians crazy), the Wikipedia community seems to have a good information page on STEREO at http://en.wikipedia.org/wiki/STEREO. Other NASA resources are at http://stp.gsfc.nasa.gov/missions/stereo/stereo.htm and http://stereo.gsfc.nasa.gov/, and Johns Hopkins University Applied Physics Laboratory has information at http://stereo.jhuapl.edu/.

Currently USAF and NOAA predict a planetary A index of 8 for today, March 27, then leveling off at 5 (a very quiet, stable level) until April 9-10, when it jumps to 15, then 10. Geophysical Institute Prague predicts quiet to unsettled conditions March 27, quiet March 28-29, quiet to unsettled March 30-31, and back to quiet for April 1-2.

This weekend is the CQ World Wide WPX SSB Contest. Perhaps we'll get lucky with some worldwide propagation. The chance of disruption by any geomagnetic activity seems remote.

Finally, Kenneth Beck, WI7B of Kennewick, Washington responded to last week's musings about east and west on the Sun. Referencing an image at, http://www.enchantedlearning.com/subjects/astronomy/sun/rotation.shtml, he wrote, "It always seemed to me to be clearer when I realize that the Sun rotates around its axis in the same direction as the earth. The is the 'right-hand rule,' with your thumb pointing towards the 'north.' With that perspective, look up at the sky (you can stand, sit, or crawl on your knees for this thought experiment), hold up your right hand with the thumb pointing up to the sky, and then rotate it. Sunspots will travel in the direction of your fingers, counter-clockwise around your thumb."

He continues, "Better yet, hold a full mug of beer in your right hand and turn it. The bubbles in the beer will turn just like sunspots. Now drink!"

Thanks, Kenneth. If you look up his call on qrz.com, on his page you'll see Kenneth in a kilt, hunched over and ready to launch a Scottish Hammer, a Stone Put, or perhaps doubled over in pain after a manly contest of Caber Toss.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for March 19 through 25 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 69.1, 68.7, 70.1, 68.7, 68, 69.1, and 68.5 with a mean of 68.9. Estimated planetary A indices were 3, 4, 8, 4, 3, 8 and 10 with a mean of 5.7. Estimated mid-latitude A indices were 3, 2, 5, 4, 2, 6 and 7 with a mean of 4.1.

Hi guys,
I worked KS6DV on 7 Apr 1980 with a W6 as manager. In DXK it shows USA but I think it wasn't. I ran his call in QRZed and it came up as AH8LG, Pago Pago, American Samoa with former call of KS6DV. Could KS6 have been there?

Hi Rene,

From 1981 I have 2 QSO's with KS6DV that are American Samoa. So I guess yours were most likely too. Also KS6DH in 1970.

Hi Rene !
Yes, is the same person, KS6DV is the former call of AH8LG.
If You do a Google search of KS6DV, You will find a bunch of data on Larry.
And, You are correct, KS6 is the "pre" KH8 prefix slot.

Does anyone know if Amateur radio is still banned in
Turkmenistan? I seem to recall a few years ago they got a new
leader, and he put the brakes on Ham radio in EZ. Haven't heard if
this has changed or not.

Hi Paul,

Funny you should bring this up as I was thinking of this very topic myself tonight-the number of countries in which ham radio is banned. So far, the only ones I can think of are:

EZ
P5
XZ-I am not sure on this one but I think it is.

Any other countries on the list?

Hi John,

Well, I think it might as well be in 7O. I don't know that
Yemen ever came out and said the words "Amateur Radio is banned in
this country", but they might as well have. As far as I know, they
won't let nationals operate and they sure as heck don't seem to be
letting any visitors in. So I don't know . . . the three above for
sure and likely 7O.

I had forgotten about 7O. I am not sure where Somalia fits into this mix as there might not be any central government to authorize amateur operation but then there isn't one to ban it either.

I was thinking about the banned list as part of a thought about how much easier it is to get DXCC today than when I was first licensed in 1980. It should be easier because:

1. The DX cluster spots all the DX on the bands. You don't need to listen and tune near as much.
2. There are more DXCC entities today. There was 318 when I was first licensed. Now we have 20 more, including a few new ones in our backyard like P4 and FJ.
3. There are many fewer countries that don't allow or at least have any ham activity. In 1980 you weren't going to hear any signals out of: BY, ZA, XV, XU, 5A, C9, TZ, YA, and probably quite a few others I have forgotten about.
4. The DXpeditions are much better equiped today, so even average stations can work them on several bands (except for BS7 and T5-I never have any luck with those).

Good morning Gents:

For all practical purposes it is banned in E3 & ZL9. The tree huggers
will not allow it on ZL9, and anyone attempting to operate from E3 runs
the risk of waking up dead. I also wonder if there is a government in
E3 to grant permission or issue licenses.
